| Gross/Weapon System Unit Cost (\$ in Thousands)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | -           | -       | -       | -                                      | -           | -             | -                                                                                    | -                                   | -       | -               | -           | -     |
| Description:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |             |         |         |                                        |             |               |                                                                                      |                                     |         |                 |             |       |
| This funding line is directly aligned to the Army Network Modernization Priority and supports the Army of 2030 and 2040 initiatives.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |             |         |         |                                        |             |               |                                                                                      |                                     |         |                 |             |       |
| Tactical Network Technology Modernization in Service (TNT MIS) funding modernizes the Army's Tactical Network Transport that enables mission command capabilities. The Tactical Network Transport connects highly mobile and dispersed forces together. It allows information sharing across the Army's global information network, joint and multinational elements, and the Department of Defense Information Network (DoDIN). The Tactical Network Transport consist of systems ranging from large ground terminals at fixed sites to very small aperture systems at the tactical edge and provides data connectivity at the halt and on the move. The program modernizes systems that have been in the field for 20 years. These modernization efforts are critical to maintain network security and Information Assurance policy compliance required to maintain the Authority to Operate (ATO).                                                                                                          |             |         |         |                                        |             |               |                                                                                      |                                     |         |                 |             |       |
| The program accomplishes modernization by providing technology insertion on a five-to-seven-year cycle to improve the security and resiliency of the network. The program modernizes end of life commercial technology and other information technology (IT) equipment (switches, routers, servers and NetOps capabilities) procured to ensure the readiness of the Tactical Network. This modernization reduces life cycle costs by reducing size, weight, and power through consolidating and converging capabilities previously residing on individual hardware components, and through leveraging common Commercial Off the Shelf (COTS) solutions across the portfolio. These modernization efforts result in the divestment of aging systems through their replacement by the updated systems.                                                                                                                                                                                                           |             |         |         |                                        |             |               |                                                                                      |                                     |         |                 |             |       |
| The foundation of the Tactical Network Transport is the Regional Hub Nodes (RHN), five fixed site ground terminals dispersed globally to provide the foundation for the network. These systems provide the link between tactical beyond line of site communications and the Department of Defense Information Network (DODIN). The five RHNs provide Combatant Commanders with an all encompassing, seamless tactical global network point of presence that can be leveraged anywhere, anytime. Included in this modernization effort is hardware procurement, systems engineering, network engineering, production facilities and software licensing and renewals. The RHN also includes the Global Agile Integrated Transport (GAIT) which provides simplified and rapid connectivity between and amongst tactical and strategic units. GAIT includes support for all commercial transport options to include Low Earth Orbit (LEO)/Medium Earth Orbit (MEO)/High Capacity GEO satellites and cellular (5G). |             |         |         |                                        |             |               |                                                                                      |                                     |         |                 |             |       |
| The Tactical Hub Node (THN) compliments the Regional Hub Node at the Division-level with Extra Large Terminals. These terminals are currently fielded at 18 Divisions, which consist of two antenna vehicles and one control vehicle that provides a mobile platform to control the network at the Division level. This effort modernizes 8 systems over an eight-year period, and includes hardware procurement, initial spares, systems engineering, operational evaluation, software licensing and renewals, training development, and fielding.                                                                                                                                                                                                                                                                                                                                                                                                                                                            |             |         |         |                                        |             |               |                                                                                      |                                     |         |                 |             |       |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                        |                                                                                      |
| <p>The Satellite Transportable Terminal (STT) has been the primary terminal connection to the Tactical Network since 2005. This system is fielded at battalion through Corps units. This system provided the primary satellite link for command posts to exercise mission command, intelligence, and logistics functions amongst unified, joint and coalition forces.</p> <p>Satellite Terminals is the future modernization effort that focuses on alternative state of the art At-the-Quick-Halt (ATQH) and On-the-Move (OTM) solutions to meet the operational needs in accordance with the Army decision for future tactical network requirements. Satellite Terminals creates a Command and Control (C2) capability to defend the Army's tactical network against peer adversaries in a large scale combat operations (LSCO), where enemy capabilities greatly threaten static C2 nodes. LEO/MEO/High Capacity GEO satellites are emerging technologies to improve network speed, capacity, and resiliency for tactical units. The modernization effort also includes hardware procurement, systems engineering, operational evaluation, software licensing, and training development.</p> <p>Technical Insertions - Communications Nodes Modernization represents a cutting-edge initiative aimed at modernizing the Army's Tactical Network. This transformative effort involves the integration of the Medium and Large Communication Nodes ushering in a new era of enhanced commercial baseband and terminal capabilities. These baseband enhancements provide the network connection between the Satellite terminal and the mission command systems in the command post nodes. The updated Medium and Large Communication Nodes are replacements for the current systems that have been fielded since 2017. These capabilities enable network management and DoD mandated cyber and electronic warfare resiliency and meet the operational needs in accordance with the Army decision for future tactical network requirements. The program will leverage a Family of Baseband contracting approach to incorporate emerging technologies to ensure network resiliency, capacity, and convergence by providing high-throughput and low-latency broadband services. The modernization effort includes hardware procurement, systems engineering, operational evaluation, software licensing, and training development.</p> <p>The Scalable Network Node (SNN) is the beyond line of sight communications that consists of COTS, very small aperture terminal (VSAT), commercial baseband, and power generation to enable network connection. The system is configured to provide a flexible communications package to the combatant commander and scalable based on mission requirements for seamless connectivity in any operationally contested environment. The current efforts include the evaluation of High throughput terminals using various satellite constellations. This includes commercial SATCOM to improve existing capabilities while informing future initiatives to deliver the Army 2030 and design the Army 2040 for At-The-Halt and at the quick halt in accordance with Army fielding requirements. The modernization effort is hardware procurement, systems engineering, operational evaluation, software licensing and renewals, training development, and fielding.</p> <p>On the Move Network Transport (Armored Formation Network On-the-Move (AFN OTM)) provides on the move network connectivity to Armored formations up through the Division-level. This effort builds upon the FY 2022 Pilot and will inform a modernized, simplified, and resilient solution for armored formations. The AFN OTM solution will improve mission command on the move and at the quick halt and will significantly improve survivability due to command post dispersion and decreased electronic signature. Current efforts include the evaluation of High throughput terminals using various satellite constellations. This includes commercial SATCOM and other requirements to deliver the Army 2030 and design the Army 2040 to modernize On-The-Move and at the quick halt in accordance with Army fielding requirements. The modernization effort includes hardware procurement, systems engineering, network engineering, system integration, operational evaluation, software licensing and renewals, training development, and fielding.</p> <p>TNT MIS supports the near-term objectives of the Army Network Modernization Strategy by standardizing the Tactical Network Transport baseline to leverage state of the art commercial products to help create the future network. TNT MIS supports the Army's Mission Command Network Modernization Implementation Plan mid-term goals by providing technology insertion that incorporates cyber and electronic warfare resiliency required for the expeditionary Army. TNT MIS will introduce new capabilities and new technologies through engineering changes to the tactical network baseline. TNT MIS provides the Army with acquisition agility to respond to the network environment in which it operates and remain the world's most lethal land force. TNT MIS directly aligns to the Army of 2030/2040 goal to be secure from enemy cyber and electronic attacks in order to reliably communicate and share data with ourselves, sister services and coalition partners. Modernizing the Army's Tactical Network Transport is one of the Army's top six priorities.</p> <p>In FY 2026, the primary focus of TNT MIS remains modernizing Tactical Network Transport. These upgrades are critical to defending the network from emerging cyber threats, ensuring commanders maintain communications in contested or congested environments, and ensuring system availability by replacing end of life components in the communications baseline.</p> <p>This program is included in the OPA Budget Line Consolidation. In FY 2025, B07100 Tactical Network Technology Mod In Svc was consolidated into B11200 Tactical Network Communication (parent) /B11226 TACTICAL NETWORK TECH MOD IN SVC Program.</p> |                                        |                                                                                      |

Description:

Tactical Network Communication funding supports the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems, Transport Layer. In FY 2025, B11200 Tactical Network Communication consolidated Other Procurement, Army (OPA) budget lines: B00010 Signal Modernization Program and B07100/B07110 Tactical Network Technology Mod in Service (TNT-MIS). This line is the Army's response to FY24 Defense Appropriations language requiring consolidation options of Other Procurement, Army (OPA) budget lines. This line is not a new start: funds have been realigned from B00010 and B07100/B07110, these funds will be used to continue funding ongoing efforts.

The Tactical Network Communication funding line consists of two distinct portfolios: Signal Modernization (SIGMOD) Program & Tactical Network Tech Mod in Svc (TNT-MIS).

The SIGMOD portfolio funding supports the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems, Transport Layer. These funds procure a portfolio of products that deliver the latest Commercial Off The Shelf (COTS) networking and communications capabilities to enable the Warfighter's ability to conduct Mission Command at every stage of operations - from home station to early entry to the most austere environments of the battlefield. The SIGMOD capabilities augment, extend, and strengthen the tactical network by providing rapidly deployable, high-throughput, low-latency Line-of-Sight (LOS) and Beyond Line-of-Sight (BLOS) capabilities and cutting-edge networking systems.

Line of Sight Backhaul Radios: Supports the NGC2 Mid-Tier LOS Data backhaul mounted/dismounted configurations and Point to Multi-Point radio solutions. These solutions provide mesh-enabled LOS internodal broadband radios, data transport, Command Post Communications, Low Probability of Interception and Detection (LPI/LPD), and Anti-Jam (AJ) capabilities. The radios enable Secure but unclassified (SBU) and Colorless Core transport Domains for improved interoperability, usability, flexibility, and readiness through smaller and more expeditionary technology.

Broadband Kit (BK): Supports the NGC2 mounted/dismounted capability used to connect to cloud-based resources and provides remote internet connectivity through a lightweight mobile broadband communication solution utilizing VPN-secured connectivity over both public and commercial cellular service. BK v1 is dismounted and v2 is vehicle mounted.

Commercial Coalition Equipment (CCE): Provides both commercial and coalition communications Local Area Networks (LAN) and radio bridging voice cross-banding (RBVC) capabilities, supporting command, control, and coalition partners to enable the Mission Partner Environment (MPE) among forces. The CCE program is comprised of five variants: CCEv2, CCEv4, CCEv4A, CCE NETOPS, and CCE Common Services Hub (CSHub).

| <b>Line Item MDAP/MAIS Code:</b> N/A                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                               |                                                                                     |
| <p>Secure Wireless (WiFi): Provides WiFi based access points to enable resilient, encrypted mobility across classified and unclassified environments. Secure Wireless enables wireless Mission Command for laptops, tablets and phones, improving survivability by dramatically reducing set-up and teardown times. Secure Wireless enables echelons at brigade and above, along with mobile command and control vehicles, to connect to and use the Tactical Network as backhaul.</p> <p>Secure Wireless (Cellular): Support the NGC2 architecture by providing connections for end-user-devices to compute and store capabilities in a form of the private cellular bubble.</p> <p>Terrestrial Transmission Line of Sight (TRILOS) System: Enables LOS low-latency and high-throughput broadband communications to extend the network by utilizing a radio with significantly reduced Size, Weight and Power (SWaP). TRILOS also provides RF path diversity, making the system more resilient to jamming in contested environments. Provides point to point and point to multi-point.</p> <p>Troposcatter Transmission System (TROPO): Enables BLOS low-latency broadband communications in a satellite denied environment over longer ranges and at higher throughput. TROPO enables Army units to reduce reliance on costly satellite bandwidth and provides RF path diversity.</p> <p>Enroute Mission Command (EMC): Supports the Global Response Force requirement to execute mission command when conducting Airborne forcible entry operations, to include mission planning and rehearsal, while enroute on board US Air Force Air Mobility Command aircraft. EMC modernizes enroute communications to enable broadband reach-back data capability utilizing military or commercial networks with adequate bandwidth to support required Mission Command and Intelligence applications.</p> <p>The Tactical Network Technology Modernization in Service (TNT MIS) portfolio supports the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems, Transport Layer.</p> <p>Tactical Network Technology Modernization in Service (TNT MIS) funding line enables mission command capabilities and connects highly mobile and dispersed forces together by providing network connectivity and transport for the ground domain to connect with the Department of Defense Information Network (DoDIN). TNT MIS provides modernization of commercial technology ensuring a resilient cybersecurity posture. These upgrades are critical to defending the network from emerging cyber threats, ensuring commanders maintain communications in a contested environment.</p> <p>Command and Control (C2) At-The-Quick-Halt (ATQH) is the dismounted modernization effort focusing on alternative state-of-the-art technology to meet the operational needs in accordance with the Army decision for future tactical network requirements. The C2 ATQH capabilities will provide simplified, modular, flexible tactical network transport solutions. ATQH capability consists of a Network Appliance, GEO terminal (with the potential ability to be MEO certified) and Commercial LEO flat panel terminal.</p> <p>C2 On-The-Move (OTM) is the mounted modernization effort focusing on alternative state-of-the-art technology to meet the operational needs in accordance with the Army decision for future tactical network requirements. FY 2025 funds the procurement of tactical edge compute and store A-Kit and B-Kit hardware and On-the-Move platform installation and checkout.</p> <p>PLEO provides both Mounted and Unmounted capability which supports modernization effort focusing on data centric command and control to meet future tactical network requirements using the Commercial LEO flat panel terminal.</p> <p>Multi Orbit Antenna is the state-of-the-art MEO/GEO capability, high throughput, low latency, terminal supporting C2 nodes Battalion to Division.</p> <p>Network Appliance is a small baseband like appliance with dedicated resources to support network requirements including Software Defined Networking, Firewall, interfaces to transport capabilities, Wi-Fi, and Public Cellular.</p> <p>TNT MIS Next Generation Command and Control Transport enables and ties into the Network to support The Army Unified Network Strategy. The Regional Hub Nodes (RHN) are a critical component of the Army's modernized Software Defined Network (SDN) infrastructure that keep pace with the future C2 architecture.</p> |                                               |                                                                                     |

