| <p><b>Justification:</b><br/>           This program is included in the OPA Budget Line Consolidation. In FY 2025 Base Support Communications (BU4160) and Emergency Management Modernization Program (BU8000) were consolidated into the new Base Emergency Communications (B74000) program.</p> <p>This modernization will converge legacy stand-alone LMR systems at each location into a regionalized architecture and enable synchronization with FRBN, CAD, NG-911 and EMWN sites where capabilities currently exist.</p> <p>Note: Funding will also procure the hardware/software along with necessary cybersecurity requirements to interoperate and provide secure and reliable digital communications to assist military and civilian emergency personnel with emergency management operations. Hardware and software components include towers, speakers, switches, routers and relays that leverages BECS capabilities to modernize and optimize CAD, NG-911, LMR, FRBN and EMWN for interoperability with multiple mutual aid partners and federal agencies.</p> |                                   |                |                                               |                         |                        |                                                                                  |                        |                |                |                |

**Description:**  
All Information Technology (IT) procurements consist of Commercial-off-the-Shelf COTS solutions; all quantities and unit costs vary by project, system configuration, and site.

This program provides engineering, quality assurance, and IT infrastructure (common user voice, data, audio/visual systems and networks) in support of Military Construction Army (MCA) and Sustainment, Restoration, and Modernization (SRM) projects. It supplies non-tactical telecommunications equipment and engineering services for Army base operations. When required due to MCA or SRM projects, this program provides upgrades to regional or Theater IT infrastructure, as well as physical plant infrastructure that directly support those IT assets. This program delivers standardized operational processes and procedures, providing the Army with consistent integration, synchronization, and delivery of voice, data, imagery, applications, and network capabilities down to the individuals in both the operating force and generating force Army- wide. In conjunction with MCA or SRM projects, this program also provides funding for organization-specific command and control IT requirements necessary to equip a new or modernized facility to a mission- ready state ahead of the physical relocation of the occupant organization.

PROPONENT/MISSION IT-MCA/PHYSICAL RELOCATION (B31510):  
This program funds organization-specific mission unique command and control IT requirements necessary to relocate and equip an organization in conjunction with MCA or SRM projects. These may include specific IT requirements to facilitate connectivity from building infrastructure to end user equipment, items for classrooms, computers, teleconferencing systems, display/knowledge walls, telephone equipment, and other mission partner or above SIPR networks. This program consolidates individual organizational requirements to provide a deliberate planned programmatic approach to procure mission essential IT equipment and includes the following large-scale projects.

INTELLIGENCE & SECURITY COMMAND (INSCOM): This provides for mission unique IT equipment supporting the renovation of the Nolan Building Phase IV at Fort Belvoir, Virginia to provide Sensitive Compartmented Information Facility (SCIF) space for INSCOM HQ, Military Intelligence Readiness Command (MIRC), and the 1st Intelligence Operations (IO) Command. The renovation will include specialized operations space, equipment storage, classrooms, conference rooms, office and admin support, MIRC visitor control and SCIF entry port area, loading dock and material management areas.

US ARMY CYBER COMMAND (ARCYBER): This provides for the IT fit-out of a new Information Systems Facility at Fort Johnson, Louisiana. Additionally provides for Facility Infrastructure-Mission Unique Equipment (FI-MUE) upgrades to ancillary equipment such as Heating, Ventilation, and Air Conditioning (HVAC), Computer Room Air Conditioning (CRAC), Uninterruptible Power Supply (UPS) equipment, generators, and other power sources required to support operational NETCOM-owned IT that supports installation-wide voice and data network services worldwide.

| <p>US ARMY MATERIEL COMMAND (AMC): This provides for mission unique IT equipment supporting the Army Materiel Command's (AMC) scheduled construction of a Powertrain Facility at Corpus Christi Army Depot in Texas, Barracks, Child Development Centers, Fire Stations, and Physical Fitness Centers across the Army. These projects support base operations, critical infrastructure, Soldier and family wellness, and the Army's Organic Industrial Base, generating readiness and operational capability.</p> <p>US FORCES KOREA COMMAND (USFK): This provides for mission unique IT equipment requirements supporting the Command and Control Facility at Command Post Theater Air Naval Ground Operations (CP TANGO), Republic of South Korea. This funding supports specific IT requirements to provide state-of-the-art training and infrastructure, responsive quality of life programs, and fully capable mobilization and deployment operations.</p> <p>US ARMY PACIFIC COMMAND (USARPAC): This provides for the mission unique IT requirements for Multi-Domain Task Force facilities at Helemano Military Reservation, Hawaii. This funding will support specific IT requirements to provide state-of-the-art infrastructure to enable training, mobilization and deployment operations.</p> <p>US ARMY MILITARY ACADEMY (USMA): This provides for mission-unique IT equipment supporting the Academic Building Upgrade Program (ABUP). The US Military Academy Cyber &amp; Engineering Center (CEAC) is an educational facility that will house the engineering laboratory functions of the Departments of Civil &amp; Mechanical Engineering, Electrical Engineering &amp; Computer Science, and Systems Engineering together under one roof. Cullum Hall will provide modernization for Cadet Clubs and will serve as the new home for the USMA archives. Lincoln Hall modernization will house the Directorate for Admissions, the USMA Staff Judge Advocate, Audio, Visual and Media support, and the Cadet Store. Building 606/Math &amp; Systems Engineering Center will become the new Math and Systems Engineering Center (MSEC), which will serve as the new home for the Departments of Mathematical Sciences and Systems Engineering and feature classrooms and collaborative spaces. These upgrades will allow USMA to realize new and innovative ways to deliver programs and facilitate intellectual development on levels that are commensurate with, or ahead of, peer institutions.</p> <p>INFORMATION SYSTEMS (MCA SUPPORT) (BB1400):<br/>This program provides the worldwide IT infrastructure requirements for common user voice and data in support of the MCA Program. It supplies non-tactical information systems equipment and services in support of Army base operations, Unified Capabilities, common user, and physical plant infrastructure to support IT assets. It provides standardized operational processes and procedures, enabling the Army consistent integration, synchronization, and delivery of voice, data, imagery, applications, and network capabilities down to the individuals in both the operating force and generating force Army-wide.</p> <p>INFORMATION SYSTEMS (CONUS/WESTERN HEM) (BB8700):<br/>This program provides the worldwide IT infrastructure requirements for common user voice and data in support of the SRM Program. It supplies non-tactical information systems equipment and services in support of Army base operations, Unified Capabilities, common user, and physical plant infrastructure that supports IT assets. It provides standardized operational processes and procedures, enabling the consistent integration, synchronization, and delivery of voice, data, imagery, applications, and network capabilities down to the individuals in both the operating force and generating force Army-wide.</p> <p>In accordance with Section 1815 of FY 2008 National Defense Authorization Act (P.L. 110-181), these items are necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.</p> |                                   |                |                                               |                     |                    |                                                                          |                        |                |                |                |

| *Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                       |             |       |                                               |                                          |                                                                          |                                            |                                          |                                          |                                          |
| Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                       |             |       |                                               |                                          |                                                                          |                                            |                                          |                                          |                                          |
| <p><b>Justification:</b><br/>         PROPONENT/MISSION IT-MCA/PHYSICAL RELOCATION (B31510):</p> <p>FY 2026 procurement dollars in the amount of \$162.297 million support PROPONENT/MISSION IT-MCA/PHYSICAL RELOCATION with procurement of commercial-off-the-shelf (COTS) end-user devices (including telephones, soft phones, computing devices), associated licensing, secure data switches and gateways for classified and unclassified connectivity. It also supports information systems for classrooms, computers for traditional business users and Warfighters, teleconferencing systems, display/knowledge walls, secure telephone equipment, and physical plant infrastructure to support those information system assets. Procurements include network infrastructure engineering, acquisition, installation, security, and quality assurance to support the planning, design, implementation, and completion of a multitude of MCA and SRM projects. Installation of the Mission Unique Equipment (MUE)/end user equipment is dependent upon construction timelines as it is the final phase of an MCA or SRM project. MUE is required to ensure new/renovated buildings are complete and usable, mission capable and ready for unit/Soldier occupancy. Specific breakdown of Base projects listed below:</p> <p>FY 2026 Base procurement dollars in the amount of \$2.470 million supports INSCOM MUE such as switches, virtual desktop systems, computers, monitors, hard and soft phones, printers, large screen displays, cameras, video codecs, microphones, speakers, and other supporting IT equipment.</p> <p>FY 2026 Base procurement dollars in the amount of \$149.673 million supports ARCYBER MUE such as routers, switches, virtual desktop systems, computers, data storage, hard and soft phones, cabling, cameras, sound and video mixers, display panels, speakers, and other IT equipment.</p> <p>FY 2026 Base procurement dollars in the amount of \$0.344 million supports AMC MUE such as switches, virtual desktop systems, computers, data storage, phones, cabling, cameras, sound and video mixers, display panels, speakers, and other IT equipment.</p> <p>FY 2026 Base procurement dollars in the amount of \$1.408 million supports USFK MUE such as routers, switches, virtual desktop systems, computers, data storage, hard and soft phones, cabling, cameras, sound and video mixers, display panels, speakers, and other IT equipment.</p> <p>FY 2026 Base procurement dollars in the amount of \$3.166 million supports USARPAC MUE such as switches, virtual desktop systems, computers, hard and soft phones, cabling, cameras, sound and video mixers, display panels, speakers, and other supporting IT equipment.</p> <p>FY 2026 Base procurement dollars in the amount of \$5.236 million supports USMA MUE such as routers, switches, computers, phones, cabling, cameras, sound and video mixers, display panels, speakers, and other IT equipment.</p> |                                                       |             |       |                                               |                                          |                                                                          |                                            |                                          |                                          |                                          |

| <p>INFORMATION SYSTEMS (MCA SUPPORT) (BB1400):</p> <p>FY 2026 Base procurement dollars in the amount of \$46.770 million supports IT infrastructure such as Unified Capability systems, voice/data switches, common user network transport infrastructure, end-user instruments (including telephones, soft phones, and computing devices), associated licensing, secure data switches, and gateways for classified network connectivity. This funding also procures the network infrastructure engineering, acquisition, installation, security, and quality assurance to support the planning, design, and implementation of IT requirements associated with MCA projects. Funding is required to ensure that these projects have all necessary IT infrastructure and equipment to make the facility fully usable.</p> <p>FY 2026 Base procurement dollars in the amount of \$46.770 million supports Active Army, Army Reserves, and Army National Guard with common user NIPRNet, SIPRNet, other IT services and equipment.</p> <p>INFORMATION SYSTEMS (CONUS/WESTERN HEM) (BB8700):</p> <p>FY 2026 Base procurement dollars in the amount of \$0.311 million supports SRM projects with Unified Capability switches; common user network transport infrastructure; end-user instruments which include telephones, soft phones, computing devices as well as associated licensing; secure data switches and gateways and for classified network connectivity. This funding also procures the network infrastructure engineering, acquisition, installation, security, and quality assurance to support the planning, design, and implementation of Information Systems requirements. This program ensures these projects have all necessary IT infrastructure and equipment to make the facility fully usable.</p> |                                               |                                                                          |

Description:

This program is included in the OPA Budget Line Consolidation. In FY 2025 Base Support Communications (BU4160) and Emergency Management Modernization Program (BU8000) were consolidated into the new Base Emergency Communications (B74000) program.

