Part I – Purpose and Scope

This account provides funding for design and construction of full-scale chemical agent-destruction pilot plant facilities and associated projects to upgrade installation support facilities and infrastructures required to support the Assembled Chemical Weapons Alternatives (ACWA) portion of the Chemical Demilitarization Program. This account was established starting in FY 2005 to comply with Section 141 (b) of the FY 2003 National Defense Authorization Act.

Part II – Justification of Funds Required

The funds requested in this budget submission are required to carry out the Congressional mandate of Public Law 99-145 and support the commitments of this nation under the Chemical Weapons Convention (CWC). The Chemical Demilitarization Program is this nation's response to the mandate of public law and commitments under the CWC. The major milestones anticipated for the ACWA Program during FY 2013 are defined primarily for the construction phase as shown in Part III of this document.

The original FY 2013 military construction (MILCON) funding request for the ACWA program was $151M. However, the program received an additional $36,434M of reprogrammed FY 2010 MILCON funding in FY 2013 for the Blue Grass Chemical Agent-Destruction Pilot Plant (BGCAPP).
This document and the budget exhibits contained herein provide justification for FY 2014 financial requirements in support of the ACWA portion of the Chemical Demilitarization Program. The FY 2014 funding increment request consumes the remaining portion of the $746M MILCON authorization for BGCAPP. No additional MILCON funds will be requested in future years. Requirements for this Program, other than those addressed herein, are budgeted in the Chemical Agents and Munitions Destruction, Defense appropriation.

The costs for facilities construction for each chemical agent-destruction pilot plant to be built are based on site-specific design criteria and depot infrastructure requirements. These requirements include planning, acquisition, construction and other supporting activities necessary to construct the destruction facilities.

**Part III — Program Descriptions and Milestones**

The Assembled Chemical Weapons Alternatives (ACWA) program is a separately managed part of the Chemical Demilitarization Program, responsible for implementing alternative technologies for the destruction of the chemical weapons stockpile at the Pueblo Chemical Depot in Colorado and the Blue Grass Army Depot in Kentucky.

In 2008, Public Laws 110-116 and 110-181 mandated that the U.S. chemical weapons stockpile must be destroyed by the deadline established by the CWC and under no circumstances later than December 31, 2017. In response, DoD submitted the May 2009 Semi-Annual Report to Congress on progress toward destruction of the U.S. stockpile of lethal chemical agents and munitions. In that report, DoD stated its proposed plan to seek additional resources to (in part) “accelerate the ACWA program schedule toward completing destruction of an additional eight percent of the U.S. stockpile at Pueblo in 2017 and the remaining two percent of the U.S. stockpile at Blue Grass in 2021”. In June 2011, DoD certified a restructured ACWA program pursuant to 10 U.S.C 2433a. In February 2012, the Program Manager position was changed to a Program Executive Officer (PEO) position. In March 2012, the ACWA program received Milestone B approval and an approved Acquisition Program Baseline that reflects revised cost and schedule estimates. The restructured ACWA program and the PEO’s estimates underlying the restructured program are the basis
for the program milestones and funding requirements reflected in this document. In July 2012, permanent orders were signed to re-designate the U.S. Army Element, ACWA to the Program Executive Office (PEO), ACWA effective 1 October 2012.

The Pueblo Chemical Agent-Destruction Pilot Plant (PCAPP) requires no new MILCON funding in FY 2014. The PCAPP milestones to be accomplished in FY 2014 will be funded with FY 2013 and prior-year MILCON funds.
**Major Milestones** for Assembled Chemical Weapons Alternatives Program are as follows:

**Pueblo Chemical Agent-Destruction Pilot Plant (PCAPP):**

- Complete plant modifications to meet Destruction/Removal Efficiency air emission criteria 4th Qtr FY 2013
- Continue Explosive Destruction Technology infrastructure support 2nd Qtr FY 2014

**Blue Grass Chemical Agent-Destruction Pilot Plant (BGCAPP):**

Primary Facility and Balance of Construction, Field Activities March 2008 to FY 2017

- Complete construction, Energetic Neutralization Reactor Systems September 2010
- Complete construction, Agent Neutralization Reactor System December 2011
- Complete construction, Energetics Batch Hydrolyzer February 2012
- Complete construction, Rocket Cutting Machine 2nd Qtr FY 2013
- Complete construction, Rocket Shear Machine 1st Qtr FY 2014
- Begin construction, Entry Control Facility 2nd Qtr FY 2014
- Complete construction, Control and Support Building 3rd Qtr FY 2014
- Begin Chemical Limited Area upgrades 3rd Qtr FY 2014
- Complete construction, Personnel Maintenance Building 4th Qtr FY 2014
- Complete construction, Utility Building 4th Qtr FY 2014
- Begin construction, Gas Mask Storage Building 4th Qtr FY 2014