The Regional Hub Nodes provide flexible connections and resilient global networks designed to support large-scale combat operations. The RHN transport diversity modernization efforts are needed to support NGC2 transport architecture. The RHNs act as bridges, seamlessly connecting the tactical network used by deployed units to the Army's primary network (DODIN-A) and Regional Hub Node (RHN). The RHN infrastructure supports Data Centric Army Transport and supports NGC2 Transport concept and is located at: Division and Corps Homes Station Mission Command Centers (HSMCCs), Public and Private Cloud Environments, and Secure Army Data Centers.

The RHN effort also provides Global Agile Integrated Transport (GAIT) capabilities that includes upgrading hardware and software, simplifying network design, and leveraging a variety of communication methods - including LEO/MEO/GEO satellites and 4G/5G cellular technology - to ensure constant connectivity in contested environments. The RHN Software Defined Network (SDN) architecture also incorporates military fiber and commercial Internet transport. This enhances transport diversity and connectivity by providing simplified and rapid communication channels between units, utilizing diverse commercial and military transport options.

Virtual Mission Enclave (vME) hardware and software is a set of virtual network functions that enhances Division network infrastructure, delivering improved mission readiness, enhanced cybersecurity, and increased resilience. vME provides faster deployment of critical network elements, centralized threat detection, and scalable infrastructure - ensuring a more secure and responsive tactical network for the warfighter.

SIPR Enclaves are encryption and switch boxes for SIPR access. Force-pooled BDE and below encryption, and switch to access classified enclaves as required by warfighting functions in a primarily SBU-E environment.

SATCOM Obsolescence THN provides funding for the latest modernized extra-large deployable terminal (XLDT). Extra-large deployable terminal provides mobile network connectivity for Army Tactical Theater level units and keep pace with the future C2 architecture. The XLDT provides flexible data centric global networks to the tactical network's SATCOM and RHN Software Defined Network (SDN) transport infrastructure. This mobile platform consists of a tri or quad-band antenna with baseband and allows for flexible and resilient network control at the Corp and below echelons. The RHN and XLDT efforts work in tandem to provide a comprehensive and resilient unfragmented network, ensuring seamless connectivity from the tactical edge to the Army Enterprise.

| <p>Contractor Management: Costs for contractor personnel supporting SIGMOD Systems engineering, risk management, travel, facilities lease, and business management efforts.</p> <p>Training: Costs in support of efforts associated with new equipment training (NET) for all SIGMOD Systems.</p> <p>SIGMOD Overseas Operations Costs (OOC) funds support Army Rotational Forces in the amount of \$4.362 million for FY 2026 Budget Estimate.</p> <p>----</p> <p>B11226 - TACTICAL NETWORK TECH MOD IN SVC FY26 Base procurement dollars in the amount of \$723.947 million supports:<br/>Hardware for FY 2026 TNT MIS Systems:</p> <ul style="list-style-type: none"><li>- RHN &amp; GAIT Infrastructure</li><li>- SATCOM Obsolescence - THN Extra Large Deployable Terminal (XLDT)</li><li>- C2 At-The-Quick-Halt</li><li>- pLEO Antenna</li><li>- Multi Orbit Antenna</li><li>- Network Appliance</li><li>- VME</li><li>- SIPR Enclave</li><li>- GEO Terminals</li></ul> <p>Additionally, FY 2026 Base procurement dollars supports the following for TNT-MIS:</p> <p>Post Deployment Software Support: Procures software licenses that are critical to ensure continuous access to essential tools, maintain security and compliance, terminal airtime, feature enhancements, and technical support from the vendors. Procures technical support to Mission Network systems and equipment that maintains interoperability across the Tactical Network, ensuring mission readiness. Procures full-time support for an array of software tasks including access to proprietary Microsoft code, development of cloud technical solutions, quality assurance of applications, cybersecurity strategies, and cyber incident response.</p> <p>Fielding: Costs associated with manpower to facilitate the delivery, training, and unit integration of TNT-MIS end items from the manufacturer to the receiving units. Costs for development and revision of technical manual, development and management of existing training support packages, and manual validation and verification assistance supporting TNT-MIS portfolio of systems.</p> <p>Initial Spares and Repair Parts: Costs associated with the procurement of initial field and/or pipeline spares to include repair parts for the TNT-MIS portfolio of systems.</p> <p>Contractor Management: Costs for contractor personnel supporting TNT-MIS Systems engineering, risk management, travel, facilities lease, systems engineering technical assistance, and business management efforts.</p> <p>Government Management: Costs for Matrixed personnel supporting TNT-MIS engineering, risk management, travel, and business management efforts. Government management include salaries, travel, training, supplies, facilities, equipment, to manage NGC2 transport, RHN &amp; GAIT Infrastructure, and XLDT acquisition efforts.</p> <p>Systems Engineering: This effort addresses Information Assurance Vulnerability Alerts (IAVAs), Cybersecurity Documentation Requirements, establishes the Network Architecture, develops the software Technical Data Packages, maintains the software configuration management, and provides testing support to remain in compliance with the Authority to Operate (ATO).</p> |                                        |                                                                              |

**Remarks:**

This is not a new start. Effort was previously funded under project B00010 Signal Modernization. Funds transferred in FY25 from project B00010/Signal Modernization to project B11225/Signal Modernization Pro under a new Parent program element B11200/Tactical Network Communication.

All hardware is procured according to the Army prioritization of NGC2 efforts, leveraging a multivendor contract vehicle where the unit cost is negotiated with each order.

- LOS Backhaul Radio Dismounted: FY26 unit cost increase is driven by inflation. This system is procured according to the Army prioritization of NGC2 efforts, leveraging a multivendor contract vehicle where the unit cost is negotiated with each order. This element was called Integrated Tactical Network (ITN) Line of Sight (LOS) Backhaul Radio 4W in PB25.
- LOS Backhaul Radio Mounted, was called Integrated Tactical Network (ITN) Line of Sight (LOS) Backhaul Radio 8W in PB25.
- Point to Multi-Point LOS Radio: FY26 unit cost increase is driven by inflation.
- Broadband Kit: FY26 unit cost increase is driven by inflation. This element was called Integrated Tactical Network (ITN) MBK in PB25.
- CCEv4A HW: FY26 unit cost increase is based on current vendor quotes and decreased procurement quantities.
- CCE NETOPS was called NETOPS HW Equipment in PB25. NETOPS HW was determined to not be required in FY25 based on shifting Army priorities.
- CCE CSHub: FY26 unit cost increase is driven by inflation; this element was called CCE V5 - CS Hub in PB25.

| <p>-Secure Wireless (WiFi) Small Form Factor (SFF): FY26 cost increase due to updated costs provided by industry for NSA certified system to include laptops, servers, and switches. This element was called Secure Wireless (WiFi) HW Equipment in PB25.</p> <p>-Secure Wireless (Cellular): FY26 unit cost increase is driven by inflation.</p> <p>-TROPO-M: FY26 unit cost increased is based on current vendor quotes; this element was called TROPO HW-Equipment (TROPO-M) in PB25. Due to original TROPO system not meeting requirements during test, Army adapted acquisition strategy to procure TROPO-M - a solution that demonstrated compliance with requirements during an operationally realistic, soldier-driven test event.</p> <p>-TRILOS: FY26 unit cost increased is based on current vendor quotes and decreased procurement quantities; this element was called TRILOS HW-Equipment in PB25.</p> <p>-Spares: FY26 cost increase due increased quantities of system procurement. When compared to PB25, spares have been separated out by capability within the portfolio.</p> <p>-Software: Cost decreased since Software Renewals transitioned to OMA beginning in FY26 due to new guidance from 10 DEC 24 ASA(ALT) Software Funding Policy. When compared to PB25, software cost have been separated out by capability within the portfolio.</p> <p>-Data: FY26 decrease is driven by portfolio stability. Data supports the procurement of technical data packages and training materials.</p> <p>-Fielding: Cost increased due to additional fielding requirements globally; fielding costs are based on the quantity of systems procured, with increased procurement quantities additional personnel are required to support fielding activities.</p> <p>-Government/Contractor Management: FY 2026 cost decreases due to more efficient use of personnel associated with Program Management to support implementation of NGC2 requirements and products.</p> <p>-Training Services: Cost decreased due to more efficient use of training support; training costs are based on the quantity of systems procured and the number of units those systems support, with increased procurement additional personnel are required to support training activities.</p> |                        |

<sup>(†)</sup> indicates the presence of a P-21

**Remarks:**

Tactical Network Communication supports the Army's Command Control (C2) Transport strategy.

The program office leverages multi-award IDIQ contracts which compete with each order, this is why all future vendors are TBD.

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

| Remarks:<br>This funding supports the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems, Transport Layer. This is not a new start. Effort was previously funded under project B07110 Tactical Network Technology Modernization in Service (TNT-MIS).<br>Funds transferred in FY25 from project B07110/TNT-MIS to project B11226/TNT-MIS under a new Parent program element B11200/Tactical Network Communication.<br><br>RHN & GAIT Infrastructure: FY26 increase is due to inflation factors.<br>SATCOM Obsolescence - THN (XLDT) Extra Large Deployable Terminal: FY26 increase is due to inflation factors. Continues XLDT 1 System Modification Per Year<br>Scalable Network Nodes (SNN): FY26 decrease is due to closure of legacy equipment investment. |                     |               |                      |                     |               |                                                                              |                     |               |                      |                     |                 |                                                                              |                     |               |                      |                     |               |                      |

