"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

| Remarks:<br>This funding supports the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems, Transport Layer.<br><br>AGNR is an Engineering Change Proposal (ECP) to specific aviation platforms to address SINCGARs obsolescence and crypto-mod requirements.<br><br>AGNR FY 2026 Base procurement dollars (B95017) in the amount of \$59.429 million funds AGNR B-Kit procurements, UH-60M, CH-47F and AH-64E integration modification work orders (MWO), Aviation Radio Control Manager (ARCM) software updates, cybersecurity support, initial spares, component/system/platform level testing, and program management office support.<br><br>AGNR Recurring HW: Cost consists of B-Kits (Radios). Decrease from FY 2025 to FY 2026 is in alignment with PEO Aviation's AGNR UH-60M, CH-47F and AH-64E MWO requirements.<br>AGNR Non-Recurring Engineering (NRE): Costs include the engineering change proposals (ECPs) Modification Work Orders (MWO) for UH-60M, CH-47F and AH-64E. Increase from FY 2025 to FY 2026 is in alignment with PEO Aviation's AGNR UH-60M, CH-47F and AH-64E MWO requirements.<br>Initial Spares and Repair Parts: B-Kit sparing is at 6% of planned procurement quantities. Decrease from FY 2025 to FY 2026 is directly related to the recurring hardware procurement quantity decrease from FY 2025 to FY 2026.<br>System Engineering: Matrix Government and SETA contract labor for system management, control and execution.<br>System Technical Support (STS): Cybersecurity maintenance.<br>System Test and Evaluation: Cost consists of component, system and platform level testing. |                     |                            |                      |                     |               |                      |                                                                                     |               |                      |                     |               |                      |                                                                      |               |                      |                     |               |                      |

Description:

This funding enables the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems.

This funding line supports the Army Modernization Priority Air & Missile Defense and is part of the Army's modernization plans.

B24400 Army Link 16 Systems is the Parent Line to Multifunctional Information Distribution System (MIDS) Joint Tactical Radio System (JTRS) Ground Variant (GV) (B24425).

Army Link 16 is a tactical data link that networks communication between land, sea, and air forces to support joint operations and improve interoperability. It allows for real-time transfer of combat data, voice communications, imagery, and relative navigation information using data encryption and frequency hopping to maintain secure communications. Interoperability provided by Army Link 16 allows the user in the communication link to electronically observe the battlespace, identify threats, and acquire targets.

IAW the Joint Requirements Oversight Council Memorandum (JROCM), the Army will procure Link 16 terminals, gateways, and radios along with services in support of the Army's Link 16 Modernization Strategy by providing interoperability and continuity through the procurement of tactical communication enhancement equipment, ancillaries, and related services. Components supported under Army Link 16 include but are not limited to: Ground Army Integrated Air and Missile Defense (IAMD), Aviation, Communication Gateways, and Ground Fires Radios. These items will provide Concurrent Multi-netting (CMN), Concurrent Contentions Receive (CCR), Enhanced Throughput (ET) and advanced Transmission Security (TRANSEC) capabilities.

MIDS JTRS GV is a modernization effort of the MIDS Low Volume Terminal (LVT), providing a software defined radio solution that introduces modernized Link 16 networking capabilities. Upon completion of fielding, MIDS JTRS GV will fully displace Army MIDS LVT variant. MIDS JTRS GV will provide CMN, CCR, ET and TRANSEC.

**Justification:**  
FY 2026 Base procurement dollars in the amount of \$133.836 million supports the procurement of MIDS JTRS Ground Variant systems/B-Kit Production, A-Kit Production, Schoolhouse A-Kits, ancillaries, assessments, warranties, software licenses, Army Network Design Facility (ANDF) support, platform integration, fielding, and Systems Engineering and Program Management (SEPM).

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), these items are necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

| Remarks:<br>This funding enables the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems.<br><br>FY 2026 Base procurement dollars in the amount of \$133.836 million supports the procurement of MIDS JTRS Ground Variant system's B-Kit Production, A-Kit Production, Schoolhouse A-Kits, ancillaries, assessments, warranties, software licenses, Army Network Design Facility (ANDF) support, platform integration, fielding, and program management office support.<br><br>Recurring Production: MIDS JTRS Ground Variant (GV) radios, ancillary equipment, and associated warranties.<br>Non-Recurring Costs: MIDS-JTRS GV Platform Integration in support of (FAAD, Patriot, IBCS, THAAD, ADAM (AMDPCS)). FY 2025 to FY 2026 increase due to integration efforts for FAAD, Patriot, IBCS, THAAD, ADAM (AMDPCS)) expected to complete FY 2026.<br>Software Costs: Maintenance of software licenses for the MIDS JTRS GV systems and Link 16 terminal annual required software updates, and maintenance.<br>System Engineering Cost: Matrix Government and Systems Engineering and Technical Advisory (SETA) contract labor for system management, control and execution.<br>System Test and Evaluation Cost: ATEC and ANDF (DEVCOM) support for Operational Assessments.<br>Training Cost: Hardware for training team. Decrease from FY 2025 to FY 2026 due to the training hardware being procured prior to FY 2026 in order to support the First Unit Equipped in FY 2027.<br>Initial Spares: Spare MIDS JTRS GV systems and ancillaries will be procured to support depot activity. Increases from FY 2025 to FY 2026 due to program ramp up in order to meet Joint Full Operational Capability of 90% by FY 2029.<br>Fielding Cost: MIDS JTRS GV new equipment training (NET) and new equipment fielding (NEF), initial support equipment, repairs, shipping, and Tobyhanna Depot support. FY 2025 to FY 2026 cost increase results from ramping up of fielding efforts as procurement deliveries increase in support of FUE in FY 2027. |                     |               |                      |                     |               |                                                                    |                     |               |                      |                     |               |                                                                      |                     |               |                      |                     |               |                      |

**Remarks:**  
Navy program office (owner of MIDS JTRS contract) has established a 12-24 month Lead time for MIDS JTRS vendors.

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

| Gross/Weapon System Unit Cost ( <i>\$ in Thousands</i> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | -                          | -              | -              | -                                             | -                  | -                    | -                                                                          | -                                          | -              | -                      | -                  | -            |
| <b>Description:</b><br>The Unified Command Suite (UCS) is a mobile communications Family of Systems platform consisting of three separate products; Joint Reachback Interoperability System (JRIS), Advanced Echelon (ADVON), and Dismounted Strike Kit (DSK). Each of which are self-sufficient and highly interoperable by integrating Commercial-Off-the-Shelf/Government-Off-the-Shelf (COTS/GOTS) military communications hardware. The UCS provides communications interoperability with Federal, State, Local and Military Emergency Response elements at incident scenes. The UCS is constantly employed throughout the Continental United States (CONUS); over 3,000 mission events and 4,500 mission days annually. UCS benefits the warfighter by enabling incident Commanders to better assess an incident scene, advise responders, and access critical reach-back capability to improve decision making.<br><br>Establishment of Weapons of Mass Destruction Civil Support Teams (WMD-CST)<br><br>* 1999 - Title 10 USC 12310, established WMD-CSTs<br>* 2003 - The National Defense Authorization Act (NDAA) of 2003 authorized the establishment of 55 WMD CSTs<br>* 2006 - Public law 109-364 amended Title 10 USC 12310, directs WMD-CSTs to prepare for or respond to any event involving the following:<br>- The use or threatened use of a WMD in the United States;<br>- A terrorist attack or threatened terrorist attack in the United States that results, or could result, in catastrophic loss of life or property.<br>- The intentional or unintentional release of nuclear, biological, radiological, or toxic or poisonous chemical materials in the United States that results, or could result, in catastrophic loss of life or property.<br>- A natural or man-made disaster in the United States that results, or could result, in catastrophic loss of life or property.<br>* 2006 (August) - The Joint Requirements Oversight Council (JROC) approved the UCS Capability Production Document (CPD) as a Program of Record (PoR).<br>* 2013 - The NDAA of 2013 expanded the number of WMD-CSTs from 55 teams to 57 teams, based on the recommendation of the "Advisory Panel on Department of Defense Capabilities for Support of Civil Authorities After Certain Incidents" (Additional teams in Florida and New York were established). |                            |                |                |                                               |                    |                      |                                                                            |                                            |                |                        |                    |              |

