MILITARY CONSTRUCTION, ARMY

The military construction program for the active Army shown in the schedules of this title is summarized in the following tabulation:

<u>FISCAL YEAR</u>	<u>MILITARY CONSTRUCTION, ARMY APPROPRIATIONS (\$)</u>
2008	4,039,197,000
2007	2,059,762,000 *
2006	1,958,918,000

1. Major Construction. The MCA major construction program is one of the most visible means of improving the working and living conditions of the Army. This program provides for military construction projects in the United States and overseas as authorized in currently effective Military Construction Acts and in this year's request for Authorizations and Appropriations.

This request funds the Army's most critical facilities needs within the context of Transformation to Army Modular Force (AMF), moves associated with the Global Defense Posture Realignment (GDPR) and fiscal constraints. In the current year, investment is primarily directed toward facilities required for Soldiers as our Centerpiece, Current Readiness, and Army Modular Force, such as troop housing, Brigade Combat Teams, and training ranges, along with construction necessary for environmental, recapitalization, and mission essential requirements.

2. Minor Construction. Provision is made for construction of future unspecified projects that have not been individually authorized by law but are determined to be urgent requirements and do not cost more than the amounts specified in 10 USC 2805. Projects awarded with these funds may not exceed \$1.5 million, or \$3.0 million if there is a threat to life, health, or safety.

3. Planning & Design. This provides for necessary planning of military construction projects including design, host nation support, standards, surveys, studies, and other related activities. In general, design funds requested in fiscal year 2008 will be used to design projects in the Army's Fiscal Years 2009 and 2010 programs.

* Note: This is the Army's FY2007 President's Budget requested amount rather than appropriated amount. The FY2007 MCA Appropriation has not yet been enacted.

Department of Defense

MILITARY CONSTRUCTION, ARMY

Fiscal Year 2008

MILITARY CONSTRUCTION, ARMY

For acquisition, construction, installation, and equipment of temporary or permanent public works, military installations, facilities, and real property for the Army as currently authorized by law, including personnel in the Army Corps of Engineers and other personal services necessary for the purposes of this appropriation, and for construction and operation of facilities in support of the functions of the Commander in Chief, \$4,039,197,000, to remain available until September 30, 2012: Provided, that of this amount, not to exceed \$481,468,000 shall be available for study, planning, design, architect and engineer services, and host nation support, as authorized by law, unless the Secretary of Defense determines that additional obligations are necessary for such purposes and notifies the Committees on Appropriations of both Houses of Congress of the determination and the reasons therefore.

Items of Interest - Authorizing Committees

Conference Report 109-702 on the FY07 National Defense Authorization Act

Safety-Critical Projects.

On page 430 (of the House Report 109-452), the committee encouraged the Army to ensure that construction projects that are necessary to eliminate safety hazards to personnel receive priority funding in the Future Years Defense Program (FYDP). As such, the committee urged the Army to accelerate projects, such as the programmed effort to address safety hazards at the Advanced Training Support Center at Fort Eustis, Virginia, within the next FYDP. This project is programmed in FY 2010 in the FYDP.

Planning and Design.

On page 430 (of the House Report 109-452) and on page 457 (of the Senate Report 109-254) the Conferees directed the Army to accomplish design for the following projects.

Planning & Design				
State	Location	Project	\$000	Status
The House (Report 109-452; p. 430 & 437) directed that funds for <u>Planning and Design</u> be expended for the following active Army projects, and to include in the next FYDP the two projects below marked by an asterisk (*). The Army could not include these projects in the FYDP due to affordability.				
Arizona	Yuma PG	* Special Operations Free Fall Simulator	365	Design to begin in Jan 2007
Utah	Dugway PG	* Community Dining Facility	243	Design to begin in Jan 2007
Virginia	NGIC, Charlottesville	Sensitive Compartmented Information Facility	1,260	Advertise design-build in Mar 2007
The Senate (Report 109-254; p. 457, 458) directed that funds for <u>Planning and Design</u> be expended for the following active Army projects:				
Virginia	Fort A.P. Hill	Joint Asymmetrical Warfare Group Headquarters	1,000	Under design, Request for Proposal complete Feb 2007
Nevada	Hawthorne AD	Ground Water Treatment System	500	10% design complete by end of Jan 2007

Unspecified Minor Military Construction.

On page 430 (of the House Report 109-452) the Conferees directed the Army to accomplish the following project using unspecified Minor Military Construction funds. Award of this project is planned for 4th quarter, fiscal year 2007.

Unspecified Minor Construction				
State	Location	Project	\$000	Status
The House (Report 109-452; p. 430) directed that funds for UMMCA be expended for the following active Army project:				
Georgia	Fort Benning	Combat Pistol Qualifications Course	930	Design initiated in Aug 2006

Items of Interest - Appropriating Committees

House Appropriations Committee Report #109-464

Reducing Overhead for Army Military Construction Projects

On page 22, the Committee directed the Army to provide a status report, by October 2, 2006, on efforts to reduce design and overhead costs on military construction projects through the increased use of standard designs and changes in Supervision, Inspection and Overhead (SIOH) practices. This report is being developed and will be provided to the Committee when it is completed.

Planning and Design.

On page 22 (of the House Report 109-464) and on page 12 (of the Senate Report 109-286) the Conferees directed the Army to accomplish design for the following projects.

Planning and Design				
State	Location	Project	\$000	Status
The House (Report 109-464; p. 22) directed that funds for <u>Planning and Design</u> be expended for the following active Army projects:				
Arizona	Yuma PG	Special Operations Free Fall Simulator	365	Design to begin Jan 2007
Utah	Dugway PG	Community Dining Facility	243	Design to begin Jan 2007
Virginia	NGIC, Charlottesville	Sensitive Compartmented Information Facility	1,260	Advertise design-build Mar 2007
The Senate (Report 109-286; p. 12, 13) directed that funds be expended for <u>Planning and Design</u> of the following active Army projects:				
Texas	Red River AD	Body Repair Building (and include in FY08)	500	75% design complete
Alaska	Fort Richardson	Regional NCO Academy	1,300	Authorized for design Jan 2007

Unspecified Minor Military Construction.

On page 22 (of the House Report 109-464) the Conferees directed the Army to accomplish the following project using unspecified Minor Military Construction funds. Award of this project is planned for 4th quarter, fiscal year 2007.

Unspecified Minor Military Construction				
State	Location	Project	\$000	Status
The House (Report 109-464; p. 22) directed that funds be expended for <u>Unspecified Minor Military Construction</u> of the following project.				
Georgia	Fort Benning	Combat Pistol Qualification Course	930	Design initiated Aug 2006
The Senate (Report 109-286; p. 12, 13) directed that funds be expended for <u>Planning and Design</u> of the following active Army projects:				
Washington	Fort Lewis	General Instruction Building	1,500	Design initiated Aug 2006
Florida	Camp Rudder	Multifunction Center	1,450	Design initiated Aug 2006
Nevada	Hawthorne AD	Railroad Line Spur	1,400	Design initiated Aug 2006

Military Construction Army
FY 2008 BUDGET ESTIMATE

PROGRAM ASSESSMENT RATING TOOL

In accordance with the President's Management Agenda, Budget and Performance Integration initiative, this program has been assessed using the Program Assessment Rating Tool (PART). Remarks regarding program performance and plans for performance improvement can be located at the Expectmore.gov website. The MILCON PART received high scores for purpose and planning. See Exhibit on the next page for a summary of MILCON PART rating and improvement plans.

ExpectMore.gov

EXPECT FEDERAL PROGRAMS TO PERFORM WELL, AND BETTER EVERY YEAR.

Program Assessment

Military Construction Programs

Program

[View Assessment Details](#)

The Department of Defense (DoD) Military Construction program provides capital assets necessary to support our military forces. The program is flexible and disciplined to respond to emerging operational, weapon system, and other special program real property requirements on military installations.

Rating

[What This Rating Means](#)

PERFORMING
 ★★ **Moderately Effective**

- **DoD has developed a long-term strategic plan to manage its capital assets.** The plan will help improve its business practices, by incorporating performance measurements, process efficiencies, and life-cycle cost analyses in decision-making.
- **The program is decentralized.** DoD headquarters provides program oversight; Military Departments provide program development; and designated construction agents execute the project.
- **A key performance measure is the facilities recapitalization metric.** The metric helps DoD to evaluate adequacy of corporate-level capital investments by using economic assessments and estimated service life for each facility.

Improvement Plan

[About Improvement Plans](#)

We are taking the following actions to improve the performance of the program:

- Implementing a Facilities Modernization Model to improve the facilities recapitalization metric and in addition, improve the Quality rating and process for assessing facility conditions.
- Reviewing the current construction agent customer surveys to develop a DoD Customer Satisfaction performance measure for the Military Construction Program.
- Developing performance measures: 1) evaluate project cost variation between budget documentation and awarded contract and 2) assess the reasonableness of construction duration.

10.Description of Proposed Construction Construct an Industrial Wastewater Treatment Plant (IWTP). Project includes the wastewater treatment plant and the pre-treatment facilities. Interior building information systems will be provided. An administrative facility will include office(s), break room, shower and locker area, chemical storage, laboratory, maintenance workshop, and/or storage areas. Supporting facilities include connections to all necessary utilities, pavements, curbs and gutters, site work and connections to exterior information systems. Access for individuals with disabilities will be provided in public areas.						
11. REQ:	3,028 L/d ADQT:	NONE	SUBSTD:	1,514 L/d		
PROJECT: Construct an Industrial Wastewater Treatment Plant (IWTP). (Current Mission)						
REQUIREMENT: This project is required to upgrade the industrial wastewater treatment operations for increased capacity and efficiency while meeting current and near term environmental compliance requirements. Anniston Army Depot (ANAD) will require a renewal and modification to the current industrial wastewater permit granted by the Alabama Department of Environmental Management (ADEM) in August 2007. The facility is subject to 40 CFR Part 433,						

1. COMPONENT ARMY	FY 2008 MILITARY CONSTRUCTION PROJECT DATA	2. DATE 26 JAN 2007
3. INSTALLATION AND LOCATION Anniston Army Depot, Alabama		
4. PROJECT TITLE Industrial Waste Water Treatment Plant	5. PROJECT NUMBER 27259	
<p><u>REQUIREMENT:</u> (CONTINUED)</p> <p>Federal Standards for Metal Finishing. ADEM will require ANAD to meet more stringent standards upon the effective date of renewal of the current permit. The IWTP is currently not capable of meeting the anticipated new limits for total suspended solids (TSS), pH, and modified metals limits. The site identified for this project is adjacent to the ANAD Sewage Treatment Plant (STP) in the Nichols Industrial Complex (NIC). This location provides efficiency gains by being collocated with the current STP and will allow cross training of personnel at both the new IWTP and current STP. A portion of the existing IWTP will be retained for pretreatment of waste from the existing NIC production facilities. Approximately eighty percent of the existing IWTP will be demolished.</p> <p><u>CURRENT SITUATION:</u> ANAD's National Pollution Discharge Elimination System (NPDES) permit does not conform to existing Federal/State (F/S) water regulations, which ADEM will enforce when the permit is opened for modification and/or reissuance. ANAD needs to modify its permit in order to add a new discharge from its new Power Train Engine Repair Facility. The IWTP currently does not meet Federal standards for the treatment of Metal Finishing wastewater. Constructed in 1976, the current IWTP has reached the end of its service life. The majority of the equipment is outdated and replacement parts are no longer available. Only a few components such as the equalization basins and several lagoons are in reasonably good condition. Without continuous oversight and manual adjustments, the IWTP cannot meet future NPDES permit discharge requirements. The current IWTP critical equipment is in poor condition and in many cases is failing. The automatic control system installed when the plant was first constructed is no longer functional. Without continuous oversight and manual adjustments, provided by skilled plant operators, the IWTP cannot meet future NPDES permit discharge requirements. As a result of high pH, calcium content, and excessive flows, the STP often is unable to function as designed. On peak days, the combined IWTP and general sewage flow exceeds the 620,000 gpd original design capacity of the aging STP. This issue results in STP overflows, which are unpermitted discharges and are violations of ANAD's current NPDES permit. Upon construction of a new IWTP, the effluent from the IWTP will bypass the current STP which will solve the existing overflow conditions and should extend its useful life. This will also improve biological treatment processes at the STP, eliminate overflows, reduce the risk of future noncompliance issues, and reduce solid waste generation.</p> <p><u>IMPACT IF NOT PROVIDED:</u> If this project is not provided, when the new permit requirements go into effect, the current IWTP will be in noncompliance and subject to an Administrative Order from Federal and State regulators and/or citizen law suits. Without this project, noncompliance could then subject ANAD to enforcement actions by F/S regulators resulting in stipulated penalties. Future noncompliance could also result in citizen law suits under the Clean Water Act.</p> <p><u>ADDITIONAL:</u> In the event that a utility system is privatized (under 10 USC</p>

 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.

10.Description of Proposed Construction Replace substation and upgrade power capacity and distribution. Work will consist of adding and replacing transformers, modernizing and replacing all switchgear and protective devices, modernizing generator control system to incorporate current state-of-the-art controls and monitoring, and installing standby generation to provide the Central Heat and Power Plant (CHPP) with a "black-start" capability. Upgrade the Fort Wainwright power distribution and breaker system by adding looping capability and replacing selected distribution feeders. The power distribution system consists of poles, fixtures, guys/anchors, overhead and underground conductors, street lighting (poles, circuits, and fixtures); transformers, and the distribution switchgear in the CHPP. The critical electric equipment of the CHPP system consists of the generator switchgear, generator controls, and the substation tie with the local utility. Supporting facilities include site improvements.						
11. REQ:		9,144 m	ADQT: NONE		SUBSTD:	2,286 m
PROJECT: Replace substation and upgrade power capacity and distribution. (Current Mission)						

1. COMPONENT ARMY	FY 2008 MILITARY CONSTRUCTION PROJECT DATA	2. DATE 26 JAN 2007
3. INSTALLATION AND LOCATION Fort Wainwright, Alaska		
4. PROJECT TITLE Replace Substation/Upgrade Electric	5. PROJECT NUMBER 61238	
<p><u>REQUIREMENT:</u> The work is required to meet increasing electrical demand due to transformation of Army units at Ft Wainwright. Existing capacity will be exceeded in 2010 upon completion of all construction for these units and this work is critical to meet that demand.</p> <p><u>CURRENT SITUATION:</u> Fort Wainwright has a connection to the local utility at the CHPP substation that provides a portion of the Ft Wainwright electric load. The existing system was installed in 1953 and rebuilt in the late 1960's. Since the initial installation, there has been no upgrade to the capacity. The system is currently operating close to capacity. Potential loss of power from the local utility and resultant CHPP overload/shutdown creates a high potential for total electric power and heat failure for the Installation. Standby generation is required to provide the CHPP with a "black-start" capability to bring the plant back on-line in such an emergency and to offset loss of local utility power.</p> <p><u>IMPACT IF NOT PROVIDED:</u> If this project is not provided, current construction and future developments on Fort Wainwright will be impacted by the lack of available power from the Central Heating and Power Plant. If the system should be overloaded and cause a long term power outage during the winter months the post infrastructure will be severely damaged causing millions of dollars in replacement costs and possible evacuation of the post.</p> <p><u>ADDITIONAL:</u> In the event that the electric utility system is privatized (per 10 USC 2688), contracting for construction of the utility infrastructure with the utility privatization contractor involved is authorized using other than full and open competition. MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for construction of the utility infrastructure. Title to utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. This project has been coordinated with the installation physical security plan, and all physical security measures are included. No antiterrorism protection measures are required. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. 10. Description of Proposed Construction Construct a standard design (duplex) company operations facility to include an enclosed laydown area, installation of an intrusion detection system, connection to the Energy Monitoring and Control System (EMCS), local area network connections and antiterrorism (AT) measures. Supporting facilities include site utilities, fire alarm and protection system, paving, site improvements, storm drainage, information systems, and Anti-Terrorism (AT) measures. Heat furnished by central plant. Comprehensive building and furnishings related to interior design services are required. Access for persons with disabilities will be provided in public areas. Air Conditioning (Estimated 373 kW/106 Tons).					
11. REQ: 72,269 m2 ADQT: 38,699 m2 SUBSTD: NONE					
PROJECT: Construct a standard design (duplex) company operations facility. (Current Mission)					
REQUIREMENT: This project is required to provide adequate permanent facilities for company operations, relocating this operation out of the barracks facility.					

1. COMPONENT ARMY	FY 2008 MILITARY CONSTRUCTION PROJECT DATA	2. DATE 26 JAN 2007
--------------------------	--	----------------------------

3. INSTALLATION AND LOCATION

Fort Wainwright, Alaska

4. PROJECT TITLE Company Operations Facility	5. PROJECT NUMBER 66835
---	--------------------------------

CURRENT SITUATION: Operational facilities located within existing barracks are too small and adversely impact company operations. Sufficient space does not exist to support all proposed elements of the Stryker Brigade Combat Team (SBCT) and Aviation Task Force (ATF).

ADDITIONAL: In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.

10.Description of Proposed Construction Construct an effluent transport system. Primary facility includes 40,000 linear feet of forced main, three effluent lift stations, and associated control and data systems. Supporting facilities include site improvements and utilities.						
11. REQ: 12,192 m ADQT: NONE SUBSTD: NONE						
PROJECT: Construct a forced effluent main line and effluent lift stations. (Current Mission)						
REQUIREMENT: This project is required to implement the Fort Huachuca Water Resources Management Plan in support of the August 2002 Biological Opinion for Endangered Species Act (ESA) compliance. The installation must achieve zero-balance direct impact on the regional aquifer by 2007, and zero-balance indirect regional impact by 2011. The project will convey additional effluent to the installation treatment plan. The treated water will augment existing supplies for reuse, or for recharge when reuse is not necessary. This project will slow the annual drawdown on the aquifer and potentially benefit stream flow in the San Pedro River adjacent to Fort Huachuca. The San Pedro Riparian National Conservation Area (SPRNCA) is a critical habitat area for several federally listed species.						

1. COMPONENT ARMY	FY 2008 MILITARY CONSTRUCTION PROJECT DATA	2. DATE 26 JAN 2007
--------------------------	--	----------------------------

3. INSTALLATION AND LOCATION

Fort Huachuca, Arizona

4. PROJECT TITLE Effluent Reuse System	5. PROJECT NUMBER 68458
---	--------------------------------

CURRENT SITUATION: Currently the installation's treatment, recharge, and reuse facilities have additional capacity. Huachuca City's effluent treatment lagoons are located immediately adjacent to the installation boundary. Effluent that would be conveyed to the installation's treatment system by this project is currently conveyed to evaporation ponds north of the installation where it cannot benefit the designated critical habitat in the SPRNCA. In addition, storms currently cause the effluent in the lagoons to enter the SPRNCA, creating a water quality problem.

IMPACT IF NOT PROVIDED: If this project is not provided, Fort Huachuca will have to find an alternate source of approximately 200 acre-feet of water per year to reach the goal of having zero impact on the regional aquifer. Because imported water (such as from the Colorado or Rio Grande Rivers) is not available in this region, and most other potential water harvesting measures have been taken into account, a more exotic or expensive method would be required to substitute for this project to meet Endangered Species Act/Biological Opinion terms and conditions. The Upper San Pedro Partnership, a regional water management organization comprised of 20 State, federal, and non-governmental members, identified this project as a potential major contribution to the installations's goals.