The Emergency Management Modernization Program (EM2P) was a single integrated acquisition program for the design, procurement, fielding, new equipment training, and life-cycle management of emergency management capabilities in support of Army installations, Soldiers and their Families, civilians, and contractors. EM2P provided capabilities that increased situational awareness, decreased response time, and allowed for quicker warning and notification of personnel during the management of an active incident. EM2P consisted of Mass Warning and Notification (MWN) technologies, Alert! Enhanced 911 (E911) solutions, and an enterprise Computer Aided Dispatch (CAD) capability.

EM2P now encompasses Next Generation 911 (NG-911), Computer Aided Dispatch (CAD) and Enterprise Mass Warning and Notification (EMWN) capabilities in support of the Army's FY 2030/2040 objectives. This program supports the procurement of Commercial Off-The-Shelf (COTS) Non-developmental Items (NDI) to implement NG-911 infrastructure and Public Safety Answering Point (PSAP) modernization that will be fielded to Army installations worldwide. PSAP includes CAD and associated hardware and software to implement NG-911 call-handling and routing equipment to rapidly identify Geospatial Information Systems (GIS) and Location Information Services (LIS) data. GIS and LIS data is provided when calls are placed enabling resource allocation for rapid response.

NG-911 is a digital, internet protocol (IP)-based system that will replace the analog 911 infrastructure that's been in place for decades. It is designed to enhance emergency number services by creating a streamlined system that allows voice, video, data and text messages to flow seamlessly from the public to the 911 network. NG-911 will also improve public safety answering points' ability to help manage call overload, natural disasters, and transfer of 911 calls based on caller location data. The capability is entirely digital, operating on an IP based infrastructure that is mandated by several public laws with key congressional statutes being:

1. Public Law 112-96, Section 158, directs State and Federal Agencies to migrate to an Internet Protocol (IP) based emergency infrastructure.

2. Public Law 115-127, known as "Kari's Law Act of 2017," requires multi-line telephone systems to directly dial 911 without having to first dial a code (e.g., #9).

3. Public Law 115-587, known as "Ray Baum's Act of 2018," directs Automatic Number Identification (ANI) and Automatic Location Identification (ALI) for all 911 calls.

The Army has 197 installations worldwide comprised of 123 in the Americas and 74 OCONUS where NG-911 Infrastructure and PSAP modernization will be required. Within these locations the Army possesses 38 Tier I PSAPs where 911 calls are directly routed to Army installations for processing and resource allocation. The implementation of NG-911 involves much more than just new computer hardware and

| software, it requires the coordination of a variety of emergency communication capabilities, public safety, legislative and governing entities, and other critical elements. Many states and localities are planning for and making the transition to NG-911 now. The Army must align its efforts to switch from an analog to IP infrastructure to allow for continued services that remain uninterrupted and meet the laws identified.                                                                                                                                                                                                                                                                                                                                                                               |                            |         |                                        |              |                                                                                          |                                     |                 |         |         |         |
| CAD is a system used by dispatchers and first responders to log, track, dispatch, and assign calls for service and is an integral part of PSAP Modernization, is a central hub capable of dispatching law enforcement/fire/medical services. CAD will interoperate with existing Army Force Protection systems, EMWN via Giant Voice Technology, and Law Enforcement (LE) authoritative data sources as well as mutual aid partner emergency communications capabilities. CAD is a technical software/hardware system which assists dispatchers, call- takers, and 911 operators in tracking, monitoring, and rapid dispatching of first responders using GIS/ LIS technology and pre-programmed protocols to quickly get the nearest responders to critical incidents, while maintaining records of these responses. |                            |         |                                        |              |                                                                                          |                                     |                 |         |         |         |
| EMWN is a network-centric, mission critical command & control system that provides the capability to produce, track, and disseminate information through network alerts, beacons, Giant Voice, and telephone alerts for at-risk military communities experiencing no-notice threats, hazards, and other emergencies. The EMWN system is composed of two subsystems: (1) GOVT Alert! is an enterprise cloud-based Government-off-the-shelf (GOTS) system that provides timely hazard event notifications to pre-determined DoD contacts and (2) Giant Voice is a commercial-off-the-shelf (COTS) system that provides DoD installations outdoor mass notifications.                                                                                                                                                    |                            |         |                                        |              |                                                                                          |                                     |                 |         |         |         |
| NG-911, CAD and EMWN are required to be an enterprise solution and must be interoperable with other Base Emergency Communications System (BECS) capabilities, which include Land Mobile Radio (LMR) and the First Responder Broadband Network (FRBN).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                            |         |                                        |              |                                                                                          |                                     |                 |         |         |         |
| Secondary Distribution                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                            | FY 2024 | FY 2025                                | FY 2026 Base | FY 2026 OOC                                                                              | FY 2026 Total                       | FY 2027         | FY 2028 | FY 2029 | FY 2030 |

| Justification:<br>This program is included in the OPA Budget Line Consolidation. In FY 2025 Base Support Communications (BU4160) and Emergency Management Modernization Program (BU8000) were consolidated into the new Base Emergency Communications (B74000) program.<br><br>Note: Funding will also procure the hardware/software along with necessary cybersecurity requirements to interoperate and provide secure and reliable digital communications to assist military and civilian emergency personnel with emergency management operations. Hardware and software components include towers, speakers, switches, routers and relays and leverages BECS capabilities to modernize and optimize CAD, NG-911, LMR, FRBN, and EMWN for interoperability with multiple mutual aid partners and federal agencies. |                            |         |                                        |              |                                                                                          |                                     |                 |         |         |         |

**Description:**

This program is included in the OPA Budget Line Consolidation. In FY 2025 the Base Support Communications (BU4160) and Emergency Management Modernization Program (BU8000) programs were consolidated into the Base Emergency Communications (B74000) program. This funding enables the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems.

Base Emergency Communications System (BECS) capabilities refer to the standardized suite of capabilities that provide modernization for first responders Command and Control (C2) comprised of: Land Mobile Radio (LMR), Computer Aided Dispatch (CAD), Next Generation 9-1-1 (NG 911), Enterprise Mass Warning Notification (EMWN), and First Responder Broadband Network (FRBN). BECS program modernizes these capabilities at 288 worldwide Installations, Depots, and Activities (I/D/A). The BECs program was established to increase interoperability amongst the capabilities and fielding efficiency. BECS comprises a diverse array of hardware and software components requiring seamless interoperability to ensure efficient and effective operations within the mission and with Mutual Aid Partners including Federal, State, Local, Tribal, and Territorial (FSLTT) dispatch centers. Emergency dispatchers depend on these to receive emergency Calls for Service (CFS), dispatch first responders, create incident records, and manage incidents through resolution and closure to prevent loss of life, minimize injury, and mitigate incidents.

B74111 Base Support Communication provides real-time mission-critical voice and data communications for I/D/A first responders (Military Police, Fire Departments, and Emergency Medical), public safety, force protection, homeland security, pre-deployment logistics support, and Installation management missions via the Army LMR network in support of the Army's 2030/2040 objectives. LMR includes network infrastructure, dispatch and management consoles, and portable and mobile radios per the LMR Basis of Issue Plan (BOIP), to ensure synchronized, timely, and effective emergency response. Modernized LMR systems will be interoperable with other BECS capabilities. LMR will transition from stand-alone, to regional, to a centralized interoperable capability in the BECS-enabled public safety communication enterprise architecture with Internet Protocol Infrastructure as mandated by public law 110-283. Centralizing LMR maximizes cost-effectiveness and cyber security.

LMR site requirements at each I/D/A vary based on the geography; number of end users, radio frequency towers, mutual aid partners; and Installation dispatch concept of operations. Site specific requirements are determined by government surveys and stakeholders' coordination.

B74222 Emergency Management Modernization Program (EM2P) was a single integrated acquisition program for the design, procurement, fielding, new equipment training, and life-cycle management of emergency management capabilities in support of Army Installations. EM2P consisted of Mass Warning and Notification (MWN) technologies, Alert!, Enhanced 911 (E-911), and CAD. Public Safety Answering Point (PSAP) Modernization now encompasses NG-911, CAD, and EMWN capabilities in support of the Army's FY 2030/2040 objectives. PSAP supports procurement of Commercial Off-The-Shelf (COTS)

| Non-Developmental Items (NDI) to modernize NG-911 infrastructure, CAD, Geospatial Information Systems (GIS), and Location Information Services (LIS) at Army I/D/A worldwide. PSAP includes CAD and associated hardware and software to implement NG-911 call-handling and routing to rapidly location of the emergency.                                                                                                                                                                                                                                                                                                      |                            |         |                                        |              |                                                                            |                                     |                 |         |         |         |
| NG-911 is a digital, Internet Protocol (IP)-based system that replaces aged analog 911 infrastructure. It enhances emergency number services by streamlining voice, video, data, and text messages to flow seamlessly to the 911 network. NG-911 also improves PSAP's ability to help manage call overload, natural disasters, and 911 calls transfer based on caller location. NG-911 public laws include:                                                                                                                                                                                                                   |                            |         |                                        |              |                                                                            |                                     |                 |         |         |         |
| 1. Public Law 110-283, Section 102, directs State and Federal Agencies to migrate to an IP-based emergency infrastructure.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                            |         |                                        |              |                                                                            |                                     |                 |         |         |         |
| 2. Public Law 115-127, known as "Kari's Law Act of 2017," requires multi-line telephone systems to directly dial 911 without having to first dial a code (e.g., #9).                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                            |         |                                        |              |                                                                            |                                     |                 |         |         |         |
| 3. Public Law 115-141, Section 506 and H.R. 4986, known as "Ray Baum's Act of 2018," directs Automatic Number Identification (ANI) and Automatic Location Identification (ALI) for all 911 calls.                                                                                                                                                                                                                                                                                                                                                                                                                             |                            |         |                                        |              |                                                                            |                                     |                 |         |         |         |
| PSAP Modernization is required at 197 I/D/A worldwide (123 in the Americas and 74 OCONUS). Within these locations there are 38 Tier I PSAPs where 911 calls are directly routed to Army I/D/A for response. Implementation of NG-911 entails more than just hardware and software, it requires coordination of a variety of emergency communication capabilities, public safety, legislative and governing entities, and other critical elements. Many states and localities are planning for and transitioning to NG-911. The Army must align PSAP Modernization to support uninterrupted services and meet applicable laws. |                            |         |                                        |              |                                                                            |                                     |                 |         |         |         |
| CAD, an integral part of PSAP Modernization, is a central hub to dispatch, log, and track calls for service. CAD will interoperate with existing Force Protection systems, EMWN, and Law Enforcement authoritative data sources as well as mutual aid partner emergency communications.                                                                                                                                                                                                                                                                                                                                       |                            |         |                                        |              |                                                                            |                                     |                 |         |         |         |
| EMWN is a network-centric, mission-critical C2 capability to produce, disseminate, and track information through network alerts, beacons, Giant Voice, and telephone alerts for at-risk military communities experiencing no-notice threats, hazards, and other emergencies. EMWN is composed of two subsystems: (1) GOVT Alert!, an enterprise cloud-based GOTS system providing timely hazard event notifications to applicable DoD contacts and (2) Giant Voice is a COTS system that provides I/D/A outdoor mass notifications.                                                                                           |                            |         |                                        |              |                                                                            |                                     |                 |         |         |         |
| NG-911, CAD, and EMWN enterprise solutions are required to be interoperable with other BECS capabilities.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                            |         |                                        |              |                                                                            |                                     |                 |         |         |         |