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand). If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

| <b>Description:</b><br>Disaster Incident Response Emergency Communications Terminal (DIRECT) capability provides communication to each of the 50 States and 4 Territories to meet the information exchange requirements of the States National Guard (NG) operational commanders while performing Defense Support of Civil Authorities (DSCA) missions. DIRECT leverages the Army's Tactical Network to provide seamless network connectivity to support first responders and emergency managers.<br><br>DIRECT Capabilities consist of:<br>Commercial Coalition Equipment (CCE): Provides commercial internet access to civilian and multinational partners to reduce Size Weight and Power (SWaP) technology, thus fully addressing the increasingly high demand for accelerated capabilities. Interconnects disparate voice communications networks/devices used by multiple response agencies at an incident site.<br>Cellular Solution (Commercial Wireless and Secure Cellular): Provides immediate cellular and wireless network connectivity to first responders, state authorities, and federal authorities allowing for enhanced Command and Control (C2) and shared situational awareness at an incident site.<br><br>DIRECT capability was previously funded under The Joint Incident Site Communications Capability (JISCC) (B0009) and are realigned to B47200 beginning in FY 2022. |                                   |                |                |                                               |                    |                      |                                                                                                         |                                            |                |                        |                    |              |

| Description:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                            |         |         |                                        |             |               |                                                                         |                                     |         |                 |             |       |
| JOINT COMMUNICATION SUPPORT ELEMENT (JCSE): Aligned under Joint Enabling Capabilities Command (JECC), US Transportation Command (USTRANSCOM), is the only Department of Defense (DOD) organization specifically formed that provides contingency and crisis communications to meet the operational support needs of the Joint Chiefs of Staff (JCS), Combatant Commands (CC), DOD agencies and non-DOD agencies. JCSE mission is to provide rapidly deployable, enroute, early entry, and scalable coalition command, control, computers, intelligence, surveillance, and reconnaissance (C4ISR) capability to CCS and other agencies as directed to facilitate rapid establishment and transitions of JFHQs and bridge joint communications requirements. JCSE seamlessly scales C4ISR support for up to four conventional or unconventional JFHQs. JCSE has a robust 24/7 reach back capability through its Global Enterprise Network and has access to a full range of DOD and commercial networks. |                            |         |         |                                        |             |               |                                                                         |                                     |         |                 |             |       |

**Justification:**  
FY 2026 base procurement dollars in the amount of \$5.389 million procures communications equipment in concert with Strategic Planning Guidance, Joint All Domain Command and Control (JADC2) architecture and CC JTF capability requests. This includes maximum capabilities for narrowband, wide band and protected satellite communications (SATCOM) terminals and systems, tactical radios, terrestrial communications systems, satellite hubs, networking elements, virtual appliances, Video Teleconferencing (VTC) capabilities, alternative power solutions, Airborne/En route, Forced entry, Cyber Security, Denied, Degraded C2 Environments (D2C2E), and mobile joint C2 requirements. Advancements in technology, especially in commercial off-the-shelf solutions continue to provide opportunities to modernize JCSEs equipment sets with enhanced capabilities to support Delayed/Disconnected Intermittent Low Bandwidth (DDIL) and zero trust capabilities with the smallest footprint, enhanced cyber security, reduced operations and maintenance costs and seamless integration with the Department of Defense Information Network (DODIN) and the Joint Information Environment (JIE). The equipment is a critical part of delivering scalable C4ISR across the full spectrum of operations for the JFHQ that is in line with the JADC2 framework and the direction of C3 modernization.

To consistently deliver state of the art technology solutions to meet emergent CC operational communications requirements, JCSE relies on the Modernization Program as outlined in Director, Joint Staff Memorandum (DJSJ) 0148-20 whereby services are mandated to apportion and program procurement funds each year to support JCSE's Modernization Program. Per Defense Planning Guidance and DJSJ 0148-20, the Army is mandated to fund 1/3rd of \$16.698 million fair share of JCSEs validated Modernization Program. JCSE's Modernization Program is based on Combatant Commands (CC) and Service Components requirements and emerging technologies. The Services influence JCSEs spending plan through recommendations in concert with Major Defense Acquisition Program (MDAP) schedules, ensuring the Service monies meet Joint Service Requirements.

This line funds the Department of the Army's one third portion of the total JCSE Modernization Program. This program is jointly funded by Army, Navy, and Air Force.

| Multiple contract awards for small acquisitions in work through different government contracts and contracting agencies. JCSE contracting actions primarily provided by 6th Contracting Squadron, MacDill AFB, FL.                                                                                                                                                                                                                                                                                                                                                                                                                           |                  |                            |                   |                  |            |                                                                         |                  |              |                   |                  |            |                                                                    |                  |               |                   |                  |            |                   |
| Note: Currently employed commercial-off-the-shelf (COTS) equipment is approaching the end of its life cycle and requires replacement, along with technology refresh, to meet the modernization program goals which include meeting emerging real-world operational requirements with improved capabilities, smaller footprint, reduced operations and maintenance costs, and seamless integration with the global information grid. This equipment is a critical part of Command and Control communications packages that provide direct operational support to joint forces and HQ elements deployed to austere locations around the globe. |                  |                            |                   |                  |            |                                                                         |                  |              |                   |                  |            |                                                                    |                  |               |                   |                  |            |                   |

Description:

Satellite Communications supports the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems, Transport layer. The Tactical Network Communication funding line consists of four distinct portfolios: Transportable Tactical Command Comms (T2C2), Super High Frequency (SHF) Terminal, Protected Anti-Jam Tactical SATCOM and CSS Satellite Communications.

This line is not a new start. This program is included in the OPA Budget Line Consolidation. B56000 SATELLITE COMMUNICATIONS is result of Army's consolidation of four funding lines:  
B858000 Transportable Tactical Command Comms (T2C2)  
BA9350 Super High Frequency (SHF) Terminal  
BC4000 EHF SATELLITE COMMUNICATION / B34002 Protected Anti Jam Tactical SATCOM  
BD3501 CSS Communications / BD3513 CSS SATCOM

This consolidation was proposed in FY 2025 and approved with FY 2025 full year continuing resolution. FY 2026 is the first year Army is presenting B56000 SATELLITE COMMUNICATIONS funding line with retroactive adjustments for FY2025.

--

Transportable Tactical Command Comms (T2C2) funding line supports the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems, Transport layer.

In FY 2023, the program began procurement of an Ultra Lite terminal intended for small teams that require high bandwidth network capability in austere environments. Additionally, the program office will produce logistics products, program supply support, cyber support, etc. and establish contracts to support the Ultra Lite terminal.

Transportable Tactical Command Communications (T2C2) previously procured ISA Lite (1.2m) terminal, ISA Lite v2 (1.3m) terminal, SCOUT Expeditionary (1.3m) terminal, SCOUT Small (0.65m-0.95m) terminal, SCOUT Medium SFAB (1.3m) terminal, SCOUT Medium ITN (1.3m) terminal, Enhanced Baseband, Deployable Ku-Band Earth Terminals (DKET), and ISA Heavy (2.4m) terminal.

Ultra Lite: Provide all-weather capable lightweight early-entry communications packages for small teams at the tactical edge with setup/teardown time within 7 minutes. Supports one subscriber over NIPR and three over SIPR. The only system in the suite of terminals that consists of one (1) transit case in a carry-on suitcase that provides a SIPR connection over commercial SATCOM for small intelligence teams and

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                        |                                                                        |
| <p>executive communications. The Ultra Lite terminal requires support from the SATCOM Support Center (SSC), which provides 24/7 helpdesk support and mission critical network connectivity that actively supports secure commercial tunnel architecture, access to unclassified, classified (up to Secret), and coalition networks, and routing to a Top-Secret gateway. The program will fund SATCOM Support Center (SSC) services for Ultra Lite terminals.</p> <p>--</p> <p>Super High Frequency (SHF) funding line supports the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems, Transport layer.</p> <p>The AN/TSC-156E Super High Frequency (SHF) terminal (Phoenix E-Model) is the Army's only quad-band capable, multi-carrier, high-capacity SATCOM terminal with the flexibility to expand capacity at priority network nodes and bridge seams in the network. The modernized AN/TSC-156E provides more flexibility, scalability, and modularity for the Multi-Domain Task Force (MDTF) and replaces the AN/TSC-156D in the Expeditionary Signal Battalion (ESB)/Expeditionary Signal Battalion - Enhanced (ESB-E) in support of expeditionary communications Joint and Army Headquarters at the Division and Corps levels. The AN/TSC-156E also enables interface with strategic networks via Regional Hub Node (RHN) and Standardized Tactical Entry Points (STEP). The AN/TSC-156E is based on modern architectures described in the Transmission Systems Increment 1 Capabilities Production Document (CPD), which increases demand for satellite bandwidth.</p> <p>The AN/TSC-156E provides broadband satellite data capability by leveraging commercial off-the-shelf (COTS) solutions to increase reliability, flexibility, mobility, and range. The AN/TSC-156E is a network communications transport that operates over military and commercial satellite space segments to provide high-capacity links to support voice and data communications. The AN/TSC-156E utilizes a transit-case based concept, allowing for rapid deployments with or without vehicle support. Specifically, the AN/TSC-156E adds Internet Protocol (IP) routing capability as well as providing a dual head capability to access two satellites simultaneously in order to increase network diversity, robustness, and capacity. The AN/ TSC-156E allows seamless integration with current and future proposed tactical communications networks at high data rates and multiple bands required by current and future operations. The Phoenix terminal supports and complements the Army's tactical network and architecture by increasing the operational reach and situational awareness of the entire force, while ensuring quality and technical relevancy. The program will leverage a Family of Terminals contracting approach to incorporate emerging technologies to ensure network resiliency, capacity, and convergence by providing high-throughput and low-latency broadband services. Supports Network Fix Architecture with downward reinforcing SATCOM capability.</p> <p>The Approved Acquisition Objective (AAO) for the SHF Terminal is 172.</p> <p>--</p> <p>Protected Anti-Jam Tactical SATCOM funding line supports the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems, Transport layer.</p> <p>Protected Anti-Jam Tactical SATCOM (Protected SATCOM) provides the ability for the Army tactical terminals to be resilient in a contested environment and protect against catastrophic loss of situational awareness and command and control during critical battle movement with Anti-Jam capabilities. The Resilient Anti-Jam Modem (RAM) (previously referred to as Block II Small Form Factor (SFF)) will provide on the move and early entry satellite terminals with adaptive, anti-jam communications for the highest levels of protected communications in multi domain operations. Air Force/Army Anti-Jam Modem (A3M) (formerly referred to as Block I) will offer tactical Army protection against interference that is either intentional or unintentional. A3M is a Joint Effort between the Army and US Space Force (USSF). RAM is an Army only requirement, as USSF does not have a requirement for RAM. Protected SATCOM supports initial development, testing and certification of production representative Protected Tactical Waveform (PTW) modems, waveform license procurement, incorporating Army requirements, to support continued spiral development of critical protected communications capabilities to address resiliency in jamming environments. Protected SATCOM addresses evaluation of capabilities to mitigate emerging threat requirements.</p> <p>The Protected/Resilient SATCOM Abbreviated - Capabilities Development Document (CDD) was validated and approved 1 March 2024.</p> <p>--</p> <p>Combat Service Support (CSS) Satellite Communications funding line supports the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems, Transport layer.</p> <p>The CSS Communications funding line supports the Army's Sustainment Transport System (STS). STS is a data transport capability through satellite communications (SATCOM) and is an integrated component of the Unified Network, targeted at providing unclassified communications to Army sustainment units in their support to the Warfighter. STS provides network infrastructure, connectivity and enables a SATCOM pathway for logistics, financial management, personnel, and health service support data to be exchanged on the battlefield between multiple echelons and enterprise data sources. STS provides critical connectivity on the battlefield where the Integrated Tactical Network (ITN) and other communication systems do not extend to dispersed and forward deployed sustainment units.</p> |                                        |                                                                        |

| <p>Operational needs require a smaller, lighter system that is able to transition between frequency allocation bands and also provide logisticians with high-speed distributed access to the DOD Information Network (DODIN) to ensure continuous, integrated, and synchronized support across the enterprise while minimizing network and data vulnerabilities. To meet these critical needs, STS will replace the currently fielded CSS Very Small Aperture Terminal (VSAT) and CSS Automated Information System Interface (CAISI).</p> <p>Based on the approved requirements document "STS Annex III to the Bridge to Future Network (BFN) Capability Production Document (CPD)", STS enables Beyond Line-of-Sight (BLOS) communication and enterprise access to the DoD Information Network-Army (DODIN-A) with modernized SATCOM Systems. Included with each SATCOM System is a SATCOM terminal, a cyber-resilient baseband kit, and support equipment for Network Infrastructure. Modernization splits the CAISI into two distinct capabilities to enable more flexibility for the unit to adjust concepts of operation and for the program to adapt to emerging technologies. Based on unit requirements and mission needs, each SATCOM system can be paired with varying combinations of 1) Line of Sight (LOS) transmission equipment to extend network access to the forward edge of battle; and 2) Wireless Network Access (Wi-Fi) to provide dispersed elements a dedicated connection to the network. The current proposed AAO for modernized systems represents a significant reduction to 19,133 end items fielded: 2,709 SATCOM Systems, 8,644 Wi-Fi Systems, and 7,780 LOS Systems.</p> <p>Modernization efforts will ensure continued support of Sustainment Information Systems (SIS) communications and logistics Enterprise Resource Planning (ERP) software systems globally, at home station (Garrison), and into the tactical, operational and strategic battle space. These SIS and ERP applications and their associated data are enterprise level services that require on-demand global connectivity and reliable, redundant, and consistent unit access to reach back capabilities to the DODIN-A through modernized communications systems.</p> <p>Milestone C occurred in April 2023 when the Milestone Decision Authority (MDA) approved entry into Low Rate Initial Production (LRIP) of the Production and Deployment phase for the purpose of conducting Initial Operational Test and Evaluation (IOT&amp;E) and preparing for Full Rate Production (FRP). Hardware procured in FY2023 and FY2024 represent the approved LRIP quantities.</p> |                                   |                |                                               |                         |                        |                                                                               |                        |                |                |                |