| <p>*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.</p> <p>Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                       |             |       |                                               |                                          |                                                                            |                                            |                                          |                                          |                                          |
| <p><b>Justification:</b></p> <p>FY 2026 Base funding in the amount of \$20.010 million will modernize, upgrade, and procure components for the Unified Command Suite (UCS) for the National Guard Bureau Weapons of Mass Destruction Civil Support Teams (WMD CST). Additionally, FY 2026 funding will be used to continue efforts to modernize High Frequency (HF) Radios, Wireless Communication Systems, Automated Data Processing (ADP), and Network Component Systems.</p> <p>HF Radio system modernization targets the current MICOM HF system which is at the end of sale/support with limited spare pool. HF radio serves as last backup means of communication during network and communications failure.</p> <p>Wireless Communication Systems include the Mobile Ad Hoc Networking (MANET) radio, wireless access points and wireless downrange cameras. Current wireless capabilities are projected to be end of sale/support in FY25. Wireless systems enable wireless enable intra, inter, and extra-team network connectivity allowing data sharing and Command and Control (C2) functions.</p> <p>ADP Systems include all laptop, desktop and tablet computer devices. Current laptops and tablets are end of sale and are project to have cyber compliance concerns in FY26. ADP systems allow teams to analyze C2 data and transmit data to national labs to confirm substance found.</p> <p>Network Component Systems include network servers, switches, routers, firewalls, modems and Hardware/Software management systems. Current network components are projected end of sale/support in FY26. Network Component Systems allow network connectivity and use of server, including applications and data, enabling communication with C2 and critical reach back capabilities. They also route Common Operating Picture (COP) data to Joint Force Headquarters - State (JFHQ-ST), USNORTHCOM, and enhance communication with Incident Command.</p> <p>The ongoing SATCOM modernization includes installation of commercial Wideband Global SATCOM (WGS) satellites, as legacy systems will no longer be supported by the manufacturer. The Advanced Echelon(ADVON) Prime Mover efforts include integrating existing shelters onto newly leased prime movers. Note, the ADVON prime movers are leased approximately every ten (10) years through GSA and include a maintenance warranty that expires at the end of the lease. Overall, these system modernization efforts are necessary to:</p> <ul style="list-style-type: none"> <li>* Prevent denied Authority to Operate or being quarantined on the DoD Information Network (DoDIN).</li> <li>* Address Manufacturer end of support of equipment that causes equipment to be incompatible with latest DoD vulnerability patch updates.</li> <li>* Ensure program complies with DoD orders and policies for end-to-end data encryption requirements.</li> <li>* Prevent loss of network connectivity and use of servers, including apps and data, breaking communication with C2 and critical reach back capabilities.</li> <li>* Prevent inability to transmit or receive classified information critical to national security/homeland security.</li> <li>* Prevent inability to promulgate COP data to JFHQ-ST, USNORTHCOM, and communicate with Incident Command.</li> </ul> <p>In accordance with section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110 - 181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.</p> |                                       |             |       |                                               |                                          |                                                                            |                                            |                                          |                                          |                                          |

| Remarks:<br>Recurring Cost - Hardware: Unit cost for UCS is a function of multiple components within a hardware change package. The individual material components vary in cost per unit and do not correlate in cost to other system components in other change packages resulting in hardware unit cost variances between years. |                     |                            |                      |                     |               |                                                                     |                     |               |                      |                     |               |                                                                |                     |               |                      |                     |               |                      |

Description:

This funding supports the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

BU8100 COTS Communication Equipment (CE) is the Parent Line to Low Cost Tactical Radio Replacement (B08105), Tactical Communications Components (B08111), Communication Gateways (B98111), Networked Radios Planner (B98112), Cross Domain Solution PEO C3T (B98113), Contingency Communications (B98115), High Frequency (HF) Radios (B98120), and Small Unit Locator and Evader Locator Communications (B98121).

COTS CE procures non-developmental items (NDI) and services in support of the Army's Network Modernization Strategy by providing interoperability and continuity through the procurement of tactical communication enhancement equipment, ancillaries, and related services. Components supported under COTS CE include but are not limited to: HF radios (TOC, Vehicular and Dismount), Link 16 radios, communication gateways, line-of-sight (LOS) radios, beyond line-of-sight (BLOS) radios and radio gateway tactical integration kits. These items provide resilient software-defined communication systems and operational utility and adaptability through simplified and protected communications and are enablers to the Integrated Tactical Network Capability Set (CS) fielding concept in support of the Army Network Modernization Strategy.

The Integrated Tactical Network (ITN) family of radios capability fills critical communications gaps and allows the Army to pivot strategically to changes in combatant environments. ITN provides assured tactical network transport; reduced complexity; security requirements; reduced cost, and Size, Weight and Power (SWaP) for dismounted soldiers; Secure but Unclassified-Encrypted (SBU-E) network; expeditionary command posts not reliant upon mounted assets; and simplified and reduced NetOps toolset capability.

Low Cost Tactical Radio Replacement (LCTRR) (B08105) supports the replacement and modernization of legacy Single Channel Ground and Airborne Radio System (SINCGARS) to address emerging threats and meet National Security Agency (NSA)/Office of Secretary Defense mandated cryptographic modernization requirements. LCTRR's Non-Developmental Item (NDI) radio solution, the Combat Net Radio (CNR), is critical to meeting SINCGARS Modernization for the ARMY and provides resilient and secured communications for Army ground forces to conduct Multi-Domain Operations (MDO) over extended mission ranges. Capabilities will provide reliable, secure, and easily maintained long distance, fixed, on the move, ground-to-air communications, and modernizes Communications Security (COMSEC).

| <p>Tactical Communications Components (B08111) provide for several communication components in support of the ITN which integrates the Army's current tactical applications, services and communications with commercial network components and transport capabilities to form a more flexible, resilient network environment for tactical warfighting with joint and coalition partners. Components include but are not limited to: Link 16, LOS, BLOS, and Advanced Networking Waveforms (ANWf) capable radios (e.g. TSM). Tactical Communications Components supports capability set procurements, platform integration and fielding.</p> <p>Communication Gateways (B98111) provide critical voice and data communication bridging across multiple echelons. The Link 16 Gateway is a rapidly deployable Air/Ground LOS and satellite communication (SATCOM) system. Radio gateway tactical integration kits are for routing and switching between various waveforms. Gateway functions in Tactical Operations Centers. The communication gateways support capability set procurements, platform integration and fielding.</p> <p>The Networked Radios Planner (NRP) (B98112) delivers the Ruggedized Applications Platform - Tactical Radios (RAP-TR) hardware platform and integrated software applications, enabling Network Operations (NetOps) in support of the Army's family of tactical radios. These capabilities provide critical support for Tactical Radio planning, management, and provisioning. Additionally, RAP-TR enables the management and monitoring of the Tactical Radio Integration Kit and ensures compliance with Crypto Modernization requirements. RAP-TR provides NetOps functionality, including the planning, management, monitoring, loading, and configuration of Software-Defined Radios and waveforms. This project supports the Army's Command Control (C2) Applications strategy.</p> <p>Cross Domain Solution (CDS) (B98113): This project supports the infrastructure layer of the Army's Command and Control (C2) Architecture. CDS is an integrated information assurance system composed of specialized software and hardware that is designed to enforce domain separation. It typically includes some form of content filtering, which is used to designate information that is unauthorized for transfer between security domains or levels of classification. This could be between different military divisions, intelligence agencies, or other operations that critically depend on the timely sharing of potentially sensitive information. CDS is a core enabler of the Mission Partner Environment (MPE) and configuration set capability.</p> <p>Contingency Communications (B98115) Procures, integrates, and fields assured multi-path communications for senior Department of Defense leaders while traveling in different platforms. Integration of commercial off-the-shelf (COTS) SATCOM/Cellular Internet communications to enable secure communications and TS/SCI voice teleconferences.</p> <p>HF Radios (B98120) support the long distance, wide area voice and data communications for ground, air-to-ground, and fixed position mission command while at the halt or on the move. HF can augment or replace SATCOM in operational environments where SATCOM is degraded or denied. The existing COTS NDI radios are used to perform a technology refresh of the current HF Radio/Transmitter (R/T) to mitigate crypto-modernization and obsolescence issues.</p> |                                   |                |                                               |                     |                    |                                                                                    |                        |                |                |                |