| <p><b>Justification:</b><br/>           This program is included in the OPA Budget Line Consolidation. In FY 2025, this program consolidates the Base Support Communications (BU4160) and Emergency Management Modernization Program (BU8000) programs into the Base Emergency Communications (B74000) program.</p> <p>B74111 Base Support Communication FY 2026 Base procurement funding in the amount of \$25.810 million supports LMR Modernization at (1) Sierra Army Depot, CA; (2) Ft. Devens, MA; and (3) Ft. Irwin and National Training Center, CA. This modernization will converge legacy stand-alone LMR systems at each location into a regionalized architecture, provide CAD interoperability for applicable modernized Tier 1 PSAPs, and enable synchronization with FRBN, CAD, NG-911, and EMWN sites where capabilities currently exist.</p> <p>B74222 Emergency Management Modernization Program (EM2P) FY 2026 Base procurement funding in the amount of \$24.367 million supports PSAP Modernization and upgrade of I/D/A in the Americas with Tier I PSAPs to ensure critical emergency communications exist and align with state NG-911 migration efforts and to meet policy and statutory compliance. Installations include (1) West Point, NY;(2) Ft. Huachuca, AZ; (3) Ft. Hunter Ligget, CA; (4) Red River Army Depot, TX; (5) Pine Bluff Arsenal, AR; (6) Detroit Arsenal, MI; (7) Ft. Eustis, VA; and (8) Ft. Sill, OK.</p> <p>Note: Funding also procures hardware/software and necessary cybersecurity requirements to interoperate and provide secure and reliable digital communications to assist military and civilian emergency personnel with emergency management operations. Hardware and software components include towers, speakers, switches, routers, gateways, and relays that leverage BECS capabilities to modernize and optimize CAD, NG-911, LMR, FRBN, and EMWN for greater interoperability including with multiple mutual aid partners and federal agencies.</p> |                                                  |             |       |                                               |                                          |                                                                                   |                                            |                                          |                                          |                                          |

| This program is included in the OPA Budget Line Consolidation. This program consolidates the Base Support Communications (BU4160) and Emergency Management Modernization Program (BU8000) programs into the Base Emergency Communications (B74000) program. This funding enables the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems.                                                         |                  |            |                   |                  |            |                   |                                                                            |            |                   |                  |            |                   |                                                                     |            |                   |                  |            |                   |               |  |  |
| All quantities of LMR equipment vary based on the unique requirements at each installation and level of effort required as a result of Government site survey completed for each location. Fluctuations in unit costs year to year for Commercial LMR Systems are based on the cost drivers and specific requirements at each post/camp/station. All IT procurements consist of Commercial Off-The-Shelf (COTS) Non-Developmental Items (NDI) solutions. |                  |            |                   |                  |            |                   |                                                                            |            |                   |                  |            |                   |                                                                     |            |                   |                  |            |                   |               |  |  |
| Engineering and Program Support conduct site surveys, implement engineering strategies, and acquire material solutions to field a vendor-agnostic open architecture to achieve optimization and interoperability.                                                                                                                                                                                                                                        |                  |            |                   |                  |            |                   |                                                                            |            |                   |                  |            |                   |                                                                     |            |                   |                  |            |                   |               |  |  |

| This program is included in the OPA Budget Line Consolidation. This program consolidates the Base Support Communications (BU4160) and Emergency Management Modernization Program (BU8000) programs into the Base Emergency Communications (B74000) program. This funding enables the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems. |                  |            |                   |                  |            |                   |                                                                            |            |                   |                  |            |                   |                                                                                  |            |                   |                  |            |                   |               |  |  |
| FY 2026 increase in EM2P funding is for investment in NG-911 to field and modernize eight (8) installations in the Americas to ensure compliance with established public laws and that critical communications exist and align with state migration efforts.                                                                                                                                     |                  |            |                   |                  |            |                   |                                                                            |            |                   |                  |            |                   |                                                                                  |            |                   |                  |            |                   |               |  |  |

**Remarks:**  
This program is included in the OPA Budget Line Consolidation. This program consolidates the Base Support Communications (BU4160) and Emergency Management Modernization Program (BU8000) programs into the Base Emergency Communications (B74000) program. This funding enables the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems.

| Gross/Weapon System Unit Cost (\$ in Thousands)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | -           | -       | -       | 437,924.000                            | -           | 439,373.000   | -                                                                                          | -                                   | -       | -               | -           | -     |
| Description:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |             |         |         |                                        |             |               |                                                                                            |                                     |         |                 |             |       |
| <p>This funding enables the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems. This funding line is in support of Army 2030/2040 efforts and is a key enabler of the HQDA G6 Infrastructure modernization priorities to achieve an Army Global Unified Network (Army's Software Defined Network (SDN) Solution), Global Secure Network (GSN), and Unified Network (UN) utilizing Zero Trust based principles.</p> <p>This infrastructure supports the Army Unified Network Plan for 2030 by synchronizing multiple efforts and leveraging emerging technologies that allow secure global transport of extensive amounts of data from home stations throughout the Department of Defense Information Network-Army.</p> <p>The Enterprise Transport Modernization (ETM) Program approved in 2024, provides a comprehensive approach to lifecycle network modernization for the U.S. Army's telecommunications infrastructure to support Multi-Domain Operations (MDO) and enhance Mission Command from Afar across all components, Active Army, Army National Guard, and Army Reserve. ETM consists of four key capabilities: Installation Campus Area Network (ICAN) Modernization, Inside Plant (ISP), Outside Plant (OSP), and Army Enterprise Transport (AET). ICAN Modernization includes upgrading network equipment such as switches, routers, and fiber optic cables to provide robust Internet Protocol (IP) connectivity across Army installations. ISP and OSP efforts modernize internal infrastructure (e.g., racks, power, HVAC) and external infrastructure (e.g., fiber optic cabling) to ensure secure, reliable connectivity. Last, AET serves as the Army's Gateway to enhance connection between local users and the Department of Defense Information Network (DODIN-A) Wide Area Network (WAN). Note: On previous years' P-forms, AET was referred to as Technical Control Facilities (TCF).</p> <p>ETM provides the necessary network infrastructure to enable Unified Capabilities (UC), Unified Network Operations (UNO) Installation Infrastructure, Joint Information Environment (JIE), Synthetic Training Environments (STE), and decommissions outdated systems such as Time Division Multiplexers (TDM) to ensure the Army's communication systems meets modern operational demands securely.</p> <p>Modernizing the Army's telecommunications infrastructure will enable a Unified Network to support a range of critical capabilities, including a Global Secure Network (GSN), cloud-based services, and large-scale communications systems. The goal is to reduce management and maintenance costs, improve the Army's operational efficiency, and increase the reliability and security of Army communications, both within the continental United States (CONUS) and Outside the Continental United States (OCONUS).</p> <p>These efforts align with the broader strategic Army Global Unified Network (AGUN) effort, Cryptographic Hardware Modernization, and efforts to support mobility and wireless communications. The ETM program represents a critical investment in enabling the Army to remain agile, secure, and capable of executing multi-domain operations effectively.</p> |             |         |         |                                        |             |               |                                                                                            |                                     |         |                 |             |       |

| <p>B00540 / I3MP-SWA: I3MP-SWA delivers comprehensive lifecycle network modernization to refresh the existing legacy network's infrastructure, voice, video, data, and Mission Command from Afar capabilities. I3MP-SWA delivers capabilities associated with the Global Secure Network (GSN), including Secure-Consolidated Security Suite (S-CSS) hardware &amp; integration, Multiple Independent Levels of Security (MILS) hardware and integration, and End User Devices (EUDs). I3MP-SWA delivers capabilities associated with Army Global Unified Network (AGUN) (Army's SDN Solution), including Consolidated Security Suite (CSS) hardware and integration, SDLAN hardware and integration, and SDN device provisioning.</p> <p>BU0510 / I3MP-Europe: I3MP-Europe delivers comprehensive lifecycle network modernization to refresh the existing legacy network's infrastructure, voice, video, data, and Mission Command from Afar capabilities. I3MP-Europe delivers capabilities associated with the GSN, including S-CSS hardware &amp; integration, MILS hardware and integration, and EUDs. I3MP-Europe delivers capabilities associated with AGUN (Army's SDN Solution), including CSS hardware and integration, SD-LAN hardware and integration, and SDN device provisioning. Overseas Operation Cost (OOC) funds this requirement in FY 2026.</p> <p>BU0520 / I3MP-Pacific: I3MP-Pacific delivers comprehensive lifecycle network modernization to refresh the existing legacy network's infrastructure, voice, video, data, and Mission Command from Afar capabilities. I3MP-Pacific delivers capabilities associated with the GSN, including S-CSS hardware &amp; integration, MILS hardware and integration, and EUDs. I3MP-Pacific delivers capabilities associated with AGUN (Army's SDN Solution), including CSS hardware and integration, SD-LAN hardware and integration, and SDN device provisioning.</p> <p>BU0530 / I3MP-CONUS: I3MP-CONUS delivers comprehensive lifecycle network modernization to refresh the existing legacy network's infrastructure, voice, video, data, and Mission Command from Afar capabilities. I3MP-CONUS delivers capabilities associated with the GSN, including S-CSS hardware &amp; integration, MILS hardware and integration, and EUDs. I3MP-CONUS delivers capabilities associated with AGUN (Army's SDN Solution), including CSS hardware and integration, SD-LAN hardware and integration, UNO Installation Infrastructure, and SDN device provisioning.</p> <p>BU2000 / Terrestrial Transmission (TT): The Terrestrial Transmission program provides hardware modernization for the Army's Special Access Program Enterprise Portal (ASEP). This is a Top Secret / Secured Compartmented Information (TS/ SCI) accredited network supporting operational intelligence and acquisitions for Special Access Programs (SAPs). It also continues the upgrade of power, timing, and alarm systems for the European Transmission Systems. The Army Special Access Program Enterprise Portal (ASEP) is the Army's only Top Secret compartmented wide area network providing a secure communications capability (email, video, teleconferencing, document storage/sharing, voice over internet protocol and instant messaging) for the transmission of highly classified Special Access Required (SAR) information between the Army Operations Center (AOC), the Army staff, Army Commands, Army Service Component Commands, Army SAPs and Army Sensitive Activities (SAs).</p> <p>Overseas Operations Cost (OOC) funds this requirement in FY 2026.</p> |                                   |                |                                               |                         |                                                                                                   |                                            |                        |                |                |                |

**Justification:**

BU0510 / I3MP-Europe:

FY 2026 Base procurement dollars in the amount of \$22.656 million enables the Project Manager to expand the Army Global Unified Network (AGUN) (Army's SDN Solution) in FY26, capabilities in Europe. Funding provides the hardware and integration for the global orchestrator, regional controllers, Software Defined-Wide Area Network (SD-WAN) Edge sites, Software Defined-Local Area Network (SD-LAN) orchestrator, Next Generation Firewall (NGFW) with Secure Access Service Edge (SASE) capabilities, remote access capabilities, and the cybersecurity accreditation required to achieve Authority to Operate (ATO) associated with the AGUN capability. \$1.449 million in Overseas Operation Cost (OOC) funds this requirement in FY 2026.

