

**Revision Date:** 16 November 2020

**Name of Product:** OASA(FM&C) Internet

**Contact Info:** usarmy.pentagon.hqda-asa-fm.list.webmaster-mailbox@mail.mil

**Summary Table  
Voluntary Product Accessibility Template**

<b>Criteria</b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
Section 1194.21 Software Applications and Operating Systems	Please refer to the section details.	
Section 1194.22 Web-based internet information and applications	Please refer to the section details.	
Section 1194.23 Telecommunications Products	Not Applicable	OASA(FM&C) Internet does not support telecommunications products.
Section 1194.24 Video and Multi-media Products	Please refer to the section details.	
Section 1194.25 Self-Contained, Closed Products	Not Applicable	OASA(FM&C) Internet is not a self-contained product.
Section 1194.26 Desktop and Portable Computers	Not Applicable	OASA(FM&C) Internet is software as defined under section 1194.21.
Section 1194.31 Functional Performance Criteria	Please refer to the section details.	
Section 1194.41 (a) Information, Documentation and Support	Please refer to the section details.	

**Section 1194.21 Software Applications and Operating Systems - Detail  
Voluntary Product Accessibility Template**

Criteria	Supporting Features	Remarks and explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	<b>Supported</b>	
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	<b>Supported</b>	
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	<b>Supported</b>	
(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.	<b>Supported</b>	
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	<b>Supported</b>	
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	<b>Supported</b>	

<b>Criteria</b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	<b>Supported</b>	
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	<b>Supported</b>	
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	<b>Supported</b>	
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	<b>Supported</b>	
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	<b>Supported</b>	
(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	<b>Supported</b>	

**Section 1194.22 Web-based Internet information and applications - Detail**  
**Voluntary Product Accessibility Template**

<b>Criteria</b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	<b>Supported</b>	
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	<b>Not applicable</b>	
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	<b>Supported</b>	
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	<b>Supported</b>	

Criteria	Supporting Features	Remarks and explanations
(e) Redundant text links shall be provided for each active region of a server-side image map.	<b>Supported</b>	
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	<b>Supported</b>	
(g) Row and column headers shall be identified for data tables.	<b>Supported</b>	
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	<b>Supported</b>	
(i) Frames shall be titled with text that facilitates frame identification and navigation	<b>Not applicable</b>	
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	<b>Supported</b>	
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	<b>Supported</b>	
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	<b>Not applicable</b>	
(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).	<b>Not applicable</b>	
(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	<b>Supported</b>	

<b>Criteria</b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(o) A method shall be provided that permits users to skip repetitive navigation links.	<b>Supported</b>	
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	<b>Supported</b>	

**Section 1194.24 Video and Multi-media Products- Detail**  
**Voluntary Product Accessibility Template**

<b>Criteria</b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) All analog television displays 13 inches and larger, and computer equipment that includes analog television receiver or display circuitry, shall be equipped with caption decoder circuitry which appropriately receives, decodes, and displays closed captions from broadcast, cable, videotape, and DVD signals. As soon as practicable, but not later than July 1, 2002, widescreen digital television (DTV) displays measuring at least 7.8 inches vertically, DTV sets with conventional displays measuring at least 13 inches vertically, and stand-alone DTV tuners, whether or not they are marketed with display screens, and computer equipment that includes DTV receiver or display circuitry, shall be equipped with caption decoder circuitry which appropriately receives, decodes, and displays closed captions from broadcast, cable, videotape, and DVD signals.	<b>Not Applicable</b>	Television equipment is not in the scope of this program
(b) Television tuners, including tuner cards for use in computers, shall be equipped with secondary audio program playback circuitry.	<b>Not Applicable</b>	Television tuners are not in the scope of this program.
(c) All training and informational video and multimedia productions which support the agency's mission, regardless of format, that contain speech or other audio information necessary for the comprehension of the content, shall be open or closed captioned.	<b>Supported</b>	All available audio files have transcripts available
(d) All training and informational video and multimedia productions which support the agency's mission, regardless of format, that contain visual information necessary for the comprehension of the content, shall be audio described	<b>Not Applicable</b>	No video content exists on the OASA(FM&C) Internet
(e) Display or presentation of alternate text presentation or audio descriptions shall be user-selectable unless permanent.	<b>Not Applicable</b>	All presentation is permanent

**Section 1194.31 Functional Performance Criteria -Detail  
Voluntary Product Accessibility Template**

<b>Criteria</b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	<b>Supported</b>	
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	<b>Supported</b>	
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided	<b>Supported</b>	
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	<b>Not Applicable</b>	No video content exists on the OASA(FM&C) Internet
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	<b>Not Applicable</b>	<b>OASA(FM&amp;C) Internet</b> does not require speech.
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	<b>Not Applicable</b>	<b>OASA(FM&amp;C) Internet</b> supports operating system tools and other assistive technologies such as JAWS

**Section 1194.41 Information, Documentation, and Support - Detail  
Voluntary Product Accessibility Template**

<b>Criteria</b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
Section 1194.41 (a) Product Support Documentation provided to end-users shall be made available in alternate	<b>Supported</b>	

formats upon request, at no additional charge.		
Section 1194.41 (b) Accessibility and Compatibility Features. End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	<b>Supported</b>	
1194.41 (c) Support Services for products shall accommodate the communication needs of end-users with disabilities.	<b>Supported</b>