| *Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                      |             |       |                                               |                                          |                                                                               |                                            |                                          |                                          |                                          |
| Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                      |             |       |                                               |                                          |                                                                               |                                            |                                          |                                          |                                          |
| <p><b>Justification:</b></p> <p>B56111 - TRANSPORTABLE TACTICAL COMMAND COMMS (T2C2) FY 2026 Base procurement dollars in the amount of \$9.959 million supports: Procurement of Ultra Lite terminals, Recurring Engineering for Engineering Change Proposals (ECPs) that affect hardware and software configuration baselines, software, and configuration management. FY2026 base also supports engineering and logistics support, software procurement, and Ultra Lite System support which includes SATCOM Support Center (SSC) helpdesk labor and material procurement support, and connection services to secure enclaves for the Ultra Lite terminal. Funding also supports personnel for fielding, training and maintenance support; procurement of initial spares and consumables; shipping; and addresses obsolescence for systems fielded prior to FY 2022.</p> <p>B56222 - SUPER HIGH FREQUENCY (SHF) TERMINAL FY 2026 Base procurement dollars in the amount of \$43.713 million supports: Procurement of Phoenix-E Terminals, Government Furnished Equipment, Testing to address Fielded baseline obsolescence, Logistics data such as Technical Manuals, Software configuration baselines, Fielding and Training personnel, spares, logistics services, Systems Engineering and Program Management and Systems Engineering support.</p> <p>B56333 - PROTECTED ANTI-JAM TACTICAL SATCOM FY 2026 Base procurement dollars in the amount of \$10.057 million supports: Recurring Engineering, Waveforms, Fielding and Training Support, Engineering Services, and Systems Engineering and Program Management.</p> <p>B56444 - CSS SATELLITE COMMUNICATIONS FY 2026 Base procurement dollars in the amount of \$51.041 million supports: Procurement of Network Infrastructure, STS Line of Sight (LOS) Systems, STS Wi-Fi Systems, and STS SATCOM Systems. Additionally these funds procure: Initial spares; Software maintenance - including software licenses (initial and renewal) and cybersecurity Authorities to Operate (ATOs); Support data (logistics documentation); fielding - includes New Equipment Training (NET), New Equipment Fielding (NEF), and logistics/integration facility leases; government management; and system engineering. The STS Acquisition Strategy is to procure Commercial Off the Shelf (COTS) systems that are already available to PM Tactical Network through existing contract vehicles, which greatly reduces the anticipated procurement timeline. The product office plans to field STS Low Rate Initial Production (LRIP) systems procured in FY 2024 in FY 2025.</p> |                                                      |             |       |                                               |                                          |                                                                               |                                            |                                          |                                          |                                          |

| In FY25, B56111 is not a new start. Effort was previously funded under project B858000 Transportable Tactical Command Coms (T2C2) and funds have been realigned to B56111 as a result of the Army's response to FY24 Defense Appropriations language requiring consolidation options of Other Procurement, Army (OPA) budget lines. |                     |               |                      |                     |               |                                                                        |                     |               |                      |                     |                 |                                                                                         |                     |               |                      |                     |               |                      |
| Recurring Engineering: Cost decrease from FY2025 to FY2026 due to Hardware transition to sustainment of the Lite, Heavy, and SCOUT Small in FY2025.                                                                                                                                                                                 |                     |               |                      |                     |               |                                                                        |                     |               |                      |                     |                 |                                                                                         |                     |               |                      |                     |               |                      |
| Ultra Lite System Support: Cost decrease from FY2025 to FY2026 due to reduction in required system support for the Ultra Lite. Ultra Lite System Support includes required SSC labor and material support, licensing and warranties, and sustainment materials for deployed Ultra Lite terminals.                                   |                     |               |                      |                     |               |                                                                        |                     |               |                      |                     |                 |                                                                                         |                     |               |                      |                     |               |                      |
| Software: Cost decrease from FY2025 to FY2026 due to the software renewal licensing transferring to OMA funding Post Production Software Sustainment (PPSS).                                                                                                                                                                        |                     |               |                      |                     |               |                                                                        |                     |               |                      |                     |                 |                                                                                         |                     |               |                      |                     |               |                      |

**Remarks:**  
 In FY25, B56111 is not a new start. Effort was previously funded under project B858000 Transportable Tactical Command Coms (T2C2) and funds have been realigned to B56111 as a result of the Army's response to FY24 Defense Appropriations language requiring consolidation options of Other Procurement, Army (OPA) budget lines.

Recurring Engineering: Cost decrease from FY2025 to FY2026 due to Hardware transition to sustainment of the Lite, Heavy, and SCOUT Small in FY2025.

Ultra Lite System Support: Cost decrease from FY2025 to FY2026 due to reduction in required system support for the Ultra Lite. Ultra Lite System Support includes required SSC labor and material support, licensing and warranties, and sustainment materials for deployed Ultra Lite terminals.

Software: Cost decrease from FY2025 to FY2026 due to the software renewal licensing transferring to OMA funding Post Production Software Sustainment (PPSS).

Technical Publications: Cost decrease from FY2025 to FY2026 due to transition to sustainment of the Lite, Heavy, and SCOUT Small in FY2025.

Fielding: Cost Decrease from FY2025 to FY2026 due to a reduction in field support and quantity procured. Fielding cost includes fielding, training, spares and addresses obsolescence for fielded terminals.

Government Management: Cost decrease from FY2025 to FY2026 as a result of decreased program management support requirements. Government Program Management cost element, above, consists of matrix personnel labor. This includes all required program oversight, system engineering and technical control, risk management, and fielding support.

Contractor Management: Cost decrease from FY2025 to FY2026 as a result of decreased program management support requirements. Contractor Management cost element includes personnel responsible for performing day to day programmatic operations to include acquisition, budget execution and essential contracting support functions.

System Engineering: Cost decrease from FY2025 to FY2026 as a result of decreased program management support requirements. System Engineering includes engineering personnel responsible for performing day to day technical requirements and experimentation of emerging technologies for the program.

| In FY25, B56222 is not a new start. Effort was previously funded under project BA9350 Super High Frequency (SHF) Terminal and funds have been realigned to B56222 as a result of the Army's response to FY24 Defense Appropriations language requiring consolidation options of Other Procurement, Army (OPA) budget lines. |                     |               |                      |                     |               |                                                                        |                     |               |                      |                     |                 |                                                                              |                     |               |                      |                     |               |                      |
| GFE provides for government furnished equipment for Phoenix E-model terminals and is driven by the quantity of terminals purchased in the fiscal year. Cost increase in FY 2026 is due to higher quantity of HMMWV being procured.                                                                                          |                     |               |                      |                     |               |                                                                        |                     |               |                      |                     |                 |                                                                              |                     |               |                      |                     |               |                      |
| E-model Terminal unit cost decrease in FY 2026 is due to competitive contract award GTACS II Delivery Order.                                                                                                                                                                                                                |                     |               |                      |                     |               |                                                                        |                     |               |                      |                     |                 |                                                                              |                     |               |                      |                     |               |                      |
| Data/Test cost increased in FY 2026 as a result of inflation.                                                                                                                                                                                                                                                               |                     |               |                      |                     |               |                                                                        |                     |               |                      |                     |                 |                                                                              |                     |               |                      |                     |               |                      |
| Full Rate Production (FRP) Software includes new licenses and renewals for all systems. Cost increased in FY 2026 as a result of additional terminals in the field requiring subscription software services.                                                                                                                |                     |               |                      |                     |               |                                                                        |                     |               |                      |                     |                 |                                                                              |                     |               |                      |                     |               |                      |
| Fielding and training costs are based on quantities procured and available for fielding. Costs increased in FY 2026 as a result of higher quantities.                                                                                                                                                                       |                     |               |                      |                     |               |                                                                        |                     |               |                      |                     |                 |                                                                              |                     |               |                      |                     |               |                      |

Logistics services cost increased in FY 2026 as a result of inflation.

Spares cost increase in FY 2026 as a result of inflation.

The Government Program Management cost element, above, consists of matrix personnel labor. This includes all required program oversight, system engineering and technical control, risk management, and fielding support. Costs decreased in FY 2026 due to executive orders and decreased manpower requirements.

Contractor Management cost element includes personnel responsible for performing day to day programmatic operations to include acquisition, budget execution and essential contracting support functions. Costs decreased in FY 2026 due to executive orders and decreased manpower requirements.

System Engineering includes engineering personnel responsible for performing day to day technical requirements and experimentation of emerging technologies for the program. Cost increased in FY 2026 due to inflation adjustments.

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

| Remarks:<br>In FY25, B56444 is not a new start. Effort was previously funded under BD3501/BD351 CSS Communications and funds have been realigned to B56444 as a result of the Army's response to FY24 Defense Appropriations language requiring consolidation options of Other Procurement, Army (OPA) budget lines.<br><br>Network Infrastructure - FY26 ensures network access for STS systems' fielding events allowing the system of system to process data on a commercial network. Decrease in FY26 from FY25 due to fewer planned fielding activities.<br>STS LOS System - FY26 unit cost increase is based on current vendor quotes. This system is procured via NASA SEWP multivendor contract vehicle where the unit cost is negotiated with each order.<br>STS Wi-Fi System - FY26 unit cost increase is based on current vendor quotes. This system is procured via NASA SEWP multivendor contract vehicle where the unit cost is negotiated with each order.<br>STS SATCOM Systems - In FY26, Army will procure 31 STS SATCOM Systems. FY26 unit cost increase is based on current vendor quotes. This system is procured via NASA SEWP multivendor contract vehicle where the unit cost is negotiated with each order.<br>Software Maintenance - Overall is a decrease in FY26 due to WiFi configuration changes to reduce cost. Software maintenance cost includes software licenses (initial and renewal) and cybersecurity ATOs. |                     |               |                      |                     |               |                                                                        |                     |               |                      |                     |                 |                                                                       |                     |               |                      |                     |               |                      |

Support Data - increase in cost from FY25 to FY26 due for support to continuing logistics documentation development and maintenance costs.  
Fielding - FY26 fielding costs in accordance with the FY26 fielding plan. Decrease in FY26 from FY25 due to fewer planned fielding activities.  
Government Management - decrease in FY26 from FY25 due to personnel efficiencies in logistics support and government system of systems integration.  
System Engineering - increase in FY26 from FY25 due to personnel efficiencies in logistics support, configuration verification testing (CVT) support and system of systems integration.

**Remarks:**

FY 2026 procurement aligns to STS Annex III to Bridge to Future Networks (BFN) Capability Production Document (CPD), AROC validated in May 2022. The CPD includes cyber hardening and survivability improvements, transport interoperability capabilities, and enhanced reliability above those for the Operational Need Statement (ONS) equipment procured in FY 2021 and FY 2022. This is reflected in the cost of the three analogous systems procured in FY2026: 31 STS SATCOM terminals and 31 cyber-resiliency baseband kit and support equipment procured to enable Beyond Line of Sight (BLOS) communication and enterprise access; 36 STS Line of Sight (LOS) Systems comprised of radios and transmission equipment to extend network access to the forward edge of battle; and 53 STS Wi-Fi Systems providing dispersed sustainment elements a dedicated connection to the network. The STS Acquisition Strategy is to procure Commercial Off The Shelf (COTS) systems that are already available to PM Tactical Network for procurement through existing contract vehicles, which greatly reduces the anticipated procurement timeline.

