

LOE 4

Enhance and Embrace Essential FM Systems

This fiscal year, we are focused on fostering a robust two-way feedback loop with our users by strengthening our strategic communications and governance, tracking inbound issues and improving our systems. By cultivating a customer-first mindset, we are leveraging modern technologies to reimagine an auditable and transparent PPBE process through:

- Improved completeness and accuracy of financial data to inform financial and operational decisions
- Modernized financial and data management processes, to achieve efficiencies and a sustainable, favorable audit opinion

EXPLORE THE ART OF THE POSSIBLE

Robotic Process Automation (RPA)