ADDITIONAL: In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.

10.Description of Proposed Construction Construct Phase 2 of a four-phase program for a large Military Operations Urban Terrain (MOUT) complex. Phase 2 primary facilities include: prison compound, university building, business buildings, training roads, downrange electrical power, building information systems, range operations, After Action Review (AAR) building, AAR access road and latrine. Supporting facilities include electrical power and communications. Targetry and instrumentation systems will be funded by Other Procurement, Army (OPA) appropriations. Air Conditioning (Estimated 35 kW _r /10 Tons).						
11. REQ:	1 EA	ADQT:	NONE	SUBSTD:	NONE	
PROJECT: Construct Phase 2 of a modified standard, large Military Operations Urban Terrain (MOUT) complex. (Current Mission)						
REQUIREMENT: This project is required for the training of Active Army, National Guard, Army Reserve, and other service personnel in the techniques of fighting within towns and cities at the brigade level. It is capable of training combat personnel equipped as light infantry, with medium weight vehicles, or with heavy armor. Facilities will support training for the ten brigade rotations that train annually at the National Training Center. Use of these facilities by home station units, Army Reserve and National Guard units						

1. COMPONENT ARMY	FY 2008 MILITARY CONSTRUCTION PROJECT DATA	2. DATE 26 JAN 2007
3. INSTALLATION AND LOCATION Fort Irwin, California		
4. PROJECT TITLE Military Operations Urban Terrain, Ph 2	5. PROJECT NUMBER 60241	
<p><u>REQUIREMENT:</u> (CONTINUED)</p> <p>can be expected during non-rotational periods. Facilities also meet the joint goal of a large urban training facility and will be used during Joint National Training Center (JNTC) rotations. The training facilities meet the doctrinal requirements for training brigades and battalions in urban operations combat skills. Brigade Combat Teams (BCT) gain critical urban operations skills prior to deployment to theaters of operations. Heavy BCTs must be exposed to as realistic as possible urban threat conditions prior to insertion into hostile environments. This training complex supports that training.</p> <p><u>CURRENT SITUATION:</u> Military Operations Urban Terrain (MOUT) training is currently conducted using makeshift mobile MOUT facilities. These facilities do not provide the necessary building types or sizes to adequately train Battalion task force and higher units. Realistic training is severely hampered because the sites will not support units greater than a company size, integrating pyrotechnics, or armored vehicles. There are no other facilities available to support the specialized needs of this requirement.</p> <p><u>IMPACT IF NOT PROVIDED:</u> If this project is not provided, Fort Irwin will be unable to provide realistic urban operations warfare training to soldiers of the Army and other uniformed service members and Federal Agencies. Lack of current doctrinal training facilities impacts ongoing Army Transformation and ultimately on force readiness. Required brigade training will continue to not be met.</p> <p><u>ADDITIONAL:</u> In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. This project has been coordinated with the installation physical security plan, and no physical security measures are required. No antiterrorism protection measures are required. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.</p>

<p><u>REQUIREMENT:</u> (CONTINUED)</p> <p>conduct of Force-on-Force exercises with Rotational Task Forces. It provides more realistic zones of operation and supports establishment of normal combat lines of communication. Project provides a new road for tactical vehicles to directly access training zones through current GOLDSTONE operational areas; upgrading unimproved trails to support civilian traffic for by-pass access to existing federal and state owned lands, and safety protection closure of existing mine areas.</p> <p><u>CURRENT SITUATION:</u> At present, 350,304 acres of the recommended maneuver acreage is available for training of Rotational Troops at Fort Irwin. Due to terrain configurations, the NTC is restricted to a single East-West corridor for the conduct of Force-on-Force Rotational Task Forces. Constant use of the East-West corridor has resulted in the familiarity of land by rotational units and deterioration of terrain features. Terrain restrictions preclude both realistic re-supply activities and the emplacement of supply and staging areas at realistic distances from maneuver areas to provide for a true evaluation of resupply activities. Due to the current lack of appropriate width within existing training corridors in the Force-on-Force areas, severe restrictions are placed on the ability of a unit to maneuver, or opportunities for a battalion to participate in an envelopment or turning movement. Currently 294,427 acres of land are listed as non-maneuverable.</p> <p><u>IMPACT IF NOT PROVIDED:</u> If this project is not provided, the available trafficable terrain will not be large enough to provide maneuver area for a modern, combat heavy, brigade combat team. The effectiveness of the NTC as a tough, realistic training environment must be maintained to keep pace with the growing complexity of modern warfare weapon systems.</p> <p><u>ADDITIONAL:</u> This project has been coordinated with the installation physical security plan, and no physical security measures are required. No antiterrorism protection measures are required. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.</p>

10. Description of Proposed Construction Construct a modified standard-design General Instruction Building to include an elevator, antiterrorism measures and building information systems and fire protection and alarm systems. Supporting facilities include all utilities and mechanical systems support, paving, walks, curbs and gutters, storm drainage, information/network support systems, and site improvements. Access for persons with disabilities will be provided. Antiterrorism (AT) measures include laminated glazing, pressure rated doors, mass notification system and site limiting landscaping features. Heating and air conditioning will be provided by self contained systems. Project will include comprehensive building and furnishings related interior design services. Air Conditioning (Estimated 1,759 kWr/500 Tons).						
11. REQ: 77,909 m2 ADQT: 37,882 m2 SUBSTD: 16,842 m2 PROJECT: Construct a modified standard design General Instruction Building. (Current Mission) REQUIREMENT: The Defense Language Institute Foreign Language Center (DLIFLC) is transforming language instruction to increase proficiency requirements of the Combatant Commands (COCOMs), Services and National Security Agency (NSA). As a result of increasing requirements, DLIFLC will experience a 40% increase						

1. COMPONENT ARMY	FY 2008 MILITARY CONSTRUCTION PROJECT DATA	2. DATE 26 JAN 2007
3. INSTALLATION AND LOCATION Presidio of Monterey, California		
4. PROJECT TITLE General Instruction Building	5. PROJECT NUMBER 60269	
<p><u>REQUIREMENT:</u> (CONTINUED)</p> <p>in student population projections by FY 2010. Additionally, the Secretary of Defense directed DLIFLC to increase the proficiency of linguists based on needs assessments from the Combatant Commands (COCOMs), Services, and NSA. To meet these needs, DLIFLC initiated a program to reduce the students per classroom. This reduction will improve student-to-instructor ratios, and ultimately enhance reading, listening, and speaking proficiency of our linguists. The total growth for staff and faculty by FY10, will be approximately 600 new employees. Transforming current practice and incorporating significant growth will require a sizable expansion of offices and classrooms, yielding an increase in classroom requirements by nearly 200 additional classrooms over the next 5 years.</p> <p><u>CURRENT SITUATION:</u> Language instruction and faculty and support offices are housed in substandard, converted barracks buildings that lack adequate amenities. Many of the structures date from 1903. Present facilities do not provide the adequate classroom and staff/faculty office space necessary for intensive learning activities. DLIFLC schools and support functions are widely separated across the Presidio of Monterey. This situation prevents the consolidation of activities and leads to logistical and management span of control problems in both classrooms and support offices. Increases in language requirements have required temporary leasing of classrooms off-post.</p> <p><u>IMPACT IF NOT PROVIDED:</u> If this project is not provided, the ability of the DLIFLC to raise language proficiency will be at risk. The lack of additional classrooms will prevent reduction of student-to-instructor ratio which is the most critical cornerstone of DLIFLC's 5-year transformation plan. This continued shortage of space will severely limit language curriculum, evaluation, and faculty development. DLIFLC will continue to attempt less than desirable temporary measures unlikely to meet the desired language proficiency in accordance with the Secretary of Defense's directives.</p> <p><u>ADDITIONAL:</u> In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. An economic analysis has been prepared and utilized in evaluating this project. This project is the most cost-effective method to satisfy the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be</p>

10. Description of Proposed Construction						
Finance design, right-of-way, and construction of: new off-installation entrances to Army activities; urgently needed improvements of existing highways serving Army activities; the Federal Government share of the cost of relocating highways severed by expansion or construction of new Army facilities; and alterations to roads near Army activities to accommodate special military vehicles. Funds provided will be transferred to the Federal Highway Administration of the Department of Transportation, which is responsible under Title 23 USC 210 for assuring proper execution of the work. This project is to construct 1.5 miles paved roads, on City of Colorado Springs property, to connect Drennan Road and Powers Boulevard to the Fort Carson Arrival/Departure Air Control Group (A/DACG) Complex on Peterson Air Force Base. The project supports the movement of M1 Battle Tanks between Fort Carson and the new A/DACG facility and \$1M for design/ construction of other minor Defense Access Road (DAR) projects at other Army installations.						
11. REQ: 2,414 m ADQT: NONE SUBSTD: NONE						
PROJECT: Construct 1.5 miles of paved road to connect the existing public highway network with the A/DACG facility. (Current Mission)						

1. COMPONENT ARMY	FY 2008 MILITARY CONSTRUCTION PROJECT DATA	2. DATE 26 JAN 2007
--------------------------	--	----------------------------

3. INSTALLATION AND LOCATION

Fort Carson, Colorado

4. PROJECT TITLE Defense Access Road	5. PROJECT NUMBER 61573
---	--------------------------------

REQUIREMENT: This project is an essential part of a total effort to construct a new Arrival/Departure Air Control Group (A/DACG) Complex on Peterson Air Force Base (AFB), Colorado. This project separates the Defense Access Road (DAR) Program roads from the total two-phase effort PN 52183 (FY06) and PN 58087 (FY07) to construct the A/DACG. The A/DACG Complex is required to enable Fort Carson to deploy an Initial Ready Company of personnel, equipment and material within 24 hours of notification. The A/DACG activities require that M1 tanks, on Heavy Equipment transporters, travel on existing public roads and new roads across property of the City of Colorado Springs in order to reach the A/DACG Complex. This project will construct 1.5 miles of paved roads to provide direct access to the new A/DACG Complex. No other access is currently available.

CURRENT SITUATION: Fort Carson currently utilizes an improvised A/DACG in the main cantonment area of Peterson AFB. The current complex does not have the capability to efficiently deploy the Initial Ready Company. Further, it requires that the Heavy Equipment Transporters, carrying the M1 tanks, travel through heavily populated and congested areas.

IMPACT IF NOT PROVIDED: If this project is not provided, essential roadways, constructed through the Defense Access Road (DAR) Program, will not be available to access the new A/DACG Complex for Fort Carson.

ADDITIONAL: This project has been coordinated with the installation physical security plan, and no physical security measures are required. No antiterrorism protection measures are required.

10.Description of Proposed Construction Construct a Joint Personal Effects Depot. Project includes the personnel effects depot, the replacement of an existing recreation facility within the footprint of this project, antiterrorism measures, building information systems, security, and cooling. Project will provide for installation of Intrusion Detection System (IDS) and connection to Energy Monitoring and Control System (EMCS). Supporting facilities include: utility connections, paving, parking, walkways, storm drainage, site improvements, and information systems. Access for individuals with disabilities will be provided in public areas. Demolish 1 Building (TOTAL 1,390 m2/14,957 SF). Air Conditioning (Estimated 264 kWr/75 Tons).						
11. REQ:		5,477 m2	ADQT: NONE		SUBSTD: NONE	NONE
PROJECT: Construct a Joint Personal Effects Depot. (Current Mission)						
REQUIREMENT: The Joint Personal Effects Depot was activated in September 2001 in response to the events of 9/11. Originally located at Fort Myer, VA, the Depot processed the personal effects of those service members and civilians who were wounded or killed at the Pentagon. In March 2003, the Depot was relocated to Aberdeen Proving Ground, Maryland, where the mission focused on processing the personal effects for those Soldiers, Sailors, Marines,

 Dover Air Force Base, Delaware

4. PROJECT TITLE	5. PROJECT NUMBER
Joint Personal Effects Depot	66005

REQUIREMENT: (CONTINUED)
 Airmen, and DOD civilians who had been wounded or killed in action as a result of the Global War on Terror. Consolidation of mortuary affairs and personal effects depot at Dover Air Force Base is needed to enhance operations and provide appropriate care of soldiers' remains and effects.

CURRENT SITUATION: The Depot is currently operating out of 2 WWII era buildings and do not meet the minimum operating standards for this mission. The buildings, which were vacant warehouses, were reconfigured to process personal effects. The facilities have exceeded their physical capacity to meet this mission. There is inadequate ventilation, heating, air conditioning, water supply, and lighting, and there is inadequate space and security to perform the mission. The required facility maintenance directly impacts the ability to perform the daily mission.

IMPACT IF NOT PROVIDED: If this project is not provided, JPED personnel will be unable to process the personal effects in a timely and efficient manner with the dignity, reverence and respect due our fallen service members and their families.

ADDITIONAL: In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.

10.Description of Proposed Construction This project is Phase 2 of a 3-phase project. Phase 1 (PN 65216) was funded in FY07 and Phase 3 (PN 64990) is planned for FY 2009. Construct a modified standard-design Complex for two Special Forces Battalions. The primary facilities include Battalion Operations Facilities with special compartment information system facility (SCIF), Unaccompanied Enlisted Personnel Housing, Vehicle Maintenance Shops, Oil Storage Building, Organizational Vehicle Parking, Waste Water Treatment Plant addition, and Deployment Equipment Storage buildings. Install Intrusion detection Systems, Fire detection and suppression, surveillance, access control, secure communications, energy monitoring and control systems connections to installation central systems. The Battalion Operations Facilities will be provided with emergency standby power generators. Supporting facilities include site-work, all necessary utilities, lighting, information systems, protected distribution system for classified communications, parking, walks, roads, curbs and gutters, storm drainage, site accessories, landscaping and other site improvements. Force protection measures include building access control, surveillance, and mass notification systems, minimum standoff distances, elevated air intakes, and laminated glass for windows and doors. Access for individuals with disabilities will be provided in public areas.

DESCRIPTION OF PROPOSED CONSTRUCTION: (CONTINUED)
Heating and air conditioning will be provided by self contained systems. Comprehensive building and furnishings related interior design are required. Air Conditioning (Estimated 4,220 kW/1,200 Tons).

11. REQ: 22,305 m2 ADQT: NONE SUBSTD: NONE
PROJECT: Construct a modified standard design complex for two Special Forces Battalions. (Current Mission)
REQUIREMENT: This project is required to support the realignment of two battalions of the 7th Special Forces Group (Airborne) (SFG(A)) at Eglin Air Force Base, FL. This realignment will result in force structure growth for the unit.
CURRENT SITUATION: Eglin AFB does not have adequate permanent facilities to support the two battalions or to provide for other operational requirements of the 7th SFG(A).
IMPACT IF NOT PROVIDED: If this project is not provided, the units would be severely limited in the functions associated with day-to-day planning and coordination required to meet its real-world, sensitive, and urgent National Security Missions.
ADDITIONAL: In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. 11. REQ: 47,942 m2 ADQT: NONE SUBSTD: 25,084 m2

PROJECT: Construct a joint/coalition/interagency headquarters complex for US Southern Command (USSOUTHCOM). (Current Mission)

REQUIREMENT: This project is required to provide a mission capable facilities to replace multiple leased facilities scattered around the Miami, Florida metropolitan area. A consolidated facility capable of supporting over 2,800 active, reserve and civilian personnel is critical to enhancing SOUTHCOM's global joint and interagency operations, and provide a strong collaborative setting instilling security cooperation to achieve U.S. strategic objectives within the 32 countries in their Area of Responsibility. Funded from other appropriations and projects, commissary, Army Air Force Exchange Services (AAFES) and credit union service facilities are also required and should be collocated with the proposed SOUTHCOM Complex.

CURRENT SITUATION: SOUTHCOM currently occupies nine separate leased facilities in Miami, Florida. High cost leases, set to expire in two years, do not provide adequate space, functional, force protection, or other minimal criteria. Commonly, up to 3 persons occupy space designed for 1 person. The greater urban Miami area can support only extremely limited secure conference and multi-purpose meeting space for coalition and interagency needs. Additionally, personnel support services for physical fitness, medical, commissary and child care services are also severely limited or non-existent. Lack of government controlled conference space (up to 200 major conferences

<p><u>CURRENT SITUATION:</u> (CONTINUED)</p> <p>per year with more than 150 persons) continues to subject international dignitaries, ministers, and high level defense department members to continued exposure to possible attack moving to and from the leased facilities.</p> <p><u>IMPACT IF NOT PROVIDED:</u> If this project is not provided, inefficiencies of staff dispersal and the continuation of expensive leases will continue. Risk to not only employees, but distinguished international visitors, staffs and U.S. leaders will continue. Anticipated staff increases in 2010 will exacerbate space shortages and lease issues likely impacting mission accomplishment. Makeshift retrofits in existing leased buildings to incorporate evolving communication and automated technologies, will continue to lag and impact the collaborative processes.</p> <p><u>ADDITIONAL:</u> In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. 10.Description of Proposed Construction This is Phase 1 of a three-phase project. Phase 2 is PN 51256 and Phase 3 is PN 67419 which are planned for future years. Construct a Reception Station and Processing Center. This phase will include the reception station, processing center, dining facility, soldier community building, general purpose storage building, central energy plant, and a lighted multi-purpose athletic field with a quarter-mile running track and associated physical training area. Project will provide IDS installation, connection to EMCS, antiterrorism measures and building information systems. Supporting facilities include site preparation; water, sanitary sewer, and natural gas connections and underground electrical distribution; grading, removal and replacement of unsuitable soil, landscaping with irrigation, paving, walks, curbs and gutters; additions to the storm drainage system; connections and enclosures; wetlands mitigation; and information systems. Antiterrorism (AT) standards will be met by providing resistance to progressive collapse, special windows and doors, mass notification system and site measures. Access for individuals with disabilities will be provided in public areas. Heating and air-conditioning will be provided by a central energy plant. Comprehensive building and furnishings relate interior design services are required. Air Conditioning (Estimated 1,143 kW/325 Tons).

11. REQ: 2,312 PN ADQT: 660 PN SUBSTD: 1,652 PN
PROJECT: Construct a Reception Station and Processing Center, Phase 1.
(Current Mission)

REQUIREMENT: This project is required to provide adequate permanent facilities to support five (5) battalions of initial entry training (IET) Soldiers. This project will construct the reception station processing building, soldier community building, dining facility, a physical training field with running track, general-purpose storage building, and a central energy plant.

CURRENT SITUATION: Adequate permanent trainee/receptee billeting, activity, processing and dining space do not exist at the current 30th AG Battalion (Reception) complex to support the five battalions of Initial Entry Training Soldiers. Billeting is currently being supplemented by 1,210 additional spaces in leased relocatable buildings to support Fort Benning's current mission.

IMPACT IF NOT PROVIDED: If this project is not provided, Fort Benning will not have adequate permanent facilities to process the increased mission receptee load.