| *Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                      |             |                                               |                |                                       |                                                                                    |                                       |                                       |                                       |                                       |
| Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                      |             |                                               |                |                                       |                                                                                    |                                       |                                       |                                       |                                       |
| <p><b>Justification:</b><br/>This funding supports the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems.</p> <p>FY 2026 Base procurement dollars in the amount of \$207.402 million procures equipment in support of Low Cost Tactical Radio Replacement (B08105), Tactical Communications Components (B08111), Communication Gateways (B98111), Networked Radios Planner (B98112), Cross Domain Solution PEO C3T (B98113), Contingency Communications (B98115), and High Frequency (HF) Radios (B98120), in accordance with Army's Command Control (C2) Radios, Infrastructure, and Applications strategy.</p> <p>Low Cost Tactical Radio Replacement (B08105) FY 2026 Base procurement dollars in the amount of \$78.035 million supports the procurement of Low Cost Tactical Radio Replacement (Combat Net Radio (CNR)) hardware, data, non-recurring integration, depot facilitization, logistics support, risk management framework (RMF) support, fielding and SEPM.</p> <p>Tactical Communications Components (B08111) FY 2026 Base procurement dollars in the amount of \$13.872 million supports NGC2 integration efforts.</p> <p>Communication Gateways (B98111) FY 2026 Base procurement dollars in the amount of \$11.215 million supports NGC2 integration efforts.</p> <p>Networked Radios Planner (B98112) FY 2026 Base procurement dollars in the amount of \$16.043 million in procurement and fielding of Ruggedized Applications Platform - Tactical Radios (RAP-TR) hardware, software licenses and support, and spares. Additionally, funds will support program management and systems engineering, integration and testing, depot, help desk and logistics /training support activities. The RAP-TR will be fielded in direct alignment with tactical radio fielding requirements to provide the required Network Operations (NetOps) capabilities for planning, management, monitoring, loading, configuration of tactical radios.</p> <p>This Program Element (B98113) supports the Army's Command and Control (C2) Infrastructure strategy. Cross Domain Solution (CDS) FY 2026 funding in the amount of \$12.633 million will be used to: procure 88 Non-Developmental Item (NDI) Tactical Cross Domain Solution (TACDS) quantities for fielding (4) Brigade Combat Teams (BCTs) supporting Army's Command and Control (C2) infrastructure and Integrated Tactical Network (ITN) capability updates, spares, and replacement of obsolete quantities that require upgrades to latest version. Funding also supports: TACDS repairs, battery replacement and TACDS license upgrades, Mission Command Support Center (MCSC) CDS hardware tech refresh in support of ongoing Army tactical operations, High Threat Network (HTN) and High Speed Guard (HSG) initial system procurements with license and service agreement purchases, systems engineering to enable ITN and C2 cross functionality and Raise The Bar (RTB) National Security Compliance requirements, and National Cross Domain Strategy &amp; Management Office (NCDSMO) risk assessments.</p> |                                                      |             |                                               |                |                                       |                                                                                    |                                       |                                       |                                       |                                       |

| Remarks:                                                                                                                                                                                                                                                                                                                                                 |                     |               |                      |                     |               |                                                                             |                     |               |                      |                     |                 |                                                                                      |                     |               |                      |                     |               |                      |
| This funding supports the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems, Transport Layer.                                                                                                                                                                                                   |                     |               |                      |                     |               |                                                                             |                     |               |                      |                     |                 |                                                                                      |                     |               |                      |                     |               |                      |
| Low Cost Tactical Radio Replacement (B08105) FY 2026 Base procurement dollars in the amount of \$78.035 million supports the procurement of Low Cost Tactical Radio Replacement (Combat Net Radio (CNR)) hardware, data, non-recurring integration, depot facilitization, logistics support, risk management framework (RMF) support, fielding and SEPM. |                     |               |                      |                     |               |                                                                             |                     |               |                      |                     |                 |                                                                                      |                     |               |                      |                     |               |                      |
| Recurring HW: FY 2026 Unit Cost increases due to overall reduction in hardware quantities to the minimum sustainment rate (MSR). Reduction in quantities to the MSR supports the Army's shift to NGC2 where the demand is higher for Sensitive But Unclassified-Encryption (SBU-E) Radios.                                                               |                     |               |                      |                     |               |                                                                             |                     |               |                      |                     |                 |                                                                                      |                     |               |                      |                     |               |                      |
| Depot Facilitization Cost: Funds requirements to facilitate the stand-up of the public, private partnership (P3) at the designated government depot activity for the Combat Net Radio.                                                                                                                                                                   |                     |               |                      |                     |               |                                                                             |                     |               |                      |                     |                 |                                                                                      |                     |               |                      |                     |               |                      |

<sup>(†)</sup> indicates the presence of a P-21

**Remarks:**

The acquisition strategy leverage a multiple vendor contract award to meet production quantities needed for fielding to NSA cryptographic modernization goals. Future delivery order quantity splits will be based upon competition and final contract award. Manufacturers for the Low Cost Tactical Radio (LCTRR) Combat Net Radio (CNR) IDIQ contracts are L3Harris Radio Corp (Rochester, NY) and Thales Defense and Security, Inc. (Clarksburg, MD).

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

| This funding supports the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems, Infrastructure Layer.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                     |                            |                      |                     |               |                                                                             |                     |               |                      |                     |               |                                                                                |                     |               |                      |                     |               |                      |
| Tactical Communications Components (B08111) provide for several communication components which integrates the Army's current tactical applications, services and communications with commercial network components and transport capabilities to form a more flexible, resilient network environment for tactical warfighting with joint and coalition partners. Components include but are not limited to: Link 16, LOS, BLOS, and Advanced Networking Waveforms capable radios (e.g. TSM), platform integration and fielding. The LOS unit cost is comprised of multiple components. Quantities are dependent upon capability set requirements and unit types which will vary impacting unit cost. |                     |                            |                      |                     |               |                                                                             |                     |               |                      |                     |               |                                                                                |                     |               |                      |                     |               |                      |

| This funding supports the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems, Infrastructure Layer.                                                                                                                                                                                                                                                                                             |                     |               |                      |                     |               |                                                                             |                     |               |                      |                     |                 |                                                                  |                     |               |                      |                     |               |                      |
| Communication Gateways (B98111) provide critical voice and data communication bridging across multiple echelons. The communication gateways support C2 infrastructure procurements, platform integration and fielding. The Link 16 Gateway is a rapidly deployable Air/Ground LOS and SATCOM system. Radio gateway tactical integration kits are for routing and switching between various waveforms. Gateway functions in Tactical Operations Centers. |                     |               |                      |                     |               |                                                                             |                     |               |                      |                     |                 |                                                                  |                     |               |                      |                     |               |                      |
| FY 2026 Base procurement dollars in the amount of \$11.215 million support NGC2 efforts.                                                                                                                                                                                                                                                                                                                                                                |                     |               |                      |                     |               |                                                                             |                     |               |                      |                     |                 |                                                                  |                     |               |                      |                     |               |                      |

| Remarks:<br>1) Flyaway Non-Recurring, Mission Command Support Center (MCSC) CDS Hardware Tech Refresh and Software Licenses/Support: Funding provides configuration and employment of the NDI TACDS devices and similar high-speed guard hardware (for High-Threat Network and Defensive Cyberspace Operations) and software to enable the transfer of both structured and unstructured data between units at multiple echelons and security domains, one of the Army's primary goals for NGC2. Efforts support Army wide requirements to implement national security directive for Raise the Bar (RTB) cybersecurity compliance from tactical to enterprise across domain systems. This requires procurement of hardware and software with tech refresh of existing tactical hardware components with annual software renewals. |                     |               |                      |                     |               |                                                                             |                     |               |                      |                     |                 |                                                                           |                     |               |                      |                     |               |                      |

2) The FY25 quantity reduced due to the architecture requirements and planned upgrades of the Tactical Cross Domain Solution (TACDS) Hardware, High Threat (HT) Version 1.0.