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

| Description:<br>The Department of Defense Chief Information Officer established America's Mid-Band Initiative Team (AMBIT) in response to a White House 5G initiative to auction 100 MHz of spectrum. This funding stream includes the production of hardware and associated support to enable spectrum reallocation and coexistence solutions. |             |         |         |                                        |             |               |                                                             |                                     |         |                 |             |       |

| Description:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |             |         |         |                                        |             |               |                                                                                          |         |                                          |         |             |       |  |
| The Defense Enterprise Wideband Satellite Communications (SATCOM) Systems (DEWSS) requirement is included in the Army 2030/2040 Strategic Plan and all funding supports Joint and Next Generation Command and Control (NGC2) initiatives to modernize Command and Control (C2) systems.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |             |         |         |                                        |             |               |                                                                                          |         |                                          |         |             |       |  |
| Note: Wideband Sat Payload Control System will transition to US Space Force in FY2026.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |             |         |         |                                        |             |               |                                                                                          |         |                                          |         |             |       |  |
| The DEWSS funding line provides Super High Frequency (SHF) wideband military satellite communications readiness and resiliency supporting critical national strategic and tactical Command, Control, Communications and Intelligence (C3I) requirements. The DEWSS is a joint interest program supporting Department of Defense (DoD) Components with Joint Chiefs of Staff and DoD Chief Information Officer oversight. The DEWSS/Wideband Global SATCOM (WGS) is a key component of the Department of Defense Information Network (DoDIN), providing end-to-end network connectivity for strategic and combatant command communications. DEWSS is a system of systems composed of various hardware and software components; including large satellite earth terminal antennas, baseband telecommunications and networking equipment, satellite payload control planning and management systems. Requirements vary based on geographic area, terrain, end users, and joint partners (both US and international). |             |         |         |                                        |             |               |                                                                                          |         |                                          |         |             |       |  |
| DEWSS consists of the following efforts: B08900/Special Communications Links Program, BB8416/Enterprise Wideband Satellite Terminal (Mod) - The Modernization of Enterprise Terminals (MET), BB8501/Enterprise Wideband Satellite Terminal Digital EQ, and BB8509/Enterprise Wideband Sat Payload Control System.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |             |         |         |                                        |             |               |                                                                                          |         |                                          |         |             |       |  |
| B08900/Special Communications Links Program - The Senior National Leadership Communications (SNLC) program and the required modernization effort exists through a bilateral international agreement for equipment modernization. Per Lead MILDEP designation memorandum - dated 28 July 2000, this is a must fund effort. This funding supports the acquisition and fielding of unique capabilities that provide critical communications to support continuing relations between the United States President, Department of State (DoS), Secretary of Defense (SECDEF), other high level United States members and their foreign counterparts (Russia). The program includes the Direct Communications Link (DCL), Continuous Communications Link (CCL) and the Government-to-Government Communications Link (GGCL). Communications are required for diplomatic peacekeeping, arms control, and treaty verification purposes.                                                                                     |             |         |         |                                        |             |               |                                                                                          |         |                                          |         |             |       |  |
| BB8416/Enterprise Wideband Satellite Terminal (Mod) - The Modernization of Enterprise Terminals (MET) program is a complete modernization of fixed X-Band enterprise satellite communications terminals. The MET family of terminal equipment will increase the capacity of existing satellite communications facilities by adding military Ka-Band capability, enabling the Army to maximize its use of the Wideband Global SATCOM (WGS) constellation. The MET's modular design and incorporation of Commercial-Off-The-Shelf (COTS) systems will improve the sustainability of Army enterprise satellite communications systems, reduce life cycle costs, and extend the life of the enterprise terminal family beyond 2035.                                                                                                                                                                                                                                                                                   |             |         |         |                                        |             |               |                                                                                          |         |                                          |         |             |       |  |

BB8501/Enterprise Wideband Satellite Terminal Digital EQ - The Digital Communications Satellite Subsystem (DCSS) is an array of baseband telecommunications equipment that is integral to the Defense Enterprise Wideband SATCOM System (DEWSS). DCSS is the interconnection between the Department of Defense Information Network (DoDIN) and the DEWSS satellite earth terminal equipment, providing users with access to the Wideband Global SATCOM (WGS) system, the DoDIN, and other military and commercially available satellite constellations. Provides deployed Warfighters with global connectivity to military command and control systems, reach back to the sustaining base, and access to enterprise information resources and the Defense Information Systems Network. Interfaces with the national strategic communications infrastructure to support Presidential and senior DoD leadership communications.

BB8509/Enterprise Wideband Sat Payload Control System (This program requirement will transition to US Space Force in FY 2026). The Wideband SATCOM Operational Management System (WSOMS) integrates COTS-based telecommunications hardware (servers, workstations, routers, switches, and encryption devices) and software applications into a suite of planning and management tools that enable the efficient use of the Wideband Global SATCOM (WGS) constellation for the Department of Defense and International Partners. Modernizations will streamline mission planning to support combatant command operations, improve operational network capacity and availability, integrate data analytics and trend analysis to identify and resolve system performance anomalies, resolve satellite bandwidth and radio-frequency constraints, and improve resiliency for combatant command operations under stressed and unstressed conditions.

| *Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                            |             |                                        |                |                                                                                          |                                       |                                          |                                       |                                       |                                       |
| Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                            |             |                                        |                |                                                                                          |                                       |                                          |                                       |                                       |                                       |
| Justification:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                            |             |                                        |                |                                                                                          |                                       |                                          |                                       |                                       |                                       |
| FY 2026 BB8500 Base procurement dollars in the amount of \$65.591 million supports Joint and Next Generation Command and Control (NGC2) initiatives to modernize Command and Control (C2) systems under each of the following programs:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                            |             |                                        |                |                                                                                          |                                       |                                          |                                       |                                       |                                       |
| FY 2026 B08900 Base procurement dollars in the amount of \$2.457 million supports modernization of the Direct Communications Link (DCL) software suite to support modern computers, network hardware and operating systems. Funding provides integration, installation and training support for software and associated hardware.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                            |             |                                        |                |                                                                                          |                                       |                                          |                                       |                                       |                                       |
| FY 2026 BB8416 Base Procurement dollars in the amount of \$45.115 million supports the engineering, systems integration, post-production integration, testing and installation support of Modernization of Enterprise Terminals (MET) systems fielding globally; MET Interactive Electronic Technical Manual (IETM) upgrades, Life Cycle Modernization of the terminal systems; and the procurement, site preparation and installation of radomes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                            |             |                                        |                |                                                                                          |                                       |                                          |                                       |                                       |                                       |
| FY 2026 BB8501 Base procurement dollars in the amount \$17.962 million procures satellite terminal and satellite baseband equipment and associated management systems in support of Network Enterprise Technology Command (NETCOM) new facilities at Ft. Buckner, Japan and Camp Humphreys, Korea. Provides the minimum essential baseband and telecommunications equipment (power distribution, precision timing systems, encryption) to support the modernization of Digital Communications Satellite System (DCSS) components and their integration into the Defense Enterprise Wideband SATCOM Systems (DEWSS). Additionally, procures the Enterprise Digital Intermediate Frequency Multi-carrier (EDIM) Modem; which will support a future Digital Intermediate Frequency architecture and improve communications resiliency and network diversity. Supports Chairman, Joint Chiefs of Staff (CJCS) validated Combatant Commanders/Service long haul communication requirements and provides baseband equipment support for the Modernization of Enterprise Terminals (MET) program. |                                                            |             |                                        |                |                                                                                          |                                       |                                          |                                       |                                       |                                       |
| FY 2026 BB8509 Base procurement dollars in the amount of \$.057 million supports modernization of the closed restricted Wideband Satellite Operations Management System (WSOMS) network to transition to a modern and capable IP-based any-to-any network that provides reliability, sustainability, scalability, security, and management of the increasing SATCOM demands. It increases resiliency, trend analysis and anomaly resolutions to ensure reliable communications; increases automation of payload planning to increase resource efficiency and dynamic Combatant Commands (COCOM) mission planning, and transitioning WSOMS subsystems to a common interoperable virtual machine computing environment which will significantly reduce the physical footprint and reduce energy costs to the facilities. This program requirement will transition to the US Space Force in FY 2026.                                                                                                                                                                                          |                                                            |             |                                        |                |                                                                                          |                                       |                                          |                                       |                                       |                                       |

**Remarks:**  
Explanations for significant increases/decreases in efforts from FY 2025 to FY 2026:

- Increase in Software Development and Integration and Systems Engineering is due to preparation of the next DCL modernization increment.  
- Decrease in fielding is due to next DCL modernization increment fielding beginning in FY 2027.

**Remarks:**

Explanations for significant increases/decreases in efforts from FY 2025 to FY 2026:

- Increase in Large Fixed Anchor Terminals and Hardware procures two High-Altitude Electromagnetic Pulse (HEMP) hardened antennas and one shelter for Alternate ("Alt") Site to modernize legacy systems supporting Presidential voice communications over SATCOM as part of the National Leadership Command, Control and Communications Systems (NLC3S).
- Increase to System Engineering is to support testing and engineering reviews for Large Wideband SATCOM Terminals.
- Decrease to Radome Hardware & Install; MET Tech Refresh; and Fielding cost elements is due to an Army Senior Leadership decision to realign modernization priorities.

**Remarks:**

Explanations for significant increases/decreases in efforts from FY 2025 to FY 2026:

- Increase in EDIM Modem is due to transition from low rate initial production (LRIP) to full-rate production (FRP).
- Baseband Production Support costs are included in the EDIM Modem project for FY26 and beyond.
- Decrease in Ft. Buckner Equipment is due to completion of project.
- Increase in Gateway Management and Control funds equipment procurement for low-rate initial production (LRIP).
- Decrease in Fielding is due to completion of the Ft. Buckner project.

| Flyaway Unit Cost ( <i>\$ in Thousands</i> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | -                  | -              | -              | -                                             | -                  | -                    | -                                                                                                        | -                                          | -              | -                      | -                  | -            |
| Gross/Weapon System Unit Cost ( <i>\$ in Thousands</i> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 1,945.321          | 527.055        | -              | -                                             | -                  | -                    | -                                                                                                        | -                                          | -              | -                      | -                  | -            |
| <p><b>Description:</b><br/>This funding line is directly aligned to the Army Network Modernization Priority and the Army of 2030 and 2040 initiatives.</p> <p>Transportable Tactical Command Communications (T2C2) and Scalable Class of Unified Terminals (SCOUT) provide a suite of expeditionary and mobile satellite terminals. As part of the Army's unified tactical network, this scalable suite of expeditionary ground satellite communication (SATCOM) terminals transmits voice, video and data to provide mission command, situational awareness and an improved common operational picture in support of multi-domain operations. T2C2 and SCOUT terminals support small team elements up to echelons above brigade, company sized command posts operating away from the battalion/brigade HQ, and advanced parties/early entry units. The program office is leveraging a "Suite of Terminals" (SoT) strategy to meet Army requirements for the Expeditionary Signal Battalion-Enhanced (ESB-E), Security Force Assistance Brigade (SFAB), Integrated Tactical Network (ITN) Brigade Combat Teams (BCTs), Multi-Domain Task Force (MDTF), SPACE Brigade, Maneuver Enhancement Brigades (MEB), Military Intelligence Brigades (MIBs), Divisions and Corps headquarters and other formations. This strategy enables procurement of the most capable and formation appropriate terminals for the requirement.</p> <p>With a variety of terminals and sizes (sub-1 meter (m)) up to 4m) to support different mission requirements, these SATCOM terminals provide interoperable high-speed, high-capacity connectivity, enabling Soldiers to communicate beyond line of sight (BLOS) across vast distances and in austere locations and terrains, virtually anytime, anywhere, without the need of static infrastructure. These SATCOM terminals also include baseband and ancillary equipment to enable authorized cyber secure connections at the tactical and strategic level. The SATCOM terminals in the portfolio support and complement the Army's tactical network and architecture by increasing operational reach and situational awareness of the entire force, while ensuring quality and technical relevancy. The program will leverage a Family of Terminals contracting approach to incorporate emerging technologies to ensure network resiliency, capacity, and convergence by providing high-throughput and low-latency broadband services. The program transitioned the Lite materiel solution from an inflatable satellite terminal to a lighter, more expeditionary and capable rigid dish solution, the Lite v2. In FY 2023, the program began procurement of an Ultra Lite terminal intended for small teams that require high bandwidth network capability in austere environments. Additionally, the program office will produce logistics products, program supply support, cyber support, etc. and establish contracts to support the Ultra Lite terminal.</p> <p>Lite (1.2m): Is a previously fielded inflatable satellite terminal solution.</p> <p>Lite v2 (1.3m): Supports small command posts of 8 subscribers over SIPR/NIPR. The terminal provides a tri-band Scalable Class of Unified Terminals (SCOUT) rigid dish for the antenna solution. This is the follow-on system to the Lite and offers reduced setup time, improved connection characteristics, reduced maintenance requirements, and less overall complexity resulting in a more desirable terminal based on end-user feedback when compared to the previous Lite. The Lite v2 nomenclature will change to SCOUT Expeditionary, however the capability does not change.</p> |                    |                |                |                                               |                    |                      |                                                                                                          |                                            |                |                        |                    |              |

SCOUT Expeditionary (1.3m): Supports small command posts of 8 subscribers over SIPR/NIPR. The terminal provides a tri-band Scalable Class of Unified Terminals (SCOUT) rigid dish for the antenna solution. This is the follow-on system to the Lite and offers reduced setup time, improved connection characteristics, reduced maintenance requirements, and less overall complexity resulting in a more desirable terminal based on end-user feedback when compared to the previous Lite. The SCOUT Expeditionary was previously referred to as the Lite v2.