ADDITIONAL: In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design

11. REQ: 16,167 PN ADQT: 6,000 PN SUBSTD: 10,167 PN
PROJECT: Construct an Initial Entry Combat Training Battalion Barracks Complex. (Current Mission)

REQUIREMENT: This project is required to provide adequate permanent facilities to command, house, feed and train five companies of Initial Entry Training Soldiers. Maximum and intended utilization is 1200 enlisted soldiers.
CURRENT SITUATION: Fort Benning currently houses forty companies of Initial Entry and Basic Training Soldiers in eight trainee barracks complexes. There are no other adequate, permanent barracks available on Fort Benning to command, house, feed and train an additional five companies of Initial Entry Training Soldiers.

IMPACT IF NOT PROVIDED: If this project is not provided, trainees will be required to live and train in substandard and/or temporary facilities, which will have an adverse effect on their morale, training absorption and potential retention.

ADDITIONAL: In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. 10.Description of Proposed Construction Construct a standard design barracks complex consisting of barracks, one battalion headquarters with classroom, one company operations facility (three companies)and central energy plant. Provide fire protection and alarm systems. Provide connections with the energy monitoring and control system (EMCS) system and install intrusion detection system (IDS). Provide building information systems. Realign roads. Supporting facilities include electricity, security lighting, water, sewer and natural gas services; fire protection; paving, parking areas, service roads, walks, curbs and gutters; storm drainage; information systems, lightning protection systems; site improvements, and landscaping; information systems and anti-terrorism measures. Heat and air condition from central plant. Anti-terrorism measures consist of providing appropriate standoff distances from adjacent buildings, roadways and parking areas, laminated windows, solid core exterior doors, bollards and concrete planters. Access for persons with disabilities will be provided in public areas. Comprehensive interior design services are required. Demolish 6 Buildings (TOTAL 13,455 m2/144,825 SF). Air Conditioning (Estimated 1,973 kWr/561 Tons).

11. REQ: 1,983 PN ADQT: 1,152 PN SUBSTD: 831 PN

PROJECT: Construct a barracks complex. (Current Mission)

REQUIREMENT: This project is required to provide adequate barracks space for enlisted personnel assigned to Hunter Army Airfield along with battalion and company unit level administrative facilities. Substandard barracks are planned for demolition and partial replacement as part of the overall strategy for upgrading barracks airfield wide. The maximum utilization is 336 soldiers. Intended utilization is for 186 Junior Enlisted and 75 Sergeants.

CURRENT SITUATION: Currently, soldiers are housed in one of three permanent barracks constructed at Hunter Army Airfield by the Air Force in 1954. Rooms lack adequate space for work/study, storage of personal possessions, including equipment, do not provide any privacy for the individual soldier and do not provide adequate lighting and electrical service. Interior corridors are dark and narrow with low ceilings. Laundry rooms are small. Upon completion of this project the existing facilities will be demolished, to include infrastructure systems.

IMPACT IF NOT PROVIDED: If this project is not provided, continued utilization of substandard housing facilities will be required. This will result in negative impacts on both unit readiness and troop morale. The only alternative would require the use of off-post housing on a permanent basis. Since the lower pay grades form the largest portion of the single soldier population, a requirement to live off-post will place a significant undue financial burden on the individual soldier. Payments for utilities, separate rations, utility deposits and the disparity between housing allowances and actual rental costs incurred will cause financial difficulties and ultimately result in a negative impact on mission readiness.

ADDITIONAL: In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization

contractor notwithstanding any other provision of law. This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.

During the past two years, \$23,739,621 has been spent on sustainment, restoration and modernization (SRM) (formerly known as Real Property Maintenance) of unaccompanied enlisted personnel housing at Ft Stewart/Hunter AAF, Ga. Upon completion of this multi-phased project and other projects approved through FY 2008, the remaining unaccompanied enlisted permanent party deficit is 495 personnel at this installation.

11. REQ: 4 EA ADQT: NONE SUBSTD: 4 EA

PROJECT: Construct facilities (standard design) to complete a Brigade Combat Team Complex. (Current Mission)

REQUIREMENT: This project is required to provide adequate brigade headquarters, battalion headquarters, classrooms, organizational vehicle parking and unit storage to support creation of the 2d BCT at Fort Stewart. At Fort Stewart three BCTs and a Division Support Brigade (DSB) have been created from a combination of previous divisional personnel assets and the stationing of approximately 2,100 additional troops. With this reorganization, a shortfall of critical mission support facilities now exists.

CURRENT SITUATION: All existing adequate facilities are fully utilized. Currently, the 2nd BCT headquarters occupies inadequate facilities that only provide a third of the space required for accommodating the new organizational structure of a brigade headquarters. The facility also lacks a sensitive compartmented information facility (SCIF) that is required to support brigade operations. There is an inadequate number of battalion headquarters facilities to serve increase in battalions IAW the force structure for the 2nd BCT. Battalion HQs must share facilities designed to accommodate only one battalion. The existing battalion headquarters buildings were not constructed with sufficient organizational classrooms nor are there any stand alone classrooms within the 2nd BCT area. There is a large deficit in organizational storage throughout all of the 2nd BCT's vehicle maintenance complexes, with 4 of the 6 battalions short in the authorized amount of unit storage buildings. These deficiencies are offset through the use of temporary storage containers within the Vehicle Maintenance Shop (VMS) Complexes, the use of vehicle workbay space for storage, and/or the use of unit operations areas to store deployment items. Three of the brigades' tactical equipment complexes do not provide the required organizational vehicle parking.

IMPACT IF NOT PROVIDED: If this project is not provided, unit readiness of the 2nd BCT will continue to be degraded. The use of existing, substandard

REQUIREMENT: (CONTINUED)

the Army's Brigades to support mission changes. Maximum utilization is 226 soldiers. Intended utilization is 194 Junior Enlisted and 16 Sergeants.

CURRENT SITUATION: Current facilities are inadequate to accommodate the additional requirements of a Brigade Combat Team. Existing facilities considered for renovation are inadequately sized and lack proper space and infrastructure.

IMPACT IF NOT PROVIDED: If this project is not provided, Schofield Barracks will not be able to provide adequate permanent facilities to support the administrative and billeting requirements to support the U.S. Army's Transformation goals.

ADDITIONAL: In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.

During the past two years, \$3.2M has been spent on sustainment, restoration and modernization (SRM) (formerly known as Real Property Maintenance) of unaccompanied enlisted personnel housing at Schofield Barracks. Upon completion of this multi-phased project and other projects approved through FY 2008, the remaining unaccompanied enlisted permanent party deficit is 962 personnel at this installation.

PROJECT: Construct a barracks complex. (Current Mission)

REQUIREMENT: This project is required to provide living and working conditions that meet current Army standards for soldiers. The maximum barracks utilization is 204 soldiers. The intended utilization is 154 Junior Enlisted, and 25 Sergeants.

CURRENT SITUATION: Personnel are currently housed in a substandard barracks buildings. The soldiers use gang latrines and showers. Buildings lack proper plumbing, lighting, ventilation, and partitions for security, privacy, comfort, and noise abatement.

IMPACT IF NOT PROVIDED: If this project is not provided, personnel will continue to live in deteriorated barracks facilities constructed in the 1940s or live off base. This will adversely affect the soldiers' quality of life and morale, compromising retention rates and ultimately unit readiness.

ADDITIONAL: In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. 10.Description of Proposed Construction Construct a standard-design barracks. Project includes the barracks and a central energy plant. Project includes connection to Energy Monitoring and Control System, Building Information Systems, Fire/Smoke detection/enunciation/ suppression System and connections to the installation central systems. Supporting facilities include connection to all required utility systems; exterior lighting; paving; walks; curbs and gutters; parking; storm water management facilities; exterior information systems; site improvements and road improvements. Antiterrorism (AT) measures in the primary facility will include blast-resistant windows and exterior door glass, internal sway bracing and mass notification system. Site AT measures will include building orientation, masking landscaping, berming, bollards and planters, security lighting and fencing. Access for individuals with disabilities will be provided in public areas. Comprehensive building and furnishings related interior design services are required. Air Conditioning (Estimated 528 kW _r /150 Tons).

1. COMPONENT ARMY	FY 2008 MILITARY CONSTRUCTION PROJECT DATA	2. DATE 26 JAN 2007
--------------------------	--	----------------------------

3. INSTALLATION AND LOCATION

Fort Shafter, Hawaii

4. PROJECT TITLE Barracks Complex	5. PROJECT NUMBER 61882
--	--------------------------------

REQUIREMENT: This project is required to provide adequate permanent living accommodations for single Soldiers to support the Army Transformation and strategic redeployment of units in Hawaii. Maximum utilization will be 188 Soldiers. Intended utilization is 142 Junior Enlisted and 23 Sergeants.

CURRENT SITUATION: Fort Shafter does not have sufficient adequate permanent living accommodations for single Soldiers to support the Army Transformation and strategic redeployment of units in Hawaii.

IMPACT IF NOT PROVIDED: If this project is not provided, Fort Shafter will not be able to provide adequate permanent living accommodations for the single Soldier. Single Soldiers will have to live off-post or double-up in living quarters. Doubling up will adversely impact the quality-of-life, morale and retention of highly motivated and highly trained Soldiers. Additionally, off-post housing will adversely affect unit cohesion and mission readiness.

ADDITIONAL: In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.

During the past two years, \$3.2M has been spent on sustainment, restoration and modernization (SRM) (formerly known as Real Property Maintenance) of unaccompanied enlisted personnel housing at Fort Shafter, Hawaii. Upon completion of this multi-phased project and other projects approved through FY 2008, the remaining unaccompanied enlisted permanent party deficit is 379 personnel at this installation.

REQUIREMENT: Fort Leavenworth has been designated to house the new Midwestern Regional Joint Level II (medium security) correctional facility. This project will house the Military Police Battalion that supports the correctional facilities. The Military Police Battalion is a specialized battalion requiring additional features to the Battalion Headquarters for an Emergency Operations Center (EOC) and a Family Service Center. The maximum barracks utilization is 254 soldiers. Intended utilization is 212 Junior Enlisted and 21 Sergeants.

CURRENT SITUATION: Currently, the installation has no enlisted dining facility and battalion headquarters facilities. There is no available company operations administrative space. The installation does not have adequate barracks space available to house the E-1 through E-5 soldiers who will be authorized to live on the installation.

IMPACT IF NOT PROVIDED: If this project is not provided, Fort Leavenworth will not have adequate administrative, barracks, and dining facilities to support the incoming military units that will operate the new Midwestern Regional Joint Level II (medium security) Correctional Facility.

ADDITIONAL: In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. 			Total	1,541

REQUIREMENT: The M-DMPRC supports Active Army, Army Reserves (USAR), National Guard (NG), and Air Force. Units require a collective live fire home station training facility for all elements of Fort Riley. Crews and dismounted soldiers train and test their ability to detect, identify, engage and defeat stationary and moving combined arms targets in both open and urban terrain environments. Units require tactical live fire operations independently of, or simultaneously with, supporting vehicles in free maneuver. They require training with sub-caliber and/or Training devices used to train and test armor, infantry and aviation elements on skills necessary to detect, identify, engage and defeat stationary and moving infantry and armor targets in a tactical array. Units require dismounted infantry platoon tactical live-fire operations either independently of, or simultaneously with, supporting vehicles. Current gunnery requires both Digital and Analog Communications Systems.

CURRENT SITUATION: The digital requirements for combat vehicles are not being met. The existing range does not support digital targetry systems or feedback mechanisms organic to current digital weapon platforms. The existing range is not capable of processing digital information, nor does it possess the systems to provide digital situational feedback to units or receive digital reports. Present targetry will not interact with either the firing element or the Digitally Enhanced Range Operations Center Command and Control System. The existing Multi-Purpose Range Complex was designed for earlier weapon systems of lighter caliber and limited information gathering capability. The existing range is 4,000 meters in length, which does not meet training requirements. The current system is a simple command and reporting system, which does not lend itself to advanced simulation and integration into existing information systems. The existing range does not provide urban operations engagements and does not support required free maneuver gunnery needs of units supported at Fort Riley.

IMPACT IF NOT PROVIDED: If this project is not provided, the soldiers of Fort Riley, and other active Army units, Reserve and National Guard will continue to train on inadequate analog ranges. These units will not train to

standard, and units may enter future combat less than fully prepared to employ the full capabilities of the digitized weapons and equipment used by these soldiers.
ADDITIONAL: In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.

10.Description of Proposed Construction Construct a standard Army Special Operations Force (SOF) Indoor Range. Primary facilities include the indoor range and building information systems. Supporting facilities include: electric service, natural gas, water, sanitary sewer, access road, parking, fencing and exterior lighting, site preparation and improvements, and information systems. Air Conditioning (Estimated 141 kW/40 Tons).						
11. REQ: 2,137 m2 ADQT: NONE SUBSTD: NONE						
PROJECT: Construct a standard Special Operations Force (SOF) Indoor Range. (Current Mission)						
REQUIREMENT: The Army Special Operations Forces indoor range provides realistic and challenging concurrent training for a secure all-weather weapons training facility supporting initial and sustainment live-fire, reducing the exposure/signature of the unit.						
CURRENT SITUATION: No training facility of this type currently exists at Fort Campbell. Existing training facilities do not support multi-faceted requirements of indoor range environments for realistic training. Due to the nature of the types of weapons used by Special Operations Forces, the requirement for indoor training involves special safety features not normally

CURRENT SITUATION: (CONTINUED)
found within traditional training facilities. The Army Standard Design for this facility type is being adopted from a project at the FBI's Law Enforcement Training Center and this project will be used as the standard for all the other Indoor Ranges in the FY2008 program.
IMPACT IF NOT PROVIDED: If this project is not provided, the Soldiers of the Special Operations community that rely on Fort Campbell for training will not be able to fully exercise small arms gunnery engagement procedures. The Soldiers and units will not receive complete exposure to training standards, causing an adverse impact to small arms combat proficiency.
ADDITIONAL: In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. 10. Description of Proposed Construction Construct four medium standard design tactical vehicle maintenance shops for a Brigade Combat Team (BCT) maintenance complex. Project includes the vehicle maintenance shops, organizational storage, oil storage, organizational parking facilities and unmanned aerial vehicle maintenance and storage. Vehicle Maintenance Shops include one 35-ton crane and three 10-ton cranes. Work will include connection to the energy monitoring and control systems (EMCS), fire alarm detection and reporting systems, and installation intrusion detection system (IDS). Supporting facilities include utilities; paving, walks, curbs and gutters; parking; access roads; storm drainage; information systems; landscaping and site improvements. Heating and air conditioning will be provided by self contained units. Antiterrorism measures will be incorporated into the building and site construction. Access for individuals with disabilities will be provided in public areas. Air Conditioning (Estimated 281 kW/80 Tons).

10.Description of Proposed Construction Widen the access corridor to four traffic lanes on Fort Knox from the reservation boundary at Wilson Road to the intersection at Eisenhower Boulevard. Project includes installing a bike path, improving drainage, upgrading traffic signals, moving utility lines, installing curb and gutters and reflectorized pavement markings. Supporting facilities include site preparation and improvements, and electrical service.						
11. REQ: 38,072 m2 ADQT: NONE SUBSTD: NONE						
PROJECT: Construct Road access corridor improvements. (Current Mission)						
REQUIREMENT: Project is required to provide increased traffic volume capacity and safety for large increases in traffic through the area resulting from newly assigned missions due to Army Transformation. With these major operational transitions, Fort Knox is shifting from a largely trainee population with few personal vehicles to a more permanent party and civilian employee population whose primary mode of transportation is their personal vehicles. Fort Knox will begin construction of the Army's Human Resources Center of Expertise along this Wilson Road corridor in 2007. This major office complex will bring several thousand additional vehicles into the area when completed. The installation is currently constructing a large new family

3. INSTALLATION AND LOCATION Fort Knox, Kentucky		
4. PROJECT TITLE Cantonment Area Roads, Paved	5. PROJECT NUMBER 66549	
<p><u>REQUIREMENT:</u> (CONTINUED)</p> <p>housing area along Wilson Road with plans for future construction of housing under the Army's Residential Communities Initiative (RCI). Fort Knox is planning to house several new mission military units along this corridor as part of Army Transformation's initiative to return units from Europe and Korea. Additionally, Fort Knox will house a newly activated Engineer Battalion (800 personnel) and an Infantry Brigade Combat Team (3500 personnel), as well as two major Army Reserve headquarters in adjacent areas of the installation. These multiple stationing actions will dramatically change the demographics of the post population and greatly increase the daily volume of traffic.</p> <p><u>CURRENT SITUATION:</u> The Wilson Road access corridor is a major commuter route through the eastern portion of the cantonment area connecting with multiple arterial routes feeding the rest of the cantonment area. The Wilson Road access control point (entrance gate) is located at the southern end of this corridor providing direct access to the adjacent civilian community of Radcliffe, Kentucky. Currently, Wilson Road is a two-lane road except for one limited stretch that has four lanes. Large sections along the length of this road have drainage problems.</p> <p><u>IMPACT IF NOT PROVIDED:</u> If this project is not provided, the increased traffic converging on this limited traffic corridor will overwhelm the capability to move vehicles in a timely manner, causing major delays. Inability to reach these multiple new mission complexes will severely limit the operational effectiveness of the missions and hamper their ability to attract and retain qualified employees. Delays at the installation boundary may create unsafe traffic backups in the local civilian community.</p> <p><u>ADDITIONAL:</u> In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. This project has been coordinated with the installation physical security plan, and all physical security measures are included. No antiterrorism protection measures are required. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.</p>

REQUIREMENT: (CONTINUED)

widths. Fort Leonard Wood supports Basic Combat Training, One Station Unit Training, Engineer School, Military Police School, and Chemical Schools for the U.S. Army. Modern, dense target training environments are important skill qualifiers for individual soldiers.

CURRENT SITUATION: The current need is not fully met. Individual weapons training is accomplished on a nonstandard range which results in longer range periods and nonstandard weapons techniques in order to adjust to range physical limitations. The tenets of initial entry training is to instill standards and consistent discipline of process. Nonstandard training ranges defeats this basic training tenet. Current lanes are not standard width reducing target acquisition opportunities requiring adjustments to engagement scenarios. Target systems are old generation and do not recover as quickly as more modern systems. Target nonresponsiveness or inoperation defeats training discipline standards. This reduces throughput and requires longer training events. The goal of weapons training is focused on applying steel on target. Nonstandard ranges with limited engagement opportunities restricts this goal.

IMPACT IF NOT PROVIDED: If this project is not provided, over 36,000 Individual Entry Training (IET) and 13,000 US Army Forces Command (FORSCOM), Reserve, and National Guard soldiers will not be able to train to current standards and requirements. Soldiers will continue to train on sub and nonstandard training facilities.