3) Recurring, Hardware, Tactical Cross Domain Solution (TACDS) Hardware: Funding increase from FY 2025 due to upgrading to newer TACDS hardware device with a higher unit cost. The specific upgrade is from TACDS Vehicle Mounted (VM) Version 3.0 to TACDS High Threat (HT) Version 1.0.

4) Support, System Engineering: Funding increased from FY 2025 to address upgrades to latest TACDS version, systems engineering to enable ITN cross functionality and RTB requirements.

| This funding supports Joint and Next Generation Command and Control (NGC2) initiatives to modernize Command and Control (C2) systems.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                     |                            |                      |                     |               |                                                                             |                     |               |                      |                     |               |                                                                     |                     |               |                      |                     |               |                      |
| Rotary Wing Contingency Communication (RWCC) B98115 supports providing assured multi-path communications for senior leaders while airborne on rotary wing aircraft. RWCC consists of a Department of Defense (DoD) accredited secure communications system connected to commercial-off-the-shelf (COTS) equipment that provides for multi-path connection through commercial Internet services. The RWCC system provides secure voice communications (Threshold) and/or Secure Video Teleconferencing (SVTC) (Objective) at the Top Secret/Sensitive Compartmented Information (TS/SCI) classification level. Beginning in FY 2025, funding in Contingency Communications (B98115) was realigned from Small Unit and Emergency Locator Communications (B98121). |                     |                            |                      |                     |               |                                                                             |                     |               |                      |                     |               |                                                                     |                     |               |                      |                     |               |                      |
| FY 2026 Base procurement dollars in the amount of \$5.216 million procures Cell and SATCOM services, Spectrum Supportability Risk Assessments (SSRAs), Field Service Representatives (FSR), and program management office support.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                     |                            |                      |                     |               |                                                                             |                     |               |                      |                     |               |                                                                     |                     |               |                      |                     |               |                      |

| This funding supports the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems, Transport Layer.                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                     |                            |                      |                     |               |                                                                             |                     |               |                      |                     |               |                      |                                                                |               |                      |                     |               |                      |
| HF Radios (B98120) support the long distance, wide area voice and data communications for ground, air-to-ground, and fixed position mission command while at the halt or on the move. HF can augment or replace SATCOM in operational environments where SATCOM is degraded or denied. HF radios acquisition approach is based on an Engineering Change Proposal (ECP) that will utilize existing Commercial-Off-The-Shelf (COTS)/Non-Developmental Item (NDI) radios to perform a technology refresh of the current HF Radio/Transmitter (R/T) to mitigate crypto-modernization and obsolescence issues. |                     |                            |                      |                     |               |                                                                             |                     |               |                      |                     |               |                      |                                                                |               |                      |                     |               |                      |
| HF Radio (B98120) FY 2026 Base procurement dollars in the amount of \$70.388 million funds the procurement of HF radios, initial spares, fielding, and SEPM.                                                                                                                                                                                                                                                                                                                                                                                                                                              |                     |                            |                      |                     |               |                                                                             |                     |               |                      |                     |               |                      |                                                                |               |                      |                     |               |                      |
| HW Recurring Cost: HF radios and conversion kits.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                     |                            |                      |                     |               |                                                                             |                     |               |                      |                     |               |                      |                                                                |               |                      |                     |               |                      |
| Non-Recurring Cost: Platform integration NRE for the Multiple Launch Rocket System (MLRS) & High Mobility Artillery Rocket System (HIMAR).                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                     |                            |                      |                     |               |                                                                             |                     |               |                      |                     |               |                      |                                                                |               |                      |                     |               |                      |
| Depot Facilitization: Costs associated to establish Tobyhanna Army Depot as the depot source of repair for HF radios and includes equipment and training.                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                     |                            |                      |                     |               |                                                                             |                     |               |                      |                     |               |                      |                                                                |               |                      |                     |               |                      |
| Fielding Costs: New Equipment Training (NET)/New Equipment Fielding (NEF), Tobyhanna Army Depot (TYAD) support, shipping.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                     |                            |                      |                     |               |                                                                             |                     |               |                      |                     |               |                      |                                                                |               |                      |                     |               |                      |
| Spares: Initial spares. FY 2025 to FY 2026 decrease is due to procurement of required spares in support of fielding.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                     |                            |                      |                     |               |                                                                             |                     |               |                      |                     |               |                      |                                                                |               |                      |                     |               |                      |
| Systems Engineering Costs: System Management and SETA requirements which support the program office in managing cost, schedule, and performance.                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                     |                            |                      |                     |               |                                                                             |                     |               |                      |                     |               |                      |                                                                |               |                      |                     |               |                      |
| Systems Test and Evaluation: Network evaluation facility (on-going support), NSA Certification. Decrease from FY 2025 to FY 2026 is due to completion of MLRS & HIMARS platform safety confirmations and Live Fire assessments.                                                                                                                                                                                                                                                                                                                                                                           |                     |                            |                      |                     |               |                                                                             |                     |               |                      |                     |               |                      |                                                                |               |                      |                     |               |                      |

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

**Description:**

In accordance with section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110 - 181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

The Operational Medicine Information Systems-Army (OMIS-A) Program Office provides modernized Operational Health Information Technology (OHIT) software applications to deployed Army medical personnel and units around the world. The OHIT software allows medical providers to electronically document patient care through the phases of care on the battlefield, from the moment of injury until the patient reaches a definitive care facility. With so many different roles and locations providing specific medical interventions at different stages of the patient transport process, electronic health record (EHR) documentation is critical for reasons such as patient safety, improved coordination of care, documentation accessibility across the battlefield, efficiency, accuracy and reliability of documentation, and better data analytics and reporting.

The OMIS-A team collaborates with multiple stakeholders to ensure the battlefield EHR documentation data interfaces with other warfighting systems, such as the Army's Command and Control/Situational Awareness (C2/SA) systems so commanders at all echelons are informed in real-time on the patient movement status of injured Soldiers and the health status of their forces, allowing them to make informed decisions about troop readiness, resource allocation, and troop movement on the battlefield. The Soldier's battlefield EHR documentation data flows into the Military Health Systems EHR, MHS GENESIS, which will follow the Soldier through their military career and into the VA Healthcare system. The battlefield EHR data is critical for patient continuity of care and the availability of the battlefield EHR is pivotal in applying for and obtaining VA Disability compensation.

Requirements in the operational environment are constantly evolving and to ensure the Warfighter's needs are being met, the OMIS-A program provides the following capabilities:

- Develops and/or Integrates OHIT software applications onto numerous Army systems and networks, including the Army Integrated Tactical Network (ITN)
- Tests and Evaluates software provided by the Joint Operational Medicine Information Systems (JOMIS) program to ensure effective operation and cyber compliance on Army network infrastructures
- Develops OHIT software applications for Army specific requirements that JOMIS can/will not provide
- Maintain Authority to Operate/Authority to Connect for all OHIT software applications on Army infrastructure
- Field and train capabilities to all Army units

| Funding provides the hardware to Army users to utilize the BATDOK-J software, which will be the first handheld electronic documentation source used by Army medics at the point of injury and during patient movement. The data from BATDOK-J will follow the patient through the continuum of care, which is a significant patient safety improvement and will populate the patient's lifelong health record. |                            |         |                                        |              |                                                                                           |               |                                              |         |         |         |

**Justification:**  
FY 2026 base procurement dollars in the amount of \$110.678 million supports the procurement of communications and electronic equipment and other support equipment used in select programs. It also includes all cost integral and necessary to deliver useful end items intended for operational use within the communications and electronics, information dominance and multi-domain battlespace environment.