**BGCAPP Explosive Destruction Technology (EDT):**

- Award EDT design (dependent on NEPA action) 1st Qtr FY 2014
- Finalize EDT design (dependent on NEPA action) 4th Qtr FY 2014

10. Description of Proposed Construction

Construct a Chemical Agent Destruction Pilot Plant facility complex using incremental appropriations against a total authorization level of $746.000 million. The FY 2014 budget request is for increment XIV PN 72654 ($122,536 million) which consumes the remaining portion of the $746.000 million authorization. MDB changes since last submission reflect development of an EDT initial design and infrastructure, estimated cost of $5.000 million. Previous appropriations are as follows: FY 2000, Increment I, PN 21994 ($0.000); FY 2002, Increment II, PN 40845 ($4.315 million); FY 2003, Increment III, PN 47847 ($10.300 million); FY 2004, Increment IV, PN 50552 ($16.632 million); FY 2005, Increment V, PN 51027 ($37.094 million); FY 2006, Increment VI, PN 58391 ($0.000); FY 2007, Increment VII, PN 58392 ($89.157 million); FY 2008, Increment VIII, PN 59800 ($69.017 million); FY 2009, Increment IX, PN 59801 ($67.218 million); FY 2010, Increment X, PN 67602 ($59.041 million); FY 2011, Increment XI, PN 67703 ($59.974 million, requested); and FY 2013, Increment XII, PN 67605 ($59.283 million). Additionally, the program received $36.434 million of reprogrammed FY2010 funding in Dec 2012. This project will provide for the design and construction of toxic chemical munitions demilitarization (demil) complex based on
DESCRIPTION OF PROPOSED CONSTRUCTION: (CONTINUED)
neutralization followed by supercritical water oxidation (SCWO) as identified in the restructured Assembled Chemical Weapons Alternatives program certified on 14 June 2011. The work is being executed under a performance based design-build-operate cost reimbursement contract. Work includes a munitions demilitarization building (MDB) with blast containment areas, an adjoining control and support building, a corridor connecting the munitions container handling building, MDB filters, SCWO process building, hydrolysate storage tank area, a utility building with steam boilers, chilled water equipment, bulk chemical storage area, a personnel and maintenance facility with change rooms, maintenance storage, medical treatment area, a combination maintenance/warehouse building, personnel support building, gas mask storage building, chemical analysis laboratory with filter system, entry control facility, treaty compliance office building, access road and access control point, access control building, badge building, munitions storage magazines, toxic maintenance building, munitions transportation equipment storage building, an explosive destruction technology area for processing over-packed and reject munitions, and a fire station. Features include blast containment doors and gates, room entrance airlocks, fire detection and suppression.

11. REQ: NONE     ADQT: NONE     SUBSTD: NONE

PROJECT: Design and construct an Assembled Chemical Weapons Alternatives approved toxic chemical agent munitions demilitarization facility. (New Mission)

REQUIREMENT: This project is required to provide the capability to demilitarize and dispose of the toxic chemical agents and munitions stored at the Blue Grass Army Depot (BGAD) Chemical Activity in a safe, environmentally acceptable manner. Congress has mandated the disposal of the existing unitary chemical stockpile and the Army submitted an implementation plan to Congress which cites this facility as an integral and essential part of the chemical stockpile disposal program.

CURRENT SITUATION: Rockets and projectiles containing lethal chemical agents are stored in igloos at the installation. Some of these munitions are currently deteriorating at an accelerated rate. These munitions are of no strategic value but they must be safely stored and inspected so that there is no risk to the public or the environment. The monitoring and surveillance costs for safe storage continue to accrue. No other acceptable disposal facilities are available.

IMPACT IF NOT PROVIDED: If the Chemical Agent Destruction Pilot Plant project is not provided, the Army will not comply with the Congressional mandate for chemical munitions stockpile disposal. Also, maintenance and surveillance costs will continue to accumulate. The threat to the health of Depot employees and to the environment will continue.

ADDITIONAL: This project has been coordinated with the installation physical security plan, and all required physical security measures are included. Anti-terrorism/force protection measures have been designed as required. This project is mandated by Congress and is exempt from preparation of an economic analysis.

12. SUPPLEMENTAL DATA:

A. Estimated Design Data:
   (1) Status:
      (a) Date Design Started................................. SEP 2003
      (b) Percent Complete As Of January 2013............. 100.00