ADDITIONAL: In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. 10.Description of Proposed Construction Construct a ground water treatment plant capable of treating arsenic and fluoride. Project includes the water supply/treatment building, plant/utilities building, potable water storage tank, distribution lines, and building information systems. Supporting facilities include site utilities (water, gas, electric, sewer), site improvements, roads, information systems, and antiterrorism/force protection. Access for individuals with disabilities will be provided in public areas.						
11. REQ: 7,571 L/d ADQT: 1,893 L/d SUBSTD: 5,678 L/d PROJECT: Construct a groundwater treatment plant (Current Mission). REQUIREMENT: This project is required to treat ground water for arsenic and fluorides so as to comply with new EPA Standards that went into effect January 2006. A waiver requesting a six year exemption has been requested through the State of Nevada and is pending approval of the State plan by EPA. If approved, HWAD will have six years to have an approved and operational water treatment plant in place or be forced to stop all ground water consumption. (Current Mission)

9. COST ESTIMATES (CONTINUED)

Item	UM (M/E)	QUANTITY	Unit COST	Cost (\$000)
<u>PRIMARY FACILITY (CONTINUED)</u>				
Water Supply/Treatment Building	m2 (SF)	297.29 (3,200)	1,924	(572)
Building Information Systems	LS	--	--	(17)
			Total	589

CURRENT SITUATION: Ground water at Hawthorne Army Depot (HWAD) will not meet the new EPA standards for flourides and arsenic that were effective 23 January 2006. The USEPA has mandated that, in January 2006, all drinking water must meet their new standards. Both arsenic and flourides occur naturally in the soils and groundwater at HWAD. Existing well water currently is only used for dust suppression and HWAD relies on unfiltered surface water to meet mission requirements.

IMPACT IF NOT PROVIDED: The existing potable ground water system will not be granted a waiver for the new USEPA arsenic and flouride drinking water standard; both minerals are considered potential human health risks. HWAD will be forced to shut down its groundwater system when the new standard becomes effective, and incur additional costs to meet its drinking water requirements by having to transport water to HWAD from an approved potable water sytem. The new limitation on available surface water make this ground water plant mission critical to both residential needs and the ammunition mission. There are no other viable solutions available.

ADDITIONAL: In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.

10.Description of Proposed Construction Construct utilities infrastructure upgrades. Project will include a sewage lift station, upgraded sewage pump station, sanitary sewer lines, water tanks and pumps, water lines, and electrical distribution lines. Supporting facilities include site preparation and improvements.						
11. REQ: 1 EA ADQT: NONE SUBSTD: 1 EA						
PROJECT: Construct utilities infrastructure upgrades. (Current Mission)						
REQUIREMENT: This project is required to support the increased demand for electricity, water and sewage collection/treatment resulting from the transformation of the Army (Army Modular Force) being stationed at Fort Drum. The increased population will outstrip the capabilities of the electrical, water and sewerage systems in the areas of expected construction. This project is designed to support the cumulative effects of many individual projects on the various utilities.						
CURRENT SITUATION: There are a number of critical locations that the proposed expansion is exceeding the existing capacity of the sewer lines; some by over 250% of the current line capacity.						

1. COMPONENT ARMY	FY 2008 MILITARY CONSTRUCTION PROJECT DATA	2. DATE 26 JAN 2007
--------------------------	--	----------------------------

3. INSTALLATION AND LOCATION

Fort Drum, New York

4. PROJECT TITLE Infrastructure Upgrades	5. PROJECT NUMBER 62576
---	--------------------------------

IMPACT IF NOT PROVIDED: If this project is not provided, the new facilities constructed to support the Army Modular Force could not be fully utilized due to the utilities systems being overtaxed. The cumulative effect of individual projects connecting to the various utilities will ultimately overload the utility systems downstream at various points.

ADDITIONAL: In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.

3. INSTALLATION AND LOCATION

Fort Drum, New York

4. PROJECT TITLE Brigade Complex-Company Operations	5. PROJECT NUMBER 65795
--	--------------------------------

REQUIREMENT: The 10th Mountain Division (Light) has been reorganized based on the Army's Modular Force (AMF) concept. Three Brigade Combat Teams (BCTs) have been formed at Fort Drum along with their support units. This transformation has significantly increased the installation's population, requiring facilities to support the additional units. This project provides company operations facilities to support the Brigade Combat Teams (BCTs).

CURRENT SITUATION: All existing adequate facilities are being fully utilized to support this transformation action. However, there is not a sufficient number of adequate facilities to entirely accommodate the transformation. This project provides essential permanent company operations facilities to support the Brigade Combat Teams.

IMPACT IF NOT PROVIDED: If this project is not provided, there will not be sufficient adequate permanent facilities to support the transformation. Soldiers will continue to work out of temporary and/or relocatable buildings which have limited operational capabilities and limited useful life expectancies.

ADDITIONAL: In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. 11. REQ: 15,984 PN ADQT: 15,266 PN SUBSTD: 718 PN
PROJECT: Construct a barracks complex. (Current Mission)
REQUIREMENT: This project is required to provide living and working conditions that meet current Army standards for soldiers. The maximum barracks utilization is 704 soldiers. The intended utilization is 544 Junior Enlisted, and 80 Sergeants.
CURRENT SITUATION: The existing barracks consist of the older style 2+2 design and must be reassigned from 2 soldiers per room to 1 soldier per room in each module to meet the 1+1 or equivalent standard. This resulted in the elimination of half of the available barracks spaces. To meet the UPH housing requirement, additional barracks must be constructed expanding into nearby space available.
IMPACT IF NOT PROVIDED: If this project is not provided, soldiers will continue to live and work in substandard and deteriorated facilities.
ADDITIONAL: In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. An economic analysis has been prepared and utilized in evaluating this project. This project is the most cost-effective method to satisfy the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in

10. Description of Proposed Construction Construct a student barracks. Project includes multi-story (4 story minimum) standard design student barracks, EMCS connections, antiterrorism measures and building information systems. Elevators will be provided in multi-story barracks. Supporting facilities include utilities, electric service, steam and chilled water distribution; paving, walks, curbs and gutters; storm drainage; information systems; site improvements, fire alarm, detection and centrally reporting systems and automatic building sprinklers. Heating and air-conditioning will be provided by connection to an existing central energy plant. Asbestos survey and abatement along with lead-based paint remediation are required as part of demolition. Anti-terrorism (AT) will be provided by structural reinforcement, special windows and doors, and site measures. AT will include mass notification systems for each facility. Access for persons with disabilities will be provided in public areas. Comprehensive interior and furnishings related design services are required. Demolish 7 Buildings at , (TOTAL 12,908 m2/138,936 SF). Air Conditioning (Estimated 1,407 kW/400 Tons).

3. INSTALLATION AND LOCATION Fort Bragg, North Carolina		
4. PROJECT TITLE Student Barracks	5. PROJECT NUMBER 65558	
<p><u>REQUIREMENT:</u> This project is required to provide living conditions that meet current standards for Soldiers while they are undergoing Special Forces Qualification Course (SFQC) and advanced special operations training. The maximum and intended utilization is 720 Soldiers.</p> <p><u>CURRENT SITUATION:</u> Special Forces Soldiers are currently housed in barracks that are nearly 40 years old, are severely deteriorated, have gang latrines, lack centrally monitored fire detection and alarm systems and contain inadequate Soldier support facilities. Because of the shortage of barracks spaces, Soldiers are also housed off post using certificates of non-availability (CNAs). Existing conditions do not promote soldier morale, quality of life or training effectiveness and efficiency.</p> <p><u>IMPACT IF NOT PROVIDED:</u> If this project is not provided, Soldiers will continue to live in substandard and deteriorated barracks and/or off-post. It is critical that these Soldiers are housed in barracks as the Army has invested heavily in their recruitment, airborne training, special forces selection, assessment and language training. Special Forces Soldiers are one of the most critical shortfalls within DoD. Production of Special Forces Soldiers is being ramped up to meet this need. Quality barracks are required to support the training and qualification of these Soldiers.</p> <p><u>ADDITIONAL:</u> In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.</p>

General Instruction Building	m2 (SF)	74.32 (800)	1,295	(96)
Building Information Systems	LS	--	--	(11)
Total				107

REQUIREMENT: (CONTINUED)
Range will support both familiarization and qualification training and will greatly enhance scheduling flexibility and training quality.

CURRENT SITUATION: The need is currently being met using two heavily scheduled Initial Entry Training (IET) Automated Record Fire ranges, and or qualifying on M16A1 Alternate Course "C" paper targets on a 25 meter range.

IMPACT IF NOT PROVIDED: Soldiers will continue to try to schedule an IET Record Fire Range or qualify on paper targets. The current rifle ranges support the needs of IET, IIId Corps Artillery, Mobilizing units, and will soon include support for BOLC. With the additional scheduling requirements, current ranges cannot provide the needed resources to effectively train these elements.

ADDITIONAL: In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. CURRENT SITUATION: The existing barracks/dining facility are old, deteriorated and substandard. The mechanical systems are failing and are not economical to repair. These facilities are not economical to repair.

IMPACT IF NOT PROVIDED: If this project is not provided, soldiers will continue to live and work in substandard and deteriorated facilities, which will adversely impact morale, and readiness.

ADDITIONAL: In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. An economic analysis has been prepared and utilized in evaluating this project. This project is the most cost-effective method to satisfy the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.

During the past two years, \$35M has been spent on sustainment, restoration and modernization (SRM) (formerly known as Real Property Maintenance) of unaccompanied enlisted personnel housing at Fort Hood, Texas. Upon completion of this multi-phased project and other projects approved through FY 2008, the remaining unaccompanied enlisted permanent party deficit is 283 personnel at this installation.

10.Description of Proposed Construction Construct the core area of a standard design small Battle Command Training Center. This is Phase 1 of two phases. Phase 2 will be programmed in future years. Phase 1 includes administrative areas, multipurpose rooms and latrines. Heating and air conditioning will be provided by self contained plant. Antiterrorism protection measures and access for individuals with disabilities will be provided. Support facilities include all utilities and mechanical systems support, paving, curbs and gutters, storm drainage and site improvements. Air Conditioning (Estimated 70 kW _r /20 Tons).						
11. REQ: 4,279 m2 ADQT: NONE SUBSTD: 1,369 m2						
PROJECT: Construct a standard design small Battle Command Training Center (BCTC). (Current Mission)						
REQUIREMENT: A BCTC is required to support individual and collective digital training and battle staff training using constructive simulations with command, control, communications, computers and intelligence (C4I) interoperability. This project is required to provide effective training in the command and control of individual as well as combined operations in a simulated tactical environment, incorporating appropriate opposing forces. This facility supports several different levels of battle command training for

3. INSTALLATION AND LOCATION Fort Sam Houston, Texas		
4. PROJECT TITLE Battle Command Training Center, Ph 1	5. PROJECT NUMBER 66824	
<p><u>REQUIREMENT:</u> (CONTINUED)</p> <p>contingency force units and various additional combat, combat support, and combat service support units. Battle simulations and command post exercises are conducted at company, battalion, brigade, division, corps and joint levels. The size and complexity of battle command training using simulations and C4I systems have increased significantly.</p> <p><u>CURRENT SITUATION:</u> Current Battle Command capability does not support expanded training needs for battle command using increased simulations, instrumentation and C4I systems. Present training limits the integration of combat systems, C4I systems, and equipment and does not provide a platform for integration of other Army and joint battle command systems. Minimum required capabilities of integrating architecture, operational C4I system simulation, reach capability and training sustainment are not available. The existing building does not provide minimum space requirements to support Army standard training protocols. Existing building does not provide mechanical, electrical, communication or structural standards to support prolonged use as training buildings.</p> <p><u>IMPACT IF NOT PROVIDED:</u> If this project is not provided, Fort Sam Houston will not have adequate battle command training and simulation enhanced facilities for individual and collective digital and battle staff training. The quality of battle command and staff simulation exercises and unit C4I expertise will decline. Essential training and skill development will not be able to keep pace with mission demands.</p> <p><u>ADDITIONAL:</u> In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.</p>

4. PROJECT TITLE Urban Assault Course	5. PROJECT NUMBER 18165	
<p><u>REQUIREMENT:</u> (CONTINUED)</p> <p>capabilities as well as their ability to provide medical support. It will also be used by Air Force Ground Base Defense units training at Camp Bullis. Army and Air Force Reserve training will also be supported. This training course and range will allow for both individual and collective hands-on training enhancing doctrinal understanding and skill development.</p> <p><u>CURRENT SITUATION:</u> Current training in urban assault and live fire convoy conducted by the Academy of Health Sciences consists of mostly classroom instruction and some hands-on training on the litter obstacle course. Army doctrine stresses the importance of urban warfare training as a critical mission essential task. There are no existing training facilities suitable to support this requirement. Uniformed service members are denied exposure to the basics of urban warfare and confrontational convoy operation environments during the primary medic training and Medical Officer Basic training periods. This lack of training support greatly reduces individual proficiencies and provides a less than fully trained medical specialist.</p> <p><u>IMPACT IF NOT PROVIDED:</u> If this project is not provided, the Academy of Health Sciences (AHS) will not be able to provide required hands-on training in support of medical operations in an urban setting or for confrontational convoy operations.</p> <p><u>ADDITIONAL:</u> In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. This project has been coordinated with the installation physical security plan, and all physical security measures are included. No antiterrorism protection measures are required. 10.Description of Proposed Construction Construct Phase 2 of the Maneuver Systems Sustainment Center (MSSC) for tactical wheeled vehicles repair. Phase 2 constructs the Paint & Prep Facility and the Surface Preparation & Cleaning Facility and the demolition of buildings located on the Phase 2 site. Antiterrorism/force protection measures include a mass notification system. Project also includes fire protection systems that connect to the installation's central system, and building information systems. Supporting facilities include connections to all required utilities, exterior lighting, lightning protection, storm water management, and site work. Heating and air conditioning will be provided by self-contained units. Access for individuals with disabilities will be provided. Demolish 3 Buildings (TOTAL 4,533 m2/48,798 SF). Air Conditioning (Estimated 70 kWr/20 Tons).						
11. REQ: 91,546 m2 ADQT: 36,256 m2 SUBSTD: 35,326 m2 PROJECT: Construct Phase 2 of the Maneuver Systems Sustainment Center at Red River Army Depot (RRAD). (Current Mission) REQUIREMENT: The RRAD provides depot level vehicle maintenance for the Army. The RRAD is the Center for Technical and Industrial Excellence (CITE) for the Bradley Fighting Vehicle Systems, Multiple Launch Rocket System (MLRS), the						

1. COMPONENT ARMY	FY 2008 MILITARY CONSTRUCTION PROJECT DATA	2. DATE 26 JAN 2007
3. INSTALLATION AND LOCATION Red River Army Depot, Texas		
4. PROJECT TITLE Maneuver Systems Sustainment Ctr, Phase 2	5. PROJECT NUMBER 66690	
<p><u>REQUIREMENT:</u> (CONTINUED)</p> <p>Small Emplacement Excavator, and Rubber products. The RRAD provides critical maintenance and sustainment of the Reconstitution and Reset of the force in support of the Global War on Terrorism. In support of the Army's transformation efforts, the RRAD industrial base must be modernized so that the Army has the capabilities to perform state-of-the-art depot level operations. A state-of-the-art vehicle maintenance center for modern, efficient, safe and environmentally sound industrial operations is required. Included in this vehicle maintenance center is the requirement for a depot level tactical vehicle Paint & Prep Facility and Surface Prep & Cleaning Facility.</p> <p><u>CURRENT SITUATION:</u> Most of the disassembly and assembly work is done in one of the original Tank Repair buildings built in 1942. It was built with columns every 25 feet, and laid out for linear production lines. It is not adequate for today's technology or modern production techniques such as cell or bay work arrangements. Short production runs require excessive down time to clear the previous runs. Current facility constraints require major vehicle components to be repaired, assembled, and installed in outlying buildings. This causes additional transportation and queuing of assets. Before disassembly, vehicles are cleaned at the South Wash Rack area which is a conglomeration of wash racks, blast bays, and blast equipment shelters. After disassembly, some components and parts are carried back to the South Wash Rack area for specialized cleaning. Parts are also sent to various buildings for vat cleaning, hand-blasting, plating, and coating. This requires a substantial amount of time spent transporting these vehicles and components due to the dispersed locations of these operations.</p> <p><u>IMPACT IF NOT PROVIDED:</u> If this project is not provided, Red River Army Depot will continue to operate under inefficient and technologically obsolete conditions. The ability to perform short, varied production runs will be hampered due to the physical limitations of the existing facilities. The multiple movement of vehicles, components, and parts from one building to another will continue. The inefficiencies that exist due to the tactical vehicle repair processes being dispersed will also continue to occur. The remote locations for each component work requires additional handling and transporting across the depot to accomplish all facets of the current processes for the tactical vehicle repair mission performed at RRAD. This results in longer maintenance cycle times to provide combat ready vehicles and equipment.</p> <p><u>ADDITIONAL:</u> In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. This project has been</p>

10.Description of Proposed Construction Construct a standard Army Special Operations Force (SOF) indoor range. Primary facilities include the indoor range and building information systems. Supporting facilities include: electric service, natural gas, water, sanitary sewer, access road, parking, fencing and exterior lighting, communications, site preparation and improvements. Air Conditioning (Estimated 141 kW/40 Tons).						
11. REQ: 2,137 m2 ADQT: NONE SUBSTD: NONE						
PROJECT: Construct a standard Special Operations Force (SOF) indoor range. (Current Mission).						
REQUIREMENT: The Army Special Operations Forces indoor range provides realistic and challenging concurrent training for a secure all-weather weapons training facility supporting initial and sustainment live-fire, reducing the exposure/signature of the unit.						
CURRENT SITUATION: No training facility of this type currently exists at Fort Lewis. Existing training facilities do not support multifaceted requirements of indoor range environments for realistic training. Due to the nature of the types of weapons used by Special Operations Forces, the requirement for indoor training involves special safety features not normally

found within traditional training facilities.

IMPACT IF NOT PROVIDED: If this project is not provided, the Soldiers of the Special Operations community that rely on Fort Lewis for training will not be able to fully exercise small arms gunnery engagement procedures. The Soldiers and units will not receive complete exposure to training standards, causing an adverse impact to small arms combat proficiency.

ADDITIONAL: In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.

10. Description of Proposed Construction This is an incrementally funded project. The full authorization of \$408M was requested in FY 2007 (PN 62057) with the first funding increment of \$102M. The second funding increment of \$102M is requested in FY 2008 (PN 65933). The third funding increment of \$102M will be requested in FY 2009 (PN 65934). The fourth funding increment of \$102M will be requested in FY 2010 (PN 65935). Construct a Stryker Brigade Combat Team (SBCT) Complex. Primary facilities include a standard design battalion headquarters, a standard design barracks, company operations facilities, dining facility, vehicle maintenance shop, unit storage and organizational vehicle parking. Supporting facilities include site utilities; exterior lighting; information systems, fencing; fire protection and alarm system; walks, curbs, and gutters, parking, and site improvements. This project will include installation of Intrusion Detection Systems (IDS), and connection to Energy Monitoring Control Systems (EMCS). Anti-terrorism measures will include laminated glass, reinforced window and door framing, traffic control barriers, and mass notification system. Project includes self contained heating and ventilation systems. Demolition will include asbestos and lead abatement. Transition administrative facilities are included for units displaced by this project. Accessibility for the disabled will be provided in public areas. Comprehensive

10. Description of Proposed Construction Modernize an existing Multipurpose Range Complex (Light) to a modified Digital Multi-Purpose Range Complex that includes adding a maneuver lane and urban operation engagements. Upgrades consist of: increasing the size of the range, replacing existing target emplacements, electrical downrange power and data lines; and adding new: target emplacements, power, data lines, roads, fire breaks, machine gun bunkers, fighting trenches, breach walls and building facades, live fire villages, hasty battle positions, and mortar simulation devices. New Range Control facilities will consist of: the range operations center, after action review building, upgrade ammunition storage area, latrine, range instructional support building, covered mess, instrumentation dock, bleacher enclosure, range support logistics and maintenance, staging/marshalling area and building information systems. Range Operations Control Area (ROCA) includes: relocation of existing fuel storage tanks and security lighting, site preparation and improvements, fencing, gates, parking, waterlines, sewer line extensions, and water and sewer storage tanks. Supporting facilities include electric service, site improvements and information systems. Targetry and instrumentation systems will be provided by Other Procurement, Army (OPA) appropriations. Heating and air conditioning will be provided by a self-contained system.