| This program provides the Army, as a member of the Department of Defense (DoD) Counterintelligence (CI) community, with advanced CI operational equipment to enhance its ability to contour the global threat through significant improvements in information sharing, common situational awareness, and knowledge management in a joint operational environment.                                                                                                 |                            |             |         |                                        |              |               |                                                                                |                                     |         |                 |         |             |       |
| Joint Task Force Guantanamo (JTF-GTMO) Intel IT Systems provide critical intelligence capabilities in support of ongoing detainee operations, military commissions and detainee assessments as directed by OSD. In accordance with directives by OSD and DoD General Counsel on GTMO detainee records, JTF-GTMO is mandated to preserve all detainee relevant data. These systems were originally installed in a contingency nature with the intent of operating. |                            |             |         |                                        |              |               |                                                                                |                                     |         |                 |         |             |       |
| Sensitive Compartmented Information Facility - Information Technology (SCIF-IT) provides maintenance, manning, and sustainment in support of the Joint Worldwide Information Communications System (JWICS) Top Secret network services for the entire Army. In addition, the project supports Collateral (Secret and below) network services in the Army's military intelligence IT domains.                                                                      |                            |             |         |                                        |              |               |                                                                                |                                     |         |                 |         |             |       |

**Justification:**  
FY 2026 Base procurement dollars in the amount of \$15.290 million procures the following efforts:

FY 2026 Base procurement dollars in the amount of \$15.290 million supports the Department of Defense Intelligence Information System (DODIIS) - compliant CI and Human Intelligence (HUMINT) material solutions to support implementation of case management, threat management information systems, and information processing systems at Service, Major Command (MACOM) and user level Army Intelligence sites. Funding also provides specialized equipment necessary to support worldwide CI operations and investigation missions. Funding also procures Army Intelligence-Related Information Technology Systems and Networks. This effort will provide life-cycle replacement for critical information technology systems to include Joint Worldwide Intelligence Communications Systems (JWICS) required to support global Army intelligence operations.

| Flyaway Unit Cost (\$ in Thousands)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | -           | -       | -       | -                                      | -           | -             | -                                                                       | -                                   | -       | -               | -           | -     |
| Gross/Weapon System Unit Cost (\$ in Thousands)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | -           | -       | 67.878  | 271.638                                | -           | 271.638       | -                                                                       | -                                   | -       | -               | -           | -     |
| Description:<br>Multi-Domain Intelligence (MDI) is the Army Intelligence Enterprise's overarching modernization framework that drives Military Intelligence (MI) modernization priorities to field a ready Army Intelligence team supporting Mission Command against all threats in Multi-Domain Operations (MDO). The MDI framework will enable intelligence professionals to execute the intelligence cycle and associated doctrinal functions with increased speed, precision, and accuracy in both competition and conflict. The framework's emphasis on modernizing sensors, enhancing data management practices, and advancing analytical tradecraft through technology will support commanders' ability to make sound, timely decisions, placing friendly forces in a position of decisive advantage. The Multi-Domain Intelligence funding supports a number of different activities required for Army Intelligence operations.<br><br>K26111--The Intelligence Applications and Integration (Intel Apps) Program is a software-centric, platform agnostic ACAT III Program that will provide the Next Generation intelligence capabilities aligned to the National Defense Strategy and Multi-Domain Operations by enabling intelligence professionals to work through the intelligence cycle with increased speed, precision and accuracy. The Intel Apps Program will synchronize applications (including All Source, Intelligence Support to Targeting, Weather Operational Effects, and Information Collection Management) to be integrated into the Mission Command Platforms and NGC2 architecture, including Next Generation Command and Control, onto dedicated Intelligence Edge Nodes where applicable, extending Army enterprise intelligence from the Army Intelligence Data Platform/ Cloud to the Tactical Edge.<br><br>K26222-- The Army Integrated Geospatial Enterprise Capability (AIGEC) is the singular set of modernized Army Geospatial and Geospatial Intelligence (GEOINT) requirements that will deliver modernized capabilities from enterprise to the tactical edge. AIGEC advances the Geospatial Engineer's ability to perform the functions of Generation, Management, Analysis & Dissemination (GMAD) and Geospatial Intelligence Imagery Analyst's ability to perform Processing, Exploitation, and Dissemination (PED) of data which supports a commander's assessment of the battlefield providing actionable intelligence. AIGEC requirements include: enterprise delivery of software and licensing, generating data to fill the gaps in the Theater Geospatial Database (TGD), and Standard Sharable Geospatial Foundation (SSGF); managing the data to support the Multi-Domain Operations and the Next Generation Command and Control Common Operational and Intel Pictures; analyzing the terrain in support of the Military Decision Making Process (MDMP) with predictive analyses, providing actionable information products such as the Course of Operations (COO) for Intelligence Preparation of the Operational Environment (IPOE); and disseminating data and information via web services, image tiles, and hardcopy publishing.<br><br>K26333--The MDI program supports the Tactical Intelligence Node (TIN) and based on the expanded Basis of Issue of CD1 systems in FY 2024 and FY 2025. FY 2026 funds will complete the fielding, training, and initial sustainment for systems procured in FY24 and FY25. |             |         |         |                                        |             |               |                                                                         |                                     |         |                 |             |       |

| <p>K26444--The MDI program supports the procurement of software licenses for the Army Intelligence Data Platform (AIDP)/CD2 Program, which is a commercial item acquisition to modernize the Army Intelligence Data Enterprise with data warehousing and advanced analytical capabilities in support of worldwide operations across multiple echelons but primarily accessed at echelons from division through strategic command and hosted in the Cloud. AIDP is the primary provider of intelligence to Next Generation Command and Control.</p> <p>K26555--The MDI program supports the procurement and fielding of Top Secret and Below (TSABI) Cross Domain Systems required to exchange information between classified networks. The Cross Domain Solution Suite (CDSS) is the hub allowing analysts to transfer data, information, and products across networks operating at different security levels.</p> <p>K26666--The MDI program supports the upgrade, modification, and Technical Refresh of current Army Intelligence Ground Stations. The Ground Station Modification includes the Tactical-Intelligence Ground Station (TGS) and the Operational Intelligence Ground Station (OGS). The TGS primary mission is as a target acquisition subsystem and performs Processing, Exploitation, and Dissemination (PED) execution. The OGS provides a DCGS-A Ground Station for CORPS, Army Forces/Joint Forces Land Component Commander, and/or Joint Task Force Commanders for OCONUS, Theater, Coalition, and National Intelligence, Surveillance, and Reconnaissance (ISR) Sensor Systems. The OGS provides access to enhanced sensor data, improved analyst tools, and technology upgrades ensuring battlefield awareness and targeting capability.</p> <p>K26777-- The Joint Tactical Terminal/CIBS funding line is directly aligned to the Army Network Modernization Priority. The Joint Program Office (JPO) for Integrated Broadcast Service (IBS) Terminals supports all of the Joint Services and Special Operations Command (SOCOM). The JPO's role is to coordinate modernization and sustainment of IBS terminals interoperable with the Ultra High Frequency Satellite Communications (UHF SATCOM) IBS broadcasts in support of Air and Missile Defense, Long Range Precision Fires, Soldier Lethality, and Network Command, Control, Communications, and Intelligence Cross Functional Teams and Tactical Intelligence Targeting Access Node. The IBS is the worldwide Department of Defense (DoD) standard network enterprise for transmitting time-sensitive tactical intelligence and targeting data to all echelons of Joint Service operational Users. The Joint Tactical Terminal (JTT) is the official IBS system and ensures continued IBS interoperability to a variety of tactical producers and consumers across the Joint Services. JPO IBS Terminals program offices perform JTT life cycle program management through acquisition, fielding support and sustainment of JTT equipment. The JPO coordinates support as needed for the IBS networks that employ Communication Security (COMSEC), a Common Interactive Broadcast (CIB), and the Common Message Format (CMF). The JPO is fielding a Next Generation non-developmental item to replace the existing JTT due to obsolescence and sustainment costs with current JTT configurations.</p> <p>This program is included in the OPA Budget Line Consolidation. In FY 2025, this program consolidates the JTT/CIBS-M (V29600) program into the Multi-Domain Intelligence (BZ6100/K26777) program.</p> |                                   |                |                                               |                     |                                                                                |                                            |                        |                |                |                |

**Justification:**

FY 2026 base procurement dollars in the amount of \$108.655 million support the following efforts:

K26111 - FY 2026 base procurement dollars in the amount of \$35.957 million is for acquisition of Intelligence Application software, maintenance and licenses to be integrated on Mission Command Platforms to include Next Generation Command and Control equipped units or fielded on other platforms (e.g., Cloud); fielding and training support of Intel Apps.