Heavy (2.4m): Is a previously procured inflatable satellite terminal solution.

SCOUT Small (0.65m-0.95m): Supports small command posts of 13 subscribers over SIPR/NIPR. The terminal provides a tri-band capable, early entry satellite connection for SFAB units to complete their mission.

SCOUT Medium SFAB (1.3m): Supports small command posts of 9 subscribers over SIPR/NIPR/MPE. The terminal provides a tri-band capable, early entry satellite connection for SFAB units to complete their mission.

SCOUT Medium ITN (1.3m): Supports small command posts of 26 subscribers over SIPR/NIPR/Secure but Unclassified (SBU). This terminal is capable of supporting voice, imagery, data, video, chat, and full motion video (FMV) at the battalion level. Terminal provides tri-band capable, early entry satellite connection for ITN units to complete their mission.

Ultra Lite: Provide all-weather capable lightweight early-entry communications packages for small teams at the tactical edge with setup/teardown time within 7 minutes. Supports one subscriber over NIPR and three over SIPR. The only system in the suite of terminals that consists of one (1) transit case in a carry-on suitcase that provides a SIPR connection over commercial SATCOM for small intelligence teams and executive communications. The Ultra Lite terminal requires support from the SATCOM Support Center (SSC), which provides 24/7 helpdesk support and mission critical network connectivity that actively supports secure commercial tunnel architecture, access to unclassified, classified (up to Secret), and coalition networks, and routing to a Top-Secret gateway. The program will fund SATCOM Support Center (SSC) services for Ultra Lite terminals.

Enhanced Baseband: Additional baseband added to previously fielded Lite terminals to support 26 users over Secure Internet Protocol Router/Non-Secure Internet Protocol Router (SIPR/NIPR), consistent with ITN requirements.

Deployable Ku-Band Earth Terminals (DKET) are satellite terminals which are used to augment the Army's communications network infrastructure in theater. The terminals operate as hubs, providing inter- and intra-theater satellite links and network hub services for disadvantaged forward operating bases (FOBs).

This program is included in the OPA Budget Line Consolidation. In FY 2025, B85800 Transportable Tactical Command Communications (T2C2) was consolidated into B56000 SATELLITE COMMUNICATIONS.

| Justification:<br>In FY2025 funds transferred from project B85800/Transportable Tactical Command Communications (T2C2) to project B56111/Transportable Tactical Command Communications (T2C2) under a new Parent program element B56000 SATELLITE COMMUNICATIONS. This consolidation was proposed in FY2025 and approved with FY 2025 full year continuing resolution. FY 2026 is the first year Army is presenting B56000 funding line with retroactive adjustments for FY2025.<br><br>In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities. |                            |         |                                        |                 |                                                                                                  |                                     |                 |         |         |         |

| Gross/Weapon System Unit Cost (\$ in Thousands)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 28,270.250  | 2,449.059 | -       | -                                      | -           | -             | -                                                      | -                                   | -       | -               | -           | -     |
| Description:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |             |           |         |                                        |             |               |                                                        |                                     |         |                 |             |       |
| This funding line is directly aligned to the Army Network Modernization Priority and the Army of 2030 and 2040 initiatives.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |             |           |         |                                        |             |               |                                                        |                                     |         |                 |             |       |
| The AN/TSC-156E Super High Frequency (SHF) terminal (Phoenix E-Model) is the Army's only quad-band capable, multi-carrier, high-capacity SATCOM terminal with the flexibility to expand capacity at priority network nodes and bridge seams in the network. The modernized AN/TSC-156E provides more flexibility, scalability, and modularity for the Multi-Domain Task Force (MDTF) and replaces the AN/TSC-156D in the Expeditionary Signal Battalion (ESB)/Expeditionary Signal Battalion - Enhanced (ESB-E) in support of expeditionary communications Joint and Army Headquarters at the Division and Corps levels. The AN/TSC-156E also enables interface with strategic networks via Regional Hub Node (RHN) and Standardized Tactical Entry Points (STEP). The AN/TSC-156E is based on modern architectures described in the Transmission Systems Increment 1 Capabilities Production Document (CPD), which increases demand for satellite bandwidth.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |             |           |         |                                        |             |               |                                                        |                                     |         |                 |             |       |
| The AN/TSC-156E provides broadband satellite data capability by leveraging commercial off-the-shelf (COTS) solutions to increase reliability, flexibility, mobility, and range. The AN/TSC-156E is a network communications transport that operates over military and commercial satellite space segments to provide high-capacity links to support voice and data communications. The AN/TSC-156E utilizes a transit-case based concept, allowing for rapid deployments with or without vehicle support. Specifically, the AN/TSC-156E adds Internet Protocol (IP) routing capability as well as providing a dual head capability to access two satellites simultaneously in order to increase network diversity, robustness, and capacity. The AN/ TSC-156E allows seamless integration with current and future proposed tactical communications networks at high data rates and multiple bands required by current and future operations. The Phoenix terminal supports and complements the Army's tactical network and architecture by increasing the operational reach and situational awareness of the entire force, while ensuring quality and technical relevancy. The program will leverage a Family of Terminals contracting approach to incorporate emerging technologies to ensure network resiliency, capacity, and convergence by providing high-throughput and low-latency broadband services. Supports Network Fix Architecture with downward reinforcing SATCOM capability. |             |           |         |                                        |             |               |                                                        |                                     |         |                 |             |       |
| This project supports the Army's Command Control (C2) Transport strategy.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |             |           |         |                                        |             |               |                                                        |                                     |         |                 |             |       |
| The Approved Acquisition Objective (AAO) for the SHF Terminal is 172.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |             |           |         |                                        |             |               |                                                        |                                     |         |                 |             |       |
| This program is included in the OPA Budget Line Consolidation. In FY 2025, the SHF Term (BA9350) was consolidated into the SATELLITE COMMUNICATIONS (B56000) program.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |             |           |         |                                        |             |               |                                                        |                                     |         |                 |             |       |

**Justification:**  
In FY 2025 funds transferred from project BA9350 Super High Frequency (SHF) Terminal to project B56222 Super High Frequency (SHF) Terminal under a new parent line B56000 SATELLITE COMMUNICATIONS. This consolidation was proposed in FY2025 and approved with FY 2025 full year continuing resolution. FY 2026 is the first year Army is presenting B56000 funding line with retroactive adjustments for FY2025.

**Description:**  
This funding line is directly aligned to the Army Assured Positioning, Navigation and Timing modernization priority.

The Assured Positioning, Navigation and Timing (APNT) capability provides Army ground maneuver forces access to Military Code (M-Code) and assured PNT in accordance with National Defense Authorization Act guidance under conditions where Global Positioning Systems (GPS) may be limited or denied (jammed and spoofed). APNT products are ruggedized tactical systems that enable Army forces the ability to shoot, move, communicate, thereby allowing forces to maneuver from operational and strategic distances to close with, destroy, and exploit the enemy with sufficient combat power, tempo, and momentum. APNT addresses two critical capability gaps: Access and Integrity. Access is the ability to retrieve accurate PNT information in a contested Electronic Warfare/Cyber environment. Integrity is the ability to trust the PNT information. PNT is a critical enabler of many Army Maneuver, Fires, Intelligence, Mission Command and communications that are dependent on accurate Position and Timing, and a foundational Multi-Domain Battle capability to support: calibrated force posture (position and maneuver across strategic distances); multi-domain formations (operate in contested spaces against near-peer adversaries); convergence (continuous integration of capabilities in all domains). APNT capabilities provide critical support to the execution of the Army's Deliberate Transformation as well as Transformation in Contact and the Next Generation Command and Control (NGC2) environment.

Approved Requirements: The Army Requirements Oversight Council (AROC) approved the Alternative Navigation (ALTNAV) Abbreviated Capabilities Development Document (A-CDD) on 29 August 2022. The Joint Requirements Oversight Council (JROC) approved the Dismounted APNT System (DAPS) Capabilities Development Document (CDD) on 28 January 2022. The Army Requirements Oversight Council (AROC) approved the Mounted APNT System (MAPS) CDD on 12 September 2020. MAPS and DAPS are implementing Congressional and OSD guidance to develop and field Military Code (M-Code) Global Positioning System (GPS) Ground user Equipment. The AROC approved the Command, Control, Communications, Computers, Cyber, Intelligence, Surveillance, and Reconnaissance (C5ISR) Modular Open Suite of Standards (CMOSS) Mounted Form Factor (CMFF) Abbreviated Capabilities Development Document (A-CDD) on 04 January 2021. In support of House Report 116-442, 2020, the program will prototype modular cards and software according to the Modular Open System Approach (MOSA) standards, for future modernization and new weapons systems. Joint Requirements Oversight Council Memo (JROCM) 049-10, dated 05 April 2010, approved the PNT Assurance Initial Capabilities Document and designated the Army as the Lead Component for Assured PNT.

Assured PNT consists of:

K49010 - SSN K49010 has no funds requested in FY 2026. Mounted/Dismounted Receiver: Deploys Resiliency and Software Assurance Measures (RSAM) to legacy Selective Availability and Anti-Spoof Module (SAASM) based military Global Positioning System (GPS) receivers, including Defense Advanced GPS Receiver (DAGR) and embedded Ground Based - GPS Receiver Applications Module (GB-GRAM) to recognize, reject, and report bad navigation data until more effective PNT solutions are deployed.

K49020 - Dismounted Hub: The Dismounted Assured PNT (APNT) System (DAPS) is an enduring capability that meets Congressional (10 USC 2281) and Department of Defense guidance to develop and field Military Code (M-Code) Global Positioning System (GPS) to dismounted Soldiers, Commanders, and applicable End User Devices to provide assured timing and position data necessary to effectively engage targets, share data across the network, and conduct mission command functions. DAPS delivers APNT in an optimized form factor that supports dismounted mission profiles in denied environments. The DAPS GEN II system is being fielded to execute the Joint Requirements Oversight Council (JROC) approved DAPS Capability Development Document (January 2022) requirements and will provide an increased capability to include Alternative Navigation (ALTNV) signal and stand-alone operation. The DAPS enables the Dismounted Soldier with APNT capabilities critical to the targeting process for precision fires, command and control, and maneuver for selected Army units. DAPS were evaluated through Operational Testing as effective, suitable, and survivable and approved for Full Rate Production.