DESCRIPTION OF PROPOSED CONSTRUCTION: (CONTINUED)
Demolish 7 Buildings (TOTAL 853 m2/9,178 SF). Air Conditioning (Estimated 70 kW_r/20 Tons).

11. REQ: 4 LN ADQT: NONE SUBSTD: 3 LN
PROJECT: Modernize and upgrade an existing Multipurpose Range Complex. (New Mission)
REQUIREMENT: The Digital Multipurpose Range Complex supports Active Army, Army Reserves (USAR), National Guard (NG), Air Force, Navy, Marines, and Coast Guard. Units require a collective live fire home station training facility for all elements of I Corps and Stryker Brigade Combat Team (SBCT). SBCT crews and dismounted soldiers train and test their ability to detect, identify, engage and defeat stationary and moving combined arms targets in both open and urban terrain environments. Units require tactical live fire operations independently of, or simultaneously with, supporting vehicles in free maneuver. They require training with sub-caliber and/or Training devices used to train and test armor, infantry and aviation elements on skills necessary to detect, identify, engage and defeat stationary and moving infantry and armor targets in a tactical array. Units require dismounted infantry platoon tactical live-fire operations either independently of, or simultaneously with, supporting vehicles. Current gunnery requires both Digital and Analog Communications Systems.
CURRENT SITUATION: The digital requirements for combat vehicles are not being met. The existing range does not support digital targetry systems or feedback mechanisms organic to current digital weapon platforms. Existing range is not capable of processing digital information, nor does it possess the systems to provide digital situational feedback to units or receive digital reports. Present targetry will not interact with either the firing element or the Digitally Enhanced Range Operations Center Command and Control System. Existing Multi-Purpose Range Complex was designed for earlier weapon

3. INSTALLATION AND LOCATION

Yakima Firing Center, Washington (Fort Lewis)

4. PROJECT TITLE Digital Multipurpose Range Complex	5. PROJECT NUMBER 43088
--	--------------------------------

CURRENT SITUATION: (CONTINUED)

systems of lighter caliber and limited information gathering capability. The existing range is 4,000 meters in length, which does not meet training requirements. Current system is a simple command and reporting system, which does not lend itself to advanced simulation and integration into existing information systems. The existing range does not provide urban operations engagements and does not support required free maneuver gunnery needs of the Stryker system.

IMPACT IF NOT PROVIDED: If this project is not provided, the soldiers of I Corps, and other active Army units, Reserve and National Guard that train at Fort Lewis - Yakima Training Center will continue to train on inadequate analog ranges. These units will not train to standard, and units may enter future combat less than fully prepared to employ the full capabilities of the digitized weapons and equipment used by these soldiers.

ADDITIONAL: In the event that a utility system is privatized (under 10 USC 2688 or other authority) prior to award of this project or during construction of this project, MILCON funds appropriated for the MILCON project herein may be transferred to the utility privatization contractor involved for the utility infrastructure. Title to the utility infrastructure constructed as a result of this MILCON project may be transferred to the utility privatization contractor notwithstanding any other provision of law. This project has been coordinated with the installation physical security plan, and all physical security measures are included. No antiterrorism protection measures are required. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.

10.Description of Proposed Construction Construct a hardened administrative compound with facilities to provide Joint Operations (JOC), Security Operations and Base Operations functions. Primary facilities include administration space, auditorium, conference rooms, secure rooms/SCIF, training areas, command center, communications equipment, day room, watch/law enforcement desk, interview/interrogation, guard mount/dispatching, armory, weapons cleaning and detention cells. Supporting facilities include electrical distribution, transformers, switchgear, water storage tanks, water and sewage distribution systems, mechanical systems, and building information systems. Other supporting facility features include roads, curbs, walkways, drainage, and parking. Anti-Terrorism (AT) measures will be included. The intent of this project is to provide a permanent Joint Operations Center for Bagram Air Field. This facility will be able to house a Combined Joint Task Force (or equivalent) approx 500-600 personnel . The Security & Base Operations function approx 75-150 personnel will also be accomodated in this facility.						
11. REQ:		3,425 m2	ADQT:	NONE	SUBSTD:	3,425 m2
PROJECT: Construct Administration Compound (JOC/Security/Base Ops). (Current Mission)						

1. COMPONENT ARMY	FY 2008 MILITARY CONSTRUCTION PROJECT DATA	2. DATE 26 JAN 2007
--------------------------	--	----------------------------

3. INSTALLATION AND LOCATION

Bagram Air Base, Afghanistan

4. PROJECT TITLE Administrative Building	5. PROJECT NUMBER 64128
---	--------------------------------

REQUIREMENT: The JOC, Security and Base Operations mission requires facilities to accommodate administrative activities to include staff offices for the installation command structure and for other functions such as logistics, maintenance, and personnel. Additional activities associated with the operational training and training support mission during non-contingency or surge periods of operation also require adequate facilities as well as the Joint Contingency Command Center during contingencies. A designated area in compliance with SCIF criteria is also required.

CURRENT SITUATION: Current Base Headquarter Facility is located inside a substandard Soviet-era facility. The facility contains lead based paint and asbestos. The roof leaks, potentially causing damage to computer equipment and electronics. In addition, the electrical was wired hastily during "initial" stages of construction when Bagram was first established. Current facilities will not meet the long term needs/requirements for Bagram's future missions.

IMPACT IF NOT PROVIDED: If this project is not provided, current missions will continue to operate out of buildings that are substandard and inadequate to meet long term needs. They will also be geographically separated, which causes inefficiencies to command and control. Also, these facilities will continue to deteriorate and require continuous maintenance and repair to keep them operational.

ADDITIONAL: The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.

Installations support US Army, Europe and Seventh Army (USAREUR), a trained and ready force capable of rapidly responding and operating jointly in support of US EUCOM theater strategy. Installations serve as a base for projecting power in and out of EUCOM area of responsibility by providing facilities for training, maintaining, housing, and supporting USAREUR's subordinate and supporting units/organizations. These units consist of combat, combat support, and combat service support tactical units as well as theater, mission, installation support, and quality of life organizations required to maintain a trained and ready force

10.Description of Proposed Construction Construct a modified standard-design organizational vehicle maintenance facility. Project includes four overhead cranes (10 tons), covered grease racks, apron and organizational vehicle parking, hazardous material storage, deployment equipment storage building, tank calibration ramp, maintenance sheds and company operations facilities. Install an intrusion detection system (IDS) and provide EMCS connection to installation central system. Project also includes petroleum, oils, and lubricant (POL) separator; compressed air system; fire protection and alarm systems; and water sprinkler system. Renovate a battalion headquarters building. Supporting facilities include utilities; electric service; water and sanitary sewer; storm sewer and/or surface drainage; district heat lines; paving, parking, walks, curbs and gutters; oil separator, security fencing and lighting; information systems; site improvements. All anti-terrorism (AT) measures, including Mass Notification Systems, will be provided. Access for individuals with disabilities will be provided in public areas. Comprehensive building and furnishings related interior design services are required for company operations facilities and battalion headquarters. Air Conditioning (Estimated 897 kW/255 Tons).

11. REQ: 39,947 m2 ADQT: 21,218 m2 SUBSTD: NONE
PROJECT: Construct modified standard-design organizational vehicle maintenance facilities to support a Brigade Complex. (Current Mission)
REQUIREMENT: This project is required to establish a consolidated Brigade Combat Team (BCT) in Grafenwoehr and to execute USAREUR Efficient Basing. USAREUR will maximize training time, enhance readiness and reduce operational expenses by stationing the BCT on a single installation with all necessary facilities and maneuver areas for live-fire training. Additionally, this reduces risk of injury to soldiers by eliminating the need to frequently load and unload heavy vehicles on flat bed cars, as well as travel the German autobahn to coordinate training densities and to participate in annual and semi-annual training exercises. An added benefit will be the closure of 13 small installations which are expensive to maintain.
CURRENT SITUATION: USAREUR units are stationed at widely dispersed installations constructed before or during World War II (WWII). Brigade units are scattered through numerous, widespread locations severely limiting single force lethality and command and control. Widely dispersed installations and facilities require more overhead than one single consolidated location. Units must pack supplies and equipment to transport combat vehicles at least twice per year 300 kilometers via rail to the Major Training Areas (MTA) in Grafenwoehr and Hohenfels. Management and manning support facilities for these many scattered, small installations drain resources. Most of these small installations are located in exposed positions where proper anti-terrorist (AT) protection measures become costly or impossible to provide. Vehicles are maintained in substandard buildings up to 80 years old. Existing buildings are often categorized as non-usable because they cannot support the requirements

CURRENT SITUATION: (CONTINUED)

of modern equipment. Maintenance facilities cannot accommodate, nor be rebuilt to accommodate, an Abrams tank, and also lack ventilation systems, proper heat and lighting; soldiers lift out drive trains on the apron using three cranes mounted on tow trucks.

IMPACT IF NOT PROVIDED: If this project is not provided, unit readiness, training, command and control, deployability, unit integrity, and material readiness, will continue to be jeopardized. Increased safety hazard and lost productive time associated with movement of equipment and troops will continue.

ADDITIONAL: This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.

NATO SECURITY INVESTMENT: This project is not within an established NATO infrastructure category for common funding, nor is it expected to become eligible in the foreseeable future.

10. MISSION OR MAJOR FUNCTIONS:							
Installations support US Army, Europe and Seventh Army (USAREUR), specifically the Southern European Task Force (SETAF) and 173rd Infantry (ABN) Brigade, a trained and ready force capable of rapidly responding and operating jointly in support of US EUCOM theater strategy. Installations serve as bases for projecting power in and out of EUCOM area of responsibility by providing facilities for training, maintaining, housing, and supporting SETAF and the 173rd IN (ABN) BDE. These units provide flexible, scalable joint task force components for use in expeditionary operations as well as mission, installation support, and quality of life organizations required to maintain a trained and ready force overseas.

REQUIREMENT: (CONTINUED)
accordance with the United States Military, North Atlantic Treaty Organization (NATO) and Host Nation military strategies.
CURRENT SITUATION: There are no existing permanent adequate facilities at Vicenza or Aviano to satisfy this requirement.
IMPACT IF NOT PROVIDED: If this project is not provided, Vicenza Military Community will not be able to provide adequate permanent facilities for the transformation of the US Army at Vicenza, Italy. Soldiers will be required to work and train in substandard and deteriorated facilities, which will adversely effect the morale and retention of highly motivated and highly trained Soldiers.
ADDITIONAL: This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.
NATO SECURITY INVESTMENT: This project is not within an established NATO infrastructure category for common funding, nor is it expected to become eligible in the foreseeable future.

11. REQ: 2,630 PN ADQT: 1,314 PN SUBSTD: 1,316 PN
PROJECT: Construct part of a standard design Brigade Combat Team Complex and Community Support facilities. (Current Mission)
REQUIREMENT: This project is required to support the transformation of the US Army at Vicenza, Italy. This stationing initiative is required to enhance the power projection capability in accordance with the United States National Military, North Atlantic Treaty Organization (NATO), and Host Nation Military Strategies. The maximum barracks utilization is 608 soldiers. The intended utilization is 426 Junior Enlisted, and 91 Sergeants.
CURRENT SITUATION: There are no existing adequate permanent facilities at this installation to satisfy this requirement.
IMPACT IF NOT PROVIDED: If this project is not provided, Vicenza Military Community will not be able to provide adequate permanent facilities to support the transformation of the US Army at Vicenza. Soldiers will be required to live and work in substandard and deteriorated facilities, which will adversely effect morale and retention.
ADDITIONAL: This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.

10.Description of Proposed Construction Construct a standard-design barracks. Primary facility includes barracks with elevators, pile foundation, antiterrorism measures, to include installation of mass notification systems, and building information systems. Supporting facilities will include connections to necessary utilities, security lighting, sidewalks, curbs, gutters, storm drainage, signage, exterior information systems, site amenities and other site improvements. Heating will be provided by dual fuel system. Accessibility for individuals with disabilities will be provided in public areas. Blast mitigation will meet the minimum Department of Defense (DoD) Antiterrorism Standards. Comprehensive building and furnishings related interior design services are required. Low unit costs are based on actual bid results that take into account the favorable bid climate in Korea. Air Conditioning (Estimated 340 kW _r /97 Tons).

<p><u>REQUIREMENT:</u> This project is required to support the USFK Theater Master Plan (USFK TMP) Department of Defense programmed relocation of troops from other camps to Camp Humphreys. This project is a necessary component in meeting the Land Partnership Plan international agreement. It is a necessary component in meeting the Land Partnership Plan international agreement. Maximum utilization is 464 soldiers, and the intended utilization is 208 E1-E4s and 128 E5-E6s.</p> <p><u>CURRENT SITUATION:</u> There are no existing barracks or headquarters buildings that can accommodate the increased number of the soldiers and units.</p> <p><u>IMPACT IF NOT PROVIDED:</u> Delays in constructing this project at Camp Humphreys will impact our ability to re-station US Army units from other areas and prevents us from meeting Secretary of Defense guidance and will place us in violation of the US/ROK international agreement.</p> <p><u>ADDITIONAL:</u> This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders. This project is located on an installation which will be retained by Eighth United States Army for the foreseeable future. The possibility of Host Nation funding has been addressed but sufficient funds from the Host Nation programs are not available to support this requirement.</p> <p>During the past two years, \$9.3M has been spent on sustainment, restoration and modernization (SRM) (formerly known as Real Property Maintenance) of unaccompanied enlisted personnel housing at Camp Humphreys, Republic of Korea. Upon completion of this multi-phased project and other projects approved through FY 2008, the remaining unaccompanied enlisted permanent party deficit is 1,753 personnel at this installation.</p>

10. Description of Proposed Construction This project is Phase 2 of a 2 phase effort. Phase I (PN 63505) was requested in FY07. Primary facilities will include expeditionary-type billets, operational, and maintenance facilities. These structures will be simple, lightweight, and modular to support the requirements of rotational training units. Supporting facilities include anti-terrorism measures, roads, walks, and site improvements. Utility infrastructure includes installation of packaged water and sewer treatment plants, and basic electrical, water, and sewer distribution and storage systems. Supporting infrastructure and initial site work to construct the Base Camp is included in Phase 1.						
11. REQ: 750 PN ADQT: NONE SUBSTD: NONE PROJECT: Construct Base Camp Facilities, Phase 2. (New Mission) REQUIREMENT: This project is required to provide facilities for the initial establishment of a forward operating site for the Joint Task Force East (JTF-E). JTF-E consists of rotational forces deployed into Eastern Europe in support of European Command's Theater Security Cooperation plan. JTF-E Forward Operating Sites are rudimentary bases near training areas and power projection hubs that provide rotational forces immediate training opportunities as well

REQUIREMENT: (CONTINUED)
as the ability to deploy/redeploy to other training sites throughout the region. JTF-E's forward presence will promote US interests and strengthen NATO allies in the region. This project is associated with global defense posture changes.

CURRENT SITUATION: This site has been identified by USAREUR elements as an ideal base camp location to support USAREURs modular conversion and doesn't have the facilities needed to support the JTF-E mission.

IMPACT IF NOT PROVIDED: USAREUR will not be able to complete its restructuring in accordance with the Department of Defense Global Defense Posture Realignment (GDPR) without adequate facilities at this site.

ADDITIONAL: This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. A parametric cost estimate based upon project engineering design was used to develop this budget estimate. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.

NATO SECURITY INVESTMENT: This project is not eligible for NATO infrastructure support, nor is it expected to become eligible in the foreseeable future.

10.Description of Proposed Construction The Secretary of Defense has recommended a total Army increase of 65,000 Active Component (AC) Soldiers over the next five years. This project addresses those essential facilities required to support the increase in Army strength. Construct Brigade Complexes and associated combat support (CS), combat service support (CSS), training, and quality of life facilities worldwide. Primary facilities include brigade headquarters, barracks, battalion headquarters, company operations facilities, dining facilities, command and control facilities, vehicle maintenance shops and ancillary facilities (unit storage, organizational parking, unmanned vehicle maintenance facilities, POL storage, etc). Associated training and quality of life facilities include trainee complexes, training ranges, physical fitness facilities, child development centers, and chapels. All supporting infrastructure such as roadways, utilities, site improvements (fencing, walks, curbs, gutters, lighting, etc.) and demolition are included. Antiterrorism measures are included.						
11. REQ:		NA	ADQT:		NA	SUBSTD: NA

1. COMPONENT ARMY	FY 2008 MILITARY CONSTRUCTION PROJECT DATA	2. DATE 26 JAN 2007
3. INSTALLATION AND LOCATION Worldwide Various Locations, Worldwide Various		
4. PROJECT TITLE Grow the Force-Brigade Complex	5. PROJECT NUMBER 888284	
<p><u>REQUIREMENT:</u> This requirement is needed to support the troop increase requested by the Secretary of Defense. This increase will be accomplished in two ways. First, we plan to make permanent the temporary increase of 30,000 for the AC, then build up from that base in annual increments of approximately 7,000 troops until the AC reaches a level of approximately 547,400 by FY 2012. The strategy grows capacity to build strategic and operational depth across the three components to meet Combatant Command requirements; growing Brigade Combat Teams (BCTs) and Maneuver Enhancement (ME) Brigades (Bdes) with essential Combat Support/Combat Service Support (CS/CSS) enablers; rebalancing to mitigate high demand/low density shortfalls; and ensuring adequate Institutional Army capacity to generate & sustain the force. This growth will allow the Army to increase its surge capability. The stationing planning and MILCON projects to support this Army growth is currently being refined. Site specific level of project detail will be provided by 15 Apr 2007.</p> <p><u>CURRENT SITUATION:</u> The Army has temporary approval to increase its end strength by 30,000 Soldiers. Currently, the Army does not have sufficient adequate permanent facilities to accommodate the Army's requested growth to approximately 547,400 (AC) Soldier end strength.</p> <p><u>IMPACT IF NOT PROVIDED:</u> The Nation depends on the Army to prosecute the Global War on Terrorism and prepare for future contingencies. The Army will be severely hampered without Congressional support for the funding to "Grow the Force". This requirement supports our mission and our people -- delays have operational and quality of life impacts and consequences. Operational impacts include slowing/disrupting the implementation of the modular force, reducing available modular combat forces, and extending reset operations (manning, equipping, training). Quality of life impacts include continued use of overcrowded and substandard barracks, and limited capacity to provide child care and youth services for soldiers and their families.</p> <p><u>ADDITIONAL:</u> All required physical security and antiterrorism/force protection measures will be incorporated. Sustainable principles will be integrated into the development, design, and construction. Joint use potential will be incorporated where feasible. Provisions will be made for persons with disabilities where applicable.</p>

10. Description of Proposed Construction Unspecified minor construction projects which have a funded cost of \$1,500,000 or less, including construction, alteration, or conversion of permanent or temporary facilities as authorized under Title 10 USC 2805. The funded cost limit is \$3,000,000 if the project is intended solely to correct a deficiency that is life threatening, health threatening, or safety threatening.						
11. REQ: NA ADQT: NA SUBSTD: NA						
PROJECT: Minor military construction, worldwide.						
REQUIREMENT: This line item is needed to provide for unspecified projects for which the need cannot reasonably be foreseen nor justified in time to be included in the regular Military Construction, Army program.						
CURRENT SITUATION: These urgent unforeseen projects address high national priorities such as critical mission requirements, environmental protection, life, health, and safety. These projects cannot wait until the next annual budget submission.						
IMPACT IF NOT PROVIDED: If not provided, the Army will not be able to address urgent and unforeseen requirements that arise during the year.

