

The GFEBS Costing Sheet Repository

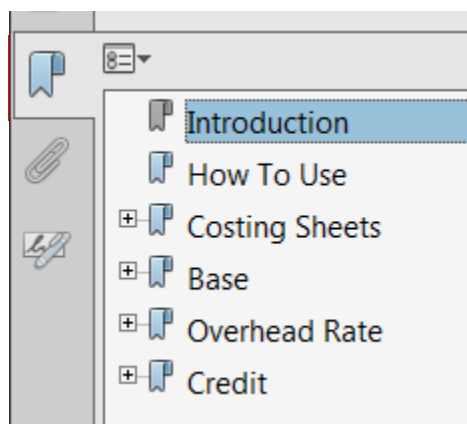

The Deputy Assistant Secretary of the Army – Cost & Economics (DASA-CE)

Introduction

Currently, GFEBS Costing Sheet creation and maintenance is centrally controlled by DASA-CE. In an effort to extend visibility beyond DASA-CE, GFEBS BI Reports were created to display both current and historic Costing Sheet information. Unfortunately, BI Reporting enhancements are needed in order to properly run and return desired Costing Sheet information via these BI Reports. To bridge this technological gap, a temporary solution was developed via this document, which is titled *The GFEBS Costing Sheet Repository*. This document provides the intended visibility of the BI Costing Sheet Reports. Until the BI Reporting enhancements can be completed and implemented, this document will be maintained and updated by DASA-CE and the GFEBS SSO team in order to provide the visibility that is required. This document serves as a temporary reference to view both current and historic Costing Sheet information.

How To Use

The primary purpose of this document is to provide change history for GFEBS Costing Sheet information. This audit trail is necessary to support and substantiate Costing Sheet Allocation Postings and is therefore referenced via audit documentation. While using the *Audit Sample Key Supporting Document Job Aid for GFEBS Costing Sheets* a user will be directed to this document to capture Costing Sheet screenshots needed to generate a complete Audit Sample KSD Packet for submission of a Costing Sheet Allocation Audit Sample.

For ease of use it is recommended that bookmarking navigation be used. Ensure the bookmarking navigation pane is open via selecting the bookmark icon. Navigate by expanding the bookmark you would like to view by selecting the appropriate heading: Costing Sheet, Base, Overhead Rate, or Credit. After selecting the appropriate heading and expanding the list, continue by selecting the item you wish to view. For ease of use, items are

arranged in alphabetical order under each heading. Once an item is selected, the document will scroll to the corresponding section allowing you to capture the necessary screenshots for inclusion in your Audit Sample KSD Packet for submission of a Costing Sheet Allocation Audit Sample.