K49030 - Mounted Hub A-PNT: The Mounted APNT System (MAPS) will deliver systems that provide the Army's combat forces access to assured PNT information under conditions where space-based GPS may be limited or denied enabling Army forces precision fires, critical maneuvering, network operations, and situational awareness capabilities. The MAPS GEN II system is the enduring capability to meet the Army Requirements Oversight Council (AROC) approved Capability Development Document (September 2020). Congressional (10 USC 2281) and Department of Defense guidance to provide resilient, survivable, and M-Code capable Ground User Equipment receivers. The MAPS GEN II provides increased capability to include M-Code GPS, Alternative Navigation (ALTNV) signal, and sensor fusion. The MAPS GEN II is comprised of two subsystems: a internally mounted navigation hub where data from sensors and receivers (to include M-code GPS) are fused together to distribute an assured PNT solution to the platform and onboard client systems; and an Anti-Jam Antenna System (AJAS) mounted externally on the platform to protect access to GPS and receive ALTNV signals. This capability will deliver distributed assured PNT capabilities to platforms in an iterative and affordable manner that allows for future modernization. MAPS were evaluated through Operational Testing as effective, suitable, and survivable and approved for Full Rate Production.

K49041 - Alternative Navigation (ALTNV) Ground Control Segment (ALTNV GCS) is a global navigation solution. A system of one, which provides warfighters with an alternative source of positioning and timing information. ALTNV GCS is a complementary capability to Global Positioning System and may be used as contingency in the PNT PACE (Primary, Alternative, Contingency, Emergency) Plan that facilitates continued operations as GPS is degraded or denied in accordance with National Defense Authorization Act (NDAA) Guidance (2021 NDAA: Section 1611). In May 2024, ALTNV received authorization to enter into the Middle Tier Acquisition - Rapid Fielding pathway from Office of the Assistant Secretary of the Army, Acquisition Logistics and Technology Army Acquisition Executive.

**Justification:**  
FY 2026 Base dollars in the amount of \$212.469 million will support the following:

K49020 - Dismounted Hub: FY 2026 base procurement dollars in the amount of \$72.899 million procures 4,336 Dismounted Assured Position Navigation and Timing Systems (DAPS) GEN II systems, spares, integrated logistics support, engineering changes and services for fielding activities to Brigade Combat Teams.

K49030 - Mounted Hub A-PNT: FY 2026 base procurement dollars in the amount of \$104.740 million procures 619 Mounted Assured Positioning, Navigation and Timing System (MAPS) GEN II systems, spares, A-kits, integrated logistics support, platform and client integration, engineering changes and services for fielding activities to Armored, Stryker and Infantry Brigade Combat Teams.

K49041 - Alternative Navigation (ALTNAV): FY 2026 base procurement dollars in the amount of \$34.830 million procures and fields the ALTNAV Ground Control Segment network equipment, systems/software engineering and Contractor Logistics Support.

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

| 1. FY 2026 Flyaway (Recurring) System Engineering supports production, reliability/maintainability engineering, safety engineering, configuration management, obsolescence management, and value engineering efforts.                                                                  |                     |                            |                      |                     |               |                                                                                          |                     |               |                      |                     |               |                                                            |                     |               |                      |                     |               |                      |  |  |
| 2. FY 2026 Flyaway (Non-Recurring) Follow-on Test and Evaluation (FOT&E), the program was unable to source an Armored Brigade Combat Team to support FOT&E in FY 2025. The test was shifted to FY 2026. FY 2025 Funding was reallocated to procure A-Kits in support of unit fielding. |                     |                            |                      |                     |               |                                                                                          |                     |               |                      |                     |               |                                                            |                     |               |                      |                     |               |                      |  |  |
| 3. FY 2026 Flyaway (Non-Recurring) Mounted PNT Depot Initiation is a new cost element. This element includes test equipment, depot level technical manual, training support packages, training for depot repair technicians, and initial stock of depot level repair parts.            |                     |                            |                      |                     |               |                                                                                          |                     |               |                      |                     |               |                                                            |                     |               |                      |                     |               |                      |  |  |
| 4. FY 2026 Hardware Cost (Recurring) B-kit unit cost includes receiver, antenna, and Military-Code card.                                                                                                                                                                               |                     |                            |                      |                     |               |                                                                                          |                     |               |                      |                     |               |                                                            |                     |               |                      |                     |               |                      |  |  |
| 5. FY 2026 Hardware Cost (Non-Recurring) A-Kit Stryker Components is a new cost element. These additional components are required only in Stryker vehicles in order for the MAPS to communicate to platform specific client systems.                                                   |                     |                            |                      |                     |               |                                                                                          |                     |               |                      |                     |               |                                                            |                     |               |                      |                     |               |                      |  |  |
| 6. FY 2026 Package Fielding (Recurring) increase to Installation is due to increase in the number of active Army Units planned to be fielded.                                                                                                                                          |                     |                            |                      |                     |               |                                                                                          |                     |               |                      |                     |               |                                                            |                     |               |                      |                     |               |                      |  |  |

| Gross/Weapon System Unit Cost ( <i>\$ in Thousands</i> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 92.905                     | 102.984 | -                                      | -            | -           | -                                                                         | -       | -                                   | -       | -       | -           | -     |
| Description:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                            |         |                                        |              |             |                                                                           |         |                                     |         |         |             |       |
| This funding line is directly aligned to the Army Network Modernization Priority and supports the Army of 2030 and 2040 initiatives.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                            |         |                                        |              |             |                                                                           |         |                                     |         |         |             |       |
| Protected Anti-Jam Tactical SATCOM (Protected SATCOM) provides the ability for the Army tactical terminals to be resilient in a contested environment and protect against catastrophic loss of situational awareness and command and control during critical battle movement with Anti-Jam capabilities. The Resilient Anti-Jam Modem (RAM) (previously referred to as Block II Small Form Factor (SFF)) will provide on the move and early entry satellite terminals with adaptive, anti-jam communications for the highest levels of protected communications in multi domain operations. Air Force/Army Anti-Jam Modem (A3M) will offer tactical Army protection against interference that is either intentional or unintentional. A3M is a Joint Effort between the Army and US Space Force (USSF). RAM is an Army only requirement, as USSF does not have a requirement for RAM. Protected SATCOM supports initial development, testing and certification of production representative Protected Tactical Waveform (PTW) modems, incorporating Army requirements, to support continued spiral development of critical protected communications capabilities to address resiliency in jamming environments. Protected SATCOM addresses evaluation of capabilities to mitigate emerging threat requirements. |                            |         |                                        |              |             |                                                                           |         |                                     |         |         |             |       |
| The Protected/Resilient SATCOM Abbreviated - Capabilities Development Document (CDD) was validated and approved 1 March 2024.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                            |         |                                        |              |             |                                                                           |         |                                     |         |         |             |       |
| This program is included in the OPA Budget Line Consolidation. In FY 2025, the EHF SATELLITE COMMUNICATION (BC4000) was consolidated into the SATELLITE COMMUNICATIONS (B56000) program.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                            |         |                                        |              |             |                                                                           |         |                                     |         |         |             |       |

| Justification:<br>In FY2025 funds transferred from project BC4000 / B34002 EHF/Satellite Communications/Protected Anti-Jam Tactical SATCOM to project B56333 Protected Anti-Jam Tactical SATCOM under a new Parent B56000 SATELLITE COMMUNICATIONS. This consolidation was proposed in FY 2025 and approved with FY 2025 full year continuing resolution. FY 2026 is the first year Army is presenting B56000 funding line with retroactive adjustments for FY 2025. |                            |         |                                        |                 |                                                                           |                                     |                 |         |         |         |

| Description:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                            |             |         |                                        |              |               |                                                                       |                                     |         |                 |         |             |       |
| This funding line is directly aligned to the Army Network Modernization Priority and the Army of 2030 and 2040 initiatives.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                            |             |         |                                        |              |               |                                                                       |                                     |         |                 |         |             |       |
| Global Broadcast Service (GBS) provides high-speed broadcast to receive only terminals of large-volume data and multimedia products including Unmanned Aerial Vehicles (UAV) and commercial video, imagery, intelligence, map data, weather, and biometric data. GBS gives deployed forces access to national level repositories of intelligence products and other critical mission planning information. GBS is used to deliver security and system software updates to other terminals in the Army Tactical Network by offloading of the Command and Control (C2) MILSATCOM bandwidth. GBS also reduces oversubscription on the Wideband Global SATCOM (WGS) constellation, providing deployed tactical operations centers (TOCs) and garrison forces worldwide greater bandwidth for two-way C2 traffic. The GBS system is being upgraded for increased cyber security. In order to fulfill the Transmission Security (TRANSEC) requirement the The United States Space Force (USSF) has developed the Enterprise SATCOM Gateway Modem (ESGM). |                            |             |         |                                        |              |               |                                                                       |                                     |         |                 |         |             |       |
| GBS is a Joint Program and designated as a Department of Defense Space System. USSF is designated as the executive service (Joint ACAT IC program). The Army supports the Joint Program Office (JPO) on the development and procurement of the Transportable Ground Receive Suite (TGRS) (AN/TSR-11). The TGRS consists of a Receive Broadcast Manager (RBM) and very-small- aperture satellite antenna. The TGRS is fielded to Battalion, Brigade Combat Teams, Divisions, Corps and Theater level units in Active, National Guard, and Reserve components.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                            |             |         |                                        |              |               |                                                                       |                                     |         |                 |         |             |       |

Description:

The Commercial Spectrum Enhancement Act (CSEA) Title II, Public Law 108-494, dated December 23, 2004, established the Spectrum Relocation Fund (SRF) to provide Federal agencies a mechanism to recover the costs associated with relocating communication systems from spectrum bands which were auctioned for commercial purposes.  
- The SRF is funded with proceeds from Federal Communications Commission (FCC) conducted auctions of spectrum licenses.  
- SRF funds have an indefinite obligation period and remain available until expended (X Year).  
- The Department of Defense (DoD) Information Officer (CIO) executes oversight of the DoD spectrum relocation and sharing efforts.  
Spectrum Microwave efforts transition all Army activities out of 1755 MHz and 1780-1850 MHz band and relocates the activities microwave links to 7/8 GHz to facilitate compression of other systems into 1780-1850 MHz bands.

Justification:

B09900 has no funding request in FY 2026.

Footnotes:

<sup>(1)</sup> The correct Gross/Weapon System Cost FY 2024 dollar amount(in thousands) is -\$6,463k.

<sup>(2)</sup> The correct Net Procurement (P-1) FY 2024 dollar amount(in thousands) is -\$6,463k.

<sup>(3)</sup> The correct Total Obligation Authority FY 2024 dollar amount(in thousands) is -\$6,463k.

Description:

8151B70000 / COE Tactical Server Infrastructure (TSI) base procurement funding in FY 2026 and beyond was realigned to Lines B29810 (Item Number B29801) and BA9301 (Item Number B99418), in support of the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems, Infrastructure Layer. This capability, along with its resources and requirement will transition under the overarching NGC2 capability to eliminate stove-piping, reduce duplication of effort, and provide capability within a single NGC2 core architecture.

The Tactical Server Infrastructure (TSI) is the server hardware platform that hosts Mission Command applications and enterprise software in Army units from the Battalion echelon up through the Army Service Component Command. The TSI provides the computing and data storage hardware/software required to host the tactical Computing Environments, supported Warfighter Functional Area applications, Cross-Cutting Capabilities and enables the collaborative work environment.

TSI standardizes server configurations using Commercial-off-the-shelf (COTS) hardware and software and TSI provides a common hosting platform for mission command systems. It extends support to the migration of future warfighting capabilities and facilitates cloud computing capabilities in the tactical space.

Description:

This funding supports the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems, Transport Layer.

The Handheld, Manpack, and Small Form Fit (HMS) radio program is a single Acquisition Category 1C program encompassing handheld radios and manpack radios. Handheld radio variants include the legacy single-channel Rifleman Radio (RR), Single Channel Data Radio (SCDR) in support of Soldier Born Mission Command (SBMC), two-channel Leader Radio (LR), and Sensitive But Unclassified-Encryption (SBU-E). The manpack variants include the legacy Generation 1 Manpack (MP) and the current Generation 2 Manpack. HMS provides voice and data communication to the expeditionary Warfighter with an on-the-move, at-the-halt, and stationary Line of Sight (LOS)/Beyond Line of Sight (BLOS) capability for both dismounted personnel and platforms. HMS radio systems are software reprogrammable, networkable, multi-mode systems capable of simultaneous voice and data communication. HMS radios will support a variety of other platforms, including tactical End User Devices (EUD) voice and data needs. HMS provides tailorable and scalable, software-defined radio systems meeting U.S. Army, Air Force, Navy, Marine Corps, and Special Operations Command communications needs. HMS provides critical components to the NGC2 systems Transport Layer.