PROJECT: Planning and design funds.						
REQUIREMENT: This funding is required to represent US interests during the planning, design, and construction of projects funded by foreign governments, when US Forces are sole or primary users. The Host Nation Support funds are required to assure that the facilities provided conform to the Services' operation and mission needs, and to US life safety criteria. The Army is the executive agent for the Department of Defense for Host Nation Construction in the Pacific. The programs provide nearly all the new construction in Japan, and much of the new construction in Korea. Host Nation Support funds are also used to oversee projects in Europe and NATO funds recoupment. The US Army Corps of Engineers is responsible for providing the criteria, reviewing designs, and monitoring the construction. The three parts of the Host Nation Support effort are: Criteria Package Preparation defines the functional requirements and specifies the health, fire, operational, functional, and life

Description of Proposed Construction This item provides for: parametric, concept, and final design of major and unspecified minor construction projects including Grow the Force facilities worldwide; value engineering; and the development of standards and criteria for Army facilities in conjunction with the Navy and Air Force.						
11. REQ: NA ADQT: NA SUBSTD: NA						
PROJECT: Planning and design funds.						
REQUIREMENT: This funding is required to provide design and engineering services for regular Military Construction, Army (MCA) and Unspecified Minor projects, including value engineering, and continued development of design criteria and standard designs (conventional functional layouts). This account is dissimilar to any other line item in the Army's MCA budget in that it is reflective of an operations expense, versus a defined scope of a single construction project. Funds will be used by the US Army Corps of Engineers (USACE) districts for in-house designs, Architect-Engineer (A-E) contracts, and administrative support functions. These funds are required for accomplishment of final correction, review, reproduction and advertisement of projects in the FY 2008 program; for advancement to final design of projects

ARMY FAMILY HOUSING
FY 2008 BUDGET ESTIMATE
SUMMARY

(\$ in Thousands)

FY 2008 Budget Request	\$1,162,320
FY 2007 Current Estimate	\$1,271,820
FY 2007 President's Budget Request	\$1,271,820*

PURPOSE AND SCOPE

The FY 2008 Budget Request integrates Base Realignment and Closure (BRAC), Global Defense Posture Realignment (GDPR) and Army Transformation into a fully synchronized program while sustaining the All Volunteer Force (AVF) in the context of the Long War. The Army Family Housing request provides for the minimum levels of support necessary to maintain those programs and services that are essential to recruit and retain the AVF.

The Army Family Housing (AFH) Budget supports the operation, maintenance, leasing, privatization and construction of military family housing worldwide. The FY 2008 Budget Request supports the Department's goal of funding the elimination of inadequate family housing units overseas. The Army's 2008 budget request of \$1,162,320 supports the commitment of the Department of Defense to grow the force and improve military housing for our soldiers and their families.

MAJOR FACTORS

The Army's 2008 budget request of \$1,162,320,000 includes \$277,857,000 (\$11,857,000 Operations and \$266,000,000 Construction) for the "Grow the Force" initiative to support the Department of Defense commitment to improve military housing for our soldiers and their families. The Army's force of Active Component (AC) Soldiers will increase by 65,000 over the next five years. These funds are essential to support the operational requirements for family housing facilities. The nation depends on the Army to prosecute the Global War on Terrorism and prepare for future contingencies. The Army will be severely hampered without Congressional support for the funding to "Grow the Force". This requirement supports our mission and our people. Support for this funding will provide a boost to the quality of life for our soldiers and prevent them from living in deteriorating and insufficient family housing facilities.

* This column reflects the FY07 President's Budget Request.
The FY 2007 Annualized Continuing Resolution level is \$1,253,448.

ARMY FAMILY HOUSING
FY 2008 BUDGET ESTIMATE
SUMMARY (Continued)

Annual changes to inventory assumptions drive program changes in most budget accounts. The FY 2008 Army Family Housing Operations (AFHO) estimate exceeds the FY 2007 President's Budget estimate by approximately \$66M even though the average supported inventory decreases by 2,780 units. This is because anticipated redeployment from Europe to the U.S. has been delayed beyond initial expectations. Most of the cost of the additional FY 2007 inventory is being absorbed within guidance through reductions to the maintenance and repair account during FY 2007. The FY 2008 request reflects the revised cost to operate and maintain an inventory approximately 8,400 units larger than previously anticipated. Although the Army's housing inventory continues to decline as more installations are privatized, domestic leasing will increase until available privatized units and local housing markets match the demand caused by stationing increases at selected bases.

EFFECT OF PRIVATIZATION

The Army continues to make progress in eliminating inadequate family housing and improving the well being of the Army's Soldiers and their families. Our housing privatization program has been so successful that we will continue to privatize family housing in 2008 through the Residential Communities Initiative Program (RCI). As the Army privatizes housing, the AFH government owned inventory decreases. While AFH inventory decreases, Military Personnel Army (MPA) appropriation increases to support payment of the Basic Allowance for Housing (BAH) to Soldiers living in privatized housing. Soldiers then pay rent to the RCI project which provides the revenue stream needed to financially support the development, maintenance, and management of the project.

PROGRAM SUMMARY

Authorization is requested for the performance of certain operation, maintenance, leasing, privatization, and construction activities in support of Army Family Housing in the amount of \$1,162,320 summarized hereafter.

Appropriation of \$1,162,320 is requested to fund:

- a. Family Housing Construction and
- b. Family Housing Operations already authorized in existing legislation.

ARMY FAMILY HOUSING
FY 2008 BUDGET ESTIMATE
PERFORMANCE METRICS

The Army will fund the elimination of all U.S. inadequate family housing by the end of FY 2007 and worldwide family housing by the end of FY 2009. The FY 2008 budget supports the replacement of 107 inadequate foreign units, the demolition of 96 uneconomical foreign units and funds privatization at Ft. Wainwright, Ft. Sill, and Ft. Jackson. Additionally, operational control of family housing at Ft. Jackson and the United States Military Academy (funded in FY 2007) will transfer to the developer in FY 2008. Exhibits FH-7 and FH-8 outline the inadequate elimination of family housing below.

Inadequate Family Housing Inventory

FY 2005, Beginning of Year,
Government Owned Inventory: 69,995 units
Total Inadequate: 44,631 units
Percent Inadequate government owned units: 64%

PROGRAM ASSESSMENT RATING TOOL

The Administration has applied the Program Assessment Rating Tool (PART) to the DoD Family Housing Program. The Housing PART received high scores for purpose and planning. It also revealed that DoD needs to work toward eliminating inadequate housing by 2007, eliminate all out-of-pocket housing expenses, and privatize government-owned housing, where feasible. For more details see Exhibit on the administration's key performance measures on the next page.

EXPECT FEDERAL PROGRAMS TO PERFORM WELL, AND BETTER EVERY YEAR.

LEARN MORE

PROGRAM ASSESSMENT

Defense Housing

DoD's housing program provides housing to military service members and their families. DoD does this in two ways -- by providing Basic Allowance for Housing (BAH) to service members (who find housing in the community or in privatized housing) or by providing members DoD-owned housing.

PERFORMING

Moderately Effective

- **The purpose of the program is clearly defined - - to provide quality housing for our service members.**
- **The program has clear and ambitious goals.** At the end of 2006, DoD had eliminated over 145,000 inadequate units, fewer than projected. At the end of 2006, DoD owned approximately 35,000 inadequate housing units, higher than was projected. DoD continues to address the unique challenges of bringing private and public sectors together to meet the goals of the program.
- **DoD should reduce the federal role by privatizing more government-owned housing.** DoD has reduced the federal role in housing by increasing allowances - - by eliminating service member's average out-of-pocket expenses for housing.

We are taking the following actions to improve the performance of the program:

- Working toward meeting yearly targets so that DoD can eliminate all inadequate housing in the U.S. by 2007.
- Privatizing government-owned housing, where feasible, so that military service members and their families can live in quality housing and reduce the role of government in housing.

AUTHORIZATION AND APPROPRIATION LANGUAGE

AUTHORIZATION LANGUAGE

SEC. 2102. FAMILY HOUSING

(a) CONSTRUCTION AND ACQUISITION. --Using amounts appropriated pursuant to the authorization of appropriations in section 2104(a)(5)(A), the Secretary of the Army may construct or acquire family housing units (including land acquisition) at the installations, for the purposes, and in the amounts set forth below:

State	Army: Family Housing		Amount
	Installation	Purpose	
Germany	Ansbach	138 units	\$52,000,000

(b) PLANNING AND DESIGN.-- Using amounts appropriated pursuant to the authorization of appropriations in Section 2104(a)(5)(A), the Secretary of the Army may carry out architectural and engineering services and construction design activities with respect to the construction or improvement of family housing units in an amount not to exceed [\$16,332,000] \$2,000,000.

SEC. 2103. IMPROVEMENTS TO MILITARY FAMILY HOUSING UNITS.

Subject to Section 2825 of Title 10, United States Code, and using amounts appropriated pursuant to the authorization of appropriations in Section 2104(a)(5)(A), the Secretary of the Army may improve existing military family housing in an amount not to exceed [\$336,859,000] \$365,400,000.

ARMY FAMILY HOUSING

NEW CONSTRUCTION

(\$ in Thousands)

FY 2008 Budget Request	\$52,000
FY 2007 Current Estimate	\$241,800
FY 2007 President's Budget Request	\$241,800

PURPOSE AND SCOPE

This program provides for construction where analysis indicates it will be more economical to build new units rather than revitalize existing Army housing. New units are also built when adequate off post housing is not available. Cost estimates include site preparation, demolition, construction, and initial outfitting with fixtures and integral equipment, along with associated facilities such as roads, driveways, walks, utility systems, and community facilities.

PROGRAM SUMMARY

Authorization is requested in FY 2008 for:

1. Construction of 138 family housing units. After completion of this construction, 138 family housing units will be returned to the Host Nation.
2. Appropriation in the amount of \$52,000,000 to fund construction of 138 family housing units.

A summary of the requested new construction funding program for FY 2008 follows:

10.Description of Proposed Construction Provides whole neighborhood revitalization by replacing stairwell family housing with construction of 138 new units consisting of 84 Junior Non-Commissioned Officer (JNCO) townhouses (74 three-bedroom and 10 four-bedroom), 34 Senior Non-Commissioned Officer (SNCO) townhouses (20 three-bedroom and 14 four-bedroom units), 14 Field Grade Officer (FGO) three-bedroom townhouse units, 5 FGO four-bedroom detached houses and 1 Senior Officer (SO) four-bedroom detached house. Project includes neighborhood amenities and supporting infrastructure built to current standards to replace 138 existing stairwell quarters in 12 buildings that are uneconomical to revitalize and will be returned to the host nation after this project is complete. Construction consists of variously configured townhouse style units that are conventially on-site constructed. Project will provide individual heating controls, hard-wired interconnected smoke and carbon dioxide detectors, garages, storage, patio or deck, fencing, full landscaping, and all equipment and appliances for functional living units. Supporting facility work includes demolition of abandoned infrastructure, new roads and utilities infrastructure and neighborhood amenities. Five percent of these units will be accessible and easily modifiable to accommodate the requirements of the handicapped. Special construction includes dual voltage (110/220), and

						TOTALS	138	25,362

PROJECT: Whole neighborhood revitalization by construction of 138 Junior and Senior Non-Commissioned Officer, Field Grade and Senior Officer family housing units to include neighborhood amenities, energy conservation and supporting infrastructure, and return 138 existing stairwell type apartments to the host nation after construction of the replacement housing. (Current Mission)

REQUIREMENT: This project is required to improve existing family housing conditions and to conform to adequate standards of comfort, habitability, size, safety, energy conservation and to create a viable community housing development at an enduring installation. This development will give Soldiers and families an equivalent housing standard as that provided to CONUS based Soldiers.

CURRENT SITUATION: The U.S. Army Garrison Ansbach is currently served by the family housing inventory at Katterbach and Bleidorn. The existing structures were constructed in the 1950s and are inadequately sized. They have not undergone a major upgrade or renovation since their construction, and all utility systems, doors, windows, roofing, exterior facades, and kitchens and baths are failing from age. To bring these stairwell buildings up to current standards, meeting force protection, fire protection, energy conservation and size standards, replacement construction at Urlas is more cost effective than renovation.

3. INSTALLATION AND LOCATION Urlas Training Area, Germany (Ansbach)		
4. PROJECT TITLE Family Housing Replacement Construction	5. PROJECT NUMBER 66253	
<p><u>IMPACT IF NOT PROVIDED:</u> If this project is not provided, service members will continue to reside in inadequate housing that will continue to deteriorate, with increasing maintenance and energy costs. This adversely affects the health, safety and quality of life of the Soldiers and their families.</p> <p><u>ADDITIONAL:</u> This project has been coordinated with the installation physical security plan, and all physical security measures are included. All required antiterrorism protection measures are included. An economic analysis has been prepared and utilized in evaluating this project. This project is the most cost-effective method to satisfy the requirement. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. The facility will be available for use by other components. Sustainable principles will be integrated into the design, development, and construction of the project in accordance with Executive Order 13123 and other applicable laws and Executive Orders.</p> <p><u>NATO SECURITY INVESTMENT:</u> This project is not within an established NATO infrastructure category for common funding, nor is it expected to become eligible in the foreseeable future.</p>

14. PROPOSED PROJECT						20	34	84	138
15. REMARKS (Specify item number)									
This project does not include demolition of any existing family quarters. However, after completion of construction, 138 existing stairwell apartments in 12 buildings at Stuttgart that are not economical to revitalize will be returned to the host nation.									
Construction consists of:									
	Senior Officer	1	4 Bedroom Unit						
	Field Grade Officer	5	4 Bedroom Units						
		14	3 Bedroom Units						
	Senior Enlisted	14	4 Bedroom Units						
		20	3 Bedroom Units						
	Junior Enlisted	10	4 Bedroom Units						
		74	3 Bedroom Units						

ARMY FAMILY HOUSING
 FY 2008 BUDGET ESTIMATE
 POST-ACQUISITION CONSTRUCTION

(\$ in Thousands)

FY 2008 Budget Request	\$365,400
FY 2007 Current Estimate	\$336,859
FY 2007 President's Budget Request	\$336,859

PURPOSE AND SCOPE

The Post-Acquisition Construction program provides funding for improvement of existing family housing units by renovation or privatization. The housing privatization request provides equity contributions to finance Public-Private Venture (PPV) actions. Traditional revitalization of military family housing units is requested when it is more economical to renovate rather than replace. The proposed investment in privatization and post-acquisition construction will increase the useful life of the revitalized units by 35 years and concurrently reduce maintenance and repair requirements.

In FY 2008, the Army will operate and maintain an inventory of approximately 32,160 family housing units with an average age exceeding 35 years. Many of these units are transitional houses in non enduring foreign locations and will not be revitalized.

The Army continues to emphasize the "whole neighborhood" revitalization concept. Our program considers the requirement of the total neighborhood. This concept includes the dwelling units, supporting utility systems, energy conservation, roads, playgrounds and community facilities. The result eliminates much of the existing stereotypical construction, improves quarters to contemporary standards, and provides functional units in more attractive housing areas. No post-acquisition construction projects at U.S. locations are included in this request.

Privatization will provide revitalized facilities by leveraging the Army's equity contribution, housing property, and the soldier's housing allowance to obtain 50-year business partnerships with private industry for revitalization and sustainment of AFH. Three privatization projects are included in this request.

ARMY FAMILY HOUSING
 FY 2008 BUDGET ESTIMATE
 POST-ACQUISITION CONSTRUCTION (Continued)

No overseas, post-acquisition construction projects are included in this request.