BU0520 / I3MP-Pacific:

FY 2026 Base procurement dollars in the amount of \$32.781 million enables the Project Manager to expand the AGUN (Army's SDN Solution) in FY 2026, in the Pacific. Funding provides the hardware and integration for the global orchestrator, regional controllers, SD-WAN Edge sites, SD-LAN orchestrator, NGFW with SASE capabilities, remote access capabilities, and the cybersecurity accreditation required to achieve ATO associated with the AGUN capability. Funding will deliver comprehensive lifecycle network modernization (COMPMOD) to multiple locations including Bonifas, Busan Pier 8, Casey, CSOCC-K, K-16 Airbase .

BU0530 / I3MP-CONUS:

FY 2026 Base procurement dollars in the amount of \$380.526 million enables the Project Manager to deliver comprehensive lifecycle network modernization (COMPMOD) to multiple locations including Camp Roberts, SOUTHCOM, Fort Johnson, Fort Irwin, Fort Meade, Aberdeen PG, Corpus Christi AD, Fort Leonard Wood, Picatinny, Fort Detrick, Rock Island, Letterkenny, Carlisle, Presidio, Fort Novosel, RRMCC, Tobyhanna AD, Detroit Arsenal, and MOTSU. COMPMOD will modernize, expand, enhance, and upgrade IT infrastructure, IT systems, IT support systems, communications systems, and associated infrastructure, hardware, and software. COMPMOD includes modernizing the Installation Campus Area Network (ICAN) consisting of network equipment (e.g. switches, routers, fiber optic cable, wireless connection devices, copper cable) and associated transport on each Army installation that provides Internet Protocol (IP) connectivity to the users; Inside Plant (ISP), which includes infrastructure modernization (e.g. racks, power & grounding, HVAC, cable management); Outside Plant (OSP), which supports the ICAN's outside portion of the telecommunication infrastructure and includes installing fiber optic cabling and associated accessories between networked buildings; the Army's DODIN-A gateway, which connects local users to the DODIN-A Wide Area Network (WAN); and voice modernization, which includes Voice over Internet Protocol (VoIP) and other voice services to installations and tenants. Additionally, the funding allows the PM to deliver and implement hardware and software for the SIPR-Consolidated Security Suite (S-CSS) capability associated with the Global Secure Network (GSN) nodes at Joint Base Lewis McCord (JBLM) and Fort Bragg; deliver and implement hardware and software for Multiple Independent Levels of Security (MILS) at JBLM and Fort Bragg; deliver and integrate Multi-Site Connectivity (MSC) capability hardware and software forming outlying Army organization connections to the GSN nodes while enabling the divestment of expensive Type 1 NSA encryption devices; and End User Device (EUD) hardware and software for CONUS GSN end users.

| Remarks:<br>FY 2026 Base procurement dollars in the amount of \$3.498 million support technology refresh (routers, switches, servers, monitors, etc.) of 10 sites to maintain operational effectiveness, information assurance requirements and to replace obsolete system components of the Army's Special Access Program Enterprise Portal (ASEP). Funds are also required for full IT hardware upgrade at two data center facilities supporting the ASEP network preventing obsolescence, vulnerabilities and system failures. |                     |                            |                      |                     |               |                                                                                            |                     |               |                      |                     |               |                                                                   |                     |               |                      |                     |               |                      |

| Gross/Weapon System Unit Cost (\$ in Thousands)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                            | -           | -       | -                                      | -            | -             | -                                                   | -                                   | -       | -               | -       | -           | -     |
| Description:<br>BLI 9398K57300 / TITAN is a new start in FY 2026.<br>SSN K57311 / TITAN GROUND STATION is a new start within the TITAN program in FY 2026<br><br>The Tactical Intelligence Targeting Access Node (TITAN) is a key enabler of the Army Modernization Priorities in support of Army Cross Functional Teams. TITAN is a scalable and expeditionary intelligence ground station that supports commanders across the entire Multi-Domain Operations (MDO)/Joint All Domain Operations (JADO) battlefield framework with capabilities tailored to echelon. TITAN leverages Space, High Altitude, Aerial and Terrestrial layer sensors to provide targetable data to fires networks as well as multi-discipline intelligence support to targeting and Situation Awareness/Situation Understanding (SA/SU) in support of mission command. TITAN will support Artificial Intelligence/Machine Learning (AI/ML) tools through Project Linchpin and other government sources and leverage critical Radio Frequency (RF) technologies as they become available.<br><br>TITAN is the Army Intelligence, Surveillance, and Reconnaissance (ISR) ground station that consolidates the sensor processing capabilities in the current Distributed Common Ground System-Army (DCGS-A) Operational-Intelligence Ground Station (OGS), Tactical-Intelligence Ground Station (TGS), the Advanced Miniaturized Data Acquisition System Dissemination Vehicle (ADV) and the Remote Ground Terminal (RGT). Additionally, TITAN will access sensor data of Tactical Space Layer assets, National assets, the Multi-Domain Sensing Systems (MDSS) as well as commercial overhead sensors. Consequently, the TITAN ground station conducts deep sensing operations with the abilities to Task, Collect, Process, Exploit, and Disseminate (TCPED) information from Space, High Altitude, Aerial, and Terrestrial Layer sensors in support of Long Range Precision Fires (LRPF) operations.<br><br>Note: Please refer to the P-5 Exhibit for quantity data. |                            |             |         |                                        |              |               |                                                     |                                     |         |                 |         |             |       |

**Justification:**  
FY 2026 Base Procurement dollars in the amount of \$236.314M support the acquisition and production of Advanced, Basic, and other TITAN articles. Additional major funding efforts include software licensing and data, acceptance testing, contractor logistics support, initial spares, new equipment training, and system engineering support. This is a new start effort in FY 2026 (discretionary funding).

Note: Please refer to the P-5 Exhibit for quantity data.

**Remarks:**  
FY26 planned quantity is 8 (3 TITAN Advanced, 3 TITAN Basic, 1 Advanced trainer and 1 Basic trainer).

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description:

This funding line is directly aligned to the Army Network Modernization Priority.

The Joint Program Office (JPO) for Integrated Broadcast Service (IBS) Terminals supports all of the Joint Services and Special Operations Command (SOCOM). The JPO's role is to coordinate modernization and sustainment of IBS terminals interoperable with the Ultra High Frequency Satellite Communications (UHF SATCOM) IBS broadcasts in support of Air and Missile Defense, Long Range Precision Fires, Soldier Lethality, and Network Command, Control, Communications, and Intelligence Cross Functional Teams and Tactical Intelligence Targeting Access Node. The IBS is the worldwide Department of Defense (DoD) standard network enterprise for transmitting time-sensitive tactical intelligence and targeting data to all echelons of Joint Service operational Users. The Joint Tactical Terminal (JTT) is the official IBS system and ensures continued IBS interoperability to a variety of tactical producers and consumers across the Joint Services. JPO IBS Terminals program offices perform JTT life cycle program management through acquisition, fielding support and sustainment of JTT equipment. The JPO coordinates support as needed for the IBS networks that employ Communication Security (COMSEC), a Common Interactive Broadcast (CIB), and the Common Message Format (CMF). The JPO is fielding a Next Generation non-developmental item to replace the existing JTT due to obsolescence and sustainment costs with current JTT configurations.

This program is included in the OPA Budget Line Consolidation. In FY 2025, the JTT/CIBS-M (V29600) program is consolidated into the Multi-Domain Intelligence (BZ6100/K26777) program.

Description:

This funding line is a key enabler of the Army Modernization Priorities in support of multi domain operations and deep sensing.

Terrestrial Layer System Brigade Combat Team (TLS BCT) is a functionally integrated Signals Intelligence (SIGINT) and Electromagnetic Warfare (EW) system that operates within the electromagnetic spectrum to provide Army maneuver forces a competitive advantage. The TLS BCT Manpack system is a tailorable, modular, Soldier portable capability that enables Signals Intelligence (SIGINT) and Electronic Warfare (EW) collection, processing, exploitation, reporting, and effects capabilities within the SIGINT Collection Team (SCT) and Electronic Warfare Team (EWT) elements. TLS BCT Mounted systems are composed of two complementary variants which together provide Indications and Warnings, Force Protection, and Situational Awareness to influence the commander's decision cycle, improve targeting timeliness and accuracy, and provide the maneuver commander with electronic attack options to degrade, deny, disrupt, or otherwise manipulate the targeted force. TLS BCT aligns to Army modernization priorities (Long Range Precision Fires, Network, and Soldier Lethality) to field technologically advanced capabilities to prevail in Multi-domain and Large-Scale Combat Operations (LSCO).

Terrestrial Layer System Echelon Above Brigade (TLS EAB) is a family of systems composed of multiple variants which together provide integrated, distributed Signals Intelligence (SIGINT) and Electromagnetic Warfare (EW) cyber-enabled capabilities to Army Divisions, Corps and Multi-Domain Task Forces. TLS EAB provides indications and warnings to influence the commander's decision cycle, improves targeting quality, timeliness and accuracy, and provides electronic attack and offensive cyber warfare options to detect, deny, degrade, disrupt or otherwise manipulate the targeted force. TLS EAB supports Multi Domain Battle capability gaps and provide Force Protection, Situational Development, and Information Superiority to Army Divisions, Corps and Multi- Domain Task Forces. Enables integration, interoperability and force modernization with emerging capabilities in support of USAREUR-AF and USARPAC Operational Needs Statements, Transformation in Contact (TiC) initiatives, and Presidential Directives.

FY 2026 was transferred from Budget Activity (BA) 2, B97600 TERRESTRIAL LAYER SYSTEMS (TLS) to BA 6, I32000 ELECTRONIC WARFARE AGILE in support of Agile Portfolio Management.