HMS radios are capable of providing both Classified and Unclassified communications. HMS radios provide the Single Channel Ground and Airborne Radio System (SINCGARS) waveform for Classified and Unclassified communications. HMS radios also provide advanced waveforms (e.g., TrellisWare TSM) that provide SBU-E and Secret and Below (SAB) communications. The SBU-E is a critical component of radio modernization for the Army. Additionally, the MP radio provides the Mobile User Objective System (MUOS) waveform for Tactical Satellite (TACSAT) communications, a top priority for Army network modernization and BLOS communications.

HMS procures Non-Developmental Items (NDI) through full and open competition to all potential industry partners. The competitive strategy promotes cost savings and innovation. These continual improvements result in better capabilities for the Warfighter. Two Firm-Fixed-Price (FFP) Indefinite Delivery Indefinite Quantity (IDIQ) contracts were awarded in support of this effort. The first contract was awarded on 29 April 2015 and procures Leader Radios; the second contract was awarded on 26 February 2016 and procures MP Radios. The SCDRs are purchased through an Other Transaction Agreement (OTA).

HMS achieved a successful Full Rate Production (FRP) decision, per the August 19, 2021 Acquisition Decision Memorandum signed by the Army Acquisition Executive. This milestone results in the ability to procure radios in sync with the current Army fielding priorities schedules. HMS is able to replace legacy equipment with more efficient, more secure, and better capable radios.

Budget Line Item B95004 also includes procurement dollars for the Air to Ground Networking Radio (AGNR). AGNR was funded under Item Number B95007 (Manpack Radio) from FY 2021 through FY 2024. In FY 2025 and out, AGNR funding is captured under Item Number B95017. AGNR is an Engineering Change Proposal (ECP) to specific aviation platforms that addresses SINCGARS obsolescence and cryptomod

| requirements, which is a modernization Priority for Network C3I. AGNR will replace the legacy ARC-201D to address emerging threats and meet National Security Agency (NSA) and Office of the Secretary of Defense mandated cryptographic modernization requirements. AGNR maintains air-ground interoperability between maneuver ground forces and aviation forces, enables Combat Aviation Brigades (CAB), Theater Aviation Brigades (TAB), and Special Operations Aviation Regiments. AGNR provides Commanders enhanced Situational Awareness and Mission Command that provides a more responsive means of directing aircraft to match changing maneuver forces. Total Army Requirement AAO/APO: 7,378 including spares/test assets. |                            |         |                                        |              |                                                                                     |                                                    |                 |         |         |         |

| *Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                       |             |       |                                               |                                          |                                                                                            |                                                           |                                          |                                          |                                          |
| Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                       |             |       |                                               |                                          |                                                                                            |                                                           |                                          |                                          |                                          |
| <p><b>Justification:</b><br/>FY 2026 Base procurement dollars (B95004) in the amount of \$478.435 million is requested to support the following:</p> <p>FY 2026 Base procurement dollars (B95006) in the amount of \$231.069 million support the procurement of: 2,689 Single-Channel Data Radios (SCDR), 700 Leader Radios, 3,365 Sensitive But Unclassified-Encryption (SBU-E), Spares, Non-Recurring Engineering (NRE) in support of platform integration, System Engineering and Program Management (SEPM), support equipment, and fielding. This funding allows PdM HMS to procure two BCT-equivalents of Handheld Radios in support of Army Fielding Strategies and directly supports the NGC2 systems Transport Layer. SCDR procurements align with PM Soldier's Soldier Born Mission Command (SBMC) strategy.</p> <p>FY 2026 Base procurement dollars (B95007) in the amount of \$187.937 million support the procurement of: 1,164 Manpack Radios, NRE, SEPM, support equipment, and fielding support. This funding allows PdM HMS to procure one BCT-equivalent of Manpack Radios in support of Army Fielding Strategies.</p> <p>FY 2026 Base procurement dollars (B95017) in the amount of \$59.429 million funds AGNR B-Kit procurements, UH-60M, CH-47F and AH-64E integration modification work orders (MWO), Aviation Radio Control Manager (ARCM) software updates, cybersecurity support, initial spares, component/system/platform level testing, and program management office support. Aligned to Army fielding strategies for multi-channel, software-defined, NSA high assurance networking radios to maintain air-ground interoperability between maneuver ground forces and Aviation. AGNR was funded under Item Number B95007 (Manpack Radio) from FY 2021 through FY 2024. Starting in FY 2025, AGNR funding was realigned under Item Number B95017 to clearly separate aviation and ground radio requirements.</p> <p>The increase in operational requirements in FY 2026 reduces funding allocation available for production and results in increased average unit costs.</p> <ul style="list-style-type: none"> <li>- Army directed acceleration of tactical satellite modernization fielding requires higher funding allocation to fielding support activities.</li> <li>- Army directed acceleration of fielding to Armored and Stryker formations: non-recurring engineering design and production of heavy platform installation kits; increased quantities of mounted configurations, which have higher unit costs than the primarily dismounted configurations.</li> <li>- Organic depot sustainment standup: intellectual property and equipment purchases to support transition of HMS radios from Original Equipment Manufacturer to Army depot sustainment.</li> </ul> |                                       |             |       |                                               |                                          |                                                                                            |                                                           |                                          |                                          |                                          |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Unit Cost<br>(\$ K) | Qty<br>(Each) | Total Cost<br>(\$ M) | Unit Cost<br>(\$ K) | Qty<br>(Each) | Total Cost<br>(\$ M) | Unit Cost<br>(\$ K)                                                                 | Qty<br>(Each) | Total Cost<br>(\$ M) | Unit Cost<br>(\$ K) | Qty<br>(Each) | Total Cost<br>(\$ M) | Unit Cost<br>(\$ K)                                     | Qty<br>(Each) | Total Cost<br>(\$ M) | Unit Cost<br>(\$ K) | Qty<br>(Each) | Total Cost<br>(\$ M) |
| Gross/Weapon System Cost                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 64.586              | 16,631        | 1,074.129            | 27.573              | 7,380         | 203.487              | 36.532                                                                              | 5,581         | 203.883              | 34.212              | 6,754         | 231.069              | -                                                       | -             | -                    | 34.212              | 6,754         | 231.069              |
| <b>Remarks:</b><br>This funding supports the Army's Next Generation Command and Control (NGC2) initiative to modernize Command and Control (C2) systems, Transport Layer.<br><br>Handheld radio variants include the legacy single-channel Rifleman Radio (RR), Single Channel Data Radio (SCDR) in support of Soldier Born Mission Command (SBMC), two-channel Leader Radio (LR), and Sensitive But Unclassified-Encryption (SBU-E).<br><br>Recurring Manufacturing: This includes Leader Radio (LR), SCDR, SBU-E, A-Kits, wedges, and other hardware ancillaries and directly supports the NGC2 systems Transport Layer. Manufacturing - Sensitive But Unclassified Encryption Radios (SBU-E) is considered a new start in FY2026; this requirement was a result of the HMS Configuration Steering Board (CSB) on 12 November 2024.<br><br>Non-recurring Cost: Vehicle integration NRE for LR, depot level maintenance repair manual evaluation, depot level tooling setup, Test Sets (e.g., TS-4549). Increased costs in FY2026 are driven by the addition of SBU-E.<br><br>Data Costs: Radio vendor services and Contractor Data Requirements List (CDRL) contractual costs outside of hardware and warranty, and maintenance and repair logistics documentation. With the addition of SBU-E, the program office estimates additional data costs will incur.<br><br>Fielding Costs: Warranties, Contractor Logistics Support (CLS) Labor, Tobyhanna Army Depot (TYAD) support, Regional Support Center (RSC), and initial consumables costs. The reduction in FY2026 is driven by a realignment of costs to New Equipment Training cost category.<br><br>Initial Spares: Initial spare components, assemblies, and subassemblies to support end item fielding, with stock going to CECOM to build HW spare stock levels. Previously procured end-items were prioritized for fielding requirements. The program office plans to begin building spares stock in FY2026.<br><br>NET: (New Equipment Training Cost) For LR includes Operator and maintainer level NET training, radio network planner and operator training, Mission Training Center (MTC), Combined Training Centers (Joint Readiness Center, National Training Center, Joint Multinational Readiness Center) and Army Training and Doctrine Command (TRADOC) and helpdesk training. The increase in FY2026 is driven by a realignment of costs from the Fielding cost category.<br><br>Operational/Site Activation: Installation costs (labor and travel) for mounted platforms.<br><br>Systems Engineering Costs: The increased requirements support the program office in managing cost, schedule, and performance. Recurring costs for Matrix Government and SETA contract labor for system management and control, and PMO travel and LR radio vendor prime contractor SEPM costs.<br><br>System Technical Support (STS) Costs: Recurring costs for Leader Radio Post Deployment Software Support and sustainment costs. Increased costs represent field software support.<br><br>Systems Test and Evaluation: Unified Lab for Tactical Radios - Army (ULTR-A) laboratory costs for LR and Commercial Technologies Integration & Evaluation (CTIE) laboratory SCDR/SBU-E. **Remarks:**  
HMS contracts are Firm Fixed Price (FFP) Indefinite Delivery Indefinite Quantity (IDIQ) in support of Full Rate Production (FRP). Delivery orders will be awarded based on a competitive basis, facilitating cost reduction and performance increase among vendors.

Vendors for the Handheld IDIQ contract are Harris Radio Corp (Rochester, NY) and Thales Communications (Clarksburg, MD). Quantities shown may be split if multiple vendors qualify for award.

| ID Code (A=Service Ready, B=Not Service Ready) :                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                            |                                                                                     | MDAP/MAIS Code: |                                                        |             |               |
| <p>Recurring Manufacturing: This includes Manpack (MP) Radios, A-kits, and hardware ancillaries. FY2022 through FY2024 the MP (B95007) funding line also supported Air Ground Networking Radio (AGNR) procurements. The unit cost increase in FY26 is due to limited funding capacity for production, resulting in lesser quantities at higher lot pricing. Additionally, the program office needs to procure more mounted configurations, included in recurring manufacturing, in coordination with the Army fielding priorities.</p> <p>Non-recurring Cost: Vehicle integration NRE, Mobile User Objective System (MUOS) software integration, Warrior Robust Enhanced Network (WREN)/TSM certification and licenses, MP battery study, depot level maintenance repair manual evaluation, depot level tooling setup, TS-4549 Test Sets.</p> <p>Data Costs: Radio vendor Services and Contractor Data Requirements List (CDRL) contractual costs outside of hardware and warranty, maintenance and repair logistics documentation, data escrow costs.</p> <p>Fielding Costs: Warranties, Contractor Logistics Support (CLS) Labor, Tobyhanna Army Depot (TYAD), Regional Support Center (RSC), and initial consumables costs. Phase 2 of TYAD transition was funded with FY 2024 and captures those depot level repairables associated with TYAD transition to sustainment. The reduction in FY2026 is driven by a realignment of costs to New Equipment Training cost category.</p> <p>Initial Spares: Initial spare components, assemblies, and subassemblies to support end item fielding, with stock going to ILS-C to build HW spare stock levels. Previously procured end-items were prioritized for fielding requirements. The program office plans to begin building spares stock in FY2026.</p> <p>NET: (New Equipment Training Cost) For MP includes Operator and maintainer level NET training, radio network planner and operator training, Logistics Assistance Representatives (LARs), Mission Training Center (MTC), Combined Training Centers (JRTC, NTC, JRMC) and TRADOC and helpdesk training. The increase in FY2026 is driven by a realignment of costs from the Fielding cost category.</p> <p>Operational/Site Activation: Installation costs (labor and travel) for mounted platforms in coordination with the Army fielding priorities. As vehicle NRE efforts begin to close out, the program office's vehicle installation efforts increase to meet required fieldings.</p> <p>Systems Engineering Costs: Recurring costs for Matrix Government and SETA contract labor for system management and control, and PMO travel and MP radio vendor prime contractor SEPM costs.</p> <p>System Technical Support (STS) Costs: Recurring costs for Manpack Radio Post Deployment Software Support and sustainment support. Increased costs represent field software support.</p> <p>Systems Test and Evaluation: Includes costs for Unified Lab for Tactical Radios - Army (ULTR-A) laboratory in support of MP.</p> |                            |                                                                                     |                 |                                                        |             |               |