PROGRAM SUMMARY

Authorization is requested for appropriation for whole neighborhood revitalization, privatization and improvements to 3,998 units. Projects exceeding the statutory funding limitation (10 USC 2825) of \$50,000 per dwelling unit (adjusted by the area construction cost factor) are documented by the DD Forms 1391 which follow this summary. These projects are listed in the following table:

<u>Location</u>	<u>Historic</u>	<u>Type</u>	<u>No. of Units</u>	<u>Amount (\$000)</u>
-----------------	-----------------	-------------	-------------------------	---------------------------

Traditional Revitalization: NONE

Projects which do not exceed the statutory funding limitation (10 USC 2825) of \$50,000 per dwelling unit (adjusted by the area construction cost factor) are listed below:

<u>Location</u>	<u>Historic</u>	<u>Type</u>	<u>No. of Units</u>	<u>Amount (\$000)</u>
Privatization:				
Fort Wainwright, AK	Some	All Grades	1,421	25,000
Fort Sill, OK	Some	All Grades	1,415	30,500
Fort Jackson, SC	No	All Grades	<u>1,162</u>	<u>43,900</u>
Subtotal			3,998	99,400
Grow the Force				266,000
Total Post-Acquisition			3,998	365,400

10. Description of Proposed Construction						
<p>These projects provide for both privatization and needed revitalization of family housing units that do not meet current standards for livability, maintainability and energy efficiency. Revitalization projects provide for renewal of the whole neighborhood which considers the dwelling unit and supporting infrastructure. Work within the house considers upgrading kitchens (to include dishwashers, garbage disposals and range hoods) and bathrooms, installation of new half-baths (where required), increasing net living area to provide adequate space, where required, comparable to the private sector, installation of central air conditioning and heating systems including, as required, relocation of ductwork, increased insulation, exterior storage, patios and covered parking. Replacement or installation of supporting infrastructure considers utility distribution systems, storm sewers, roads, road realignment, off street parking, landscaping and recreation facilities.</p>

3. INSTALLATION AND LOCATION Various Locations - Continental and Overseas		
4. PROJECT TITLE Army Family Housing Post Aquisition Construction	5. PROJECT NUMBER	
<p>11. REQUIREMENTS: The many acquisitions of the 1950s and 1960s have left a legacy of houses that are over forty-five years old which require major revitalization. The improvement requirements of the inventory have increased faster than prior years programs have met. Consequently, there is an on going requirement to renew and upgrade quarters including upgrading/replacement of the supporting infrastructure and recreational facilities. Units must be revitalized/improved due to age and obsolescence as contemporary standards have evolved. Since units are fully occupied and in high demand, accomplishing the program requires that a systematic revitalization effort be maintained. Units have deteriorated support systems and size/functionality deficiencies that are not adequate for today's family. Privatization will support this program using alternative authorities for improvement.</p> <p>IMPACT IF NOT PROVIDED: The desired/required improvements to our service members' quality of life will not be realized. Family housing units and supporting systems will continue to be used as is with increasing obsolescence, recurring maintenance costs and unnecessarily high energy use. The 30% energy reduction required by the Energy Policy Act of 2005, Section 109, will not be met. Soldiers and their families will continue to live in quarters that are below acceptable standards, affecting duty performance and adversely impacting on the Army's mission. Without privatization, the President's Management Agenda to bring all family quarters up to current standards will not be achieved.</p>

<p>10. Description of Proposed Construction During FY 2008, the Army will select a privatization partner and initiate the Community Development and Management Plan (CDMP) in preparation for the FY 2009 privatization of family housing at Fort Wainwright, Alaska. Privatization may include renovation, demolition, replacement and/or new construction, environmental mitigation, and operation, repair, maintenance and management of family housing functions. The requested funding will provide for the Army's equity contribution to the project scope. In accordance with 10 USC, Section 2883, these funds will be transferred to the DoD Family Housing Improvement Fund (FHIF) to support privatization of Army family housing.</p> <p><u>PROJECT:</u> Privatization of family housing using alternative authorities for improvement and acquisition of military housing. (Current Mission)</p> <p><u>REQUIREMENT:</u> This funding is required to provide for the Army's financial contribution to support the privatization of family housing. Privatization will improve existing conditions of the inventory to conform to current local standards of adequate size, habitability, safety, and energy conservation and to extend the life of these quarters. It will also provide new family housing and/or demolition where required, and will accelerate the rate at which revitalization is accomplished.</p>

3. INSTALLATION AND LOCATION Fort Wainwright, Alaska		
4. PROJECT TITLE Family Housing Privatization	5. PROJECT NUMBER 66641	
<p><u>CURRENT SITUATION:</u> The existing inventory includes a significant number of units that are in excess of 35 years old and require revitalization and/or replacement in order to bring them up to current standards. The Army's Family Housing Master Plan (FHMP) indicates that none of Fort Wainwright's inventory of 1,421 units are inadequate. There is a projected deficit of 268 family housing units at Fort Wainwright.</p> <p><u>IMPACT IF NOT PROVIDED:</u> If this project is not provided, both officer and enlisted personnel will continue to reside in family housing that requires ongoing renovation and improvement. Privatization will not be accomplished and existing facilities will continue to deteriorate with increased maintenance and operation costs. This will adversely affect the health, safety and quality of life of the occupants.</p> <p><u>ADDITIONAL:</u> Privatization of family housing will provide new construction and revitalization of the existing inventory at a more rapid rate than current procedures and funding levels permit. Privatization will provide renovated/new quarters to standards comparable to housing of similar size and quality as would be available in the local economy. If for any reason privatization cannot be accomplished or is financially infeasible, the Army will execute an improvement project for 100 enlisted and officer family quarters at the programmed amount of this project. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. This facility will be available for use by other components.</p>

<p>10. Description of Proposed Construction The Secretary of Defense has recommended a total Army increase of 65,000 Active Component (AC) Soldiers over the next five years. This project, and others that will be programmed in future years, address those essential family housing facilities required to support the increase in Army strength. Improve and/or construct family housing and associated ancilliary facilities (playgrounds, recreation, etc.) to current standards using traditional construction methods and/or privatization. All supporting infrastructure such as roadways utilities, site improvements (landscaping, fencing, walks, curbs, gutters, lighting, etc.) and demolition are included. Antiterrorism measures are included.</p> <p><u>PROJECT:</u> Improve and/or construct family housing including neighborhood amenities, energy conservation and supporting infrastructure.</p> <p><u>REQUIREMENT:</u> This requirement is needed to support the troop increase requested by the Secretary of Defense. This increase will be accomplished in two ways. First, we plan to make permanent the temporary increase of 30,000 for the AC, then build up from that base in annual increments of approximately 7,000 troops until the AC reaches a level of approximately 547,400 by FY 2012. The strategy grows capacity to build strategic and operational depth across the three components of meet Combatant Command requirements; growing Brigade</p>						

1. COMPONENT ARMY	FY 2008 MILITARY CONSTRUCTION PROJECT DATA	2. DATE February 2007
3. INSTALLATION AND LOCATION Worldwide Various Locations, Worldwide Various		
4. PROJECT TITLE Grow the Force - Family Housing	5. PROJECT NUMBER 889215	
<p><u>REQUIREMENT:</u> (CONTINUED)</p> <p>Combat Teams (BCTs) and Maneuver Enhancement (ME) Brigades (Bdes) with essential Combat Support/Combat Service Support (CS/CSS) enablers; rebalancing to mitigate high demand/low density (HD/LD) shortfalls; and ensuring adequate Institutional Army capacity to generate and sustain the force. This growth will allow the Army to increase its surge capability. The stationing planning and family housing projects to support this Army growth is currently being refined. Site specific level of project detail (scope and cost) will be provided by 15 April 2007.</p> <p><u>CURRENT SITUATION:</u> The Army has temporary approval to increase its end strength by 30,000 Soldiers. Currently, the Army does not have sufficient adequate permanent facilities to accommodate the Army's requested growth to approximately 547,400 (AC) Soldier end strength.</p> <p><u>IMPACT IF NOT PROVIDED:</u> The Nation depends on the Army to prosecute the Global War on Terrorism and prepare for future contingencies. The Army will be severely hampered without Congressional support for the funding to "Grow the Force". This requirement supports our mission and our people -- delays have operational and quality of life impacts and consequences. Operational impacts include slowing/disrupting the implementation of the modular force, reducing available modular combat forces, and extending reset operations (manning, equipping, training). Quality of life impacts include continued use of deteriorating an insufficient family housing and associated facilities for our soldiers and their families.</p> <p><u>ADDITIONAL:</u> All required physical security and antiterrorism/force protection measures will be incorporated. Sustainable principles will be integrated into the development, design, and construction. Joint use potential will be incorporated where feasible. Provisions will be made for persons with disabilities as applicable.</p>		

ARMY FAMILY HOUSING
 FY 2008 BUDGET ESTIMATE
 PLANNING AND DESIGN

(\$ in Thousands)

FY 2008 Budget Request	\$2,000
FY 2007 Current Estimate	\$16,332
FY 2007 President's Budget Request	\$16,332

PURPOSE AND SCOPE

This program provides funding for preparing working drawings, specifications, cost estimates, project planning reports, final design drawings and reviews of construction proposals. Also included are architectural and engineering services supporting new or post acquisition construction projects and costs incurred in developing requests for project proposals. These funds also are used to plan and design future family housing construction projects and family housing energy conservation projects. None of the FY 2008 Planning and Design request will be used to support Housing Privatization Initiatives.

Authorization and Appropriation Request

Authorization requested for \$2,000,000 and appropriation requested for \$2,000,000 in FY 2008 to fund family housing construction planning and design activities excluding Housing Privatization Initiatives.

PROGRAM SUMMARY

Planning and Design funds will provide for final design work on FY 2008 and FY 2009 projects to ensure that construction contracts can be awarded in the respective fiscal years. This funding also provides for studies and updating construction standards and criteria.

The FY 2008 planning and design program supports the Army's continuing emphasis on the whole neighborhood revitalization program. Revitalization projects require a greater degree of planning and design than do new construction projects. This additional design effort is necessary to ensure modernization requirements, including supporting utility systems and infrastructure, are efficiently and effectively integrated into existing structures.

ARMY FAMILY HOUSING
 FY 2008 BUDGET ESTIMATE
 OPERATION, UTILITIES, AND MAINTENANCE

(\$ in Thousands)

FY 2008 Budget Request	\$500,240
FY 2007 Current Estimate	\$424,538
FY 2007 President's Budget Request	\$436,058*

PURPOSE AND SCOPE

Operation Accounts. The operating accounts portion of the program provides for expenses in the following sub-accounts and includes both direct and indirect support, as applicable:

1. Management - Provides resources for family housing management, installation administrative support, and for services provided by Housing Services Office. Referral service provides information to place families into local community housing. It also includes housing requirement surveys, condition assessments of existing housing, and development of family housing construction and repair projects. The Management account also provides for the installation and operation of the Housing Operation Management Systems (HOMES) to support effective housing management. Also includes personnel costs for residual housing staff at privatized housing locations.

2. Services - Provides basic installation service support functions such as refuse collection and disposal, entomology and pest control, snow removal and street cleaning, and the proportional share of fire and police protection.

3. Furnishings - Provides for procurement, management, control, moving and handling of furnishings and household equipment; plus maintenance, repair, and replacement of the existing furnishings and equipment inventory.

4. Miscellaneous - Provides payments to non-Department of Defense agencies for housing units occupied by Army personnel.

Utilities Account. The utilities account includes the costs of heat, air conditioning, electricity, water, and sewage for family housing units.

* This column reflects the FY07 President's Budget Request. The FY 2007 Annualized Continuing Resolution level is \$433,886.

ARMY FAMILY HOUSING
FY 2008 BUDGET ESTIMATE
OPERATION, UTILITIES, AND MAINTENANCE (Continued)

Maintenance Account. The maintenance account provides funding for the following activities required to maintain family housing real property assets:

1. Recurring M&R Dwellings - Includes service calls, interior and exterior painting, between occupancy maintenance, and minor maintenance and repair (M&R) work.
2. Major Maintenance and Repair - Major M&R work continues our revitalization program to extend the useful life of the quarters, reduce future maintenance and utility costs, and increase occupancy in the out years.
3. Exterior Utilities - Includes costs for maintenance and repair of sewer and water lines, primary and secondary electric lines, and other exterior utilities exclusively for use by family housing.
4. M&R, Other Real Property - Includes work on grounds, surfaced areas, tot lots, and other real property serving family housing.
5. Alterations & Additions - Includes low-cost incidental (minor) improvements for less than \$3,000 per dwelling unit. This work is normally performed concurrently with maintenance and repair projects. Also includes modifications to quarters to meet the needs of exceptional family members.

Reimbursement Authority. This account provides authority to incur costs for services and repair of damages to be reimbursed by collection of payments from Federal and non-Federal sources.

 FY 2008 BUDGET ESTIMATE
 OPERATION, UTILITIES, AND MAINTENANCE (Continued)

PROGRAM SUMMARY

Authorization and appropriation are requested for \$488,383,000 for FY 2008. This amount, together with estimated reimbursements of \$18,000,000 will fund the Operation, Utilities, and Maintenance program of \$518,240,000. A summary follows:

(\$ in thousands)

<u>Operation</u>	<u>Utilities</u>	<u>Maintenance</u>	<u>Total Direct</u>	<u>Reimburse- ments</u>	<u>Total Program</u>
139,289	145,366	215,585	500,240	18,000	518,240

AFH O&M Reprogramming

The Army Family Housing Operations and Maintenance summary exhibit includes the net amount and percentage of funds transferred into and out of each account and sub-account during the fiscal year 2006. For FY 2006, a total of \$42M was reprogrammed into and out of the various accounts and sub-accounts. The following exhibit shows the details.

EXHIBIT FH-2 SUMMARY

Operational requirements are a function of the cost-per-unit of supported installations. In general, CONUS installations are less expensive to operate than units located in foreign countries. As the ratio of foreign to U.S. units grows due to the loss of U.S. inventory due to privatization, the average cost per unit increases. In FY 06 the total average U.S. inventory (CONUS plus U.S. overseas) represented 50% of the total owned inventory. By FY 2009, the total U.S. inventory only represents 23% of the total owned inventory and the per unit cost of operations increases accordingly.

ARMY FAMILY HOUSING
 FY 2008 BUDGET ESTIMATE
 OPERATION ACCOUNT

(\$ in Thousands)

FY 2008 Budget Request	\$139,289
FY 2007 Current Estimate	\$144,442
FY 2007 President's Budget Request	\$124,962

Budget Methodology

The Operation Account includes four sub-accounts: management, services, furnishings, and a small miscellaneous account. All Operation sub-accounts are considered "must pay accounts" based on actual bills that must be paid to manage and operate family housing.

The Management sub-account is estimated based on historic, per unit expenditures which are adjusted for pay and non-pay inflation and changes to foreign currency exchange rates. Programmatic adjustments to the FY 2008 estimate include the transfer of field personnel dedicated to RCI management and oversight to the RCI account as well as general reductions to staff and administrative overhead associated with the declining owned inventory.

The Services sub-account provides police and fire protection, trash pickup and other municipal functions. The annual requirement is estimated based on historic, per unit, expenditures which are adjusted for non-pay inflation and changes to foreign currency exchange rates. Programmatic adjustments to the FY 2008 estimate include savings associated with a declining inventory partially offset by the higher cost of operations of the remaining owned inventory which is increasingly at foreign and overseas locations.

The Furnishings sub-account is estimated based on historic regional expenditures adjusted for pay and non-pay inflation and changes to foreign currency exchange rates. Programmatic adjustments to the FY 2008 estimate include savings associated with a declining inventory which are partially offset by the higher cost of operations of the remaining owned inventory at more expensive foreign and overseas locations.

The Miscellaneous sub-account is based on best estimate of anticipated interagency reimbursement (Dept of Defense to Dept of Transportation) for housing provided to Army personnel by the Coast Guard.

ARMY FAMILY HOUSING
FY 2008 BUDGET ESTIMATE
OPERATION ACCOUNT (Continued)

Maintenance and Repair (M&R) requirements are computed using Departmental cost factors provided by the DoD Facilities Sustainment Model(FSM). Costs factors are established at the installation level and converted to per-unit requirements which are then adjusted to budget year estimates by applying non pay inflation, and currency revaluation factors. The resulting average per unit requirement provides for annual recurring and major M&R. The total M&R requirement also includes infrastructure maintenance and priority maintenance previously backlogged for financial reasons. For example, in FY 2007 revised redeployment schedules will result in the support of approximately 4,000 more units than initially envisioned when the FY 2006 -2007 estimate was submitted in 2005. The cost to support these units will be absorbed by redistributing FY 2007 M&R, seriously constraining per-unit expenditures and deferring work until FY 2008 which is being funded to correct the condition.

Utilities requirements are estimated based on historic, per unit, expenditures which are adjusted for non-pay and fuel inflation and changes to foreign currency exchange rates. Programmatic adjustments to the FY 2008 estimate include savings associated with a declining inventory partially offset by the higher cost of operations of the remaining owned inventory which is increasingly at foreign and overseas locations.

Leasing requirements are based on requested lease months as submitted by installations. The requests are validated against historic execution and known programmatic changes, adjusted for pay and non-pay inflation, and changes to foreign currency exchange rates.

Privatization support cost estimates for pay, travel, and contracts at the Headquarters management office and Residential Community Initiative (RCI) sites are based on assigned personnel and workload. Workload is driven by the number of projects in various phases of completion (planning, implementation, and post-privatization). The applied cost factors are based on experience of each phase. RCI projections are reconciled as other accounts by using prior year's adjusted appropriation to include Congressional reductions and rescissions. The Privatization estimate is adjusted for pricing changes (includes non-pay inflation and pay inflation). Program adjustments reflect the number of projects in implementation phase and post-

ARMY FAMILY HOUSING
FY 2008 BUDGET ESTIMATE
OPERATION ACCOUNT (Continued)

privatization portfolio management phase.

Summary of Primary Adjustments in FY 2008 Budget

FY 2008 adjustments are primarily driven by a revised foreign redeployment schedule. While the average inventory decreases approximately 2,800 from FY 2007 to FY 2008, this still represents approximately 4,000 more units in FY 2007 and over 8,400 in FY 2008 than was planned during development of the FY 2006 - 2007 request in January 2005. The additional cost of the retained FY 2007 units will be absorbed within guidance by redistributing funds originally planned for maintenance and repair. The FY 2008 request provides funding sufficient to prevent additional deterioration of the enduring inventory.

A second dynamic affects the pricing of the supported inventory. As CONUS installations privatize, the residual owned inventory increasingly consists of more expensive foreign and overseas housing. In FY 2006, CONUS average owned inventory represented approximately 43 percent of world wide owned housing. By FY 2008 the CONUS share will decline to 25 percent and the average per-unit cost of operations increases accordingly.

ARMY FAMILY HOUSING
 FY 2008 BUDGET ESTIMATE
 OPERATION ACCOUNT (Continued)
 MANAGEMENT SUB-ACCOUNT

	<u>(\$ in Thousands)</u>
FY 2008 Budget Request	\$64,864
FY 2007 Current Estimate	\$77,309
FY 2007 President's Budget Request	\$60,919

The management sub-account provides funding for the continued requirement of salaries, referral services, housing requirements analysis, and project planning. Pricing adjustments in the Exhibit OP-5 are based on OSD prescribed pay, non-pay inflation, and currency factors. Overall, there was a decrease to the management sub-account between FY 2007 Current Estimate and FY 2008 Budget Estimate of \$12,445,000.

EFFECT OF PRIVATIZATION

Installations continue to require a post-privatization housing staff to provide other housing services not related to privatization. However, as the privatization program expands, personnel costs in the management account decline as a result of downsizing the housing work force, in accordance with OPM and union rules. Personnel authorizations in the management sub-account at installations with privatized family housing are based on the number of families requiring other housing services (e.g., referrals, deposit waiver, and community liaison). Overall reduction to the management sub-account for FY 2008 Budget Estimate is \$12,445,000.

As a result of privatization, this account was also reduced in administrative expenses that include supplies, travel, equipment, office furnishings and leases of GSA vehicles. Each privatized location's administrative expenses are reduced for all non-pay expenses and supplies. The reduction to the management sub-account for FY 2008 Budget Estimate is \$2,685,000.

Installations continue to require a post-privatization housing staff to provide project oversight. Personnel costs budgeted in the management sub-account in the past will now be budgeted in the privatization sub-account. The transfer from the management sub-account to the privatization sub-account in FY 2008 Estimate is \$9,134,000.

OPERATION ACCOUNT
MANAGEMENT SUB-ACCOUNT (Continued)

The Management sub-account is adjusted downward by \$2,327,000 to account for U.S. and foreign manpower drawdown associated with the 2,780 average unit inventory decrease. The Status of Forces Agreements with European nations permits foreign national personnel to remain on the payroll for as long as 440 days after official notification of garrison closure. This requirement of continuing to pay personnel at closed garrisons prevents immediate payroll cost savings in the Management sub-account.

 SERVICES SUB-ACCOUNT

(\$ in Thousands)

FY 2008 Budget Request	\$29,500
FY 2007 Current Estimate	\$30,841
FY 2007 President's Budget Request	\$26,726

The FY 2008 request is based on the required level of support for refuse collection, street cleaning, police and fire protection, entomology and pest control, and custodial services. Pricing adjustments in the Exhibit OP-5 are based on OSD prescribed non-pay inflation factors. The FY 2008 estimate includes savings associated with a declining inventory partially offset by the higher cost of operations of the remaining owned inventory which is increasingly at foreign and overseas locations. The Services sub-account supports increased volume of refuse collection and entomology services associated with between unit occupancy as U.S. personnel in Europe are repositioned to U.S. locations.