Description:

The Collection Capability (CC) consists of the Next Generation Biometric Collection Capability (NXGBCC) program and the Counterintelligence (CI) / Human Intelligence (HUMINT) Equipment Program - Army (CIHEP-A).

The Next Generation Biometric Collection Capability (NXGBCC) program will procure, test, field, and sustain biometric collection devices to support Army force protection and identity intelligence operations. NXGBCC is the replacement for the current Biometric Automated Toolset-Army (BAT-A) program of record that is reaching obsolescence. The program will leverage commercial technology to provide a software-based solution to collect, submit, and match face, finger, iris, and voice biometric modalities. NXGBCC is a key enabler for joint forces to conduct force protection and identity intelligence activities including identification of combatants, management of enemy prisoners of war, and to account for detainees, displaced persons, and refugees during Large Scale Combat Operations.

The Counterintelligence (CI) / Human Intelligence (HUMINT) Equipment Program - Army (CIHEP-A) will provide CI and HUMINT collectors a full set of expeditionary capabilities to answer Commanders' intelligence requirements and protect the force. CIHEP-A is intended to be a scalable and modular equipping program which includes but is not limited to: Computing systems from the Joint common hardware Mounted Family of Computer Systems; Capability to connect to/utilize alternate sources of power; Communications package that provides Beyond Line of Sight systems; Mission support package that enables management of teams, and downward reinforcement of teams with advanced collection and security equipment; and Team support package that provides CI and HUMINT teams with required capabilities to conduct their respective functions.

This program is included in the OPA Budget Line Consolidation. This line transfers funding from the Biometric Tactical Collection Devices (BK5300) and CI AND HUMINT Intelligence (HUMINT) Capabilities (B75200).

**Justification:**  
NXGBCC - FY 2026 base procurement dollars in the amount of \$0.840 million supports deploying, training, and fielding of Next Generation Biometric Collection Capability (NXGBCC). This funding also supports the procurement of 27 devices.

CIHEP -A - FY 2026 base procurement dollars in the amount of \$2.095 million supports the procurement of 28 kits comprised of Commercial off the Shelf (COTS) and Government off the Shelf (GOTS) components for fielding.

This program is included in the OPA Budget Line Consolidation. In FY 2025, the CI/HUMINT EQUIPMENT PROGRAM-ARMY (CIHEP-A) (B75200) and BIOMETRICS AUTOMATED TOOLSET - ARMY (BAT-A) (BK5300) were consolidated into the COLLECTION CAPABILITY (B87000) program.

In accordance with section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110 - 181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Description:

Distributed Common Ground System - Army (DCGS-A) is the Intelligence, Surveillance and Reconnaissance (ISR) System of Systems (SoS) for Joint, Interagency, Allied, Coalition, and National data analysis, sharing and collaboration. The core functions of DCGS-A are: the vertical and horizontal synchronization of ISR Processing, Exploitation and Dissemination (PED) efforts; operations in a networked environment at multiple security levels; control of select Army and joint sensor systems; fusion of all acquired data and information, and distribution of relevant red (threat), gray (non-aligned), and environmental (weather and terrain) information; and providing the Warfighters' early warning and targeting capability. DCGS-A is fielded in Fixed, Mobile, and Portable configurations emphasizing the use of reach and split based operations by improving accessibility of data in order to reduce forward deployed footprint.

DCGS-A hardware and software is based on a combination of Government Off The Shelf (GOTS), Commercial Off The Shelf (COTS), and Non-Developmental Items (NDI) that are integrated into scalable configurations, tailored to Warfighting functions. These product line components include the software baseline, server suite (Intelligence Fusion Server (IFS)) and individual analyst Multi-Function Workstations (MFWS) such as Portable and Fixed MFWS (P-MFWS/F-MFWS). These components are also used to upgrade existing fielded Intel Programs of Record to enable the establishment of the Army Common Operating Environment (COE) while simultaneously assuring system compatibility and interoperability within the DCGS-A enterprise.

DCGS-A was formally designated as a Major Automation Information System (MAIS) and is deployed on multiple hardware platforms and security levels across the Army. The DCGS-A Increment 1 Full Deployment Decision (FDD) Acquisition Decision Memorandum (ADM) dated 14 November 2012, authorizes continued deployment of Release 1 capabilities. The DCGS-A Increment 1 Release 2 Fielding Acquisition Decision Memorandum (ADM) was approved by the Army Acquisition Executive (AAE) on 4 November 2015 after a successful Follow-On Test and Evaluation (FOT&E) event in May 2015. Full Deployment of DCGS-A Increment 1 Release 1 was declared on 17 June 2019.

Overseas Operations Costs (OOC) funds this requirement in FY 2026.

| <p><b>Justification:</b></p> <p>FY 2026 Base procurement dollars in the amount of \$0.884 million supports maintaining the DCGS-A COTS hardware baseline, ensuring procurable system configurations are available for unit self-funded procurement actions as investments pivot towards modernization and enduring capabilities. Funding also supports continued alignment with Army COE objectives and Army modernization priorities.</p> <p>FY 2026 Base procurement dollars in the amount of \$0.203 million supports maintaining the DCGS-A COTS hardware baseline, ensuring procurable system configurations are available for unit self-funded procurement actions in support of the Enduring Requirement for the Operation Spartan Shield (OSS). This is a decrease of \$0.070 million from FY 2025.</p> |                            |         |                                        |                 |                                                            |                                          |                 |         |         |         |

Description:

TROJAN, as an Army Intelligence system, has been providing direct support and an operational readiness capability to soldiers since 1983. TROJAN provides the tactical commander with remote access to signal environments, in order to maintain a high state of operational readiness and enhance the training and sustainment of highly perishable intelligence skills. Additionally, the TROJAN architecture provides the infrastructure enabling split-based and force protection operations in direct support of the warfighter.

TROJAN NexGEN, formerly TROJAN Classic XXI (TCXXI) advances the tactical commanders' readiness in the areas of training (technical and operational signals intelligence (SIGINT), operational intelligence production and dissemination, and operational support to split-based intelligence operations supporting force protection operations. TROJAN NexGEN's principle use is to provide remote access to target environments, enabling split-based operations from a sanctuary by being the gateway interface to environments of immediate relevance to every supported commander's priority intelligence requirements. In addition, NexGEN will continue its role as an operational readiness system, while also supporting commanders' intelligence requirements across the spectrum of conflict.

TROJAN NexGEN is an intelligence and electronic warfare (IEW) system that supports the increased readiness of key mobilization personnel in preparation for actions in the mission areas of The Army Plan (TAP). NexGEN is capable of maintaining operational readiness status of unit personnel supporting the full spectrum of military operations as outlined in the Army Strategic Planning Guidance and Army Planning Guidance sections of the TAP.

TROJAN NexGEN provides operational readiness capability to an Army commander employing a rapid global response capability to any level of military conflict throughout the seven mission areas. By employing reach technology relay capabilities between the forward deployed sensors and the sanctuary-based Remote Operational Facilities (ROFs), NexGEN can meet the operational deployment timelines through the use of readiness training venues to meet the requirements of units from Brigade Combat Teams through Corps and Echelon Above Corps (EAC). This operational concept provides the unique capability to remotely control the sensors and direction finding capabilities of the Deployable Collection Assets (DCAs) and process and analyze the collected information for timely reporting of time-sensitive information to the forward deployed Army, Joint Service and Multi-National warfighters.

TROJAN SPIRIT provides Army units with dedicated, secure, high capacity, Sensitive Compartmented Information high intelligence data processing and communications. It provides a rapidly deployable, multi-level security, processor-to-processor, high-capacity communications capability, and supports tactical to strategic reach-back, essential to split-based operations.

The Trojan Family of Systems (FoS) uses the Trojan Network Control Center (TNCC) for transport.

**Remarks:**  
Starting in FY 2024, due to a change in program requirements, SPIRIT will transition to a Tactical Communications Video-Teleconferencing Capability (TCVC) systems.

The Tactical Communications Video-Teleconferencing Capability (TCVC) systems is a combination of Government off-the-Shelf (GOTS) and Commercial off-the-Shelf (COTS) products obtained from the Prime Contractor CACI Technologies, Inc. and related vendors (TBD).

Current Prime Contractor is CACI Technologies, Inc. The Period of Performance (POP) is 20OCT23 - 19OCT24 (Base Year) and 20OCT-24 - 19OCT28 (4 Option Years).

\*Increase in FY25 to FY26 Unit Cost due to inflation and higher cost due of standardized Army components.

Starting in FY 2026, the program will resume system Tech Refreshes for the Trojan SPIRIT legacy systems.

This item is a Commercial Off the Shelf (COTS) / Government Off the Shelf (GOTS) item and does not require the P-21 form

**Remarks:**  
Current Prime Contractor is CACI, Technologies Inc. The current POP is 20OCT24-19OCT25 (Option Year) and 20OCT25 -19OCT28 (4 Option Years).

Hardware is a combination of Government off-the-Shelf (GOTS), and Commercial off-the-Shelf (COTS) products obtained from the Prime Contractor, and related vendors (TBD).

\* Increase in FY25 to FY26 Unit Cost due to 3% year-to-year inflation being applied and higher cost due to Army standardized components.

| Description:<br>SSN B99755 / THEATER SIGINT SYSTEM (TSIGS) is a new start within the MOD OF IN-SVC EQUIP (INTEL SPT) program in FY 2026<br><br>Theater SIGINT System (B99755): TSIGS is a FY26 new start program which provides Army commanders with a forward deployable, remote or locally controlled, signals intelligence (SIGINT) system for contingency operations. TSIGS, made up of the Trojan Soldier Portable Remote Intelligence Group (TSPRING) and Picketline, are currently fielded. This program funds a Continuous Integration Continuous Delivery (CI/CD) pipeline to deliver TSIGS software updates at the speed of relevancy based on Soldier feedback. Enables integration and interoperability with sustained capabilities in support of theater aligned Military Intelligence units and Intelligence Community (IC) collection priorities, as well as Transformation in Contact (TiC) initiatives, Presidential Directives and Operational Needs Statements.<br><br>Special Purpose Systems (BZ9751): Program funds Technical Insertions (TIs) for the ground-based Signals Intelligence (SIGINT) system with additional capabilities required by fielded units to effectively engage enemy forces and provide Force Protection information to friendly forces. This program funds procurement of Government and Commercial Off-the-Shelf (GOTS/COTS) Next Generation Signals Intelligence (SIGINT) capabilities for the Prophet system to pace near peer, emerging threats, and other Signals of Interest (SOIs) to support the National Defense Strategy. Prophet enables integration, interoperability, and force modernization with emerging capabilities in support of Multi-Domain Operations.<br><br>FY 2026 BZ9751 Special Purpose Systems funding was transferred from Budget Activity (BA) 2, BZ9750 MOD OF IN-SVC EQUIP (INTEL SPT) to BA 6, I32000 ELECTRONIC WARFARE AGILE / I32013 MOD OF IN-SVC EQUIP SPECIAL PURPOSE SYSTEM in support of Agile Portfolio Management. |                            |             |         |                                        |              |               |                                                                               |                                     |         |                 |         |             |       |

**Remarks:**  
Theater SIGINT System (B99755) is a FY 2026 New Start.

Software Integration: Field technical insertions critical to retain strategic/operational level advantage over near peer adversaries

Product Support Development: Development of key logistics artifacts (provisioning, training, technical manuals) to optimize the TSIGS product support strategy (PSS)

Training Support Package Equipment/Services: Development of an enduring Training Support Package; in support of the TSIGS System Training Plan (STRAP)

Initial Sparing: The issuing of key consumables and repairables to support operational systems

Contractor Management: Technical/program management support for engineering, integration, test and product support activities for the TSIGS program

Description:

The Next Generation Biometric Collection Capability (NXGBCC) program will procure, test, field, and sustain biometric collection devices to support Army force protection and identity intelligence operations. NXGBCC is the replacement for the current Biometric Automated Toolset-Army (BAT-A) program of record that is reaching obsolescence. The program will leverage commercial technology to provide a software-based solution to collect, submit, and match face, finger, iris, and voice biometric modalities. NXGBCC is a key enabler for joint forces to conduct force protection and identity intelligence activities including identification of combatants, management of enemy prisoners of war, and to account for detainees, displaced persons, and refugees during Large Scale Combat Operations.