K26222 - FY 2026 base procurement dollars in the amount of \$14.344 million is for purchase of modernized Geospatial Workstations (GWS) hardware and software to continue to provide GEOINT capabilities and tech refresh systems.

K26333 - FY 2026 base procurement dollars in the amount of \$6.127 million is for finishing software license sustainment of previously procured CD1 systems for the Basis of Issue to United States Army Special Operations Command (USASOC). This is completed prior to the transition to sustainment funding for software maintenance.

K26444 - FY 2026 base procurement dollars in the amount of \$40.620 million for Army Intelligence Data Platform (AIDP) (CD2) supports purchase of software licenses in the cloud and cloud usage requirements and to modernize the Army Intelligence Data Enterprise capabilities.

K26555 - FY 2026 base procurement dollars in the amount of \$2.954 million is for Cross Domain Solution Suite (CDSS) Modifications: Purchase of new Raise The Bar (RTB) hardware /software (licenses), and on-site installation; non-recurring engineering (NRE), logistics, property transfer, and shipping; as well as fielding and training. These upgrades will ensure fielded systems are in compliance with current RTB requirements for remote administration, load balancing, and enhanced communications capability.

K26666 - FY 2026 base procurement dollars in the amount of \$1.623 million support efforts of Ground Station Modernization: Purchase of new hardware (HW) configuration upgrades and for the technical refresh purchase of new state of the art processors, storage devices, network upgrades / communications data-link antennas to include the Aerial Layer Element (ALE), tactical radios, an enhanced computer unit (ECU) as well as software (SW) upgrades, licensing, and integration (HW/SW); NRE, logistics, property transfer, and shipping; and on-site fielding and training.

| Remarks:<br>FY 2026 unit cost decreases for Intel Apps Software and Intel Apps Enterprise Software are a result of range quantity purchases. System Engineering support increase reflects additional integration of software on commercial hardware approach to modify capabilities. Services reflect the initiation of training efforts related to fielding for each Intel App. |                     |                            |                      |                     |               |                      |                                                                         |               |                      |                     |               |                      |                     |                                                                    |                      |                     |               |                      |  |

The CDS Program supports the TS/SCI CDS materiel solution, fielding, and continual maintenance/sustainment of tactical systems and related infrastructure in a controlled-SCI environment. Strategically deployed kits fielded to CORPs/DIV/MIB-T will serve as an extension of the enterprise baseline to the Warfighter. Ongoing system and software engineering support is required to manage the system lifecycle, HW and SW maintenance, and operation of the CDS systems. These engineering efforts focus on providing continual CI/CD/CE delivery of upgrades and technology refreshes.

| Remarks:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                     |                            |                      |                     |               |                                                                         |                     |               |                      |                     |               |                                                                       |                     |               |                      |                     |               |                      |
| The TGS primary mission is as a target acquisition subsystem; it deploys as a combat multiplier, enabling the BCT/DIV/CORPS S2/G2 elements to receive, correlate, process, store, and display actionable Geospatial Intelligence (GEOINT) Data in support of intelligence collection, processing and reporting at the tactical Brigade Combat Team (BCT) level. The TGS performs Processing, Exploitation and Dissemination (PED) answering the maneuver commander's priority intelligence requirements (PIR) and decision-making process in the conduct of unified land operations (ULO). The OGS/ADV provides a DCGS-A Ground Station for OCONUS, Theater, Coalition, and National ISR Sensor Systems to CORPS, Army Forces/Joint Forces Land Component Commander, and/or Joint Task Force Commanders. As part of the DCGS-A family of systems, the OGS/ADV receives and processes sensor data, information, and intelligence and makes this data discoverable and usable by analysts throughout the ISR community, from tactical (Corps and Aerial Exploitation Battalions (AEB)) to national levels. The OGS provides access to enhanced sensor data, improved analyst tools, and technology upgrades ensuring battlefield awareness and targeting capability. Units will continue to face ground system management challenges through divestiture. Reduced funding in FY26 supports remaining ground system fielding efforts. |                     |                            |                      |                     |               |                                                                         |                     |               |                      |                     |               |                                                                       |                     |               |                      |                     |               |                      |

| The Information Systems Security Program funding line supports the Army's Network Strategy.                                                                                                                                                                                                                                                                                                                                                                                                                   |                            |             |         |                                        |              |               |                                                                                        |                                          |         |                 |         |             |       |
| The Information Systems Security Program (ISSP) supports the Army's Communication Security (COMSEC) modernization initiative to include the Army Key Management Infrastructure (AKMI) supporting the Total Force. The ISSP collects COMSEC requirements, procures and fields solutions, key management capabilities, Information Assurance (IA) / Cyber tools and associated hardware infrastructure to secure the Department of Defense Information Network (DoDIN) against evolving cyber threats.          |                            |             |         |                                        |              |               |                                                                                        |                                          |         |                 |         |             |       |
| The ISSP supports the identification and allocation of new and emerging COMSEC capabilities required to protect Army's architectures and to replace current and legacy cryptographic systems with technologically advanced (network centric/DoDIN compliant) devices. AKMI is a unified, scalable, interoperable, and trusted infrastructure providing net-centric key management services to systems that rely on cryptography, serving Department of Defense (DoD) and the broader cryptographic community. |                            |             |         |                                        |              |               |                                                                                        |                                          |         |                 |         |             |       |
| Both the ISSP and AKMI programs ensure Army keeps pace with the Chairman of the Joint Chiefs of Staff and Joint Requirements Oversight Council directed cryptographic modernization, advanced key management and network centric performance capability mandates.                                                                                                                                                                                                                                             |                            |             |         |                                        |              |               |                                                                                        |                                          |         |                 |         |             |       |

| FY 2026 Base procurement dollars in the amount of \$0.826 million supports automated capability to conduct COMSEC and hardware infrastructure modernization required to secure the Department of Defense Information Network (DoDIN) against evolving cyber threats. Funds support responding to operational mission needs and permits prioritization of COMSEC requirements. Provides for life cycle refresh of equipment to support mandated cybersecurity requirements to secure the DoDIN, such as Defense Information System Agency (DISA) Security Technical Implementation Guides (STIGs), Risk Management Framework (RMF) controls, and to meet Department of Defense (DOD) requirements. |                                        |                                                                                        |