EFFECT OF PRIVATIZATION

Program decrease to the Services Account is due to inventory reduction adjustments reflected by the average number of units reduced including privatization. The Services sub-account is reduced by two million dollars due to reduction of inventory.

 FURNISHINGS SUB-ACCOUNT

	<u>(\$ in Thousands)</u>	
FY 2008 Budget Request		\$31,940
FY 2007 Current Estimate		\$34,726
FY 2007 President's Budget Request		\$36,687

The furnishings sub-account is primarily used for procuring, controlling, managing, moving and handling, maintaining, and repairing household equipment (i.e. refrigerators, ranges, and where authorized at OCONUS locations, washers and dryers) for family quarters throughout the Army. In addition, furniture items such as beds, tables, dressers, etc., are authorized for OCONUS locations.

Pricing adjustments in the Exhibit OP-5 for this account are based on OSD prescribed pay and non-pay inflation factors. Budget decreases are due to reductions in total worldwide inventory. However, the inventory draw down results in a higher percentage of owned inventory at more expensive foreign and overseas locations with consequent increase in per unit costs of operations.

EFFECT OF PRIVATIZATION

Housing privatization impacts furnishings due to the fact that CONUS housing inventory is reduced when privatized. This reduced inventory is taken into account as stated above.

(\$ in Thousands)

FY 2008 Budget Request	\$12,985
FY 2007 Current Estimate	\$1,566
FY 2007 President's Budget Request	\$ 630

The Miscellaneous sub-account includes funds for payment to non-Department of Defense agencies for housing provided to U.S. soldiers. The FY 2008 request will fund housing provided by the U.S. Coast Guard (USCG) for Army soldier families in California, New Jersey, Massachusetts, Puerto Rico, Ohio, and Florida. Pricing adjustments in the Exhibit OP-5 are based on OSD prescribed non-pay inflation factors.

The Grow the Force Initiative provides for \$11,857,000 that will be distributed to fund FY 2008 AFH(O) requirements.

EFFECT OF PRIVATIZATION

The housing privatization program has no impact on the Miscellaneous Sub-account.

 MAINTENANCE AND REPAIR ACCOUNT

	(\$ in Thousands)
FY 2008 Budget Request	\$215,585
FY 2007 Current Estimate	\$131,768
FY 2007 President's Budget Request	\$204,963*

The value of family housing assets maintained by the Army exceeds \$8.3 billion in replacement costs. Ensuring that these facilities can be continuously occupied requires sound property management and timely recurring maintenance for preservation and protection of this major investment.

The program adjustment of -\$73,195,000 to the FY 2007 budget request reflects the reprogramming that will be required to cover other must fund operation accounts for the European drawdown that did not occur as planned. This will bring Army to a lower level of sustainment than FY 2006 on a per unit basis thus causing further deterioration to enduring housing. Program adjustments of \$81,825,000 to the FY 2008 budget request will stop deterioration and also provide funding for deferred FY 2007 requirements.

EFFECT OF PRIVATIZATION

The Army has maintained its inventory of owned housing at minimal essential levels for many years. This has kept them safe for habitation but has deferred needed major maintenance, resulting in deterioration. The Army chose to take advantage of the housing privatization authority granted by Congress to eliminate inadequate housing in the United States. The privatization program allows the Army to work as a partner with private developers to replace/revitalize housing much quicker than Army funds would allow. At end state, and after all privatization has been completed, the Army will retain an owned inventory of approximately 9,000 units worldwide. As the inventory is reduced, and funds are shared among fewer units, per-unit funding can be increased.

* This column reflects the FY07 President's Budget Request.
 The FY 2007 M&R Annualized Continuing Resolution level is \$202,792.

ARMY FAMILY HOUSING
FY 2008 BUDGET ESTIMATE
GENERAL/FLAG OFFICER QUARTERS (GFOQ)
ESTIMATED MAINTENANCE AND REPAIRS
EXCEEDING \$35,000 PER DWELLING UNIT

The projects list in this section is provided in accordance with the reporting requirement stated in Public Law 109-114, Section 124, Military Quality of Life and Veterans Affairs Appropriations Act, 2006. This section provides information regarding the anticipated costs for those GFOQ where maintenance and repair obligations in FY 2008 are expected to exceed \$35,000 per dwelling unit.

The Army's long-term GFOQ management includes privatization of selected units in the United States, and whole house renovations for units to be retained long-term. Additionally, large historic units that are uneconomical to retain are being considered for alternative uses. Thus the Army's GFOQ plan for FY 2008 includes forty-seven GFOQs with a total maintenance and repair cost that exceed \$35,000 per dwelling unit, totaling \$5,516,000. Maintenance and repairs include recurring work (service calls, preventive maintenance, and routine work between occupancy), as well as major repairs.

In those quarters designated as historic, major work is coordinated with the appropriate State Historic Preservation Office. Most of the Army's GFOQ were built prior to any Congressional size limitations and are generally larger than more contemporary structures. The Army has stewardship for historic dwelling units and a legal responsibility under the provisions of the National Historic Preservation Act, P.L. 89-665 as amended, to preserve and maintain these units. Deferring required repairs will accelerate the rate of deterioration, increase the final cost of repairs, and preclude compliance with Congressionally directed preservation responsibilities.

Experience has shown that it is more cost effective to execute one large repair project on a unit to eliminate the deficiencies, in lieu of programming multiple smaller projects spread over several years. The Army's project review and approval process eliminates unnecessary maintenance and repair. The requested repairs are necessary to ensure that the quarters are maintained in a safe, sanitary and livable condition. Failure to make these repairs will critically impact the condition of quarters and may render them uninhabitable.

FY 2008 Budget Request	\$145,366
FY 2007 Current Estimate	\$148,328
FY 2007 President's Budget Request	\$106,133

This program provides for utility services for Army Family Housing. Services include electricity, natural and propane gas; steam/hot water, fuel oil, coal, water and sewage.

The annual energy consumption reduction goal of two percent is reflected in the program. The energy conserving repair and improvement projects completed in prior years will continue in helping to achieve the energy reduction goals.

Fuel price adjustments and non-pay inflation are computed at the OSD prescribed rates.

EFFECT OF PRIVATIZATION

Inventory reductions are due to privatization and continuing efforts to divest housing which is excess to requirements or is not economically feasible to repair. The FY 2008 budget request is reduced by \$4,454,000 due to inventory reductions.

FY 2007 President's Budget Request	\$214,781

PURPOSE AND SCOPE

The purpose of the leasing program is to provide family housing at both domestic and foreign locations when additional housing is needed to satisfy a housing deficit and the local economy cannot provide adequate support. The leasing program, authorized by 10 U.S.C. 2828, provides for the payment of rent, operating, and maintenance costs of privately owned quarters assigned to military families as government quarters. The program also includes funds needed to pay for services such as utilities, refuse collection, and maintenance when these services are not part of the contract agreement.

The Army continues to rely on the private sector to meet the majority of housing needs. Where private sector rental markets cannot meet Army requirements, and cost effective alternatives do not exist, short and long-term leases are utilized. In high cost areas and overseas, the Army leases housing that the service members cannot ordinarily afford.

PROGRAM SUMMARY

Authorization is requested for the appropriation of \$206,129 to fund leases and related expenses in FY 2008. A summary of the leasing program follows:

<u>Lease Type</u>	<u>FY2006 (Actual)</u>		<u>FY2007 (Current Est)</u>		<u>FY2008 (Request)</u>

LEASING ACCOUNT (Continued)

JUSTIFICATION:

Domestic Leasing: The domestic leasing program provides temporary housing for Army families pending availability of permanent housing. In FY05, this program began increasing as new Army Modular Force Brigade Combat Teams started to stand up. This is particularly true at Fort Drum and Fort Wainwright where there are significant shortages of housing. This trend of increasing domestic leases will continue until RCI projects and local housing markets catch up to demand in these and other areas such as Forts Riley, Carson, and Bliss. Increases in Independent Duty leases for geographically displaced soldiers and families from the US Army Recruiting Command, Cadet Command, and the Active Components/Reserve Component programs are expected due to plus-ups in the number of Recruiters and expansion of the program to Corporal (E4) Recruiters.

Section 2835: The Army leases family housing at seven installations under the provisions of 10 U.S.C. 2835, Long Term Leasing of Military Family Housing to be constructed (formerly known as Section 801 housing). Under this program the Army leases family housing units from a private sector developer for up to 20 years. The units are assigned as military housing to soldiers and their families. This program helped reduce our CONUS family housing deficit at installations where Army families were the most seriously affected by housing shortages. Funds are requested to continue payment of lease costs and operation and maintenance expenses. The FY 2008 budget request reflects a substantial decrease due to the expirations of domestic Section 2835 Leases and further reductions due to expirations will be seen during FY 2009. Seventy-five percent, or about 3,000 units, of the original 4,080 Section 2835 leases will have expired by FY 2008 year-end.

Foreign Leasing: The FY 2008 total foreign leasing program request consists of 6,249 leased units. The majority of foreign leases are in Germany. Approximately 83 of these leases comprise the Governmental Rental Housing Program (GRHP). The Army negotiates, executes and manages the lease contracts, and assumes responsibility for paying the costs.

ARMY FAMILY HOUSING
FY 2008 BUDGET ESTIMATE
LEASING ACCOUNT (Continued)

PROGRAM ADJUSTMENTS

The Independent Duty lease program had to be calibrated to reflect increased demands due to the finalization of basing decisions and plus-ups in the U.S Army Recruiter program. These fact-of-life calibrations eliminated previously planned reductions anticipated in FY 2005 and FY 2006. Additionally, extreme volatility in the utility/energy sectors of the economy tended to negate any reductions in Independent Duty Leases that might have been achieved due to BAH increases.

EFFECT OF PRIVATIZATION

Housing privatization program has no effect on the leasing account, because current plans do not include leases in any privatization project.

 FY 2008 SUMMARY SHEET FOR HIGH COST LEASES

<u>COUNTRY</u>	<u>TOTAL LEASES</u>	<u>HIGH COST LEASES</u>	<u>FOREIGN CURRENCY</u>	<u>FY 1988 EXCHANGE RATE</u>	<u>FY 2008 BUDGET RATE</u>	<u>FY 2008 THRESHOLD</u>
Belgium	726	15	Franc	42.77	0.8259 (Euro)	\$48,742
Netherlands	523	2	Guilder	2.33	0.8259 (Euro)	\$48,607
Qatar	42	1	Riyal	3.64	** (Riyal)	\$37,969

The threshold for classifying foreign leases as high cost leases is determined by first adjusting the \$20,000 authority for CPI changes. If the country is a member of the European Common Market (ECM) then the CPI-adjusted \$20,000 authority is multiplied by the conversion-to-Euro factor (FY 1988 currency rate divided by the official ECM conversion rate) and then further adjusted by the Euro budget rate. For non-ECM countries, the CPI-adjusted \$20,000 authority is adjusted for exchange changes since FY 1988. Leases exceeding a country's threshold are counted against the Army's high cost leases allocation.

Example: Belgium Franc

<u>\$20K adj. for CPI</u>		<u>FY 1988 Rate</u>		<u>Permanent Belgium Franc to Euro Conversion Rate</u>		<u>FY 2008 Euro Budget Rate</u>		<u>FY 2008 High Cost Threshold</u>
\$37,969	x	42.77	÷	40.3399	÷	0.8259	=	\$48,742

** Budget rate has not been established. Amount shown in unadjusted U.S. dollars.

Note: Other Foreign Support Programs (which include Foreign Area Officer Leases, Offices of Defense Cooperation, and School of Other Nations Program leases) participate in the Department of State Housing Pool and are not subject to the maximum lease amounts cited for foreign leases in Section 2828(e)(1) of Title 10, United States Code. Clarification of Participation in Department of State Housing Pools is discussed in Section 2834 of Title 10, United States Code.

FY 2007 Current Estimate	\$25,990
FY 2007 President's Budget Request	\$25,990

MHPI Background

The Department of Army continues to employ the tools authorized by the Military Housing Privatization Initiatives (MHPI) Act to implement an aggressive family housing privatization program. The goal of this program is to improve the well being of Army families by providing quality, affordable family housing in the United States (U.S.). This program, the Residential Communities Initiative (RCI), is a key component of the Army's strategy to ensure long term sustainment of quality residential communities for soldiers and their families.

The Army selects highly qualified private sector business partners to construct, renovate, repair, maintain, and operate family housing units, grounds, and other community facilities in the family housing area. The Army and the developer negotiate a comprehensive Community Development and Management Plan (CDMP). The CDMP includes the development scope and schedule, management and operations plan, and financing plan. Following Congressional approval of the CDMP, the Army and the developer execute final business agreements defining the partnership. The agreements include a ground lease of the family housing footprint, conveyance of housing units and other facilities to the developer, and an operating agreement describing the partners' responsibilities. Typically, the partnership agreement is for a 50-year period with a 25-year option. The Army maintains oversight of the project through a rigorous portfolio management process that tracks compliance with the CDMP to ensure Army families are being provided adequate housing. The Army also monitors the financial health and stability of the project as well as various performance metrics to protect the government's interest.

ARMY FAMILY HOUSING
 FY 2008 BUDGET ESTIMATE
 MILITARY HOUSING PRIVATIZATION INITIATIVE (MHPI) (Continued)

RCI Program Status

At the end of Fiscal Year 2007, the Army transitioned family housing to privatized operations at 36 locations. The funded end state at these locations is 76,300 homes. The total investment during the initial development period of these projects is over \$10.1 billion, including Army investment \$955 million. The initial development period, which varies from 3-10 years, is the timeframe in which all inadequate homes in a project are renovated or replaced and construction of additional units is completed.

In FY 2008, the Army will transition two projects to privatized operations - U.S. Military Academy, NY, (subject to FY 2007 appropriations), and Fort Jackson, SC (subject to FY 2008 appropriations). These projects will increase the end state inventory to 78,426 homes, at 38 installations.

The total RCI program will expand to 45 locations, with an end state inventory of 86,273 family homes - 99% of the on-post family housing inventory in the U.S. (See details at Exhibit FH-6.)

Construction Funds for MHPI

The Army Family Housing Construction (AFHC) budget request for FY 2008 includes \$99.4 million for the government investment in family housing privatization projects at three installations. The 1391 Forms are included in the AFHC improvement section of this book.

Fort Jackson, SC,	\$43.9 million
Fort Sill, OK,	\$30.5 million
Fort Wainwright, AK	\$25.0 million

 FY 2008 BUDGET ESTIMATE
 MILITARY HOUSING PRIVATIZATION INITIATIVE (MHPI) (Continued)

Explanation of Budget Request

The Army Family Housing Operations (AFHO) budget request for FY 2008 includes \$36.55 million for RCI program management and operations. Funding will support civilian pay, travel, environmental and real estate surveys, training, real estate and financial consultant services, procurement costs associated with selecting the development partner, fees to the selected developers for preparation of CDMPs, and oversight of the privatized housing portfolio.

The budget for FY 2008 includes the transfer of spaces and funds for installation personnel with responsibility for oversight of the privatized family housing inventory. These spaces and funds are being transferred from the family housing management account.

The budget request is based on cost factors associated with staffing and workload projections. Workload is driven by the number of projects in various phases of development such as planning, solicitation, preparation of development plans, transition, and post-closing portfolio management. The applied cost factors for work elements of each phase are based on experience and/or established fees.

The table below summarizes FY 2008 RCI program costs (\$ millions).

Program Management and Implementation	\$17.22
Environmental/Real Estate/Procurement (U.S. Army Corps of Engineers Services)	\$ 5.41
Community Development Management Plan Award Fees	\$ 1.05
Real Estate and Finance Advisory Services	\$ 6.17
Portfolio Management Support	\$ 6.70
 Total	 \$36.55

HOMEOWNERS ASSISTANCE FUND, DEFENSE
FY 2008 BUDGET ESTIMATE
SUMMARY

	<u>(In Thousands)</u>
FY 2008 Program/Appropriation	\$3,803/ -0-
FY 2007 Program/Appropriation	\$3,143/ -0-

Program and Scope

This fund finances a program for providing assistance to homeowners by reducing their losses incident to the disposal of their homes when the military installations at or near where they are serving or employed are ordered to be closed or the scope of operations is reduced. It was established in recognition of the fact that base closure and reduction actions can have serious economic effects on local communities. Military, federal civilian personnel and Non-appropriated Fund employees, who are required to relocate as a result of or during such actions, frequently cannot dispose of their homes under reasonable terms and conditions, and suffer severe financial hardship.

In order to determine the effect of the closure or reduction action on local communities, a Market Impact Study (MIS) is performed. The MIS addresses real estate market and overall economic conditions relative to the closure or reduction action, and includes appraisals of area properties before and after the announcement. Factors in determining market impact include: a significant decline in real estate market value; significant increases in inventory of unsold houses, average number of days on the market; foreclosures; decrease in home sales; and inability of affected personnel to sell homes for the amount of the existing mortgage(s). If the MIS demonstrates sufficient impact on the market and establishes a causal relationship, a program is implemented. Eligible applicants may be reimbursed for certain losses resulting from the sale of their home.

Benefits under the program include payment of partial compensation for losses sustained in the private sale of the dwelling; payment of the costs of a judicial foreclosure of a mortgage; or purchase of a dwelling by liquidating or assuming the outstanding mortgage(s).

Although the program provides for acquisition of dwellings, the Government does so only for the accommodation of the applicant. The homes are then resold by the Government. Every effort is made to insure that each applicant is treated equally and receives the maximum benefits under the law as rapidly as practicable, but with a minimum expenditure of time and money for administration.

Program Summary

The FY 2008 budget requests no additional authorization of appropriations and appropriations to fund Homeowners Assistance Fund program expenses. Total program estimate for FY 2008 is \$3,803,444 and will be funded with revenue from sales of acquired properties, and prior year unobligated balances. Program expenses include payments to homeowners for losses on private sales; cost of judicial foreclosure; property acquisition by liquidating and/or assuming outstanding mortgages; partial payment of homeowners' lost equity on government acquisitions; retirement of debt after sale of properties when the government assumes mortgages; and administrative expenses.

The Homeowners Assistance Fund, Defense (HOA) is a non-expiring revolving fund. The Program Financial Summary chart that follows shows that the fund receives funding from several sources: appropriations, borrowing authority, reimbursable authority, prior fiscal year unobligated balances, appropriation transfers, revenue from sale of acquired properties, and recovery of prior year obligations. The fund is not a profit-making endeavor. Although the proceeds from the sale of homes are returned to the fund, this revenue does not always replenish it nor totally fund projected requirements. Since the Homeowners Assistance Fund is not self-sustaining, periodic appropriated funds are required to maintain its solvency as a revolving fund. In the past, Congress has authorized the transfer of funds from the BRAC account to the Homeowners Assistance Fund.

Program estimates indicate the current HAP financial condition requires no additional funding in FY 2008. This estimate is based on BRAC05 identified requirements from unit restationing, base realignments and closures. DoD plans for infrastructure and staff reductions may increase HAP costs in the future.