This program is included in the OPA Budget Line Consolidation. In FY 2025, the CI/HUMINT EQUIPMENT PROGRAM-ARMY (CIHEP-A) (B75200) and BIOMETRICS AUTOMATED TOOLSET - ARMY (BAT-A) (BK5300) were consolidated into the COLLECTION CAPABILITY (B87000) program.

Justification:

This program is included in the OPA Budget Line Consolidation. In FY 2025, the CI/HUMINT EQUIPMENT PROGRAM-ARMY (CIHEP-A) (B75200) and BIOMETRICS AUTOMATED TOOLSET - ARMY (BAT-A) (BK5300) were consolidated into the COLLECTION CAPABILITY (B87000) program.

FY 2026 Funding has been realigned to B87000/B87011 in accordance with Army request for Budget Line Consolidation.

| <p><b>Description:</b></p> <p>The Electronic Warfare Planning and Management Tool-X (EWPMT-X) is a software modernization effort on EWPMT Version 1 to an updated software architecture. Leveraging community contributions provides enhanced capability and features based on a government supported framework (TAKX) to enable quicker reaction to subsequent EW requirements. At end state, EWPMT-X will deliver spectrum dominance across Multi-Domain Operations (MDO) through spectrum visualization and modeling, Electromagnetic Warfare planning, sensor orchestration, fusion of intelligence, command and control (C2) that supports kinetic and non-kinetic targeting for the Commander's scheme of maneuver.</p> <p>Electronic Warfare procures, equips, and trains warfighters on capabilities to plan, manage, detect, interpret, and display the Electromagnetic Spectrum (EMS) and its use by friendly and hostile forces. This program will deliver spectrum dominance across Multi-Domain Operations (MDO) through spectrum visualization and modeling, Electromagnetic Warfare planning, sensor orchestration, fusion of intelligence, command and control (C2) that supports kinetic and non-kinetic targeting for the Commander's scheme of maneuver. These systems allow commanders to sense and see themselves in the Electro-Magnetic Spectrum (EMS), preventing electronic fratricide, helping shape the electronic operating environment, and increasing Command Post (CP) survivability.</p> <p>Spectrum Situational Awareness System (S2AS) supports Army key modernization initiatives by allowing commanders to sense and see themselves in the Electro-Magnetic Spectrum (EMS), preventing electronic fratricide, helping shape the electronic operating environment, and increasing Command Post (CP) survivability. Operationally S2AS allows commanders to determine and impact their visibility to enemy fire chain. S2AS is a dedicated EMS situational awareness management system that provides the Commander with real time EMS Situational Awareness to support Emissions Control (EMCON) decisions, Electromagnetic Interference (EMI) Resolution, and detect/warn operations centers of unauthorized or intentional sources of interference on today's complex battlefield. S2AS will employ sophisticated hardware and software to strengthen the capabilities of the Army and ensuring resilience against potential adversarial threat. S2AS will address current and future EMS challenges, ensuring awareness and secure use of the EMS.</p> <p>FY 2026 was transferred from Budget Activity (BA) 2, K00002 EW Planning &amp; Management Tools (EWPMT) to BA 6, I31000 ELECTRONIC WARFARE in support of Agile Portfolio Management.</p> |                            |                |                |                                               |                    |                      |                                                                                             |                                                 |                |                        |                    |              |

**Justification:**  
FY 2026 was transferred from Budget Activity (BA) 2, K00002 EW Planning & Management Tools (EWPMT) to BA 6, I31000 ELECTRONIC WARFARE in support of Agile Portfolio Management.

Electronic Warfare (EW) is a part of the Department of Defense Capability Based (Agile) Funding Pilot. Funding in this portfolio will be directed towards providing Electronic Warfare and Electromagnetic Spectrum planning, monitoring, and management tools, while combating the limitations from the pace and proliferation of technological change.

This funding is a transfer from:  
(1) EW Planning & Management Tools (EWPMT) (K00002000)  
(2) SPECTRUM SITUATIONAL AWARENESS SYSTEM (S2AS) (DJ8)

Electronic Warfare procures, equips, and trains warfighters on capabilities to plan, manage, detect, interpret, and display the Electromagnetic Spectrum (EMS) and its use by friendly and hostile forces. This program will deliver spectrum dominance across Multi-Domain Operations (MDO) through spectrum visualization and modeling, Electromagnetic Warfare planning, sensor orchestration, fusion of intelligence, command and control (C2) that supports kinetic and non-kinetic targeting for the Commander's scheme of maneuver. These systems allow commanders to sense and see themselves in the Electro-Magnetic Spectrum (EMS), preventing electronic fratricide, helping shape the electronic operating environment, and increasing Command Post (CP) survivability.

Spectrum Situational Awareness System (S2AS) supports Army key modernization initiatives by allowing commanders to sense and see themselves in the Electro-Magnetic Spectrum (EMS), preventing electronic fratricide, helping shape the electronic operating environment, and increasing Command Post (CP) survivability. Operationally S2AS allows commanders to determine and impact their visibility to enemy fire chain. S2AS is a dedicated EMS situational awareness management system that provides the Commander with real time EMS Situational Awareness to support Emissions Control (EMCON) decisions, Electromagnetic Interference (EMI) Resolution, and detect/warn operations centers of unauthorized or intentional sources of interference on today's complex battlefield. S2AS will employ sophisticated hardware and software to strengthen the capabilities of the Army and ensuring resilience against potential adversarial threat. S2AS will address current and future EMS challenges, ensuring awareness and secure use of the EMS.

**Description:**  
Detailed description and justification can be found in the Classified Congressional Justification Book.

Air Vigilance (AV) is a software intensive Automated Information System (AIS) program with specialized hardware. The AV systems collect critical intelligence data on emerging threat systems. The collected intelligence data provides early warning of enemy operations to ensure force protection. An AV system is comprised of a server configured and fielded with a single or multiple sensors. The original AV Basis of Issue Plan (BOIP); per requirements in Capability Drops (CDs) 1, 2, and 3; was based upon the Full Deployment (FD) of 10 servers and 39 sensors in various combinations/ configurations to the Intelligence and Security Command (INSCOM) Military Intelligence Brigades. In December 2021, the Army updated the AV program BOIP to include the twelve (12) sensors procured to support JUONS 0576, bringing the AV program sensor total to 51. The AV CD 4 requirements were validated in late FY 2021. The program will develop one (1) CD 4 transportable variant that will reduce risk and inform a possible FORSCOM increment 2. Continued deployment of Pre-Planned Product Improvement (P3I) Green Falcon version 3 (GFv3) and Tech Refresh of GFv2 adds enhanced capabilities that will pace the threat. The capabilities of the GFv3 system will be integrated into the CD 4 transportable variant.

**Justification:**  
Discretionary:

FY 2026 Base procurement dollars in the amount of \$9.731 million procures 4 each Air Vigilance Green Falcon v3 (GFv3), provide for fielding and four (4) New Equipment Training for GFv3, and provide Pre-Planned Product improvement (P3I) (through four (4) Green Falcon v3 hardware and four (4) Green Falcon v2 Tech Refresh hardware on existing sensors) to the sensor/processor of Capability Drop 3 configuration.

Mandatory:

FY 2026 request for Air Vigilance includes \$9,731 thousand of discretionary and \$3,100 thousand of mandatory (reconciliation) for a total of \$12,831 thousand. The mandatory funds procure an additional one-each (1) Iron Quest Expeditionary kit and two-each (2) Iron Neptune kit (detail description classified). Further information for this reconciliation request is provided in Section 20005 (Low-Cost Weapons) of the Reconciliation Exhibit.

| <p>In December 2021, the Army updated the Air Vigilance (AV) program Basis of Issue Plan (BOIP) to 51 sensors and 10 servers. The updated BOIP includes the 33 sensors procured as a program and 18 sensors procured through multiple Operational Needs Statements outside the parameters of the program. The TENCAP plan is to upgrade/replace all of the 51 existing sensors with Pre-Planned Product Improvements over the coming years, as budget will support, in order to pace the ever-evolving threat.</p> <p>The TENCAP plan is to upgrade/replace all of the 51 existing Green Falcon version 2 (GFv2) sensors with Pre-Planned Product Improvements and Pure Fleet Replacement (one-for-one) with GFv3 over the coming years, as budget will support, in order to pace the ever-evolving threat.</p> |                                   |                                                                         |                        |                                                                    |                        |                          |

| Description:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                            |         |         |                                        |             |               |                                                                                                |                                     |         |                 |             |       |
| The Multi-Function Electronic Warfare Air Large (MFEW-AL) funding is required to produce sufficient production quantities to support fielding to the 1st and 2nd units equipped. Fielding will be to Army Combat Aviation Brigade's Gray Eagle Unmanned Aerial System (UAS). MFEW-AL will provide tactical Commanders with deep look, organic, airborne, offensive electronic warfare, empowering Commanders to shape the Electromagnetic Spectrum to their advantage and enhance the capabilities of the Gray Eagle UAS. |                            |         |         |                                        |             |               |                                                                                                |                                     |         |                 |             |       |
| FY 2026 funding was realigned from Budget Activity (BA) 2, B05000 Multi-Function Electronic Warfare (MFEW) Systems to BA 6, I43000 MULTI-FUNCTION ELECTRONIC WARFARE SYS in support of Agile Portfolio Management.                                                                                                                                                                                                                                                                                                        |                            |         |         |                                        |             |               |                                                                                                |                                     |         |                 |             |       |

Description:

Persistent Surveillance Systems - Tethered (PSS-T) is a highly persistent and flexible multi-sensor information collection platform that integrates with other aerial and unattended ground sensor systems to provide slew-to-cue capability. The PSS-T retains medium and large aerostat platforms for persistent intelligence, surveillance, and reconnaissance (ISR), information collection, force protection and as a platform for Army Aerial Layer Network Transport. Both medium and large platforms provide 360-degree detection, surveillance, monitoring, and targeting capabilities through real-time full motion video, electro-optic/infrared (EO/IR) and wide area detection of moving vehicles and dismount targets. Video collected by PSS-T is distributed to the Forward Operating Base and division commander information center as well as to quick reaction forces via Tactical Operations Center (TOC) Extension Kits, providing tactical commanders enhanced battlefield situational awareness. Additionally, it is capable of performing tactical missions with tactical class systems that are smaller in size in comparison to the PSS-T Medium; however, are still part of the PSS-T Family of Systems (FoS) which ranges from tactical class platform aerostat to the Large platform.