| Gross/Weapon System Unit Cost (\$ in Thousands)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 25.259      | 6.931   | 11.385  | 8.825                                       | -           | 8.825         | -                                                                              | -                                        | -       | -               | -           | -     |
| Description:<br>SSN B96016 / NEXT GENERATION LOAD DEVICE- MEDIUM is a new start within the Communications Security (COMSEC) program in FY 2026<br><br>This funding enables the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems. This Program Element (PE) is a critical enabler of the Army Modernization Priorities including Cryptographic Modernization 2 (CM2) addressing current and emerging cyber security threats. Communication Security (COMSEC) is critical to maintaining the Army's most sensitive networks in support of secure, seamless, battlefield operations. Without COMSEC products, Warfighter communications cannot operate at classification levels of SECRET and TOP SECRET. The COMSEC program consists of three-sub programs: COMSEC Cryptographic Systems (CCS), Army Key Management Infrastructure (AKMI), and Next Generation Load Device (NGLD) family of systems.<br><br>COMSEC Cryptographic Systems (CCS) procures, fields, and sustains National Security Agency (NSA) products in support of secured, encrypted communications across all echelons of tactical, strategic, and enterprise networks. CCS consists of a range of products spanning from high-capacity network encryptors for high-echelon post, camps, and stations, to tactical edge user. CCS prices vary based on network bandwidth requirements.<br><br>The Army Key Management Infrastructure (AKMI) develops, procures, and sustains systems that deliver Cryptographic Key and products from the National Security Agency (NSA) Key Management Infrastructure (KMI) storefront across all echelons of strategic, tactical, and enterprise networks. These systems provide secure storage, transport and distribution capabilities for NSA certified high-assurance devices and are critical to maintaining all high-assurance networks. AKMI includes Management Client (MGC) Nodes, Over the Network Key (OTNK) specification software including the Intermediary Application (iApp), Automated Communications Engineering Software (ACES), Simple Key Loader (SKL), and Next Generation Load Device - Small (NGLD-S). The AKMI effort is also slated to support application convergence of its current software solutions into the NGC2 architecture.<br><br>The Next Generation Load Device - Medium (NGLD-M) issues, fills, and manages cryptographic key and mission planning products from the National Security Agency (NSA) Key Management Infrastructure (KMI) and End-Cryptographic Units (ECUs). The NGLD-M enhances and replaces the capabilities of the legacy product, the Simple Key Loader (SKL), by providing secure, Over-the-Network Keying (OTNK), reducing the logistics burden of touching all ECUs across the force. The NGLD-M device is being developed to meet NSA Cryptographic Modernization 2 (CM2) requirements. This effort is an Acquisition Category III (ACAT III) Program of Record (POR) and has multi-service and multi-national stakeholder interest. Prior to FY2025, this effort was funded under B96004 Key Management Infrastructure (KMI). During June 2024, the NGLD-M program realized a cost and schedule deviation due to National Security Agency (NSA) driven hardware security modifications and integration cost increases by the common user interface software developer Naval Information Warfare Center - Pacific (NIWC-P). This resulted in longer developmental efforts and a delay to the projected procurement of the NGLD-M. NGLD-M program realized a delay in FY 2025 and procurement efforts will now start in FY 2026 |             |         |         |                                             |             |               |                                                                                |                                          |         |                 |             |       |

| *Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                               |             |                                                    |                |                                          |                                                                                       |                                          |                                          |                                          |                                          |
| Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                               |             |                                                    |                |                                          |                                                                                       |                                          |                                          |                                          |                                          |
| <p><b>Justification:</b><br/>FY 2026 Base procurement dollars in the amount of \$125.970 million supports the below programs:</p> <p>COMSEC Cryptographic Systems (CCS) / (B96002): FY 2026 base procurement dollars in the amount of \$55.147 million supports procurements to upgrade to the NSA directed Cryptographic Modernization 2 (CM2) and NSA High Assurance Internet Protocol Encryption (HAIBE) Binding Operational Directive (BOD). The funding supports the procurement and fielding of modern In-Line Network Encryptors (INE), Link family of Encryptors, and Secure Voice (SV) devices at multiple price points to provide cryptographic equipment that receive key through fill devices and allow for secure communication through Army devices such as radios and satellite terminals.</p> <p>Army Key Management Infrastructure (AKMI) / (B96004): FY 2026 base procurement dollars in the amount of \$30.961 million supports the procurement, fielding, depot support for Key Management Infrastructure (KMI) Management Client Node (MGC), Simple Key Loader (SKL), Next Generation Load Device - Small (NGLD-S), and Automated Communication Engineering Software (ACES) enabling the Army to manage, control, plan, and distribute electronic key and related products to the approximately 1.5 million End Cryptographic Units (ECU)s necessary to communicate and distribute data on the Army's tactical through strategic networks. The end state for the Army is to leverage AKMI capabilities (Over the Network Keying (OTNK) software (Intermediary Application (iApp)), Delivery Only Client (DOC), Client Host Only (CHO) to increase automation, reduce soldier oversight, manage, and deliver key products to the tactical edge up through strategic ECU's.</p> <p>Next Generation Load Device - Medium (NGLD-M) / (B96016): FY 2026 base procurement dollars in the amount of \$39.862 million supports the procurement, fielding, depot support for Next Generation Load Device - Medium (NGLD-M) which replaces the legacy Simple Key Loader (SKL). NGLD-M adds capability of cryptographic re-programmability, Over the Network Keying (OTNK), and is upgradable to NSA's Cryptographic Modernization 2 (CM2) algorithms. Funding supports the NGLD-M procurement effort for two vendors. NGLD-M program realized a delay in FY 2025 and procurement efforts will now start in FY 2026</p> <p>Modernization of fill devices are supported through this funding line. It provides government and contractor engineering support, Post Production Deployment Software Support (PPDSS), system technical and software support of the AKMI components. The PPDSS contract supports AKMI components, operational support for deployed and sustaining forces, technical engineering &amp; support, associated government and contractor engineering support, and the development and updating of Web based training for AKMI components to augment in-class delta and sustainment training.</p> <p>In accordance with section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110 - 181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.</p> |                                               |             |                                                    |                |                                          |                                                                                       |                                          |                                          |                                          |                                          |

**Remarks:**

1. INE-Future Devices - FY 2026 funds will be used to procure a mix of different emerging INE products (KG-175Nano, Unit Cost: \$0.006 million; C-175N, Unit Cost: \$0.006 million; IPS-250XM, Unit Cost: \$0.009 million). The Unit Cost differs for each product; the quantity splits have been updated to meet program requirements.
2. SV-Future Devices - FY 2026 funds will be used to procure a mix of different emerging SV and LEF products (KSV21, Unit Cost: \$0.001 million; Future SV, Unit Cost: \$0.008 million; Future LEF, Unit Cost: \$0.024 million). The Unit Cost differs for each product; the quantity splits have been updated to meet program requirements.
3. NSA directive to perform cryptographic modernization phase 2 (CM2) for Quantum Resistance (QR) requires new, more expensive hardware solutions. The CM2 devices will have more computing power, memory, and upgradeability. Estimated per unit cost increases of greater than double the legacy device unit costs. The increased cost devices will be added to the NSA IDIQ contracts for DoD procurement. Cost increases are driven by enhanced security capability and not primarily by inflation.

| Remarks:<br>1. FY 2026 Hardware Costs increase from FY 2025. In FY 2025, the PM is required to facilitate Depot operations in support of KOV-21 production and refurbishment. Due to OEM closure, government is required to establish an alternative source of production and refurbishment. Without this effort, the government would not be able to source KOV-21 cards, the crypto engine of the SKL and production of the SKL would officially end.<br>2. The MGC complete system includes a desktop computer, Advanced Key Processor (AKP), KOV-29 tokens, monitor, printer and other ancillary equipment. Unit cost fluctuates depending on required components.<br>3. FY 2026 Logistics Costs - Depot Support are significantly less than FY 2025. FY 2025 Depot Support included a one time \$10M depot facilitization cost to stand-up a KOV-21 card production facility at Tobyhanna Army Depot (TYAD). Due to the slip of NGLD-M, SKLs will be needed to support all Services and Government agencies, particularly FMS through FY35. Standing up this effort at TYAD will enable the Army to keep producing KOV-21s and continue the refurbishment effort to support sustainment through the projected lifecycle of the SKL. |                     |               |                      |                     |               |                                                                                |                     |               |                      |                     |               |                                                                           |                     |               |                      |                     |               |                      |

| 4. Prior to FY 2026, Hardware Cost element NGLD-M effort was funded under SSN B96004 Key Management Infrastructure. In FY 2026 and out, B96004 no longer includes funding associated with the NGLD-M Program as it was realigned to SSN B96016 Next Generation Load Device - Medium. |                        |

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

| Remarks:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                     |               |                            |                     |               |                                                                                |                     |               |                      |                     |                 |                      |                                                                                 |               |                      |                     |               |                      |
| 1. FY 2026 Initial Spares totaling \$1.612M procure a quantity of 487 initial spare components, assemblies, and subassemblies to support end item fielding, and build HW spare stock levels.                                                                                                                                                                                                                                                                                                                                                           |                     |               |                            |                     |               |                                                                                |                     |               |                      |                     |                 |                      |                                                                                 |               |                      |                     |               |                      |
| 2. Prior to FY 2026, Hardware Cost element NGLD-M effort was funded under SSN B96004 Key Management Infrastructure. In FY 2026 and out, B96004 no longer includes funding associated with the NGLD-M Program as it was realigned to SSN B96016 Next Generation Load Device - Medium.                                                                                                                                                                                                                                                                   |                     |               |                            |                     |               |                                                                                |                     |               |                      |                     |                 |                      |                                                                                 |               |                      |                     |               |                      |
| 3. Hardware Recurring Costs: NGLD-M procurements from two vendors, Recurring Engineering changes and User Application Software (UAS) integration.                                                                                                                                                                                                                                                                                                                                                                                                      |                     |               |                            |                     |               |                                                                                |                     |               |                      |                     |                 |                      |                                                                                 |               |                      |                     |               |                      |
| 4. Software: Software Maintenance which includes licenses and cybersecurity (RMF) and Help Desk support.                                                                                                                                                                                                                                                                                                                                                                                                                                               |                     |               |                            |                     |               |                                                                                |                     |               |                      |                     |                 |                      |                                                                                 |               |                      |                     |               |                      |
| 5. Fielding Costs: Warranties, Contractor Logistics Support (CLS) Labor, Tobyhanna Army Depot (TYAD), Regional Support Center (RSC), and initial consumables costs.                                                                                                                                                                                                                                                                                                                                                                                    |                     |               |                            |                     |               |                                                                                |                     |               |                      |                     |                 |                      |                                                                                 |               |                      |                     |               |                      |
| 6. Systems Engineering Costs: Recurring costs for Matrix Government and SETA labor for system management and control.                                                                                                                                                                                                                                                                                                                                                                                                                                  |                     |               |                            |                     |               |                                                                                |                     |               |                      |                     |                 |                      |                                                                                 |               |                      |                     |               |                      |
| 7. Support Equipment: Requirement is for standard electronic tool kit for repairs.                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                     |               |                            |                     |               |                                                                                |                     |               |                      |                     |                 |                      |                                                                                 |               |                      |                     |               |                      |
| 8. Initial Spares: Initial spare components, assemblies, and subassemblies to support end item fielding, with stock going to CECOM to build HW spare stock levels.                                                                                                                                                                                                                                                                                                                                                                                     |                     |               |                            |                     |               |                                                                                |                     |               |                      |                     |                 |                      |                                                                                 |               |                      |                     |               |                      |
| 9. New Equipment Training (NET) Cost: Operator and crew maintenance level NET training. Key personnel will also receive training to prepare them to execute, integrate, and apply the equipment training resources in an effective and efficient manner. A complete and verified Training Support Manual with all necessary training materials (lesson plans, slides, handouts, practical exercises, examinations, CD-ROM, operator videotapes, Interactive Multimedia Instruction (IMI) package, etc.) provided to the unit for sustainment training. |                     |               |                            |                     |               |                                                                                |                     |               |                      |                     |                 |                      |                                                                                 |               |                      |                     |               |                      |

**Remarks:**  
NGLD-M contracts are Firm Fixed Price (FFP) Indefinite Delivery Indefinite Quantity (IDIQ) in support of Full Rate Production (FRP). Delivery orders will be awarded based on a competitive basis, facilitating cost reduction and performance increase among vendors.

Vendors for the NGLD-M IDIQ contract are Sierra Nevada Corporation (SNC) (Sparks, NV) and General Dynamics Mission Systems (GDMS), Inc. (Dedham, MA). Quantities shown may be split if multiple vendors qualify for award.

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

| Defensive CYBER Operations (DCO) consists of platform (hardware and software) programs which are key elements of the DCO Maneuver Baseline infrastructure, platform, and tools. The employment of defensive capabilities creates specific effects in cyberspace through actions that allow commanders to achieve the following objectives: deter, destroy, and defeat enemy offensive cyberspace operations; gain time; economy of force; control key terrain; protect tasked critical assets and infrastructure; and develop intelligence. DCO supports the Army Cyber Command (ARCYBER), Information Warfare Operations Center (IWOC), (5) Regional Cyber Centers (RCCs), Cyber Warfare Battalion (CWB), Multi-Domain Task Force (MDTF), and Cyber Protection Teams (CPTs) in COMPO 2/3. |                            |         |         |                                        |             |               |                                                                          |                                          |         |                 |             |       |

| Description:<br>Biometrics Enabling Capability 1 (BEC 1), provides 24/7 operational support enabling time-sensitive missions requiring near real-time biometric identification of known and/or suspected threat actors worldwide in support of Joint-All-Domain-Operations (JADO). The automated and manual biometrics matching allows the Warfighter to accurately identify and detain those responsible for conducting espionage, sabotage, terrorist operations and other coercive actions against US forces and partner nations across the globe. |                            |             |         |                                        |              |             |                                                                                   |                                     |         |                 |         |             |       |

| Gross/Weapon System Unit Cost ( <i>\$ in Thousands</i> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | -                  | -              | -              | -                                             | -                  | -                    | -                                                                                | -                                          | -              | -                      | -                  | -            |
| <p><b>Description:</b></p> <p>This program is included in the OPA Budget Line Consolidation. In FY 2025 Base Support Communications (BU4160) and Emergency Management Modernization Program (BU8000) were consolidated into the new Base Emergency Communication (B74000) program.</p> <p>The Base Support Communications program provides real-time voice communications and data via the Army Land Mobile Radio (LMR) network in support of the Army's FY 2030/2040 objectives.</p> <p>LMR is an essential subsystem of the Base Emergency Communications System (BECS) program, which is the single integrated acquisition program for lifecycle modernization of emergency management and critical communications capabilities in support of installation public safety organizations, first responders, force protection personnel, and other installation management functions.</p> <p>The five interdependent capabilities that comprise BECS are LMR, Computer Aided Dispatch (CAD), Enterprise Mass Warning Notification (EMWN), Next Generation-911 (NG-911), and First Responder Broadband Network (FRBN). Current and future LMR systems will be interoperable with all other BECS capabilities. As an enduring program, LMR will transition from an interoperable but stand-alone system on a legacy network to a fully integrated capability within the BECS-enabled public safety communication enterprise architecture with an Internet Protocol Infrastructure as mandated by public law 112-96.</p> <p>LMR systems are commercial solutions that provide mission critical mobile and portable communications for garrison first responders, public safety, force protection, homeland security, pre-deployment logistics support, and installation management missions. First Responders are the primary users of LMR to include installation Military Police, Fire Departments, and Emergency Medical personnel. The Army's LMR program provides network infrastructure, network enabling functions, and subscriber unit devices to ensure a synchronized, timely, and effective emergency first response in CONUS and OCONUS.</p> <p>The LMR program provides all LMR system hardware/software infrastructure to include initial critical system spares, dispatch consoles for dispatchers, subscriber units which include portable (handheld units for each operator), vehicle mounted mobile units, and desktop units in accordance with the Installation Management Command (IMCOM) Basis of Issue Plan (BOIP), and two years of interim contractor logistics support including system and cyber security patching.</p> <p>LMR capability is comprised of various hardware and software components. Requirements at each post/camp/station vary based on the geographic coverage area, terrain of the installation, number of end users, number of mutual aid partners, and installation dispatch concept of operations. To meet the first responder and installation non-tactical communications mission requirements, the solution at each post/camp/station is unique and determined by government surveys and coordination with stakeholders.</p> |                    |                |                |                                               |                    |                      |                                                                                  |                                            |                |                        |                    |              |

| <p>To create efficiencies, legacy LMR is migrating from a stand-alone LMR system at each post/camp/station to an enterprise network model that will centralize the information system to maximize cost-effectiveness and cyber security. The LMR system is a key component of the Army enterprise used to provide a seamless communications network in support of garrison level critical communications and infrastructure. Without adequate communications capabilities that enable coordinated emergency response, maximize the use of scarce radio spectrum, and provide secure voice transmissions, emergency responders and base support personnel would be significantly constrained in their ability to perform key emergency response functions. This is a health, life, and safety Army requirement and has been made a federal statute regulation regarding interoperability with other federal and mutual aid partners alike.</p>                                                                                                                                 |                                   |                |                                               |                         |                        |                                                                                  |                        |                |                |                |