Large Platform (PTDS, 34M) - The baseline configuration includes the U.S. Army Research Lab's Unattended Transient Acoustic Measurement and Signature INTeelligence (MASINT) System (UTAMS) which operationally cues the PSS-T MX series sensors to slew onto a target. The UTAMS is an acoustic sensor design consisting of sensor stations linked via radio to a base station. Each sensor station includes microphone arrays, signal processor, and display. The baseline PSS-T also includes the Tactical Common Data Link (TCDL) transmitter that transmits MX series video stream to ground forces equipped with One System Remote Video Terminal. Expendable-Unattended Ground Sensor (E-UGS) enhances the PSS-T ability to detect enemy vehicle and pedestrian traffic and provides improved situational awareness and facilitates tactical response. PSS-T continues to meet other urgent theater needs through system upgrades: adding High Antennas for Radio Communications (HARC) radio, the PRC-117G wide band radio, Tactical Targeting Network Technology (TTNT), Highband Networking Radio (HNR) as part of the aerial layer network extension architecture; transmitting weather data directly to Air Force Weather Agency (AFWA) via weather relay kits; added dual sensor capability; additional ground moving target indicator STARLite, VISTA radar, and wide area motion imagery (WAMI) Kestrel Block II (KBII) sensors, Persistent Surveillance Systems (PSS) Slew to Cue, coded laser target designation, and Survivability enhancements.

Medium Platform (PGSS, 22M, 28M) - The medium platform has been a highly successful example of quickly delivering urgently needed capabilities to the Warfighter at remote forward operating bases (FOBs). PGSS continues to meet other urgent theater needs through system upgrades: adding HARC radio, the PRC-117G wide band radio, Quint Networking Technology (QNT), and micro-Enhanced Position Location Reporting System (EPLRS) as part of the aerial layer network extension architecture; adding dual sensor capability; adding additional VISTA, KBII, and wireless identification sensing platforms (WISP) sensors, PSS Slew to Cue, Precision Fires, coded laser target designation, and Survivability enhancements. Additionally, Expendable-Unattended Ground Sensor (E-UGS) enhances the PGSS ability to detect enemy vehicle and pedestrian traffic and provides improved situational awareness and facilitates tactical response. Other sensors and payloads capabilities include WAMI KBII sensors, MX camera series, and UTAMS.

| These sensors provide critical long range, multi-sensor imaging and lasing payload options and are utilized on every PSS-T aerostat system. Without these sensors our systems would be designated as Non-Mission Capable (NMC). Reduced operations will result in potential loss of life, serious injury and compromised mission effectiveness due to continued insurgent activities, including Improvised Explosive Device (IED) emplacement, IED networks and other ground-based threats against U.S. and Coalition Forces. |                            |         |                                        |              |                                                                                      |                                     |                 |         |         |         |
| Overseas Operations Costs (OOC) funds this requirement in FY 2026.                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                            |         |                                        |              |                                                                                      |                                     |                 |         |         |         |

**Justification:**  
FY 2026 Base procurement dollars in the amount of \$15.382M supports the replacement of realized combat losses due to battle damage in Operation Inherent Resolve: 2 - MX Sensors, 3 - KBIs and 2 envelopes. Replacements are needed to ensure operations and sustainment of deployed systems in support of combat or direct combat support expenses in support of OIR (Non-Enduring). This is an increase of \$2.157 million from the FY 2025 request.

| Description:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                            |         |         |                                        |             |               |                                                             |                                                    |         |                 |             |       |
| FY26 funds in the amount of \$462.010M support the procurement of the Army Modernization Priorities in support of the Sentinel Radar programs and will provide for an incrementally fielded Integrated Air and Missile Defense Fire Control System/capability for the composite Army Air and Missile Defense Brigades. The Sentinel systems are a key component of the Army Integrated Air and Missile Defense (AIAMD) architecture, providing critical air surveillance of the forward areas.                                                                           |                            |         |         |                                        |             |               |                                                             |                                                    |         |                 |             |       |
| The Sentinel A4 utilizes Active Electronically Scanned Array (AESA) technology that is a ground-based sensor system designed to locate, identify and track Cruise Missiles, Fixed-Wing and Rotary-Wing Aircraft, Unmanned Aircraft Systems and Rocket, Artillery, and Mortar (RAM) projectiles. The simultaneous multi-mission Sentinel A4 system will provide 360-degree surveillance and tracking with the ability to handle simultaneous threats arriving from different azimuths.                                                                                    |                            |         |         |                                        |             |               |                                                             |                                                    |         |                 |             |       |
| The Sentinel A3 consists of a trailer mounted radar with its prime mover, generator, identification Friend or Foe (IFF) system and Forward Area Air Defense Command, Control and Intelligence (FAAD C2I) systems interface. The Sentinel A3 provides persistent surveillance and fire control quality data on Army and Joint networks through external C2 platforms enabling protection of U.S. and coalition forces as well as critical geo-political assets against Cruise Missiles (CM), Fixed-Wing, Rotary-Wing Aircraft and Unmanned Aircraft System (UAS) threats. |                            |         |         |                                        |             |               |                                                             |                                                    |         |                 |             |       |

| Gross/Weapon System Unit Cost <i>(\$ in Thousands)</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                | -                                                                  | -                                             | -                      | -                                                             | -                    | -                    |
| <p><b>Description:</b><br/>FY 2026 funds in the amount of \$462.010M procures Sentinel A4 Low-Rate Initial Production (LRIP) assets.</p> <p>The Sentinel A3 is being modified to an A4 configuration with advanced active electronically scanned array (AESA) sensor technologies to improve performance against advancing threats.</p> <p>The Active Electronically Scanned Array (AESA) Sentinel A4 is the next generation of radar technology replacing the current phase and frequency scanned array used by Sentinel A3 today. Sentinel A4 provides simultaneous multi-mission capability and hemispherical surveillance to detect and track small targets, such as Unmanned Aircraft Systems (UAS) and Cruise Missiles, in clutter as well as detect and track slow targets, such as UAS and Rotary Wing aircraft, at low altitudes in clutter. Sentinel A4 will support Integrated Air and Missile Defense Battle Command System (IBCS) requirements and contributes sensor support for mitigating current and future Indirect Fire Protection Capability Increment 2 mission requirements, Mobile Short Range Air Defense (M-SHORAD) battalions, and other operational needs.</p> <p>Ongoing Modifications include:<br/>The Active Electronically Scanned Array (AESA) Sentinel A4 is the next generation of radar technology replacing the current phase and frequency scanned array used by Sentinel A3 today. The AESA Antenna provides increased capability including extended range for ground-based surveillance and situational awareness, faster and more accurate Non-Cooperative Target Recognition (NCTR) for clearing fires and preventing fratricide, improved Fire Control (FC) quality track accuracy, and management of larger track loads. The AESA Antenna provides improved operation in severe/urban clutter. Sentinel A4 provides simultaneous multi-mission capability and hemispherical surveillance to detect and track small targets, such as Unmanned Aircraft Systems (UAS) and Cruise Missiles, in clutter as well as detect and track slow targets, such as UAS and Rotary Wing aircraft, at low altitudes in clutter. The Mode S and adjunct sensor capabilities will be integrated as a part of the Sentinel A4 modification.</p> |                                                |                                                                    |                                               |                        |                                                               |                      |                      |

| Flyaway Unit Cost ( <i>\$ in Thousands</i> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | -           | -       | -       | -                                      | -           | -             | -                                                                  | -       | -                                        | -       | -           | -     |
| Gross/Weapon System Unit Cost ( <i>\$ in Thousands</i> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 329.315     | 39.263  | 283.302 | 18.242                                 | -           | 18.242        | -                                                                  | -       | -                                        | -       | -           | -     |
| Description:<br>SSN K36414 / BINOCULAR NIGHT OBSERVATION DEVICE (BINOD) is a new start within the Night Vision Devices program in FY 2026<br><br>This funding is directly aligned to the Army Soldier Lethality, Modernization LOE 3 Integrated Visual Augmentation System.<br><br>Night Vision Devices (KA3500) is a summary budget line including the following programs:<br><br>(1) K36400 - This funding line is directly aligned to the Army Soldier Lethality Modernization Priority in support of situational awareness for the Close Area Combat Force. The Enhanced Night Vision Goggle-Binocular (ENVG-B) system is a modular helmet-mounted, passive electro-optical fused sensor imaging device in a binocular configuration. The system integrates dual Image Intensification (I2) sensors with the thermal sensor imagery into a single viewing display. The thermal sensor provides the Soldier with the capability to rapidly detect and recognize human-sized targets in adverse weather, obscurants and in varying light conditions. The dual I2 sensors provide the Soldier with depth perception for ease of low-light level maneuvers and the ability to detect rifle-mounted aiming lights to engage targets. The ENVG-B can also be operated in a monocular configuration by moving one of the two individually rotating monoculars. The ENVG-B has a near infrared (NIR) emitting light source that provides illumination for close-up viewing. The ENVG-B mounts on current Soldier equipment, including the Advanced Combat Helmet (ACH), the Enhanced Combat Helmet (ECH) and Integrated Head Protection System (IHPS). The ENVG-B has a multi-point wireless interface to the Family of Weapon Sights-Individual (FWS-I) and Nett Warrior to support augmented reality requirements. The ENVG-B wirelessly operates with the FWS-I to provide passive targeting, which is the capability to view the boresighted/zeroed weapon sight reticle in the ENVG-B display, enabling the Soldier to accurately engage targets without having to bring the weapon to eye level and without the use of active lasers, all while remaining in defilade.<br><br>(2) B53800 - This funding line provides support to the Close Combat Soldier in the area of situational awareness. This program provides funding to procure the Laser Target Locator Module (LTLM) and laser aiming devices. LTLM is a lightweight, handheld, laser target locator module with day and thermal sight capability as well as an internal Military-code Global Positioning System (GPS) receiver. LTLM provides the dismounted observer or Scout a fully digital, handheld system to accurately determine target location and the ability to call for fire during all weather and lighting conditions. LTLM improves speed, accuracy, and safety of use over previous systems of this type (e.g., Laser Target Locator System (LTLS)).<br><br>(3) K36402 - This funding line is directly aligned to the Army Soldier Lethality Modernization Priority in support of the Situational Awareness Strategy for the Close Combat Soldier. The Integrated Visual Augmentation System (IVAS) provides combat situational awareness and enables Synthetic Training Environment (STE) squad capability so that Soldiers can Fight, Rehearse, and Train on the same system. IVAS includes the Heads-Up Display (HUD) with local processing as the base system along with supportive Soldier power equipment, IVAS network components, and STE components (STE funded under |             |         |         |                                        |             |               |                                                                    |         |                                          |         |             |       |

| <p>separate fund lines). HUD is a low-profile, see-through display system providing 24/7 advanced situational awareness (SA) in all operating environments, fused vision capabilities, and passive targeting. IVAS provides movement of information, high level processing, and displays augmented reality information (Blue force tracking, Navigation, etc.) intuitively in three-dimensional space from mission planning data and real-time data including shared coordinate terrain data and machine learning/artificial intelligence processing enabled by tactical cloud package, shared information for mounted soldiers, "See Thru" armor, and advanced network services. IVAS enables Synthetic Training Environment (STE) squad capability to perform live mixed reality training and rehearsing. IVAS integration through Government owned architecture enables rapid introduction of new and improved capabilities.</p> <p>(4) K36414 - Binocular Night Observation Device (BiNOD) (formerly known as Night Vision Device - Next (NVD-N)) provides optimal resolution and depth perception to Close Combat Force (CCF) Direct Support (DS) drivers, crews, and dismounts. It enhances obstacle avoidance, execution of individual Military Occupational Specialty (MOS) specific tasks, and threat recognition. Addresses Maneuver Center of Excellence Stryker Brigade Combat Team extreme high risk platform mobility and protection gap and Infantry Brigade Combat Team high risk sustainment/mobility gap. Without BiNOD, CCF-DS elements will not be able to keep pace with the CCF, causing the CCF to lose the initiative and gains achieved with their enhance night vision capability.</p> <p>Funding in this budget request would procure night vision technology capabilities and aligns with the National Defense Strategy.</p> <p>The ENVG-B Army Acquisition Objective (AAO) is 122,323.<br/> The LTLM AAO is 12,464.<br/> The IVAS APO is 68,000 and the AAO is 121,500.<br/> The BiNOD AAO is 42,585.</p> <p>Night Vision Devices is part of Army Transformation Initiative.</p> |                                   |                |                                               |                         |                                                                           |                                                 |                        |                |                |                |

\*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

**Justification:**  
FY 2026 B53800 has no funding request.

FY 2026 K36400 Base procurement dollars in the amount of \$114.110 million supports the procurement of 2,375 Enhanced Night Vision Goggle-Binocular systems and associated program management, engineering, fielding, spares, and support equipment.

FY 2026 K36402 has no funding request.

FY 2026 K36414 is the first year of procurement funding for BiNOD. Base procurement dollars in the amount of \$96.946 million will procure 9,275 Binocular Night Observation Device systems and associated program management, engineering, system test and evaluation, spares, fielding, and support equipment. The P-40 quantity is not correct; please refer to the P-5 for the correct quantity of 9,275.

In accordance with section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110 - 181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

| PROC funding reduction of \$7.1 million from FY 2025 to FY 2026 results in hardware unit cost price shift to the highest-level stepladder pricing (for Quantities less than 2,000 systems).                                                                                                                             |                     |               |                      |                     |               |                                                                    |                     |               |                      |                     |               |                                                                                 |                     |               |                      |                     |               |                      |
| Increase of FY 2026 Systems Engineering/Program Management (Government) (Matrix Support) due to FY 2025 Matrix Support costs will be funded using both FY 2024 carryover and FY 2025 base funds. Current FY 2026 ~19% matrix cost increase displayed is estimated not to exceed inflation when prior years are updated. |                     |               |                      |                     |               |                                                                    |                     |               |                      |                     |               |                                                                                 |                     |               |                      |                     |               |                      |

**Remarks:**  
The delivery order quantities will be competitively awarded between the 2 existing manufacturers; L3 Harris and Elbit Systems of America.

"A" in the Delivery Schedule indicates the Contract Award Date.  
**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

| <p><b>Remarks:</b></p> <p>The Cost Element Heads-Up Display (HUD)/Puck Tactical kit comprises of the HUD/puck, Radio, Conformal Wearable Battery (CWB), Advanced Battery Charger (ABC), and Tactical Cloud Package (TCP). One tactical kit includes one HUD/puck, three CWBs, one radio, one ABC for every 50 HUD/puck system, and one TCP for every 135 HUD/puck system.</p> <p>IVAS single channel radios were realigned to Handheld Manpack Small Form Fit (HMS), B95004 starting in FY 2022. This program is now procured by Program Executive Office Command Control Communications-Tactical (C3T).</p> <p>FY 2025 Reprogramming action required for Soldier Borne Mission Command (SBMC) development and corresponding architecture aligning to the Army's Next Generation Command and Control (NGC2) Network Architecture. Change in Army priorities and requirements reduce Integrated Visual Augmentation Systems (IVAS) 1.2 procurement quantity from 3,162 systems to 0. Reprogramming action submitted for \$229,890K. \$32,960 reprogram to BiNOD/K36414 and \$196,930K to 604710/BQ6.</p> <p>SBMC FY 2026 previously requested funds were realigned in part from this procurement line to RDTE (PE 0604710A.BQ6) to develop the next generation Advanced Situational Awareness System and SBMC-Architecture (SBMC-A) to enable Human Machine Integration (HMI) and extensibility with other Army assets. SBMC-A complements and enables Next Generation Command and Control (NGC2).</p> |                     |               |                      |                     |               |                            |                                                                           |                |                      |                        |               |                      |                     |                                                                       |                        |                     |               |                      |  |

**Remarks:**  
A revised FY 2026 engineering estimate for the First Destination Transportation cost allowed for 80 additional systems to be procured. The total FY 2026 production quantity increased from 9,195 to 9,275.

The Binocular Night Observation Device (BiNOD) is part of the Army Transformation Initiative.

<sup>(†)</sup> indicates the presence of a P-21

**Remarks:**  
Binocular Night Observation Device (BiNOD) (formerly known as Night Vision Device-Next (NVD-N)) is a New Start in FY 2026.

BiNOD provides optimal resolution and depth perception to Close Combat Force Direct Support (CCF-DS) drivers, crews, and dismounts. It enhances obstacle avoidance, execution of individual Military Occupational Specialty (MOS) specific tasks, and threat recognition. It addresses the Maneuver Center of Excellence Stryker Brigade Combat Team extreme high risk platform mobility and protection gap and the Infantry Brigade Combat Team high risk sustainment/mobility gap.

FY 2026 increase in affordable quantity due to reduction in projected First Destination Transportation costs.

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description:

This funding line provides support to the Close Combat Soldier in the area of situational awareness. The Small Tactical Optical Rifle Mounted (STORM) Micro-Laser Rangefinder (MLRF) is a weapon-mounted, multi-function laser system. It provides an eye safe laser rangefinder, digital compass, Infrared (IR) and visible aiming lights, and an IR illuminator for far target location with continuous range, accuracy, weight and power performance enhanced capabilities. STORM is a laser range finder supporting squad and unit level formations. When connected to a Precision Lightweight Global Receiver/Defense Advanced Global Positioning System (GPS) Receiver (PLGR/DAGR), the STORM provides range and direction information to develop accurate and timely far target locations. The STORM addresses the lack of depth perception for night applications through use of its IR illuminator and rangefinder. The latest STORM variant includes a ballistic calculator for Soldiers.

Funding in this project aligns with the National Defense Strategy.

The Army Acquisition Objective (AAO) for this program is 15,570.

| FY 2026 Base procurement dollars in the amount of \$2.111 million supports the prioritized fielding of STORM II systems to Snipers, Mortar, Institutional Training Requirements, USASOC and Air Defense Dismounted authorizations. Also funds the prime contractor to provide Interim Contractor Maintenance Support, track potential parts obsolescence, track trends in field usage and repair data, conduct annual reliability testing and, if required, make updates to the system. |                                        |                                                                                         |

| <b>Description:</b><br>BLI 0169BZ6501 / Base Expeditary Targeting and Surv Sys is a new start in FY 2026.<br><br>Base Expeditionary Targeting Surveillance System - Combined (BETSS-C) (BZ6501) is a family of force protection surveillance systems providing 24/7, 360-degree visual coverage with a tower- or tripod-mounted EO/IR Sensor payload that offers detection ranges out to 20km. The system utilizes the Ageon Command and Control (C2) software and provides real-time video for 24/7, 365 continuous video feeds. The trailer-mounted Persistent Surveillance System - Ground (PSS-G) sensor platform is available in both an 80' heavy tower and a 25' medium tower. Alternatively, the smaller Cerberus Lite Scout and Detachable Kits are mounted on tripods for expeditionary applications. These systems utilize long range detection sensors that benefit from the elevation of the parent platforms for increased line of sight. All BETSS-C system variants can be equipped with wireless C2 capabilities.<br><br>Overseas Operations Costs (OOC) funds this requirement in FY 2026. |                                   |                |                |                                               |                    |                      |                                                                                             |                                            |                |                        |                    |              |

| FY 2026 Base procurement dollars in the amount of \$1.801M supports the procurement of one (1) Base Expeditionary Targeting Surveillance Systems - Combined (BETSS-C), Persistent Surveillance System - Ground (PSS-G) Heavy tower, mounted sensors (EO/IR sensors, radar sensor, and radio connectivity kit), and associated cabling and mounting hardware as the result of an operational loss in support of Operation Inherent Resolve (OIR) - (Non-Enduring). This is an increase of \$1.801 million from the FY 2025 requested level. |                                               |                                                                                              |

| Description:<br>The Counter-Rocket, Artillery and Mortar (C-RAM) Enhancements line (H30504) provides the Land-based Phalanx Weapon System (LPWS) C-RAM capability to the Indirect Fire Protection Capability (IFPC)/ Avenger Battalions, 5-5 and 2-44 Air Defense Artillery. The LPWS consists of a trailer-mounted, high rate of fire 20mm Gatling gun guided by input from its integrated search and tracking radar and Forward Looking Infrared receiver. It includes two 60 kW generators and a Local Control Station, also mounted on the trailer, as well as a Remote Control Station. The LPWS protects high value ground assets from incoming munitions, such as RAM, as well as unmanned aerial systems (UAS).<br><br>Overseas Operations Costs (OOC) funds this requirement in FY 2026. |                            |         |            |                                        |             |               |                                                                                          |                                          |         |                 |             |       |

Justification:

FY 2026 funding in the amount of \$27.881M will procure 3 LPWS systems in support of the enduring war requirement for Operation Inherent Resolve (OIR). Unit prices reflect an assessed yearly Navy procurement of LPWS. In the event Navy procurements do not occur at this level, the budgeted LPWS unit price may not be achievable.
